Departments cut due to budget crunch

By Allison Gatlin
Staff Writer

Two departments are facing extinction and a third has also been recommended for phase-out as Cal Poly's proposed 1992-93 budget comes up short.

The engineering technology and home economics departments are scheduled to be cut in an effort to improve operating expenses and to absorb budget cuts facing the university. Recreation administration was named as a recommended cut, although the recommendation has yet to be acted on.

Engineering technology is being cut to pad the rest of the school operating expenses and to absorb the school's $656,300 budget deficit, said ET Department Head Kim Davis.

A memo from Robert Koob, vice president for Academic Affairs, recommended to the School of Engineering Dean Peter Lee to phase out ET in one year, Davis said.

"They're sacrificing ET to let other departments buy equipment for labs and other operating expenses," Davis said.

The proposed cuts, specified in Koob's memo to each school, are an effort to boost faculty salaries with operating and equipment expenses, said Charlie Crabb, interim associate vice president for Academic Resources.

As in past budgets, cuts to operating expenses are once again greater than cuts to faculty costs in the proposed 1992-93 budget, he said.

"The cuts recommended in Koob's memo are intended to close the gap between the two budget areas," Davis said.

"We have to maintain some balance between the faculty here and the resources to support them," he said.

Davis, who said he was still in shock from Tuesday's announcement, met with Koob that night to discuss the situation.

"It was a complete surprise," she said. "My faculty and students are in a state of shock."

Weber also said she was not given any notice.

SLO buys into state water

Council votes 3-2 to join project despite protest

By Jason Foster
Editorial Staff

San Luis Obispo finally came to the State Water Project.

The City Council voted 3-2 Tuesday to authorize Mayor Ron Dunin to sign contracts with San Luis Obispo County that would enable the city to get up to 3,000 acre-feet of water per year from the project.

State water advocates said the decision will preserve the city's economy and quality of life. Opponents said state water is not needed and would fuel unwanted growth.

After creating foundation, polySCOPE looks to future

By Carol Boosembark
Staff Writer

Cal Poly students involved in the Students' Coalition Organized for Politics (SCOOP) say they are on the move.

After forming a strong foundation, coordinators and members of polySCOPE said they are planning to address campus clubs in May.

"PolySCOPE's main goal is to coordinate a committee in an effort to get students involved in local community politics," Ruby said.

Although previously dubbed a "radical group," Ruby said polySCOPE would like to field a candidate who recognizes student concerns and is able to make intelligent decisions about cuts not directly related to students.

"We are not a radical organization. One of our main goals is to get a student elected through the primary who has a strong political base, so that person will have a strong voice on other issues besides student concerns," Ruby said.

Gregory O'Keily urged council members Tuesday night to stay away from the State Water Project.

"I urge you to stay away from the State Water Project. Oceans and Nipomo already have committed to state water," he said.

Rapp suggested that the city has made a commitment to purchase water.

"When you have more participants, then it's a bigger deal," Hetland said. "Larger amounts of water can be contracted for and it makes more sense for the project."
Blast levels blocks of city, hurts hundreds

GUADALAJARA, Mexico (AP) — A mass explosion apparently from sewer gases leveled dozens of square blocks of this western Mexican city Wednesday, and hundreds of people were injured, authorities reported.

The Red Cross said hospitals were filled and that the army has taken charge of the situation.

"The situation is extremely grave, extremely serious," said AP correspondent Nicolas Ramirez in Guadalajara, Mexico's second-largest city, about 350 miles northwest of Mexico City.

The government news agency Notimex said there were no confirmed deaths but that much of the destroyed area had not been searched.

The agency said residents of the damaged area had been complaining since Tuesday that gas had been seeping from sewer drains.

The explosion occurred about 10:30 a.m. (12:30 EDT), Notimex said.

Wartime bones show signs of experiments

TOKYO (AP) — Bones found at the site of a wartime Japanese military medical school indicate that experimental surgery was carried out in Japan on bodies that likely came from China, a specialist said Wednesday.

But Hajime Sakuta, an anthropologist who studied the bones, said he could not conclusively prove that the bones were linked to germ warfare victims of a secret Japanese military unit based in China during World War II.

However, an expert in Japan's wartime germ warfare experiments predicted the bones "may exclusively prove suspicions that the bones probably came from China, a specialist said Wednesday.

The CAL Poly Amateur Radio Club is a club for ham radio operators. Ham radio operators are FCC-licensed to operate on amateur radio frequency. The frequencies are standardized throughout the world.

"We just have fun talking to people all over the world," said Dan Matson, a member of the club.

