Students want chancellor out
Sac State resolution calls for CSU trustees to fire Munitz

By Allison Gatlin
Staff Writer
Sacramento State students are leading a movement calling for the firing of CSU Chancellor Barry Munitz. The movement includes protests and a proposed student resolution calling for CSU Trustees to fire Munitz. The resolution has passed at San Francisco State and comes before Sacramento State students for a vote next month.

At a teach-in on Monday and an open meeting with Munitz on Tuesday, students voiced their anger at the chancellor's business actions as vice president of Maxxam Corp.

The student objections focus on 1) Munitz's involvement in Maxxam's hostile takeover of Pacific Lumber Co., which activists claim led to increased clear-cutting of old-growth redwoods (to pay for debts incurred in the takeover); 2) Munitz's administration of a pension fund in order to finance other Maxxam ventures; and 3) the charges Munitz faces for his mismanagement of a failed savings and loan in Texas, protesters said.

"Barry Munitz is the one person in the United States most responsible for the destruction of our California old-growth redwood forests," said Trish Porter, statewide CSU Green Student Alliance Coordinator. "He represents the very worst of the Wall Street bandits who have ruined our economy by hostile takeovers and junk bond financing. ... CSU trustees made a bad mistake in hiring Munitz, and we are calling for his termination or resignation."

About 400 students participated in Monday's two-hour teach-in. Speakers included Dar- ryl Charnay, an environmental activist and member of Earth First. His opposition to clear-cutting of old-growth redwoods has led him to oppose Munitz (Charnay will be at Cal Poly Nov. 5 to speak in the U.U. at 11 a.m.).

About 300 to 400 students attended Tuesday's 45-minute meeting at Sac State. Participants questioned Munitz on his leadership ability and moral stature, said Michael Twombly, a Green Party coordinator in Sacramento.

"A lot of hard questions were put to him," Twombly said. "He could not answer these questions about his moral responsibility in the S&L bailout and clear-cutting (of the redwoods)."

Students from Humboldt State and Chico State also participated in the rally.

"Students at Humboldt State in particular are upset at Munitz's role in the hostile takeover of Pacific Lumber," said Kent Smith, chairperson of the Green Party in California. "The student movement is being led by the CSU Green Student Alliance, part of the California Green Party. A national program that takes place throughout the United States."

"Into the Streets" is a national program that places more than 75 volunteers throughout the United States. This year's "Into the Streets" is a trial run and is not officially affiliated with the national program, said Mike Ma, SCS vice president and chairperson of the event.

"The program is large now. I'd think people will get a lot of something positive and very rewarding." The date will be finalized later this week, Sherman said.

"We're not interested in television proceeds," Baker said. "But we are interested in a good, solid, competitive program."

Another question the task force had was what would be required in the existing athletic program.

"We're running a program now that's adequately funded," he said. "It would require additional funding to stay afloat. I think in L.A. it would be more feasible."

Baker feels students are mistakenly assuming there's a "hidden agenda" as is sometimes the case in big-money issues.

"We're not interested in television proceeds," Baker said. "But we are interested in a good, solid, competitive program."

Student program seeks to better community relations

By Lori Cheeseaman
Staff Writer
Community relations is not a one-way street.

It requires students and residents to work together.

This Friday, Cal Poly students can do their part and go "Into the Streets" with Student Community Service's first one-day outreach program.

"Into the Streets" is a national program that takes place in more than 350 campuses throughout the United States.

This year's "Into the Streets" is a trial run and is not officially affiliated with the national program, said Mike Ma, SCS vice president and chairperson of the event.

"We're running a program now that's adequately funded," he said. "But we are interested in a good, solid, competitive program."

Another question the task force had was what would be required in the existing athletic program.

Gorbachev asks for Soviet aid in Madrid

MADRID, Spain (AP) — Soviet President Mikhail Gorbachev's oddy timed appeal for aid at the Madrid peace conference Wednesday underscored his country's secondary role in resolving the Arab-Israeli conflict.

"The world community is becoming increasingly aware that what is happening in the Soviet Union has a larger bearing than any regional conflict on the vital interest of the greater part of today's world," the Soviet leader said after a keynote address by President Bush.

