Poly teams dominate at Mustang Stampede

By Lori Cheeseman
Staff Writer

Despite a lower-than-average turnout at the Mustang Stampede this weekend, Cal Poly's rodeo team beat the heat and dominated the events.

The Cal Poly women's rodeo team placed first, with Julie Adair, an agricultural business junior, winning two of the three events and the women's sophomore, won the third event, breakaway team beat the heat and dominated the events.

Mustang Stampede this weekend. Cal Poly's rodeo lost to West Hills College by 10 points.

bareback riding, Jimmy Stickler took the calf-roping event, and David Dodson placed first in steer wrestling. Levi Grantham placed first in our traditional weekend."

Overall, it was a terrific weekend for our rodeo team," said Rodeo Coach Clay Robinson. "We took a killing as far as the numbers attending, but some of them might become reality in the near future."

The new proposal calls for Poly to cut $9 million from its budget by June 15. The cuts will be made by trimming instructional programs, according to Director of Public Affairs Stan Bernstein. All seven schools in the university are likely to be affected.

While it hasn't been determined exactly where the cuts will be, many people agree they will have a significant affect on the future of Cal Poly.

Despite the severity of the cuts, the idea of not holding summer school this year was labeled as "crazy" by Vice President of Academic Affairs Robert Koob.

"That was never even considered as a killing as far as the numbers attending, but some of them might become reality in the near future."

Koob also denied rumors about halting construction. He noted that funding for projects currently under construction was approved as much as eight years ago and has nothing to do with the current budget. "The rumors are a typical reaction to the budget cuts," said Koob, "but they are somewhat naive."
LETTERS TO THE EDITOR

Burris clears up 'misinformation'

As an ASI executive officer and a resident with over years of experience in ASI, I feel obligated to clear up some of the misinformation in the Monday article "ASI delays approval election while investigation continues." I was particularly appalled at the information given about the second complaint.

It was stated that the second complaint was because "he (Kapic) was calling friends on the night before elections, after the deadline, and asking them to vote for him." The complaint was virtually because campaign workers for Kapic were calling students from the ASI directory randomly and telling them to vote for Kapic. It wasn't done the night before elections, it was done on election days in both elections. I was outraged to read that the elections chairman and advisor had approved this blatant violation of their own campaign rules. It states on page 4, section F of the rules that "active campaigning" is "distribution of specified information about any ASI candidate, written or otherwise." Calling students to tell them to vote for him was definitely under the definition. Active campaigning is not allowed on the campus. This is a corporation serving the needs of students, we have a duty to follow up every complaint — whether the person following it up believes it's valid or not.

I think it is important to note that Kapic did not make any of the calls according to the complaint, and I think it is unfair in the article to state that he did. The issue at stake is — was it a fair election? And in light of the complaints, that will be decided by the Board of Directors. I encourage any students with opinions on this matter to attend our meeting Wednesday at 7 p.m. in U.U. 220.

Franklin Burris
ASI executive vp

**Bush returns to work with heart medication**

WASHINGTON (AP) — Wearing a wide grin, President Bush returned to work in the Oval Office on Monday as his heart resumed a normal rhythm under medication. "It's great to be back," he said after two nights in the hospital.

The success of the drug therapy allowed doctors to shelve plans to use an electrical shock procedure to make Bush's heart beat normally. The procedure would have required Bush to be put under a general anesthetic and to temporarily transfer power to Vice President Dan Quayle.

Bush's doctors recommended that he curtail his rigorous fitness regimen for a week or so while they fine-tune the drug dosages needed to keep his heartbeat stable. But they said Bush can resume his normal business schedule, and he went ahead with his appointments, including a meeting with former Soviet Foreign Minister Eduard Shevardnadze.

**Discovery lands after SDI research mission**

CAPE CANAVERAL, Fla. (AP) — Discovery and its seven astronauts returned to earth safely Monday from a long "Star Wars" research mission, landing in Florida because of high wind at the main shuttle touchdown site.

