Library to open for 2 Saturdays

By Patricia Egan
Staff Writer

Cal Poly's Kennedy Library will reopen its doors on Saturday, March 7 and 14 for students to study for finals.

David Walsh, dean of Library Services, said money to open the library for the two days came from library savings generated by unfilled library staff positions. Twenty-four percent of library staff positions have remained vacant since November 1990, said Johanna Brown, head of loan services at the library.

"We haven't refilled positions because we saw this (budget cut) coming," Brown said.

After the budget crunch, the library cut the five hours it was open on Saturdays because attendance was lowest on that day, Brown said.

"We found the library was heavily used on weekday nights," Brown said, which deterred administrators from cutting hours at those times.

An 18-month study of the library from September 1988 to January 1990 helped the administration determine that an average of 1,500 students attended the library on Saturdays, as compared to 7,000 to 8,000 students during the week.

The library administration is still trying to work with the Chancellor's Office to reopen the library permanently on Saturdays, Walsh said.

"If we get referendum money, we would be open on Saturdays spring quarter," Walsh said.

The $1 library fee referendum designed to keep the facility open on Saturdays was passed by students in November. It is still awaiting approval from the Chancellor's Office.

"At this point its still up in the air, but we are trying to be optimistic," Walsh said.

If the library does receive funding for next year from the referendum, it will take a loan in advance to help stay open on Saturdays during spring quarter, Walsh said.

The Robert E. Kennedy Library will be open two Saturdays near the end of the quarter, March 7 and 14, for students studying for finals.

Administration upholds fraternity's expulsion

By Jennifer White
Staff Writer

Cal Poly administrators rendered a final decision regarding the status of Alpha Epsilon Pi by deciding to uphold the fraternity's expulsion.

Hazel Scott, vice president for Student Affairs, said she decided to uphold the original decision of expulsion made by Ken Barclay, director of Student Life and Activities, due to the seriousness of the matter.

Several alcohol-related problems coupled with a near-fatal incident of a fraternity member drinking himself into a coma in December led to the original decision of expulsion by administrators.

According to the University Policies and Procedures for Student Organizations, AEPi did exercise its right to appeal Barclay's decision. Their appeal stated why they felt expulsion was not an appropriate decision.

Scott, after talking with fraternity members and discussing the situation with her colleagues, made her decision two weeks ago.

Scott said the university no longer recognizes AEPi as an organization and that the fraternity has lost all university rights and privileges. It is no longer recognized by the Interfraternity Council and cannot participate in any activities.

Scott noted that along with her decision she added a caveat.

"If after three years AEPi has sustained its efforts as it has outlined, the university will consider reinstatement," she said.

These efforts include the restructuring of the entire fraternity with different values and different members. Also, engaging in activities that show the fraternity is a responsible organization will be another effort.

Allen Bratt, an ag business senior and AEPi president, said his fraternity was expecting the expulsion.

"It (the caveat) is very vague," he said. "It leaves us with no options."

Bratt said, however, that AEPi will continue to perform community service and get Bacchus, an alcohol-initiative awareness group, in motion.

Bratt added that other fraternities should "learn from their (AEPi's) mistakes and not screw around."

IFC President John Grinold, a physical science senior, said the expulsion of AEPi will "set precedents for alcohol violations and alcohol abuse" for Cal Poly fraternities.

U.S. execs are paid more than counterparts

TOKYO (AP) — Presidents of large Japanese companies earn about a third of what their U.S. counterparts make, a private research group reported Tuesday.

The report said average compensation for presidents of Japanese companies with more than $78 million in capital was $375,000, well below the $1.2 million paid to presidents of comparably sized American companies.

Study says Hispanics likely to lack insurance

WASHINGTON (AP) — Hispanics are much less likely to have health insurance than other Americans, a congressional study said Tuesday.

The absence of coverage was laid in large part to the fact that many Hispanics are employed in low-wage jobs without health benefits.

The General Accounting Office, an investigative arm of Congress, said that 33 percent of all Hispanics were without private or public health insurance in 1989. Among Mexican-Americans it was 37 percent, the report said, with lower rates among people of Puerto Rican and Cuban descent.

