Two Poly administrators will retire in September

By Jim Schmidt Staff Writer

Two Cal Poly administrators with 85 years of combined experience have recently announced their retirements.

Executive Dean of Facilities Administration Douglas Gerard and Vice President for Business Affairs James R. Landreth will leave Cal Poly on Sept. 28.

With Cal Poly's budget about to be cut, speculation is that the two offices will be merged into a single unit to create efficiency, said Executive Assistant to the President Howard West.

It is currently under consideration and review although the timing has not been finalized. A decision in regards to the structure may happen in the next month," he said.

Gerard will be retiring after nearly 40 years of service to Cal Poly. He has been in charge of fiscal operations, budget planning, procurement/support services, public safety and housing and conference services.

During his career at Cal Poly, Gerard has been involved with the construction of all but six or seven buildings on campus since 1961. The cost of campus construction during his career is in excess of $200 million.

"It is an appropriate time for me to leave as things are going to be slowing down due to budget restraints," Gerard said. "Considerations will need to be made on campus growth that will take three or four years to study. It is a good time for a new person to step in to carry the program through," he said.

Gerard said that he will be making more than his current salary of $85,752 once he retires. Because of his many years at Cal Poly, he will receive about $90,000 per year from a California State University retirement fund.

Landreth will leave Cal Poly after 35 years of service. As vice president for Business Affairs, Landreth has been in charge of fiscal operations, budget planning, procurement/support services, public safety and housing and conference services.

Landreth also worked at Cal Poly Pomona from 1959 to 1962.

Landreth said that his stipend from the CSU retirement fund will be slightly less than his current salary of $96,500.

Gerard and Landreth plan to stay in San Luis Obispo after retiring. They also said they would continue to offer their services to Cal Poly on a volunteer or contractual basis.

La Fiesta celebrates hits streets of San Luis Obispo

By Shea Roberts

Staff Writer

Dancing in the streets with mariachi music and brightly-colored costumes will set the scene for San Luis Obispo's 51st annual La Fiesta celebration this week.

La Fiesta dates back to a time when the city was a small mission town, one of 21 built by the Spanish padres along California's coast. In 1925, mission pastor Father Daniel Keenan resurrected the traditional Spanish fiesta, using the proceeds to store the deteriorating mission.

This year's theme is La Fiesta de Nuestra Herencia or The Celebration of Our Heritage.

La Fiesta directly and has been a supporter of more than 20 years. He has served on the Board of Directors and is a former El Presidente.

The position of La Presidenta is awarded to a member of the community who has exhibited dedication to the La Fiesta celebration, according to Jenny Mathis, promotions sales director. Wilcox has been involved with the festival for 17 years, contributing significantly to the parade and queen contest.

The position of La Presidenta is awarded to a member of the community who has exhibited dedication to the La Fiesta celebration, according to Jenny Mathis, promotions sales director. Wilcox has been involved with the festival for 17 years, contributing significantly to the parade and queen contest.

La Presidenta will be one of the key figures in La Fiesta, 'catching' rays in the streets and encouraging everyone to enjoy the annual La Fiesta celebration this week.

Thrill-seeking grad is a real life 'Indiana Jones'

School of Engineering Dean Peter Lee said Morrison has lived most of his life as an adventurer.

Some of his experiences include a transatlantic crossing by sail on a 100-year-old, 125-foot-long Balder Tidore and a year at Anadolsk-Scott South Pole Station, Antarctica, as a facilities engineer.

Morrison's favorite expedition was crossing the Drake Passage at the southern tip of Chile in a rowboat.

"It was a 14-day crossing of a 625-mile body of water that is considered the roughest ocean in the world," Morrison said.

He and three others crossed the ocean in a self-designed, self-built, four-man rowboat.

A taste of summer...

Three Cal Poly peer health educators give suggestions for taking advantage of summer's nutritious fruits and vegetables.

In Sports Monday:

The Cal Poly baseball team swept three games from Cal State Dominguez Hills and clinched at least a tie for first place in the CCAA.

Tuesday's weather:

Sunny.