The spaceship glided through a slightly cloudy sky and touched down at 2:55 p.m. mission control's Ken Bowersox told the Associated Press: "Welcome back to sunny Florida, and congratulations on an outstanding mission."

Bowersox Mission Control's Ken Bowersox told the Associated Press: "Welcome back to sunny Florida, and congratulations on an outstanding mission."

**Ex-judge to determine course of Buckey suit**

LOS ANGELES (AP) — A retired judge will decide whether Raymond Buckey's $20 million wrongful prosecution suit in the McMartin Preschool molestation case should proceed.

Lawyers for the parties agreed Friday that retired appellate court justices Campbell Lucas should rule on a defense motion to dismiss the suit. The move was designed to avoid expected delays in Superior Court Judge William Burby's courtroom.

The rent-a-judge agreement was dissolved in Burby's court Monday. If the case goes to trial, it will return to Burby's courtroom.

Last August, Buckey filed the $20 million suit against Los Angeles County, former prosecutors, the city of Manhattan Beach and others.

Man pleads innocent in AIDS assault case

OAKLAND, Calif. (AP) — A man pleaded innocent Monday to assault charges stemming from allegations he raped one woman and had sex with another in a deliberate attempt to infect them with the AIDS virus.

William Lucas Barker, a 25-year-old ex-con, remained jailed in lieu of $200,000 bail after entering the plea before Superior Court Judge Larry Goodman.

Goodman scheduled a May 22 hearing for further proceedings in the case.

**Travel counselor gives tips to see the 'real' Europe**

By Cindy Lee

Staff Writer

Have you ever dreamed of going to Paris or London? Maybe you thought it would be too expensive or didn't know where to stay or what to do once you got there. This just might be your lucky day.

Tim McWilliams, an advisor at the ASI Travel Center, has put together an exciting and affordable excursion to London and Paris with a short stop in Wales.

McWilliams said finding a place to stay in London is the perfect way to begin your adventure. He suggests trying to make a reservation at a private youth hostel before you leave home. This may not always work, but McWilliams said it is fairly easy to get into a youth hostel once you arrive.

A private hostel is a little more expensive than other hostels — they cost about $15 a night.

By Cindy Lee

Staff Writer

Have you ever dreamed of going to Paris or London? Maybe you thought it would be too expensive or didn't know where to stay or what to do once you got there. This just might be your lucky day.

Tim McWilliams, an advisor at the ASI Travel Center, has put together an exciting and affordable excursion to London and Paris with a short stop in Wales.

McWilliams said finding a place to stay in London is the perfect way to begin your adventure. He suggests trying to make a reservation at a private youth hostel before you leave home. This may not always work, but McWilliams said it is fairly easy to get into a youth hostel once you arrive.

A private hostel is a little more expensive than other hostels — they cost about $15 a night.
TRAVEL

From page 3 to 85 per night — but this is not to be thought of as a "free" trip. McWilliams recommends London's Highgate Hostel. It is nice and clean and costs about 85 per night. If you can't get into Highgate, you may want to refer to what experienced travelers call the "Bible of the student traveler," or the "Let's Go Europe" tourguide, written by Harvard Student Agencies and published by St. Martin's Press. This tourguide lists hostels, railways and sights in Europe. The tourguide comes in other editions for every region of Europe.

The Michelin Guide is another helpful guide to the sights. Now that you are settled in, McWilliams suggests you spend the first few days walking around and going to museums. "There's history everywhere you turn," he said.

Get familiar with London and its people. Above all, McWilliams says, "don't be afraid to talk to the people."

In Paris, it is a good idea to buy a rail pass, he said. For about 800, the rail pass allows you five days of travel on the Metro within a 15-day period.

On the fourth day, McWilliams suggests a train trip to Wales. This is a two- or three-hour trip from London's Victoria Station.

In Wales, McWilliams suggests you find the tourism board, a bulletin board with information for travelers. He said you can find a tourism board in the center of every town.

By using the tourism board, you can choose a city in which to spend a couple of days. McWilliams suggests Llantwit Major, where you can stay in a hostel which has been converted from an old home. Here you can stay in your own bedroom for about 84, breakfast included.