Lawyer says Dahmer's jury made poor choice

MILWAUKEE (AP) — Veteran attorney Melvin M. Belli said the jury in the Jeffrey L. Dahmer sanity trial made the wrong decision.

"I think the jury was wrong," Belli said in an interview with The Associated Press Tuesday. "They're worthy of rehabilitation just from an economic sense."

Chico man tries to buy block of old houses

CHICO, Calif. (AP) — Chico businessman Wayne Cook wants to buy a block of six run-down houses that city officials, California State University and historians have been fighting over for 10 years.

The university owns the vacant, Victorian-style buildings and wants to raze them for a parking lot. The matter was to come before the Chico City Council on Tuesday.

"There's just a tremendous economic loss going on here," said Cook. "They're worthy of rehabilitation just from an economic sense."

plans three trips for Poly students

By Tim McWilliams

Special to the Daily

The ASI Travel Center is a paid program of Associated Students, Inc. It is set up entirely by students, mainly for students.

It offers extensive services in the areas of personal and group travel. Not only will it be able to help set up your trip, but our trained travel advisers have extensive personal knowledge on places throughout the globe.

Any question, large or small, we can answer and if not, we will find the means by which to answer it.
Faculty seek overhaul of state JC curriculum
By Julia Greenberg
Staff Writer

Starting next fall, transfer students within California's public higher education system may have an easier time completing their degrees. The Senate-academic Senate is putting the finishing touches on a curriculum which, upon completion at a community college, would be entirely transferable to either a California State University or a University of California campus.

The program is called "Intersegmental General Education Transfer Curriculum" and is expected to be approved by the Board of Trustees this spring.

"This is the result of 3 to 5 years of work by hundreds of faculty members from all over the state," said Tim Kersten, one of Cal Poly's Statewide Senate representatives.

"It was a real collaborative effort," he said.

"It took quite a while for UC and CSU to agree upon a core curriculum which would automatically be accepted to a campus," Kersten said.

The senate hopes that the program will help alleviate overcrowding on campuses in both systems since students won't have to repeat classes taken in junior colleges.

It will also take some of the pressure off evaluations personnel, who have to go through the lengthy process of determining what kind of standing a transfer student has once he has been accepted to a campus.

Paula Ringer, manager of evaluations at Cal Poly, said the program is a far simpler route for students to transfer.

"If it's implemented, it would mean that students who aren't clear when they begin their work at a community college (whether they want to go into the CSU or UC system) won't lose units and have to make up general education courses when they're trying to make progress in their major."

EXPULSION

From page 1

The solution is also a strong warning to the greedy community about how to manage alcohol, Grinnell added.

Wait Lambert, coordinator of Greek Affairs, agreed that the expulsion of AEPi will send a message to other fraternities. However, Lambert hopes the message won't stop there.

"AEPi’s expulsion should send a message to all recognized stu­
dents and other clubs with the exact same sanctions (as AEPi)," he said.

Lambert added that he felt bad that the result of AEPi's problems had to end in expulsion.

Class eases students' anxiety for mathematics
By Mark Marden
Staff Writer

"You've got to know when to hold 'em, know when to fold 'em, know when to walk away and know when to run."

At least that's what the song says.

In a Cal Poly mathematics class offered this quarter, students are learning the probabilities and conditions that make the hold-'em-or-fold-'em strategies more profitable.

But more importantly to instructor Clifford Williamson, they are learning that math is something you don't necessarily have to run from.

"The class is Math 112, The Nature of Modern Mathematics. It's a general education class that fulfills the B.2 requirement."

In the class, Williamson said students learn to employ problem-solving and analytical skills that can eventually be used to evaluate their chances at various gambling games like tic-tac-toe, roulette, slot machines and keno.

"The payoff to Williamson is the interest students have in the class and how it helps ease some misconceptions of mathematics."

"I ran into a student off campus, and he came up and asked about one of the problems on the homework," Williamson said.

"I felt like I must be doing something right here if students are actually coming to me and asking about their homework," he said.

