**Christmas spirit grows at Poly**

By Holly Vanderlan Staff Writer

Christmas is the season, and nothing tops the holiday cheer more than the scent of a fresh-cut Christmas tree.

This year, a new twist is thrown in: a Poly-grown Christmas tree. The NRM department and logging team plan to sell more than 550 fresh-cut trees this holiday season.

Environmental engineering senior Dave Schinski checks out a Polycare Christmas tree. The NRM department and logging team plan to sell more than 550 fresh-cut trees this holiday season.

The tree farm was planted in 1984 and opened for business four years later with a stock of 220 trees.

Last year, tree sales topped the 300 mark, and this year the department is hoping for more, said Mike DeLanux, a NRM instructional technician.

DeLanux said that enterprise projects are available through the School of Agriculture. The project, which is open to anyone, enables students to develop projects and experiments.

He said the students must provide a proposal that outlines the project and its expenses as well as a complete budget statement. If it is approved, the Cal Poly Foundation supplies the start-up money.

DeLanux said the tree farm is a unique enterprise project because it's managed by the Cal Poly Logging Sports Team. It is one of the few projects that provide a proposal that outlines the project and its expenses as well as a complete budget statement. If it is approved, the Cal Poly Foundation supplies the start-up money.

COPENHAGEN, Denmark (AP) — The masked man pointed a gun at bank workers, collected $21,000 and called out, "Have a merry Christmas!" Then he rode off on a bicycle, Danish newspapers reported Thursday.

Police said they believe the man who robbed Den Danske Bank on Wednesday in Taaarbæk, nine miles north of Copenhagen, is the same one who took $12,500 a month ago from a bank in a town just west of Copenhagen.

On that occasion, the robber said to bank employees, "Goodbye, and all my best for the rest of the day." He, too, rode away on a bicycle.

Japanese cities cost more for expatriates

GENEVA (AP) — The Japanese cities of Tokyo and Osaka remain the world's most expensive sites for expatriates, according to a survey published Thursday.

With New York as the base of 100, Tokyo scored 171 and Osaka 157, the survey said. Libreville in the West African state of Gabon and Braszaville in the Congo followed, at 134 and 133 respectively.

California living was cheaper than the New York base, with a 98 score for Los Angeles and 94 for San Francisco. In the list of 97 cities, Los Angeles was 84th and San Francisco 97th in living expenses for expatriates. Mexico City was 78th, with a score of 90 compared to New York.

The cost of living in West Europe continued to be higher than in the United States, while most Latin American cities were still relatively cheap, the report said.

The Indian city of Bombay, at 61, was best value for expatriates of the 97 cities surveyed.

Keating faces 10 years for junk bond fraud

LOS ANGELES (AP) — Charles Keating Jr., the free-spending, politically connected executive whose rise and fall came to epitomize the S&L debacle, faces up to 10 years in prison for defrauding junk bond investors.

Keating sat grim-faced in Superior Court on Wednesday, his 68th birthday, as a jury found him guilty of 17 of 18 counts of duping investors about the safety of junk bonds sold through his now-collapsed Lincoln Savings & Loan.

"The bonds became worthless when Lincoln went under in a collapse that cost taxpayers $2.6 billion, the most expensive government bailout in U.S. history. "This is the nicest birthday present he could give us — to find the S.O.B. guilty and send him to jail," exulted Jeri Malin, leader of a support group for those who bought the bonds. She lost $40,000 in Lincoln's collapse.

"There is a God!" cried Mimi Hines, who said her junk bond losses cost her a $1.2 million Malibu home. "It would be a great birthday present for him if he gets 68 years. Why, 99 years wouldn't be long enough for this man."

Pan Am shutdown puts employees out of work

MIAMI (AP) — Pan Am passengers scrambled to re-book flights during the heaviest travel time of the season and 7,500 employees found themselves out of work three weeks before Christmas when the once glorious airline went under.

The airline, which pioneered commercial aviation, abruptly shut down Wednesday after losing its battle to erase years of losses.

Chanda Sherman of Jolennesboro, Ga., sat in a lounge at Miami International Airport with her two young daughters on their interrupted flight from Atlanta to Mexico City.

Indian leaders claim team names racist

BURLINGAME, Calif. (AP) — The use of Indian names and symbols by sports teams is a racist attack on Native American culture, said Indian leaders attending a national conference.