McWilliams suggests the sixth night be spent in London. The seventh day, you can use your rail pass to Dover and catch the ferry to Calais. The ferry is 85 and takes about an hour.

From Calais, you can take the train to Paris. McWilliams said you should spend five nights and days here.

When you get to Paris, finding a good place to stay is a must. You can stay in a youth hostel in a suburb right outside of Paris for about 6 per night.

Some of the sights to see while in Paris include:

- The Louvre (plan on an entire day)
- The Eiffel Tower
- A few of the smaller museums 15-21:00
- Notre Dame
- Take a boat ride on the river Seine
- The Place Du Concorde (shopping at Cartier, Gucci, etc.)

McWilliams suggests taking day trips out of Paris to use the rest of your rail pass. You can go shopping and get a taste of the countryside at the tours and tasting are usually free.

The Sacre-Coeur is a famous church. McWilliams suggests visiting. Catch the Metro to the base of the church and hike up to the top, where you'll find an incredible view of Paris, he said. Another day can be spent walking the town in Versailles. Take the tour of the hall of mirrors and spend the afternoon walking the gardens.

Nights in Paris can be spent at the Moulin Rouge which features a cabaret, McWilliams said.

Another feature of Paris is its many wine-tasting bars which usually carry lots of off wines.

The Champ d'Elysees, which McWilliams said is bustling at night and packed with cafes, movie theaters and shopping malls is an exciting place to hang out.

McWilliams said an important part of preparing for your trip is deciding what kind of luggage to take.

"You want to be mobile," he said. "No big suitcases." He sug­gests an internal frame backpack or easy travel.

For discounts while you travel, you can get an interna­tional student identification card which is available at the Travel Center. The card will save you 10 to 60 percent at museums and on airplanes.

For more information about planning your travels, stop by the Travel Center in the U.U. See Tim or Elise or call them at 544-9442.

NATION

20th ANNIVERSARY

The Hofbrau is celebrating its 20th anniversary and wants to thank everyone for their many years of support. We want to show our appreciation with a celebration for the next 8 months. Nights prices and a grand prize in November. We thank you.

Editors Wanted

For the 1991-92 Mustang Daily

Editorial Staff

Applications are now being accepted for:
Managing Editor
City Editor
Opinion Editor
Sports Editor
Insight Editor
Illustrator
Arts and Entertainment Editor

Applicants do not have to be journalism majors but must possess writing, copy editing and management skills. Positions are paid and begin fall quarter.

Send a letter of interest stating position wanted, a resume and clips to Jason Foster at Mustang Daily, Graphic Arts 226. Questions? Call 756-1143.

DEADLINE TO APPLY IS 5 p.m. MAY 13.
**Canoe events are ‘concrete’ success**

By Tracey Adams
Staff Writer

The Mid Pacific Conference, otherwise known as Concrete Canoe Weekend, ended with a big splash Sunday at Laguna Lake.

Eleven concrete canoes slid into the lake racing and maneuvering around buoys. UC Berkeley took first place in all four events — men's 200-meter, women's 200-meter, a 200-meter road race and a 350-meter, coed endurance competition. UC Berkeley now will go on to a national competition.

Cal Poly's highest finish at the event was the men's 200-meter team's fourth place.

The conference is a function of the Associated Students of Civil Engineering (ASCE), although Cal Poly's Associated Students of Construction Management (ASCM) has been invited to the competition for the last five years.

Brad Oldenbrook, president of ASCM and a construction management senior, said, "Besides just to have a lot of fun, the conference in mainly to choose one school and their concrete canoe as a winner and send them on to nationals."

**WORLD**

From page 3

With the case, the government said the killing was an isolated incident.

The protests have created the worst political crisis yet for the government of President Roh Tae-Woo, in power since 1988.

The five indicted policemen belonged to a controversial plainclothes police unit. They are accused in the beating death of Kang Kyung-dae, a 20-year-old freshman at Seoul's Myongji University, during an antigovernment demonstration on April 26.

Kang's body remained under 24-hour guard at a hospital morgue. Protesters said they would not bury the body until the government accepts their demands, including the firing of the entire Cabinet.