"I think the people you tend to get in a class like this have had very unfavorable experiences (with math) and somewhat of a humiliation," he said.

"People get the attitude that "I can't do this," or "this is probably a stupid question." You need to help them get over those hurdles and forget about the past. Start with a clean slate," Williamson said.

Williamson likes to use an analogy of someone who has been punched in the face so many times that if a hand is raised toward them, they cringe.

"People seem to react that way toward math," he said.

Williamson said people normally learn traditional methods of solving problems but they don't check up the method themselves.

"What I would rather do is give them different classes of problems where they have to come up with a way to do it. What the little trick is, is for them to actually solve the problem."

One problem assigned early in the class was to place five coins so that each one touches the other four.

"I think the problems the class has been solving are not easy and many take some reasoning and ingenuity. They are problems that don't have a convenient method or "recipe" for solutions," he said.

"It's difficult because you have nothing to fall back on," Williamson said.

"I think the people you tend to get in a class like this have had very unfavorable experien­
ces (with math) and somewhat of a humiliation," he said.

"People get the attitude that "I can't do this," or "this is probably a stupid question." You need to help them get over those hurdles and forget about the past. Start with a clean slate," Williamson said.

Should corporate sponsors advertise at Cal Poly?

I think anytime we can get corporate sponsorship, especially with the budget situation the way it is, we should.

I think it's okay. It's not bad. I'm glad they do come on campus. It gives students the chance to see the types of corporations that they might get involved with when they graduate.

I think it's all right because it gives students a chance to look at things, and it's not hurting anybody when they come on campus and give their ideas.

I think it's okay to have the campus open for advertising. It's a good way for people to know what's going to be around after college. It's fine. People are into their studies and can make decisions for themselves.

The corporations should be a part of campus. They didn't keep people away from class.

I think that any kind of corporate sponsorship should be a part of campus. It's a place for education it's not a place to try and make money off of. Especially for students who don't have a lot of money.

I have a real problem with that. I think a learning institution was a place for free advertising.

I think it's not a good idea. I don't think corporations should be involved with when they come on campus and give their ideas.

I think it's all right because it gives students a chance to look at things, and it's not hurting anybody when they come on campus and give their ideas.

I think it's okay to have the campus open for advertising. It's a good way for people to know what's going to be around after college. It's fine. People are into their studies and can make decisions for themselves.

We're adults. We're old enough to decide what we want for ourselves. The Nintendo thing looked neat and I don't think it kept people away from class.

I think it's all right because it gives students a chance to look at things, and it's not hurting anybody when they come on campus and give their ideas.

I think it's all right because it gives students a chance to look at things, and it's not hurting anybody when they come on campus and give their ideas.

Get-rich-quick, work-at-home schemes deliver empty promises

By Glenn Policare

Advertisements like these can be found in almost any magazine or newspaper's classified section, usually located under the heading of business opportunities.

Companies that place these ads will promise huge profits and big part-time earnings while you work in the comfort of your own home.

It sounds like a lot of cash for a minimal effort. All one has to do is figure out how to spend this additional income. How does Fiji sound for spring break? A new car would look nice in the driveway. Tuition, books and beer could be paid off for the year.

What does it take to get started? Could I do something like this? Is it too good to be true?

Yes.

Work-at-home schemes thrive on the curious and survive thanks to the unwary.

Ron Yamato, postal inspector for the San Bruno Western Regional Postal Inspection Service Headquarters, said that most work-at-home schemes are just that—schemes.

From October 1990 to September 1991, 1,525 work-at-home schemes were reported to Yamato's office and "98 to 99 percent of those had something wrong with them," Yamato said.

Companies that are reported for suspicious activity are sent a statement of voluntary discontinuance from the Postal Inspection Service which asks them to willingly close down their business or provide proof that the business is legal.

At this point the person(s) in charge will either cease their business practice or pack up and relocate, Yamato said.

"We can tell if company XYZ is now doing business as company ABC," Yamato said. "We have a few investigative techniques that I'd rather not discuss."

According to the Better Business Bureau, a local consumer investigative service, reported it had put close to 3,500 of these work-at-home operations out of business through mail stop orders, consent agreements or criminal proceedings.