The leaders are continuing to pressure sports teams such as the Atlanta Braves and Washington Redskins to change their names and stop using Indian symbols.

"If we can't get white America to understand a basic issue of human respect, how are we going to move on to more substantive issues?" Bill Means, executive director of the Minneapolis-based International Indian Treaty Council, asked Wednesday.

"We are the only race that are used as mascots." The Atlanta Braves' tomahawk chop and the use of Indian names and symbols by other teams is offensive, said leaders attending a workshop of the annual convention of the National Congress of American Indians.

"Our religion and tradition need to be recognized, and the negative imagery of mascots and the commercial use of Indian names create a bias of misunderstanding of our people, a misunderstanding which breeds prejudice," said Michael Harvey of the United Indian Nations of Oklahoma.

Artists decry removal of nude art sculpture

LOS ANGELES (AP) — The removal from a federal building of a nude sculpture, criticized as a "shrine to pedophiles," has drawn charges of censorship from members of the art community and the sculptor himself.

The General Services Administration placed the sculpture of a nude woman and a baby girl in storage after Rep. Edward R. Roybal, D-Calif., whom the building will be named after, criticized the artwork.

A recipe for low-fat eggnog for the holidays

BY CYNDE ESTOK AND NANCY SIMMONS

When you're trying to maintain your weight through the season, the key is to make healthy holiday choices. Try low-fat or nonfat dairy products instead of heavy cream or whipped cream. Make your creamy cocktails with low-fat ice cream, then blend in a little orange juice. Enjoy a light meal the day before the big feast. Include lots of vegetables. Serve, for example, a fresh, light veggie side dish instead of dark meat.

Here are some suggestions that may help:

- Choose light poultry meat instead of dark meat
- Use cooking spray to grease baking pans and also to sauté vegetables
- Prepare hard rolls in place of cream
- Fix low-fat eggnog (see recipe below) rather than traditional eggnog. Egg nog is a

As a special gift to all of our customers to thank you for your past and continuing support, El Corral Bookstore will deduct 20% from the price of selected merchandise.

Computer products, class rings, class schedules, university catalogs, magazines, textbooks and special orders are not included due to their already low prices. Hurry for best selection!

FREE GIFT WRAPPING!
Matt Kramer, standing among four acres of trees, is proud of how his favorite seedling has grown.

Poly agricultural land are planted with Christmas trees, although DeLasaux said four others are available.

"At the moment, the thought is that we don't want to plant more trees because we don't want to appear too commercial and compete with local growers," he said. "First and foremost, the project is supposed to be an educational experience."

Curtis Edson, the tree farm manager and a natural resources senior, said, "A lot more is involved than people think. It doesn't just entail selling the trees. It takes a lot of time and effort to maintain the trees."

DeLasaux said the students involved learn everything there is to know about growing the trees, particularly overall maintenance and how to manage this type of project.

In February, Edson said the stumps left from the cut trees will be removed, the land tilled and seedlings planted to continue the growing cycle.

The farm is located on Stenner Creek Road, just off Highway 1. For more information call 756-2702.

Rain, rain come again

Local farmers, weather watchers hope for wet December forecast

By Christy Rinauro
Staff Writer

With the possibility of rain on Saturday dominating weather reports, local agriculturists and weather watchers are hoping to see the start of the accumulation of the area's December average of four inches of precipitation.

"Historically, our rain starts in December. Heavy months are usually January and February," said Ron Munds, member of the San Luis Obispo Water Conservation Council.

The current drought has been a shock to Munds. When he moved into town in 1972, he said it rained buckets. Today, as the area enters its sixth year of drought, Munds said he can hardly remember what green is.

Munds said the area's rainfall was less than one inch in November. Normal rainfall for November is 2.7 inches. Average rainfall figures were computed from statistics from 1970 to 1990.

"Obviously, we're substantially behind. Unless we have a major change in our weather pattern, we'll be in serious trouble. It seems our high pressure is not breaking down and is drifting north of us," Munds said.

Jim Greil, a professor in the crop science department, said, "Statistically, the odds are good for normal rainfall, but I certainly don't have a crystal ball."

Greil said the weather has been fairly cooperative for the growers of the county's main cash crop — wine grapes.