Bush said U.S. mediators at the conference intended "to engage the Soviet Union without winning a penny, said she felt numb after being presented with an oversize check for $3,584,941.90 at a champagne ceremony at the Grosvenor House Hotel.

A widowed mother wins record soccer jackpot

LONDON (AP) — A recently widowed mother of four who bet 93 cents on soccer pools won a record jackpot Wednesday worth more than $3.5 million.

Romanian-born Rodi Woodcock, 51, who had gambled on the pools for 25 years

Priest pleads guilty to charges of fraud

MILWAUKEE (AP) — A Roman Catholic priest accused of bilking his rural parish out of more than $265,000 has pleaded guilty to reduced charges.

The Rev. William Joffe, 60, pleaded guilty Tuesday in U.S. District Court to bank fraud and interstate transportation of a fraudulent check. Two additional counts of each charge were dropped, assistant U.S. Attorney Susan Kriel said.

Joffe was indicted on charges of defrauding St. Joseph's Church in Harvard, Ill., by diverting church money for his personal use.

Northern states agree to pollution standards

PHILADELPHIA (AP) — Nine Northeastern states and the District of Columbia have resolved to adopt California's toughest-in-the-nation pollution rules governing automobiles.

The agreement, reached Tuesday by representatives on the Northeast Ozone Transport Commission, calls for use of reformulated, cleaner-burning gasoline, improved maintenance and inspection of vehicles and use of cars that cause less pollution.

Many of the states can adopt the standards through administrative procedures, officials said, although legislative action will be required in some states.

Airliner evacuation drill hurts 44 people

LONG BEACH, Calif. (AP) — Forty-four people were injured, including a woman paralyzed when she fell to a hangar floor, during two evacuation drills from an airliner at Douglas Aircraft Co., authorities said today.

Dorothy Myles, 60, of Long Beach remained in serious condition today at Memorial Medical Center, paralyzed from the neck down, said hospital spokesman Ben Yakelev.

The woman was among volunteers who were paid $49 each to take part in morning and afternoon drills Saturday from an MD-11 jetliner in a darkened hangar at Douglas Aircraft Co.

City wants to take cars of prostitute customers

LONG BEACH, Calif. (AP) — Patrons of prostitutes could end up as streetwalkers themselves under a city councilman's proposal.

Councilman Clarence Smith proposed confiscating the cars of those who solicit prostitutes from their cars, and other council members liked the idea.

But a city attorney said the proposal might be on "pretty shaky ground" legally.

The council said it wants to rid the city of streetwalkers.

With production facilities in Europe, Japan, and Santa Clara, California, as well as service offices in more than 10 countries, Applied Materials has had unprecedented success in penetrating the world's semiconductor equipment marketplace.

For over 20 years we have committed ourselves extensively to the research and development of next generation products for the marketplace.

We currently have positions in Engineering, Mechanical Engineering, Chemical Engineering or Materials Science.

APPLIED MATERIALS
citizens, homeless and hungry, were chosen from a list of 17.

For the first time, the environmental project will be adopting a beach, working on the Earth Day logo and building trails back to the botanical gardens behind Poly Canyon.

"There is a lot you can get from a walk through a garden," McCreery said. "The food chain is like a community, this helps you look at things a little differently and really makes you think.

"If we can help people understand the boos in our environment, we will have accomplished a lot in the community.

Next year, with the help of other student groups, faculty and community members, Cal Poly will apply to become a part of the national program.

So Ma said BCS hopes to "make a world of difference" in the community.

With the support of 56 national community service organizations, "Into the Streets" has brought together different cultural, ethnic, religious, political, social and academic student groups.

"The response was so wonderful this year that I couldn't take it all," Bickler said. "It's unfortunate, but we don't have enough lighting for more than 30 booths."

However, she said they are already looking for ways to expand the size of next year's carnival.

"Since Halloween will fall on a Saturday next year, we might be able to start earlier so we won't need as much lighting," Bickler said.

Clubs were given booth spaces on a first-come, first-serve basis. Bickler said some of the clubs have participated in past carnivals.