Most of the work-at-home schemes operate in a certain fashion. Whoever is operating the business places ads in tabloids, magazines and newspapers, including Mustang Daily.

The widespread envelope-stuffing scam is by far the most popular, Yamato said. Ads coax prospective customers to mail away for free information on how they can get started down the road to riches.

The usual initial investment is simply a self-addressed, stamped envelope. The typical scenario of these scams is as follows:

A few days after a customer sends his or her envelope, the customer receives information on how to make thousands of dollars stuffing envelopes at home. The flyer will make claims that this company needs home workers to stuff and mail circulars for them. No experience is necessary, and the customer can start immediately.

To get started, the customer must mail a fee that ranges anywhere from $8 to $20. This cost is to ensure that the customer is serious about working for this company. Some companies will also offer a more expensive overnight rate to get customers started even sooner.

In a week or so, the customer receives an envelope in the mail from the company. Inside will be information on how the customer can start his or her own mail order service.

First, the customer will be told to place ads in newspapers and magazines similar to the ad he or she responded to.

People will then mail the customer self-addressed stamped envelopes which the customer will stuff with the circular he or she responded to and hope that the person who inquired about making thousands of dollars will check.

The vicious cycle continues until everyone in the country has been scammed and then the game ends. The cycle doesn't take long.

Consider the results if one person got six people to buy the program and those six people recruited six people and so on.

By the ninth cycle, over 10,000,000 people would be involved.

Robert Roth, an architecture junior, fell victim to one such scam. Roth said he was answered an ad he saw in Mustang Daily. Roth claimed he would make thousands of dollars stuffing envelopes at home.

"I did it as a thing with a couple friends," Roth said. "We thought it might be a scam." Roth was taken for $20 and the cost of a few stamps. "We didn't even have the envelopes," Roth said.

"I was too good to be true," Roth said.

Most work-at-home schemes can be checked into to see if they are or aren't legitimate. A letter to the Better Business Bureau, a local consumer investigative department or the Postal Office, along with the material in question will suffice.

The Better Business Bureau advises curious consumers to remember, whether it is envelope-stuffing, assembling products at home or raising rabbits for cash, to investigate before you invest. The bureau cautions consumers against some typical characteristics of the fraudulent business.

Work-at-home promoters will never offer regular, salaried employment.

They will require money for instructions or merchandise before telling how the plan works.

In the end, the Better Business Bureau information reaches the following conclusion: many of these career opportunities will only take the customer's money and give little or nothing in return except for shattered dreams and a lighter wallet.
Poly brings 92 firms to Career Symposium

Program aims to reveal job opportunities

By Tracey Adams
Staff Writer

Students will get a smorgasbord of job information Thursday when 92 businesses gather in Chumash Auditorium for the 13th annual Career Symposium.

The symposium will offer students a chance to be frank and ask a lot of questions, said Debi Caccese, coordinator of the on-campus recruiting program which is sponsoring the symposium.

"This is a chance for students to ask honest questions about different companies without the pressure of being in an interview situation," said Caccese.

The symposium is geared toward career exploration and targeted at Cal Poly students in all levels of any major, Caccese said.

"Some students will bring their resumes, but that's not really the focus of this forum," she said. The focus is to let students find out information on all aspects of a company including pay scale and the range of positions available, Caccese said.

Cindy Bennett-Thompson, associate for Cal Poly Outreach Services, is also on the planning committee for the Career Symposium.

Bennett-Thompson said the purpose of the symposium is to expose students to a great variety of career opportunities.

While Caccese said that recruiting is not the focus of the event, Bennett-Thompson said that "most of the companies attending are actively recruiting."

"This will give students an idea of what companies are out there looking to hire," she added.

Companies such as Hewlett Packard, J.P. Morgan, Bullock-Macy's, Smuckers, IBM and Zacky Farms will have booths in the auditorium from 10 a.m. to 3 p.m. with written information and company representatives to answer questions.

In addition to the symposium, two instructional workshops also will be given.