Without rain or frost appearing at unfortunate times of the season to damage wine grape crops, wine growers are looking to produce one of their best wines this year.

"The yields are still good and the quality is good, but the big problem is the availability of water," Greil said.

As the wine grapes are currently in a dormant period, further rainfall will not affect them. However, there is concern for the area's leaf lettuce, strawberry, broccoli, cauliflower and brussel sprout crops. Greil said if rain isn't dropped upon these fields soon, "we'll be in a bad way."
Christmastime: the season to be merry, or the time to get jipped

By Laura Carrillo

Did you know Jesus Christ was a Capricorn with Sagittarian tendencies? He was reportedly presents for, you've got but close to the end of Sagittarius. Christmas presents? I get that. Jesus had a rotten birthday too. I don't believe it, though, because I am a Capricorn born the because I would make for a nice comfortable body, the but the fetus in her is not part of that body and the majority of the doctors in this nation would agree with me. The last of Ms. Gleason's points that I would like to address is the idea that women will have abortions whether they are legal or not. If society believes that all women should have that choice, then it should not be an issue. Roe v. Wade was a victory for women's rights and it became law in 1973. All deaths in the last two years have been due to legal causes and it would be a gross violation of women's rights if any woman were to have an abortion. It is a matter of freedom and choice, and women should be able to choose what is best for them. The fetus is referred to by Ms. Gleason as a group of cells. Did you ever stop to think that all of us are a group of cells? Yes, we are all just a part of a whole body. The DNA chains which define who we are as a unique individual are all in place from the moment of conception. I agree that a woman has the right to control her body, but the fetus in her is part of that body and the majority of the doctors in this nation would agree with me. The last of Ms. Gleason's points that I would like to address is the idea that women will have abortions whether they are legal or not. Poly suits up as underdogs for Final Four

Mustangs take on No. 7 Cossacks

By Neil Pascale
Editorial Staff

It sure doesn’t figure, but the No. 12 Cal Poly Mustangs have a legitimate shot at winning the national title.

The upset-minded Mustangs will take on the No. 7 Sonoma State Cossacks at 5 p.m. tonight in the semifinals of the NCAA Division II national championships.

The game, the first of two semifinal contests, will be held in Melbourne, Fla.

Little more than one month ago, the Mustangs crawled into the playoffs by narrowly beating Grand Canyon University, 1-0, at Mustang Stadium.

Since then, Poly has played two dramatic nail-biters on the road — each ending in Mustang victories. The first was a 1-0 decision over San Bernadino, which had best Poly earlier in the season.

The Mustangs then became the first Division II school to beat the No. 1-ranked Seattle Pacific Falcons in two years. Poly barely beat the Falcons, 2-1.

Tonight, Poly finds itself in the Final Four in a very familiar role — underdogs on the road.

Poly has offensive weapons in Todd Henry (15 goals, 7 assists), Ryshiem Henderson (10 goals, 16 assists) and Lorenzo Cremona (12 goals, 8 assists).

Final Four

THE ROAD TO THE CHAMPIONSHIPS

By Neil Pascale
Editorial Staff

Here’s a brief list of the Final Four teams:

- Cal Poly Mustangs (14-4-4) — The Mustangs have earned a bid to the Final Four after two wins on the road — a 1-0 victory over San Bernadino and a 4-3 decision over Seattle Pacific.
- No. 7-ranked Sonoma State Cossacks (17-3-2) — The Cossacks got to the semis by beating Oakland, 3-2, in overtime and the University of Missouri, St. Louis, 3-1, in St. Louis. Sonoma and Poly have played four common opponents. Poly was 3-0-1 against them and Sonoma was 1-0-2. The Cossacks are led by senior Andrew Ziemer, with 26 goals and 13 assists.
- No. 1-ranked Florida Tech Panthers (18-3-1) — The Panthers are in the Final Four after beating Tampa, 2-1, in the second round. The Panthers are led by sophomore Richard Sharpe with 39 goals and 13 assists in 20 games this season.
- No. 4-ranked Franklin Pierce Ravens (18-3-3) — The Ravens are in the semis after beating Keene State, 5-0, at home. The Ravens are led by Johan Vickers with 20 goals and six assists in 21 games.