The killing caused an outburst of political passions. Three students set themselves on fire to protest police brutality and two of them died. Thousands of students, workers and dissidents have demonstrated almost daily the past week.

The North Korean remarks were seen as observers in the United States as a political attack on South Korea.

From page 1
the University Teacher Center for Education, began the day's entertainment by singing in Spanish and playing his guitar.

Sanchez reflected, in Spanish, on the importance of the celebra-

tion by stressing the need to ke-

tain intact the Latino culture

and history, without which the Mexican identity would cease to

exist.

Following him, the dancers brought a mystical feeling to the
day, performing to the rhythms of a stage-side drum and the

melodies of a distant flute.

Green ribbons, bright makeup

green and white fluffy
dress distinguished Kristi

Esqueda, a freshman business

major, from the crowd.

Esqueda is a dancer for the

newly-formed Mexican dance

group on campus, which has

about 30 performers.

"The dances we do are very

romantic, flirty and are

centered around courtship," Esqueda said.

Esqueda said she joined the

group to explore her own cultural

background.

"Because we (ethnic

minorities) are so spread out on
campus, this is one way we can

bond and show pride in our cul-
ture," she said.

Esqueda dances "la negra

Joliet," a style of dance that
romanticizes "machismo" and is

characterized by colorful dresses

and lively routines, said Laura

Torres, a Cal Poly student who

volunteers her time to teach

"dalcino" to the Poly dance group.

M.E.CH.A. Vice President

Mardonio Reyna, who also

danced the "Dalcino," said he en-

joys coming together with other

Mexican-American students.

Without the group, Reyna, a

business administration

sophomore, thought he would

have dropped out in his first

quarter.

"I didn't feel comfortable, I

missed the food, the people," said

Reyna, who comes from a

Bakersfield high school that is 79

percent Hispanic.

He said that his experience is

similar to many other Mexican-

American students on campus.

The feeling of community

seemed to characterize the crowd

assembled around the stage
decorated with red, green and

white paper flowers and ribbons.

Political science sophomore

Pedro Arroyo, who coordinated

much of the day's events, intro-

duced the drama performances

and said, "I hope this is not going
to be a one-time thing. I think it

would be beautiful to have a Mexi-
can "teatro" at Cal Poly."

Cal Poly does not have a for-

tural Mexican theater group, al-

though those involved in Sun-

day's performance expressed a

desire to continue performing, said Arroyo.

The two plays performed were

"Los Vendidos" and "El Soldado Razo."

written by playwright Luis Valdez. Valdez is best

known for his play "Zoot Suit"
and the film "La Bamba."

In "Los Vendidos," which

means "The Sellout," four

stereotyped "modelos" Mexicans

stood on stage ready to be pur-

chased by a representative from

the U.S. government for an un-
specified purpose.

Valdez worked with the idea

that the United States is only in-

terested in a "baken Hispanic,"

one that is acceptable to U.S. tas-
tes, said Gloria Velasquez, a

Foreign Languages and Litera-
tures Department professor.

"El Soldado Razo" addressed

the plight of the Mexican-

American students in the Vietnam

war.

Sprawled on the lawn was

ASI President Adam Taylor, who

said, "I hope this is not going
to be a one-time thing. I think it

would be beautiful to have a Mexi-
can "teatro" at Cal Poly."

Martinez said that the Cinco

de Mayo fiesta would inspire

much of the singing and intro-
ductions to the dance and drama

performances where in Spanish.

As darkness began to fall over

Dexter Lawn, the crowd tapered

down to a smaller and more per-

sonal group. Dancers invited

those who wished to learn a

dance routine to come on stage.

Soon a circle of giggling parents,

students and children framed the

stage.

Martinez was happy to wit-

ness the closeness of the people

on stage. "This is very fulfilling
to see, since I helped in recruit-
ing many of the dancers you see

up there," Martinez said. He said

he worked with many of the stu-

dents when they were in high

school or community colleges in

an effort to bring them to Cal Poly.