OPINION

Peer policing needed at Cal Poly
By James M. Gardiner

As a free society, we value our personal freedoms. We expect to be able to express ourselves. We expect to be free from any necessary control or distraction. This freedom is contained in the community free from unnecessary disruption or fear of injury. Over the last two years, we have been trying to balance these actions against the collective right to live without undue disturbance or violence. When we have had problems, it has often been described as a clash of student vs. resident lifestyles. I believe it is more a failure to accept personal responsibility for appropriate community behavior. A neighborhood or community...relationships and acceptance. Their efforts are to be commended.

While bottles fly, attitudes change
The Issue: The continued weekend violence committed at the San Luis Obispo game.

The bottles are still flying.

The riots of the 1990 Poly Royal are 18 months in the past, but there has been little visible change. The bottles are still flying.

Call Poly students a pedestrian with a platform of community relations. Cal Poly clubs and other organizations have taken steps to help these relations, but there has been little visible change.

The bottles are still flying.

There has been little attitude change.

But there has been a very important one we don’t see in the police reports or the media coverage.

The attitude of the students.

There was a time when a police confrontation would cause a great many protests by students and the community.

But with each bottle thrown, the stupidity of the situation has made Cal Poly students realize that the people involved are not rebels or hooded martyrs.

The majority of the Cal Poly campus is coming to realize that people who throw bottles are just idiots with no purpose in society but to break windows, break laws and damage the reputation of the innocent for their own self-serving violent brand of fun.

Attitudes have changed.

At one time, it was us against them.

Now it’s a matter of responsibility for us.

Call Poly students should be commended for developing this attitude.

The San Luis Obispo Police Department should be commended for their patience in allowing us to find a peaceful solution.

Time has not changed the actions.

The bottles are still flying.

But there is a notable change, and with continued patience from the students and police there will come a day when affected losers will respond to this attitude and realize their actions are not respected or appreciated.

Until then, students, police and the community can only keep a good attitude and keep trying.

ASI off to slow start after cutting Fish/Freaks show

By Cindy Lee
Staff Writer

The ASI Concert Series is off to a less-than-successful start this year.

As of Wednesday afternoon, Sunday’s scheduled School of Fish/House of Freaks show could not be determined.

Speaking through art

Student shares off-mainstream work

By Amy Koval
Staff Writer

Art and design senior Dave Carnie is not one who speaks loudly with flailing limbs and salivating mouth, as many who are trying make a point do.

Instead, Carnie sits back in the wings quietly, and lets his work do the screaming.

And he doesn’t like to interrupt his work with explanations or definitions. The work should couple with the experiences of the viewer, he said, to form meanings which can be different for everyone.

Carnie’s photography, described often as “angry” or “anti-establishment,” is being exhibited in the Photo Option Gallery of the Robert E. Kennedy Library until Nov. 5.

In the past, the gallery has mainly shown the classwork of art students. Now the format is changing to emphasize individual and multi-student shows, said Dana Giles, Photo Option Gallery director.

The type of work in the gallery may be changing too, to encompass a greater variety of themes and subject matter.

Carnie’s work may be bringing a little controversy to the gallery. Some of his work has caused the列入s of many Christians to scratch in question, and some Christians even take offense to Carnie’s work, he said.

One of his pieces is a picture of Jesus hanging on a cross. The piece itself hangs upside down, and he’s seen people try to “fix” it.

Carnie said he has a gripe with Christianity, and it comes through in his work. This gripe has to do with the heavy theological emphasis the religion places on conversion.

“One thing I don’t like is the ‘recruiting.’ There are a lot of things in Christianity that I like... but (Christian) people aren’t tolerant of other views,” Carnie said.

Carnie’s show is called “A Loopy Attempt At Lying,” and he says the title is reminiscent of the French author Celine, whose philosophy was that a person has two choices in life — to do or to lie.

“Life is lying,” Carnie explained. “It is filling yourself up with fun things to do in order to live the fact that you’re constantly dying.”

Carnie has taken this philosophy to heart, and has combined it with his art.

“Photographs are a good tool. You make people feel something that isn’t really there,” he said.

Christianity isn’t the only subject matter that is addressed in Carnie’s exhibit. In fact, it’s only a minor part. The rest of the work — done over the last year — is reflections of images sparked by music or books, by authors such as Nietzsche or Joyce.

“Books are the best source because they are impossible to copy,” Carnie said.

And he likes to do work involving things that are bittersome to him. He says that this tendency makes him a bit of a “cop-out.”