Mustangs still perfect, 4-0

Seven score in double figures in 105-97 win

By Travis Swafford
Staff Writer

The Cal Poly men’s basketball team scored more than 100 points for the third time in four games on their way to defeating Fresno Pacific College Wednesday night.

The Mustangs outscored Fresno Pacific in the non-conference matchup 105-97, in what Poly Head Coach Steve Beason described as a fast-paced game.

"Cal Poly has typically been a slow team, but this year we play much quicker," Beason said.

Poly’s high-scoring affluence can be attributed to the fact that many freshman players that played together last year are back this year, Beason said.

Cal Poly scores highest ranking ever in preseason coaches poll

By Brian Volk
Staff Writer

In the euphoria of the referendum decision, Cal Poly athletes received more good news.

Both the men’s and women’s swimming teams are ranked No. 3 in Division II by a preseason top-10 poll of the College Swim Coaches Association of America.

The ranking is the highest Poly’s swim teams have ever had, said Cal Poly’s Head Coach Rich Firmann.

Firmann accounts this largely to a good share of returning members and new recruits despite the "unnecessary" times before the referendum decision.

"We’ve got a lot of returning juniors and seniors and, surprisingly, with the referendum, we had a good recruiting year," Firmann said.

"We have a transfer who is a U.S. Open qualifier in the 50-meter freestyle, and we draw in two high school All-American recruits.

Firmann said they have a returning team that placed second in the nationals’ 800-meter freestyle relay.

He said one of the returning students, swim team captain Jerry Bramson, placed in the U.S. Open.

The team also has returning national champion swim team captain Stephanie Keller.

Keller, a liberal studies junior, is in her third year on the team. She was pleased with the referendum and said she’s looking forward to next year as having a "solid team with a lot of good people on it."
Students asked to select teachers for award

By Patricia Egan
Staff Writer

On the last day of this quarter, nomination forms for the Distinguished Teachers of the year are due.

Each year Cal Poly students are asked to nominate faculty members for the Distinguished Teachers Award. The award, which began in the 1963-64 school year, is the university’s way of recognizing and encouraging faculty members for excellence in teaching. “The purpose (of the award) is to encourage good teaching,” said Harvey Greenwald, mathematics professor and chairman of the Distinguished Teachers Award Committee.

Teachers are nominated during the fall quarter of each year by the student body via nomination forms, and the award committee selects the finalists during the following quarter.

“The standard number of winners is three,” Greenwald said. “Last year the committee had a difficult time separating the finalists.”

The award committee consists of five faculty members and two students.

Nomination forms will be available in the classroom buildings and both the library and University Union information desks until the last day of the quarter.

They can be turned into either the U.U. or library information desk.

Secret Santas aim to fulfill wishes of 1,000 needy children this year

Network Mall, Central Coast Plaza house name trees

By Minka Parsons
Staff Writer

A thousand needy San Luis Obispo children are hoping to receive Christmas gifts this year from community members participating in the Secret Santa Program.

The program, started by the Salvation Army, helps people in the community below the poverty level and families with special hardships.

“It’s a really nice way that people can help needy children in the community,” said Salvation Army Captain Noreen French.

She said that the program begins with needy people applying for Christmas gifts including food and toys.

The children’s first names then are written on a tag to be placed on a tree in the community. Community members anonymously pick a tag off the tree and buy one of the gifts listed on the back of the tag.

“The person who buys the gift can buy whatever gift they want to,” French said. The gift does not have to be on the child’s wish list.

The participants then bring their gift back to the tree and volunteers make sure the gifts got to the children at Christmas.

“It’s worked very well in the past couple of years,” French said. “That’s why we’re so overwhelmed with applicants this year.”

Last year the Salvation Army served about 600 needy families.

“This year we’re up to 1,000, and we’ve had to turn some away because of it,” French said. “We are hoping that the community will be responsive to the needs.”

Last year, there were children left who did not get their names picked off the tree, French said. The Salvation Army provided those children with gifts donated by local businesses, individuals and college students.

“This year, since we’ve taken so many more children and the economy is so bad, there may be a number on the tree that won’t be provided for,” French said.

French said ten trees would be set up this year — one at the Central Coast Plaza and another at Network Mall.

Names can be taken from the trees seven days a week from the day after Thanksgiving to Dec. 16.

All gifts must be turned in by the 16th in order to make the deliveries.