A workshop on job-hunting strategies in a tight economy will be held Thursday from 3 to 4 p.m. in staff dining room B.

Another workshop focusing on how to get the most out of the Career Symposium will be held Wednesday from 2 to 3 p.m. in the U.U. room 220.

"This is a chance for students to ask honest questions about different companies without the pressure of being in an interview situation."

Debi Caccese, on-campus recruiting coordinator.

Senate keeps faculty up-to-date on CSU

By Julia Greenberg
Staff Writer

To students and faculty, the Chancellor's Office in Long Beach may be just a remote and distant entity where decisions about their scholastic future are made.

But Tim Kersten, a Statewide Academic Senate representative for Cal Poly, makes it his business to keep this university's faculty abreast of happenings within the CSU system.

"Almost everybody is aware of Academic Senate at Cal Poly, but Statewide Academic Senate is separate, although we do keep connected in several ways to achieve mutually beneficial goals," Kersten said.

"But other campuses are having some problems with athletes having difficulty maintaining a strong GPA. Faculty from all the schools are really concerned with this," he said.

Although most Statewide Academic Senate meetings are held in Long Beach, members travel throughout the state to see how programs are working at different schools.

"It is not usually a problem (when coupled with sports)," Gooden said.

"At Cal Poly, we run a really clean athletic program, where scholastic achievement is not usually a problem (when coupled with sports)," Gooden said.

There are a total of 60 representatives from the various CSUs. Of these, Cal Poly has three.

The senate works with the chancellor and the Board of Trustees on such issues as budgeting and curriculum requirements.

Once elected to the senate, representatives can be appointed to different committees such as Faculty Affairs, Academic Affairs Committee, or Internatinal Programs and the Executive Committee.

Reginald Gooden, a Cal Poly political scientist professor and member of the three representatives, is currently serving on the Academic Affairs Committee.

This board, he explained, works to solve issues which may be affecting several Cal State campuses. Those issues include topics such as athletics and scholarship.

Now available on the installment plan.

Here’s a way to learn faster and work smarter without putting a lot of cash down. It’s called the Apple Computer Loan. Right now, qualifying students, parents borrowing on behalf of students, and faculty and staff members with an annual income of at least $15,000, can purchase an Apple® Macintosh® computer system using a special financing plan set up just for you.

Apply to borrow from $1,500 to $10,000 for a Macintosh computer, other Apple products—including the Apple Care® extended service plan, and up to three software packages.

If you’re a student, you’ll be able to defer principal payments for up to 48 months while in school, making interest-only payments until 30 days after you graduate or leave school. Interest rates are surprisingly low, and you can take up to eight years to repay.*

So stop by today and fill out a loan application.

Because this is one way to afford a Macintosh, even if you can’t afford a Macintosh.

From page 2, magazine covers can never guarantee instant credibility at the box office. This is a producing world where the stars of the movies are not the only people who make the difference. The results of the Academy Awards are often used to predict box office success, but in many cases, these predictions are not accurate. One example of this is "Bugsy," which, despite being a critical success, did not perform as well at the box office as expected.

However, there are some films that have managed to achieve both critical and commercial success, such as "Driving Miss Daisy." This film, which won several Academy Awards, also managed to appeal to a wide audience and grossed over $106 million in its box office returns.

Another example is "Fried Green Tomatoes," which also won several Academy Awards and proved to be a box office hit, grossing over $39.6 million in its first week.

In conclusion, while the Academy Awards can be a useful tool for predicting box office success, they are not always accurate. The success of a film depends on a variety of factors, including the film's marketing, the audience's interest, and the competition from other films at the box office.

Workshops that focus on Europe are offered free.

Right now, we have three trips in the planning process. Two will be during the spring quarter break, and the third will be at the beginning of summer.

The springtime trips will be to Costa Rica and Baja California, Mexico.

The Baja trip will be focused on travelers interested in doing some serious sea kayaking. Experience level for the trip is going to be from complete novice to world champion, as our leader is a world champion sea kayaker.

Costa Rica has been set up for people interested in the undiscovered country of Costa Rica and its raw beauty. The price of the trip is $377, and for $100 extra, you can get in on the ground level for the trip.