He explained that, “it’s easier to hate things than to like things.”

Before entering the world of art and photography, Carnie spent much of his youth drawing. His mother is a painter, so it was the natural path to follow, he said.

He said he was impatient with the drawing process because it takes so long to see results.

Then he was introduced to the camera, and he found he could participate in art and get instant results, too. He had chosen architecture as his major at Cal Poly, but decided to switch.

“I started out shooting railroad tracks and manholes,” Carnie said of his beginnings in photography. “Then I started shooting stuff out of focus; you can just look at it and find what you want in it.”

He said that when he first started out, his photographs were just something to look at. They’ve come to mean more.

“Now I feel I have something to say,” he said.

Akimbo album pleases, puzzles

By Patricia Egan
Staff Writer

If you like con-fusion with a non-sense tone, Rhythm Akimbo’s new album may be just what you’ve been looking for.

"Temple-Beth-Skyturn," released Oct. 5, is the band’s first compact disc release and third recording since the band formed in 1987.

From the album title to the 18 songs contained on the album, this new release is an intentionally confusing work of art.

The words in the title, "Temple-Beth-Skyturn" are an anagram — they spell something different when the words and letters are rearranged.

As for the songs, random lyrics are combined with well-balanced bass, brass and percusion to form a unique type of college pop music.

But it is the unpronounness of this pop music that makes it worthy of praise.

The obscure song lyrics have an intriguing upbeat sound that captivates the listener like a good riddle.

One of the songs on the new release, "I’m sorry, Hillsgopher," is a perfect example of the perplexity of most of the songs on the album.

I have to admit that when I first listened to this puzzling song I didn’t like it. Not because I didn’t like the music, but because I couldn’t figure out the meaning behind the words.

The first sentence didn’t seem to have any correlation to the next, or the next — or did they?

I listened to it again, and again, and finally I found myself singing the song (cheating off the sleeve in the disk cover, of course).

The other songs on the album have their own distinct — See REVIEW, page 7

When they aren’t lounging on and around the Mission San Miguel, members of Rhythm Akimbo are performing and releasing albums, such as their third and latest, "Temple-Beth-Skyturn."

CONCERT

From page 5
Freaks concert will be avoided.

Miller said the process of bringing a band to Cal Poly is an unpredictable one.

Students, who make up both the ASI Concerts' board and general committee, are responsible for bringing various bands to Cal Poly.

The first step in inviting a band to play at Cal Poly is finding a band that is touring in the area.

Harway contacts an agent or promoter to see if a deal can be struck, finding out how much the band costs and what they require to play, including light and sound set-up and what the band members want to eat.

"It's a matter of bargaining with the band's agents," Harway said. "In dealing with the agents, if they're willing to work with us, then it's fairly easy (to get a band to play at Cal Poly). It's a lot of just coordinating the right date and the right amount of money."

Harway then presents the band to the general committee. All students are welcome at this meeting where the band goes up for discussion.

The committee looks at the sensibility of inviting the band, taking into account student interest, popularity and what the group's show is like.

The general committee and students then vote on whether to invite the band to play at Cal Poly.

If the vote passes, Miller makes a budget, and Harway calls the agent to solidify the deal.

"If all the details can be worked out, then we do the show," Harway said.

But that doesn't always happen.

"It (the deal) doesn't always come through," Miller said. "Last year we lost The Cult because we didn't have certain sound and light capabilities."

Next, the committee works on the pre-show preparation by "promotion, getting the venue, etc," Miller said. "Everyone is a volunteer, and everything is done by students, including pre-show and the day-of-show stage set-up, security and ushering."

Miller said that all students can join the committee and work the shows. The committee is looking for more volunteers for future concerts.

More participation from students, Miller hoped, might help in preventing snafus such as occurred for the School of Fish/House of Freaks concert.

REVIEW

From page 5
A few of the pieces feature guest musicians which makes those particular songs even more unique-sounding.

"Temple-Beth-Skyturn" is warm, carrying a sort of nostalgic quality that makes the music easy to listen to. It conjures up feelings of comfort or home.

Compared to the band's previous albums, "Juvinelia" and "And the Cat Bird Seat," which fit better into the band's original category of ska-reggae, "Temple-Beth-Skyturn" strays from the norm and represents a shift in the band's style.