Highs: 60-70

Lows: 50s

w/nw winds 10-20 mph

4 ft. seas: nw swells 8 ft.
Letters to the Editor

After reading the May 9 article about Delta Sigma Theta, we wondered why there was even the slightest mention made about the other African American sororities existing at Cal Poly.

As members of the first African American sorority, Alpha Kappa Alpha Sorority Inc., we were not only surprised to see mention of our organization in the article, but were even more surprised to see that again "someone" had their facts mixed up.

Alpha Kappa Alpha Sorority, Inc. was founded in 1908 and established a chapter, Lambda Xi, at Cal Poly on May 21, 1977. After being declared inactive in the late 1980s, there has been a relin­quish of Alpha Kappa Alpha activities at Cal Poly.

There are seven Alpha Kappa Alpha women here at Cal Poly who have been working hard to maintain the high standards that Alpha Kappa Alpha women are known for.

As the source of information about Alpha Kappa Alpha Sorority Inc., I would suggest that only AKA women know AKA business.

Therefore, please check with our organization in the ar­eas of academics, campus activities, and leadership. We are the betterment of the African American community at Cal Poly.

Bowling alley needs leadership

It is nice to see that the U.U. management is finally advertising the Games Area Manager position, although three years after the initia­tive measure to reopen the bowling alley passed.

In August 1988, the ASI ticketing manager was trans­ferred to the Games Area Manager position. When he resigned in May 1989, U.U. management said it would ad­vertise fall quarter to hire a new interim. Instead, the ASI director hired a graduate student at the Student Services Professional level in January 1990 without advertising. The latter completed the work for his degree, and his position was extended until June 30, 1991. He resigned in January.

The bowling alley has been mismanaged long enough. It is time to hire someone who knows how to run a bowling alley. It is important to hire someone who knows how to fix the pin pointers, so we can have the use of the machines and income generated by them.

Affirmative action teaches people to help themselves

By Glenn G. Galang

Hearing recent arguments against affir­mative action scares me because it sets up emo­tions for many people who feel that they or people they know have been affected negatively because of it. This leads them to believe that the underrepresented students on campus are here because of unfair "favoritism" and their eth­nicities which perpetuates the "us vs. them" at­titude.

Affirmative action is often misunderstood. On the surface, its goals at educational institutions are to create a student population whose eth­nicity, gender, economic status and other charac­teristics reflect that of the entire state of Califor­nia. Many people on the other side see this as "reverse discrimination." This may be true if ra­cial equality already exists in our society and if underrepresented people were not historically oppressed and excluded from participating in this society. Unfortunately, reality has op­pressed ethnic minorities, and racial equality still does not exist. Affirmative action is a form of offsetting these harsh realities.

Let us take a look at another point of view. If these students who are admitted through the aid of affirmative action are "inferior," why are many of them still here? They should have flunked out long ago. Besides, many factors go into the dropout rates of all students.

One main factor that keeps students from doing well is the social factor. Many students of underrepresented ethnicities who drop out do so because of the lack of feeling that they belong or are here welcome at Cal Poly. Many pursue their studies at other universities where they feel more comfortable.

I admit that many students who are aided by affirmative action are not all academically prepared for the rigors of Cal Poly, but that is their fault! That is why there are programs on campus to support those students, including the Minority Engineering Program, Student Academic Services, Disabled Student Services and Summer Institute, as well as the many cul­

clubs on campus who provide welcoming and supporting academic, social, and cultural atmos­pheres such as SHPE, PCE, MECHA, AASU, OMA, HIBs and more. However, funding for cer­tain programs has been decreasing which makes it more difficult for these organizations to help students achieve academic success.

We all agree that education should be im­proved starting at the primary and secondary levels, but until all the public California schools receive equal funding, what is going to happen to all the students currently enrolled in different elementary and high schools? Are we going to deny them the proper education that they fully deserve but have been deprived of? Their parents are taxpayers also and this university is a public institution. Everyone who wants an education to better himself should be given that chance.

Many say that the community colleges are the place for those students who are not yet ready for real universities. That would be fine if the community colleges had the adequate fund­ing to provide their students with proper educa­tion and counseling. However, they don't which is why only 5 percent of community college stu­dents go on to four-year universities. If we say that their place is in the community colleges, we are perpetuating the educational and economic barriers that exist between people of different racial and economic backgrounds. This will hurt society in the long run because society will then have a population of undereducated people who will be dependent on welfare in order to survive. Who is providing this welfare? We are.