Our third trip will be an extensive trip to Spain for two weeks. The main focus will be on the Spanish culture and its surroundings. The group will be visiting various castles and museums.

If you ever have any questions, feel free to stop by or call Lani, Jaimie or Tim at 544-9442.

The Baja trip will be focused on travelers interested in doing some serious sea kayaking. Experience level for the trip is going to be from complete novice to world champion, as our leader is a world champion sea kayaker.

Costa Rica has been set up for people interested in the undiscovered country of Costa Rica and its raw beauty. The price of the trip is $377, and for $100 extra, you can get in on the ground level for the trip.

Our third trip will be an extensive trip to Spain for two weeks. The main focus will be on the Spanish culture and its surroundings. The group will be visiting various castles and museums.

If you ever have any questions, feel free to stop by or call Lani, Jaimie or Tim at 544-9442.

MUSTANG DAILY

Outreach hosts H.S. student tour

Daylong program provides introduction to university

By Tracey Adams

Cal Poly University Outreach Services is determined to show 85 high school students that college is a real possibility. Selected high school students will visit Cal Poly Thursday to learn what college is all about.

Local students, as well as students from cities as far away as Bakersfield, will be attending. "It's an all-day event," said Cindy Bennett-Thompson, a university outreach associate. "Students will be exposed to different career choices and find out what it takes to get into college."

The event will begin with a seminar on Cal Poly's admissions system and have a question-and-answer session with a panel of current Cal Poly students, said Bennett-Thompson.

A lunch break will be provided and students will end the day with a one-hour visit to the Career Symposium, an all-day event for Cal Poly students to talk with perspective employers, she said.

University Outreach services holds this event during the Career Symposium to let high school students finish their day seeing the end product of a college education, Bennett-Thompson said.

Since only 85 students are able to attend, selection is left up to each high school to choose students they feel will benefit from this program the most.

"We suggest to the schools that it may be a good time to bring students who might not have already decided on college," she said.

LIBRARY

From page 1

Walch said that the nature of Cal Poly curricula, the way professors teach, and the quality of education are reflected in how much students use the library.

"Our library use exceeds any other library in the CSU system," Walch said.

An average of 61 items per student per year are checked out of Kennedy library compared to 27 items per student per year at other CSU campuses, Walch said.

The library hours are also above average compared to other CSU campuses, said Jean Gordon, circulation supervisor.

The CSU library average for open hours is 71.9 hours per week, Gordon said. The Kennedy Library is open for 81.5 hours per week.

At Cal Poly, however, is the only CSU library closed on Saturday, Gordon said.

Other CSU campuses

WORLD

a telephone interview with the Monday Sentinel and from his office in San Francisco. "I think a person who did what Dahmer did was insane."

"I'd make a bet that by the year 2000 this guy will begin to manifest some overt and clinical signs of insanity," Belli said.

The jury had a difficult task, Belli said.

"It's a terrible thing to have to ask a jury to play God and determine whether someone is sane or insane," Belli said Monday. "At least they didn't have the death penalty to consider because your laws are a little more civilized than we are now here."

The jury decided Saturday that Dahmer was found to be insane when he murdered 15 men and boys.

Belli has practiced criminal and civil law for more than half a century and is perhaps best remembered for his defense of Jack Ruby, the man who shot and killed Lee Harvey Oswald while millions watched on television.

Meanwhile, Laurence H. Tribe, a professor at Harvard University Law School, praised the performance of Milwaukee County District Attorney E. Michael McCloskey and defense attorney Gerald P. Boyle.

"The case was handled quite competently on both sides," said Tribe, a professor of constitutional law.

"I think it would be a mistake to attribute the result of this case to some ineffectiveness of the lawyers. The jury, in particular, performed its task admirably."

a telephone interview on the west coast.

South Korea, still suspicious about North Korea's intentions, urged its rival to sincerely implement the accords, which go into effect when the prime ministers of both Koreas meet Wednesday.

South Korean President Roh Tae-woo signed the agreements Monday.