It may be different from earlier Rhythm Akimbo music, but this album has its merits. And it gets better with each listening. So don't be surprised if you get hooked in both the lyrics and the music.

The band will perform in concert at SLO Brewing Co. on Nov. 16.

There must be some way to avoid doing the same thing for the next forty years.

Life's been pretty good so far. You've kept moving—taken all the right steps along the way (for the most part). And now you're ready for the biggest step.

You'll be getting your degree from a top school. You're about to find a great job.

The question is: which job? And will it have the potential to interest you for a whole career?

You've probably heard the story of the job applicant who said he was a shoe salesman with fifteen years experience. "No," corrected the recruiter interviewing him, "you've had six months experience thirty times."

Isn't there some way to keep challenging yourself in new and different areas?

Andersen Consulting offers you the opportunity to work on a variety of projects—with clients in a wide range of industries.

We are the leader in helping organizations apply information technology to their business advantage. Every hour of every business day, we implement a solution to help one of our more than 5,000 clients worldwide.

What makes that possible is the quality of our people. And the quality of our training. We're known for both.

Because business and technology are ever-changing, we see training as a continuing process. And our $123-million Center for Professional Education in St. Charles, Illinois, is just one measure of our commitment. We train you for a career—not just a job.

Does the idea of forty years of knowing exactly what you'll be doing each week scare you? Then don't settle for that. Demand challenge and variety. Come talk to us. And find out more about a career with Andersen Consulting.

You are invited to attend an Andersen Consulting information session on Monday, November 4, in the Embassy Suites Hotel at 7:00 p.m. Reception will follow. On-campus interviews will be conducted on Tuesday, November 5. Please contact the Placement Services Center for sign-up information.
Poly begins $95,600 algae study

Faculty from four schools examine San Luis Creek

By Mark Marden
Staff Writer

A $95,600, two-year study of San Luis Obispo Creek involving faculty members from four Cal Poly schools will begin this week.

The study is funded by the California Regional Water Quality Board.

"The project is to determine the sources, kinds and amounts of nutrients that cause algal growth to become a nuisance in the creek," said Leslie Bowker, project manager.

As to what constitutes a nuisance, Bowker said it depends on the particular area of the creek.

"If you're down at what used to be the Spindle (now Chico's restaurant), the algae is considered unjustly. If you're down at lower Higuera, where there is not public access, then a nuisance would be the level of algae that would be harmful to fish," he said.

Bowker, a biological science professor, said some parts of the creek are a case of "classic eutrophication," a condition in which an area rich in nutrients leads to excessive plant growth in water, killing animal life by depriving the animal life of oxygen.

"We will be monitoring the water shed from Cuesta (Grade) to Avila Beach," Bowker said.

Dianne Long, a political science professor, will act as community liaison for the project.

"She will be interfacing with the public and appropriate government agencies and groups," Bowker said.

Walter Bremer, a landscape architecture professor, will lead his Graphic Information System skills to the project by using the computer-generated GIS to map the creek area.

"We will be using the maps to try and identify non-point sources of nutrients that end up in the creek," Bowker said.

Bowker said non-point sources are areas where runoff into the creek is not controlled. Point sources, like sewer treatment plants, are controllable. Both urban and agricultural runoff are considered non-point sources.

"We really don't know what we're going to find," Bremer said.

"We're just trying to figure out what sort of things end up in the streams depending on land use." Bowker said the soil science department's Brent Hallack is an expert on non-point sources and will assist in identifying the locations and interpreting data.

Creek monitoring involves working at various creek sights and determining nutrient levels.

"We'll check hydrogen, phoshate, oxygen, temperature, alkalinity and look at algal growth," Bowker said.

Several senior projects are coming out of the study, Bowker said. "The project gives students a real-world opportunity to participate in a real project."

"It calls for a reconsideration and re-examination of the Munitz hiring," Smith said. "The fact that Gore's opposition to Munitz is centered on his corporate ties. One reason he was selected, activists claim, is his corporate connections, which could direct research money to the university system. Activists claim this would benefit the corporation, not the students. "This creates a cheap research wing for the corporate sector," Twombly said. "That's the money Barry Munitz will bring — corporate money for the corporate system."