The ultimate goal of affirmative action is to help people help themselves so that they will be­come more self-sufficient. All they need is that extraudge. If we don't support affirmative ac­tion programs, we are ultimately hurting oursel­ves.

Glenn G. Galang is a electronics junior.
Abortion figures jump after Romania lifts ban

BUCHAREST, Romania (AP) — Nearly 1 million abortions were performed in Romania in 1990, the year after a ban was lifted following the ouster of Communist dictator Nicolae Ceausescu, health experts say.

That amounts to three abortions for every birth, the officials said Saturday.

Speaking at a two-day conference on sex education, the Romanian health experts said the government would try to reduce the number of abortions by sharply raising the fee, and by introducing sex education in schools.

Ceausescu was obsessed with increasing Romania's population of 23 million. During his regime, contraception was unknown and abortion, with few exceptions, was prohibited.

Baker: Saudi interest in peace talks is key

WASHINGTON (AP) — Agreement by Saudi Arabia and its allies to join Mideast peace talks may be the spark the United States needs to jumpstart its economic agenda, including free trade with Mexico and a cut in the capital gains tax, that offers “every American ... a fair chance to pursue his or her destiny.”

“I urge the Congress to vigorously fight discrimination and said it shared stake in everyone else’s success.”

“California is scaring the pants off Philip Morris and R.J. Reynolds,” said anti-smoking activist Julia Carol. “We’re kicking their butts out of the state.”

Nearly half of the approximately 120 local government anti-smoking laws in the United States have been in California, something that is not lost on the industry.

Activists credit the strong campaign to passage of a tax on cigarettes that funds an anti-smoking campaign, new studies on the danger of secondhand smoke and a strategy of fighting local anti-smoking battles.

Air pollution increases death rate, experts say

ANAHEIM, Calif. (AP) — Exposure to air pollution in American cities accounts for 60,000 deaths annually and increases the risk of death among the elderly and people with lung and heart diseases, researchers said Sunday.

“If we as a nation can focus on reducing emissions, we can save more lives and taxpayers money than with any other single effort to reduce toxic exposure in the environment,” said Dr. Douglas Dockery, associate professor of environmental epidemiology at the Harvard School of Public Health.

Dockery studied air pollution and causes of death for the years 1973-1980. Results were presented Sunday at the American Lung Association International Conference.

Anti-smoking efforts going strong in state

SAN FRANCISCO (AP) — A statewide anti-smoking movement — funded by smokers since 1989 — is gaining momentum, activists say.

“Sensational is scaring the pants off Philip Morris and R.J. Reynolds,” said anti-smoking activist Julia Carol. “We’re kicking their butts out of the state.”

Nearly half of the approximately 120 local government anti-smoking laws in the United States have been in California, something that is not lost on the industry.

Grads protest Bush’s vows about civil rights

HAMPTON, Va. (AP) — President Bush vowed to black college graduates on Sunday to step up the war on poverty, to vigorously fight discrimination and said it is his economic agenda, including free trade with Mexico and a cut in the capital gains tax, that offers “every American ... a fair chance to pursue his or her destiny.”

Bush drew some murmurs of protest in a commencement address at predominantly-black Hampton University, though he sought to wrap his initiatives in the mantle of civil rights. “They do not divide people along race or class lines,” he said. “They give everyone a shared stake in everyone else’s success.”

Dozens of the 1,003 graduates raised clenched fists at the end of his address, in protest of his veto last fall of a job discrimination bill. Many others sat silently.

Mother charged with murder of invalid son

Davenport, Iowa (AP) — A mother of eight spent Mother’s Day in jail in lieu of $1 million bail after being charged with first-degree murder in the death of her 5-year-old invalid son, who police said had been denied food.

Regina Akright, 35, was arrested Saturday after police found the body of Mark Allen Akright in an upstairs bedroom. The boy had cerebral palsy, was “to­ tally emaciated” and his body weighed less than 10 pounds, said police Lt. Don Schaef­ fer.