Business Improvement Administrator Association Lynn Block said that there has been a lot of positive response from the community.

“It takes 100 volunteers to man the tree. We can always use more volunteers and organizing,” Block said.

“There’s so many kids that need help and there’s tons of names on the tree,” she said. “You can make someone’s Christmas by being a Secret Santa.”

French said that by contributing to the program, participants can get discounts from many local stores.

The program has been a tradition with the Salvation Army since 1982.

This is the third year San Luis Obispo has participated.

Poly's new power forward

At the Nov. 22 men's basketball game against University of California at Santa Cruz, a youngster runs onto the court. Poly, however, didn't need him as they easily beat the Banana Slugs.
STATE

From page 2

Tom Otterness for being sexually explicit.

A lot of people in the arts community are really upset about this," said Adofo V. Nadej, general manager of the city's Cultural Affairs Department.

Museum of Contemporary Art Director Richard Kindahal and Associate Director Siberti Geldin issued a joint statement Wednesday denouncing the removal and urging a public hearing of the artist's views.

An attorney for Otterness, who was in Germany Wednesday at an exhibition, said the artist hopes to work with the government to restore his work.

"Tom was extremely upset and disappointed at the actions taken without any prior notice or respect for his artistic and legal rights," attorney Henry Welt said.

Ronald Otterness sparked the controversy Tuesday when he called the work "an attractive nuisance." He added that several judges complained about the work.

"It would attract the homeless that come in, perverts, graffiti artists, everything," he said.

One of the jurors who complained most loudly about the artwork was U.S. District Judge Dickson Teverson, who in a letter to Ronald called the baby sculpture a "shrine to pedophiles."

The work showed a woman squatting and a baby girl lying on her back, legs open and up, holding a globe. Both show genitals and are typical of Otterness' nude figures.

The figures were the central element of a $266,000 work called "The New World," whose theme includes a battle of the sexes that results in the creation of new life.

The sculpture had been installed in the central plaza of the high-rise building, which is scheduled to open next month.

Welt said Otterness could decide to sue under the Visual Artists Rights Act of 1990, designed to protect artists from alteration of their work.

However, the contested law exempts "works for hire." It is unclear whether the sculpture would be construed as "work for hire" and whether works commissioned by the federal government are covered by the law.

"But his goal...is to see his work displayed in the public space for which it was created," Welt said.

WORLD

The survey is published twice a year by the Geneva-based consultant Corporate Resources Group. It is based on a basket of 181 products including food, clothing, recreation and transportation but not accommodation.

The survey is intended to help international companies and governments determine cost of living differentials paid to foreign employees. Taiwan's capital Taipei had an index of 122, Beijing 113, Seoul 107 and Hong Kong 105. However, Jakarta, Kuala Lumpur, Bangkok, Auckland, Manila and Karachi are all cheaper than New York.

In Latin America, only the Peruvian capital Lima and Argentina's Buenos Aires are more expensive than New York, with respective indexes of 107 and 104. This is because both countries have high inflation but have not devalued their currencies accordingly, CRG spokesperson Richard Shultz said.

Toronto is the most expensive city in North America, with an index of 109.

CRIME

"It happens in major student housing complexes like Ramona Drive, Bennser Street, Foothill apartments and throughout the student housing community."

"If at all possible, Seybold advised, "it is extremely important to take valuables with you."

"If you must leave them behind, lock them up in a closet and at least write down the serial numbers. Take pictures of the, and engrave your driver's license number in it. Then kiss it goodbye."

With a California driver's license number engraved in it, the stolen item cannot be resold, he said.

He also advised students to cover up anything that must be left in a car.

Seybold called compact discs the "hottest item" and suggested owners write their license numbers across the front labels of CDs in a thick marker. Other valuables that students should not leave behind are compact disc players, stereo equipment, bicycles, cassette tapes, car stereos, cameras, electronic equipment and computers.

"During this Christmas season, be real careful. There's a lot of people out there who make their living ripping you off."

Seybold said.

But she seemed more concerned about Pan Am workers than her own predicament.

"If I feel bad. I really feel bad," she said. "I'm originally from India, and we always flew Pan Am. It's been in this country for so long. It's like history.

"The shutdown stranded thousands of passengers around the country, including 100 people removed from a flight to the Dominican Republic just before takeoff from New York's Kennedy Airport.