The accords call for the two Koreas to resume hostilities and coexist peacefully, but it was unclear whether they would immediately help ease the bitter rivalry that followed their partition in 1945.

"Written pledges alone will never bring peace or unification," South Korea's prime minister, Chung Ju-Young, said today in a dinner speech in the North Korean capital, Pyongyang.

Chung said a sincere and smooth implementation of the accords is the key to genuine reconciliation. In an earlier statement, he urged an early solution of the international controversy over the north's suspected nuclear weapons development.

He demanded North Korea dispel international concern over its nuclear intentions by quickly ratifying a safeguards accord it signed with the U.N. International Atomic Energy Agency on Jan. 30.

The prime minister also urged the north to accept Seoul's call for inspections of suspected nuclear weapons sites. The Koreas agreed in December to conduct pilot inspections of nuclear weapons sites, but no inspections have been scheduled.

North Korea, one of the world's most hard-line Communist states, is reported to be nearing the capability to make nuclear bombs as early as 1993.

Pyongyang denies it has a nuclear weapons program.

Riders rally against law

About 50 people showed up at the County Government Center at 11 a.m. Sunday to protest California’s new law that says motorcycle riders must wear helmets. The protesters had a wide variety of ages and many participants were members of local Harley Davidson groups. The protesters had a petition stating displeasure with the law and also registered people to vote. Most protesters rode motorcycles to the rally (right), and one rider let his helmet make an ironic statement (below right). James Huston (below) was one of many protesters who wanted the law repealed.

WANTED:

WHITEWATER RIVER GUIDES

Kings River Expeditions is looking for people interested in becoming professional whitewater river guides. Prerequisites include a positive personality and the ability to work hard and maintain a good attitude around guests and fellow staff.

Applicants interview for acceptance into our 1992 Whitewater Guide School, which will be conducted March 28-29 and April 4-5. Guide School candidates will be trained to river guide and handle river-related emergencies. All meals, instructional materials and equipment are provided during the school at no charge. Full-time summer guide positions will be selected on April 18 from those who have successfully completed the course.

First-year guides earn approximately $55 a day. Daily wages can be increased if a person has a Class B driver’s license, musical/theatrical ability, and emergency medical technician certificate or experience as a photographer. Room and board are provided for all staff for the length of the season (tent camping and excellent meals).

Interviews for river guide positions will be conducted March 2-13 only. You must submit an application prior to your interview.

For specific job information and to schedule an interview, call Janice at (209) 233-4881.

CALL 10 A.M. - 10 P.M.

REGULAR RATES APPLY. All dates are subject to availability. Spring Break is guaranteed. No groups of 6 or more people. All reservations are confirmed on a first-come, first-served basis. For information, call your travel agent or (209) 233-4881.

The image also contains an advertisement for an ocean liner cruise to Mexico, including roundtrip cruise, hotel accommodations, meals, and a drinking age of 18 in Mexico. The ticket price is $529, and tickets are valid for 1 year from the date of purchase. The cruise departs weekly. For more information, call 1-800-444-5364.
Injury-free victory just what Poly ordered

By Peter Hartlaub

Editorial Staff

came to a close, an ideal ending to an up-and-down year — a solid win with no injuries. The Cal Poly wrestling team beat the Wyoming Cowboys, 25-15, Saturday in Mott Gym to bring its final season record to 6-8-1.

The victory against Wyoming, a team that competes in the Western Athletic Conference, was Poly's second win in its last eight matches. Cal Poly wrestlers Seth Woodill (heavyweight) and Pat Morrissey (142-pound class) both pinned their opponents in the first period.

After opening at the 118-pound class with an 8-3 decision win by Joey Dancy, Cal Poly dropped the next two matches, leaving itself with a 9-3 deficit. Then Morrissey, who wrestled in his second match since recovering from a knee injury, pinned his man two minutes and 12 seconds into the first period.

Cal Poly Head Coach Steve Beason said about Clawson's performance, "He played very well, but he always plays hard." Matt Clawson entered a close contest with 12 minutes left in the half and scored the Mustangs' next 12 points for a 32-21 lead. During that stretch, he nailed three three-pointers.