Police alleged Ms. Akright, a single mother, with murder of invalid son

HEALTH BEAT
From page 3

Tasting summer fruits. Besides tasting great, they have a lot to offer as far as nutrients are concerned. Strawberries, papaya, kiwi and cantaloupe provide Vitamin C. Peaches, nectarines, plums, cherries, cantaloupe and mangos provide betacarotene (a form of Vitamin A). These vitamins promote healthy skin, teeth, bones and stimulate your immune system. Fruits and vegetables have no cholesterol and are low in calories, fat and sodium.

Other treats of the season are summer vegetables. Artichokes, asparagus, sugar snap peas, green beans, squash and tomatoes are at their very best. They provide nutrients such as betacarotene, Vitamin C and Vitamin B complex and contain fiber which aids digestion and lowering cholesterol levels.

Filling up on fruits and vegetables during the summer will not only help you feel your very best, but will also help you look your best, giving a healthy glow and improved energy. Another benefit is that one third of the water your body needs each day can be supplied by eating fruits and vegetables.

Filling up on fruits and vegetables during the summer will not only help you to feel your very best, but will also help you look your best, giving a healthy glow and improved energy. Another benefit is that one third of the water your body needs each day can be supplied by eating fruits and vegetables.

The California Department of Health Services recommends eating five servings of fruits and vegetables combined per day. One serving equals 1/2 cup fruit juice, or 1/4 cup of dried fruit. By replacing some of your high-fat snacks with fruits and vegetables, you will see the difference that small changes can make.

Small changes now will influence your future health by reducing your risk of developing cancer, hypertension, heart disease and diabetes. Think before you eat! Take charge of your health now by taking advantage of the summer's most refreshing and nutritious treats. And since the weather is definitely getting warmer, why not feel good about yourself when you trade in your winter sweater for a tank top?

ACT NOW! To reserve your one or two bedroom apartment at MURRAY STREET STATION

Murray Street Station has offered students the best in Off-Campus housing for years. Located only minutes from Cal Poly, we offer students:

PROUD SPONSOR OF THE CAL POLY WHEELMEN!!!
Mustangs double up on CCAA

 ■ Mustangs sweep Dominguez Hills

 By Rob Brockmeyer
 Staff Writer

 The last month of the baseball season, three teams have been in first place in the California Collegiate Athletic Association, but none of them has been able to hold on to it. This time, Cal Poly holds the top spot and no one is going to take it away. The Mustangs swept three weekend games from Cal State Dominguez Hills and wrapped up at least a tie for the CCAA title. Cal Poly has won 10 of its last 11 conference games. The wins gave Cal Poly a 18-11 conference record (26-20 overall) and eliminated Dominguez Hills from postseason play. Cal Poly Pomona (18-12) dropped out of first when it lost two of three weekend games against UC Riverside (17-12). The Highlanders and the Mustangs replayed the washed-out March 15 game on Sunday, but the results were not as exciting as the Wednesday game. Dominican Hills, the Mustangs top two CCAA teams will be Regionals. After Sunday's contest, the top two CCAA teams will be selected to join Sonoma State in the Division II Western Regionals.

 In Friday's game against Dominguez Hills, the Mustangs struck for two runs in the second inning and gave Toro ace Mark Yanase (11-3) an early exit. In the inning, Jared Snyder tagged a two-run home run over the left field wall for his eighth round-tripper of the year. The offense came back for two more runs on four hits in the fourth inning. Joa Rojo and Mike Oakland each had run-scoring singles.

 The runs were more than enough for Mustang starter Dan Cressey (8-4) as he cruised to a 5-3 win. The sophomore sensation scattered seven hits and fanned nine batters en route to his sixth complete game. Cressey finished the regular season with a 2.09 ERA and increased his team-leading strikeout total to 75.

 In the first game of Saturday's twinbill, this year's largest home crowd of about 250 spectators saw a wild affair. Cal Poly led from the start until the Mustangs tied it at 3-3 when they scored two runs in the seventh inning. Starter Jon Ifland loaded the bases on two hits and a walk and handed it to reliever Brad Ledwith to get the final out. But Ledwith's first pitch nailed Steve Whipple and forced in the tying run.