The Green Party asserts that there is a direct link between the business actions of Munitz and others like him and the current economic situation. "The economy is so saddled with bailout debts that GSI can't get its funding," Twombly said. "The Green Party is trying to bring the connection home that corporate greed is the people in charge means you have to pay for more tuition."

"I quizzed of our stadium if we went Division I-AAA, there would be such a requirement if Cal Poly was taking it to Division I-A." He also suggested that if the referendum were to pass, "there be a new student committee created because students would be doing a substantial amount of the funding of athletics programs. An all-student athletic oversight committee could be formed, and it would work closely with the athletic director as well as report directly to the campus president himself." Baker added he was pleased with the work of Mike Parent, the marketing consultant who worked with the task force earlier in the year. "He had a good perspective because he had been at Cal State University," Baker said. "He knew all about the Division I-A requirements." The task force and Baker discussed how to distribute the report effectively because it is of extreme concern to the task force.

"People join for more than just having something on their resume. They want a networking opportunity from page 2

"People join for more than just having something on their resume. They want a networking opportunity and because his school (Utah State University) had been through the same process before," Baker said.

"We have approximately 10 chair positions approximately 10 chair positions open for clubs who want to get involved in putting on luncheons, panel discussions, hospitality, wine and cheese donations and making flyers."

The main focus of SAMP is to host such educational events and raising funds for them is one of the heart of membership involvement, said LaBelle. One of the other big events is the spring tour when 40 members meet with business executives in Los Angeles or San Francisco. One area of concern for the club is the absence of big money—making potential due to the consolidation of Poly Royal. Their 1990 tri-tip stand brought in close to an $8,000 profit, said LaBelle.

LaBelle, business senior and vice president, said the club plans to step up its efforts by increasing the amount of prizes for this year's annual raffle, and increasing the club's number of members. "We have a lot of potential due to the campus's large student body," LaBelle said. "The Green Party is trying to ensure that this remains a viable club.""
It's all up in the air for Mustangs

By Neil Pascale

It's all up in the air for Mustangs launching pad Saturday night.

in the Western Football Conference are fueling up for Saturday's important contest.

The Mustangs, 3-4 and 1-1, in our league. The Mustangs, 3-4, are preparing to square off — mainly through his conference-leading 2,131 passing yards.

The Broncos' air commander is John St. Jacques who has already thrown 15 touchdown passes.

The Broncos, 4-4 overall and 2-1 in the WFC, is averaging 231 passing yards a game. Poly will need every one of those yards to beat the Broncos.

The Mustangs hope keying on the run will leave the Broncos with only one option — to pass on obvious passing downs and face Poly's sacking units.

Santa Clara's specialty. "They use him (Wise) a lot to complement their passing game," Stewart said.

The Mustangs respect Wise so much that they will concentrate on stopping the Broncos' running game, Stewart said.

The Mustangs also possess one of the conference's leading rushers in Aron Wise. The junior tailback has already rushed for 933 yards and nine touchdowns.

"They win the game by controlling the ball and keeping their offense on the field," said Poly Assistant Coach Randy Stewart. "They're probably the most balanced team in our league.

"They win the game by controlling the ball and keeping their offense on the field."

The Mustangs, 3-4 and 1-1, aren't far behind with an average of 231 passing yards a game. Poly will need every one of those yards to beat the Broncos and stay in contention for the WFC title.

The Broncos' air commander is John St. Jacques who has already thrown 15 touchdown passes. The junior quarterback also has a conference-leading 1,131 passing yards.

St. Jacques' main targets are wide receivers Chris Hite (45 catches for 709 yards) and Tony Evenson (20 catches for 290 yards). Hite leads the WFC in total yards and catches per game.

The Broncos' specialty.

THE STRONGEST on the field.

"Their defensive statistics are a little misleading," Stewart said. "Stewart said the Broncos' lack of experience on defense has resulted in inconsistent play."

The Broncos are last in the WFC in total defense by allowing more than 400 yards per game.

"Their defensive statistics are a little misleading," Stewart said. "They need his leadership in the backfield," Stewart said.

The Broncos also possess one of the conference's leading rushers in Aron Wise. The senior tailback has already rushed for 933 yards and nine touchdowns.