Martinez said that the Cinco

de Mayo fiesta would inspire

similar cultural events in the fu-

ture.

"There are going to be spinoffs

from this," he said.

Nissan M. V. King Cab 4x4

Optional equipment shown

Want to make a big impression?

Get behind the wheel of a Nissan 4x4. It's mean, powerful and it has the largest factory-available tires of any leading compact truck.

And speaking of size, this truck comes with a 30-liter, V6 engine. It also has one of the largest cargo volumes of any leading compact truck. So you can carry lots of stuff like a sofa, A year's laundry. Whatever.

Everyone needs a set of wheels. And the Nissan truck is for those whose needs are bigger than others.

Marger generally will not make a baby

but they always want their own

children.
San Luis Obispo residents learn at fair methods to conserve water

By Gabrielle Friedly

Water is essential to everyday life. And because San Luis Obispo residents have faced drought for the last five years, they know the value of each drop.

Residents asked questions and learned ways to help save water Saturday at the Fifth Annual Water Conservation Fair in the Mission Plaza. The fair was sponsored by the Central Coast Water Conservation Council.

Ben Munds, San Luis Obispo water conservation coordinator, said, "Each year the fair has gotten better. This year the Mission was filled with booths on various ways to help save water."

In 1987, California officials saw the need to designate a week to the whole month of May, "to observe the importance of water," Munds said. "Each year the fair has gotten better. This year the Mission was filled with booths on various ways to help save water."

Since the drought began, residents have become more cautious about water usage and are eager to learn more about conservation.

"We've been through a very frustrating time," Munds said, "and I don't think residents will go completely back to their old habits.

"If you have a standard faucet, you are charged if you go over the allotted amount as to how much water is used.

"Once you get used to it, it's like brushing your teeth, it comes naturally," Munds said.

"He said it is good to start children conserving at a young age. "Do a child, it is like a toy (the aerator), but to mom and dad, it means saving water," he said.

"In addition to the aerator, a low-flow shower head is also an excellent way to save water," Munds said. "Less water comes out of the shower head," he said.

For students on a budget who do not want to spend extra money on devices to save water, there is an alternative.

Shelley Stevens, with Foods Department, showed visitors information they have to conserve water, particularly in irrigation and shower use.

"Individuals who use water on campus do pay directly for the Family," suggests dropping a water-filled container or brick into the toilet tank. "This lowers the water level."

Hilda Shetler, owner of the Central Coast Greypress Systems, said water conservation is fall a matter of breaking bad habits.

Resource Conservation District Director Gary Kunkel said Cal Poly students and faculty should be more cautious about conserving water.

"The student body should be encouraged to use the valuable information they have to conserve water, particularly in irrigation and shower use."

"As proven with thousands of other communities, people use a resource most wisely when they see WATER," Hilda Shetler said conservation is a matter of "breaking bad habits."
Environmental Job Fair opens new career field

By Karen Travis
Staff Writer

Students concerned about finding a job after graduation may find what they are looking for at the Environmental Career Fair on Wednesday, May 8.

The career fair, sponsored by the Society of Environmental Engineers (SENVE), will be open from 10 a.m. to 3 p.m. in Chumash Auditorium to anyone interested in the environmental field.

SENVE President Mike Moran said the nonprofit university club organized the event to provide more job opportunities for students.

"The fair will be a good place to make initial contacts with participating businesses," Moran said. "Although they probably won't be conducting on-site interviews, interested students can bring resumes."

Moran said even though the field of environmental engineering is steadily growing at Cal Poly, few environmental companies come here to recruit. "The Environmental Job Fair was created to solve this problem," Moran said. "Cal Poly graduates have such a diverse background. Environmental companies would definitely have an advantage in recruiting here."

Sam Vigil, environmental engineering professor and adviser for the event, said the fair will also benefit the community.

"A lot of people think there is no solution to environmental problems," Vigil said. "The fair will act as an educational forum for the general public." "Concerned citizens can talk with firms and state agencies involved in finding a solution to these problems."

Vigil said the fair will eventually become a symposium with on-site interviews, interested students can bring resumes.