Several airlines said they would honor Pan Am tickets. But finding comparable flights during the busy holiday season is going to be difficult for many, said John Link, a Pan Am vice president.

"Obviously," he said, "it's going to be tight.

"We're all in shock," he added. "It's very, very tough for a 64-year-old airline and all the people who have gone through this.

Many employees left jobless were transferring to Miami from other cities as part of an plan to transform the carrier into a smaller airline focusing on Latin America. That plan fell apart on Tuesday.

"We're all in shock," he added.

Friday Terry Barnes got the news when he arrived at Miami Airport. He was told there we couldn't go in," he said.

Pan Am became the third U.S. airline to declare bankruptcy in 1989. Delta said it was not Pan Am's business plan would work at a time when losses were about $2 million a day and bookings were plunging.

"This is our own research project," said Kristin Leong, an instructor in the biological sciences department. "Initially we started with the state park now we're doing it on our own just to unravel things. It's a puzzle — the more we unravel, the more we find out.

Leong said that each full monarchs from east of the Rocky Mountains head south toward central Mexico. "That is the main population, closer to five or six million.

Butterflies native to the western side of the Rockies head toward California, nesting just north of San Francisco and down the coast as far south as Baja California, Leong said.

"The theory is that they tend to escape the (weather) extremes of the central states," Leong said.

"Certain areas, I think, are like a funnel due to wind patterns.

Biology students, professors study butterfly behavior

By Mark Marden
San Luis Obispo

This time of year, the bright clusters of monarch butterflies adorning eucalyptus boughs south of Pismo Beach look more like huge clumps of orange leaves than collections of insects.

While the butterflies hang in filtered sunlight, members of Cal Poly's biological sciences department conduct studies that may help scientists understand more about the migration and habits of the delicate travelers, some of whom have flown in from as far away as Canada.

"This is our own research project," said Kristin Leong, an instructor in the biological sciences department. "Initially we started with the state park now we're doing it on our own just to unravel things. It's a puzzle — the more we unravel, the more we find out.

Leong said that each full monarchs from east of the Rocky Mountains head south toward central Mexico. "That is the main population, closer to five or six million.

Butterflies native to the western side of the Rockies head toward California, nesting just north of San Francisco and down the coast as far south as Baja California, Leong said.

From page 2 tradition during the holiday season, however, it is very high in calories and fat. Here is a recipe for this holiday favorite with one-tenth of the fat as the traditional drick.

**Low-fat Eggnog**

1 1/2 cups sugar
1/4 cup all-purpose flour
1 teaspoon salt
4 large eggs
2 egg whites

8 cups skim milk, scalded
1 1/2 teaspoons vanilla
1/2 - 1 cup whipped (optional)

Whisk together sugar, flour and salt in a heavy saucepan. Add eggs and egg whites. Whisk until smooth. Gradually whisk in milk. Cook over low heat, stirring with a wooden spoon for 15 minutes until thick enough to coat the spoon. Immediately remove from heat and strain. Cover and refrigerate at least 2 hours. Before serving, stir in vanilla, nutmeg and whipped cream. If desired, pour 2 cups eggnog and 1/2 cup sugar into a blender. Blend until frothy. Serve immediately. Serve it 12.

Nutrition educators are available for consultation and dietary analysis. Call the Health Center for more information.

areas for migrating monarchs.

Leong said about 300,000 of
the colorful insects will spend
the winter in the trees along
Highway 1, enjoying their protec
tion and the mild climate.

“The ones born in the winter
have a life span of about seven
months. They will spend their
winter here. Then, as they head
north in the spring, they lay eggs
winter here. As they head
north, generation after
generation, lay eggs and leapfrog their
way north, generation after
generation.” Leong said the sum­
mate, lay eggs and leapfrog their

The tagging is twofold,” Leong said. “One is to see the be­
havior of the butterflies, to see if
they stay here or move to
another area. And since we have
a coding system, we can tell, for
instance, whether males cluster
higher than females and how
they distribute themselves.”

Trails through the tall
eucalyptus trees provide visitors
with a look at the specimens.

Orange County resident Mark
Adler and his family made a
point of stopping to see the but­
terfly trees.

“It’s amazing to see so many
in one place,” he said. “I thought
they hung around backyards all
the time.”

BUTTERFLIES