 No score counting until the top of the ninth inning when Will Navarette's RBI ground-out retired the Highlanders. The Mustangs jumped all over Navarette to a 7-3 win. The sophomore catcher golled a pitch high in the air to center field for a sacrifice fly. Then Matt Drake followed with a rope over the drawn-in centerfielder to give Cal Poly a 5-4 win.

 In the series finale, the Mustangs jumped all over the Highlanders and the Mustangs swept three weekend games from Cal State Dominguez Hills and wrapped up at least a tie for the CCAA title. Cal Poly has won 10 of its last 11 conference games. The wins gave Cal Poly a 18-11 conference record (26-20 overall) and eliminated Dominguez Hills from postseason play. Cal Poly Pomona (18-12) dropped out of first when it lost two of three weekend games against UC Riverside (17-12). The Highlanders and the Mustangs replayed the washed-out March 15 game on Sunday, but the results were not as exciting as the Wednesday game.  Mustangs double up on CCAA

 ■ Women's track outscores opponents by more than 100 points.

 By Peter Hartlaub
 Staff Writer

 BAKERSFIELD — After a fast performance at the California Collegiate Athletic Association championships by the Cal Poly men's track team, Bakersfield will never again be known as a slow place where nothing exciting ever happens. "Fast" and "exciting" were definitely the words of the day in Bakersfield this weekend, as the Mustangs scored 200 points and decisively won the conference championship. Placing second was Cal Poly Pomona with 163 points, followed by Cal State Bakersfield and Cal State Los Angeles.

 The biggest sweep of points was in the pole vault as Cal Poly took five of the top six places. Tony Castiglioni and Steve Toney earned automatic bids for nationals. See MEN, page 6.

Championships.

MEN

From page 5
took the top two marks with
vaults of 15-61/4. Brian Thorson,
Eric Pameson and Ed Lasquete
finished 4th, 5th and 6th respect­
ively.
In the 1,500 meters, Jim
Severance (3:52.60) and Erik Ax­
tell (3:54.44) finished first and
second. Axtell ran one of his
strongest races of the season and
finished ahead of two runners
previously ranked higher with
better marks.
In the steeplechase, Lance
Rankin (9:18.02) won the race,
the first of four Cal Poly runners
in the top six. The 5,000 meters
also placed four Mustangs in the
top six.
The 10,000 meters was won
by Matt Hempel (31:19.9). He
was closely followed by Mike
Parrott (31:20.9) and John
Fedoroff (31:41.0).
Other strong showings in­
cluded Thomas McGuirk (1st) in
the 400 meter hurdles, David
Ramirez (2nd) in the triple jump
and Steve Toney (2nd) in the
decathlon.
Another winner worth men­
tion was head coach Tim
Henderson. Henderson was
named the CCAA coach-of-the-
year by the rest of the CCAA
coaches.
The Mustangs will send a few
athletes to Cal State Los Angeles
next weekend, and the national
qualifiers will compete the fol­
lowing weekend at the NCAA
Division II nationals in San An­
gelo, Texas.

**WOODSTOCK**

**Monday, May 13, 1991 Mustang Daily**

**ADVENTURER**

From page 1

boat. The expedition was written up in the January 1909 issue of National Geographic.

His other travels have included a year in Germany as an exchange student, supervisor of the Student Conservation Corps trail crews, commercial fisherman on the West Coast and several self-financed trips to the Eastern Hemisphere.

Some of Morrison's adventures were self-financed and others were paid for through working as an engineer or fisherman.

Morrison believes that his choice to go into mechanical engineering was based largely on his adventurous and curious personality.

"There was no other program I could have possibly been in," he said. "I have been in the situation of having to depend on motors and engines a lot, and I just wanted to understand everything that there was to know about them."

Morrison added a last bit of advice for all those who want to follow in his footsteps: "Be prepared to cheat death repeatedly."

Morrison is now living in Arizona and working as an energy center supervisor of Biosphere II.

Biosphere II is the man-made microcosm in which eight researchers will spend two years amassing scientific data that will help solve environmental problems on Earth.

Morrison is also putting together an expedition to Central America to search for a lost gold treasure. He declined to reveal information as to exactly where he thinks the lost treasure is located, only that it is somewhere in Central America.