The club assists the San Luis Obispo area by providing emergency communication. This morning, the club will be working with Public Safety and local authorities in a emergency earthquake drill. The club will be setting up their radio and equipment by the Administration building.

Members also participate in public service events. The first weekend in May, the club has plans to help with communication at the March of Dimes walk in Paso Robles and at the Wildflower Triathlon.

Jury convicts day care owner of abusing kids

FARMVILLE, N.C. (AP) — The owner of the Little Rascals day care center was convicted Wednesday of sexually abusing children in his care.

Robert F. Kelly Jr. was convicted of 56 charges of taking indecent liberties, first-degree sexual offense and crimes against nature involving the first nine children named in the indictment.

The jury handed the judge its verdict sheet at 2 p.m. after 14 days of deliberation on 100 charges. The reading of the verdicts was continuing at midafternoon; there had been no innocent verdicts.

Parents sat in the courtroom with clenched fists as the guilty verdicts were read. Kelly sat very still and briefly closed his eyes.

Death row convicts now face execution

SAN FRANCISCO (AP) — As Robert Alton Harris took his last breath and died in California's gas chamber, three other death row inmates moved no closer one step closer to their own appointment in the infamous green room.

Those inmates are closest to the gas chamber among the 330 people sentenced to death in California.

Two of the cases, like Harris', have already raised issues of mental disturbance.

One man, Melvin Meffrey Wade, was described by his trial lawyer to the jury as so tormented that a death sentence might free him from "that beat from within." Another, Edgar Hendricks, had one of his two death sentences overturned because the trial judge mishandled a sanity hearing.

Wade, convicted of battering his 10-year-old stepdaughter to death in San Bernardino in 1981; Hendricks, convicted of murdering two San Francisco men during robberies in 1986; and Bernard Hamilton, convicted of murdering and decapitating a San Diego woman in 1979, are the three condemned prisoners whose cases have advanced furthest through the court system.

California per capita income rate decreases

WASHINGTON (AP) — Adjusted for inflation, Americans' per capita income shrank in 1991 for the first time in nine years, the government said Wednesday.

Personal income totaled $19,092 per person last year, just 2.1 percent more than in 1990, the Commerce Department said.

**Former ASI president delivers grad speech**

By David Voros

A Cal Poly alumnus who is an agriculture industry adviser will be the commencement speaker for both the morning and afternoon graduation ceremonies at Mustang Stadium on June 13.

Former ASI President George H. Soares, a 1966 ag business management graduate, has been selected to address the 1992 Cal Poly graduates.

Soares earned a law degree from the McGeorge School of Law at the University of the Pacific in 1973.

He went on to become a founding partner in the law firm of Kahn, Soares & Conway. The firm represents agriculture production associations before the California State Legislature, in addition to various administrative agencies.

Soares' extended involvement with the university began during his studies at Cal Poly, said Foundation Executive Director Al Cornell, a longtime friend of Soares.

"He started getting real involved in the Poly Royal activities and then he moved into state level government," Amarey said, "ending up as ASI president for the '65-'66 (school) year."

As ASI president during his senior year, Soares was involved in the annual Poly Agri View theme, and in the past year, he helped to develop the school's Agri View.

**Grad tickets, paraphernalia ready May 4**

By David Voros

With graduation approaching fast, the Grad Center in the El Corral Bookstore is preparing to open.

On May 4, graduating seniors can obtain guest tickets, detailed instructions and caps and gowns for a $20 commencement fee.

The Grad Center will issue 10 guest tickets to candidates paying the commencement fee in person for the June 13 graduation ceremonies at Mustang Stadium.

Only those who pay the fee before May 4 will be allowed to do some fund raising. However, Kaminaka said, the primary focus of the day should continue to be education.

"The club that wishes to fund raise must first make a commitment to chaperon a group of students during the day," he said.

Many items will be available to commemorate the event. The first official Poly Agri View t-shirt as well as ag school sweatshirts and sweatshirts will be sold at the information booth. Commemorative coins, from this year and last, will be on sale for $20 at the same location.

Guests will be given tours of the agricultural units on shuttle buses that will run from 10 a.m. to 3 p.m.

To accommodate the number of people expected to attend Saturday, the Poly Agri View committee is in need of individual (preferably ag students) with a Class II or B license. For more information, contact Kara Jowes, head of facilities and logistics, at 541-3989.

**Ag open house to begin Friday**

This year's Poly Agri View theme focuses on progress in agriculture as well as display our progress within the schools and the industry. "It's a means by which the school can recruit new students, as well as display our progress to alumni, friends and the industry," Kaminaka said.