The official scorer had to work fast Saturday to keep up with Matt Clawson in the first half of Cal Poly's 105-93 win over the Cal State San Bernardino Coyotes.

"After last night we really wanted to get this one," Clawson said. "Luckily, the shots were falling tonight." In the first half of Cal Poly's 105-93 win over the Cal State San Bernardino Coyotes.

"We're in a position where we can do what our goal was (to make the conference tournament)," Beason said about Clawson's performance. "He played very well, but he always plays hard." Matt Clawson, Cal Poly guard

WOMEN
From page 13
game makes our defense go." 
Brothers said Cal Poly also made good use of a slight team height advantage. "They put up our guards really well. They would get offensive rebounds and just put it back in."
The Mustangs came out strong in the first half, working their way to a 13-point lead at one time. The Panthers came back to make the halftime score 37-29.

The second half was a little bit closer," Orrick said.
The Panthers began that half aggressively to cut the Mustangs' lead to just four, but never got closer than three points the rest of the game.
The lifts the Mustangs' California Collegiate Athletic Association league record to 5-5 and 14-10 overall.

Freshman forward Susanne Corey led the scoring for the Mustangs with 14 points, including a perfect eight-for-eight performance from the free-throw line.
Junior forward Carrie Schmidt had 10 points and nine rebounds. Junior forward Beth Nelson contributed eight points and four rebounds in Saturday's game after achieving a career-high 29 points against UC Riverside on Friday.

MEN
From page 13

"It's going to come down to three teams fighting for the third and fourth playoff spots - Pomona, Dominguez Hills and us."
Steve Beason, Cal Poly coach

"Hey, we won one," Cowell said. "After a tough road trip and our injury situation, I have to be satisfied with the win. Now we get two weeks to heal."
Cal Poly Head Coach Leonis Cowell had no complaints about the Mustang victory.

"Hey, we won one," Cowell said. "After a tough road trip and our injury situation, I have to be satisfied with the win. Now we get two weeks to heal."

Cal Poly will rest those two weeks before the Pac-10 Championship in Eugene, Oregon, on Feb. 28-29.
Cowell said he was impressed by most of the performances and hoped returning injured wrestlers Nate Erickson, Eric Schwartz and Bill Green would help for a good Pac-10 showing.

WRESTLING
From page 13

Cal Poly's Ryan Sakal wrestles Wyoming's Jason Gregerson.
Williamson admitted he had trouble figuring it out himself. "Someone solved it last winter when I taught the course. It was a tough problem, but students could do it and I couldn't," he said.

Although gambling is the theme, Williamson is quick to point out that it is a math class, not a gambling class. He said the gambling is like a conduit to get mathematics across to students. "We've got to learn all the math principles," he said.

And in case anyone gets car- ried away, one of the texts, called "Custard Holiday," carries a warn- ing: "The last page of the book has an ad for Gamblers Anonymous," Houchin said.

Congratulations!! William Hall for winning the Mustang Daily Valentine's contest.

Ten years ago, when this graduate student needed a Sun workstation, he built it.

Today they're a lot easier to get.

When Andy Bechtolsheim was a graduate student at Stanford University, he couldn't get a Sun workstation anywhere. Not in a lab, not in a store. Powerful, open computers simply didn't exist.

So he built his own — the first Sun workstation.

And now they're everywhere. From college campuses to research facilities, people use them every day to make new discoveries.

And so can you. Because buying a SPARCstation™ IPX, our newest low-cost graphics system, is as easy as visiting your campus bookstore or computing center.

The SPARCstation IPX has a graphics accelerator for interactive manipulation of 2-D and 3-D wireframe models, and 8-bit color and grayscale support. The SPARCstation IPX also gives you built-in networking capabilities and access to more than 3600 SPARCware™ solutions. And it’s backed by our on-campus service and support.

No other system offers more power and graphics functionality for the same price than the SPARCstation IPX, which means you couldn’t get a better workstation unless you built it yourself.

And since Andy’s already taken care of that, why not just come in and see the SPARCstation IPX today.