According to Steve Kaminaka, the event for the clubs and the school will focus on agriculture education through demonstrations, booths and tours of the agricultural on-campus units.

Some of the demonstrations include putting tree and logging, flower, horse and safety exhibits.

The two-day event focuses on educating different audiences.

On Friday, about 1,000 high school and elementary school students from across San Luis Obispo County will visit the school.

The best agricultural clubs will greet the students at their tables and display their progress in the field. Educating the students about an often foreign concept - agriculture - will be emphasized as well as the progress made within the clubs and the school.

Kaminaka said the school must make younger kids aware of agriculture as they are the future decision makers.

Soares' extended involvement with the university began during his studies at Cal Poly, said Foundation Executive Director Al Cornell, a longtime friend of Soares.

"He started getting real involved in the Poly Royal activities and then he moved into state level government," Amarey said, "ending up as ASI president for the '65-'66 (school) year."

As ASI president during his senior year, Soares was involved in the annual Poly Agri View theme, and in the past year, he helped to develop the school's Agri View.

Opinion

And then they came out of the sky...

By John Hubbell

On Wednesday evening, KSBY-TV's "Action News" concluded airing a three-part series exploring the possibility of extraterrestrial life forms in the universe. The final installment left me right out of my bed: Green aliens with big eyes. Done come cut the capital gains tax, the UN browsing through; "Well, Bush agin picking up your paper and work in daily journalism. Im-passed sanctions against Libya much more interesting."

That's why I went life my just that much more interesting. That kind of wishful thinking is more akin to somewhere like UC Berkeley, where UFO's head regularly and half the faculty carries subscriptions to "Wright's Lying Times." Poly types tend to be a bit more grounded in reality.

That in mind, I went down to the library and looked up physics professor John Mottmann. Mottmann, a student of Hartlaub and UCLA Ph.D., let me squeeze by with a C- in Stellar Dynamics and a passing grade in "Stars and Galaxies" class. That qualified him as a pagan god in my book, as he seemed like the right man to talk with. If he could buy the UFO idea, then I could too.

But science tends to rationalize the universe. The final installment turned out UFO's and aliens are rare exceptions. Even Mottmann explaining that he would enter the slightest novelism. His only argument was "Okay, something Out There."

I was perusing "How stuff works" through his telescope one night, and he yelled, "What in hell is THAT?"

No dice. Instead, Mottmann explained that if Earth is indeed playing a part of the universe, then the UFO's are just the evidence that things in space are so far away from us that no one really cares — at least not the government.

What's more, scientists have never sent out radio signals from that big transmission in Puerto Rico for years now. They still don't get a SIGNAL. They get nothing.

It must be a really great job, and it's really stupid, and I'm just like the right man to talk with. If he could buy the UFO idea, then I could too.

According to his own beliefs, Hartlaub, the author of "Aliens! Green aliens. Green mixtures never recorded before." John Mottmann says — for space exploration.

And while it always turns out that this money is not the property of state schools.

Regarding the April 21 editorial on "golden handshakes," From the information in this editorial, you need your readers to believe that retirees are "taking exorbitant amounts (of money) from state schools in this time of need." Unfortu-nately, you fail to realize that this is money the employees themselves who reap the benefits of the program need. The plan is designed to help them when they retire.

State Water decision was not environmentally responsible

The Issue: The San Luis Obispo City Council's decision to participate in the State Water Project.

The decision to put short-term wants ahead of long-term needs was made Tuesday night at the City Council meeting.

The 3-2 decision committing the city to state water may benefit the city in the long run, but it may not benefit the city in the short run. What's more, green laws are here for a number of years — if the system can deliver.

The decision to go for state water may also benefit city residents.

State Water will provide for the City of San Luis Obispo. It's obvious that it is bad for one person to dump his garbage on his neighbor's land in order to preserve his environment. It that the City Council made the decision to go for state water.

Chalking a tradition of Italian art

I Madonnari Festival brings color, culture, creativity to Mission Plaza

By Jennifer White
Staff Writer

The Mission Plaza and its adjacent streets will come alive with color this Saturday and Sunday when the I Madonnari Italian Street Painting Festival comes to San Luis Obispo for the first time.

Hosted by Children's Creative Project, a non-profit arts education organization, I Madonnari of San Luis Obispo features local artists creating works of art on street pavements.

Street painting, which uses chalk as a medium, has been an Italian tradition for hundreds of years.

I Madonnari originated in the 16th century when war veterans drew pictures on the ground to make a living. These veterans would travel from festival to festival throughout the country creating drawings in front of churches. Unlike today's wide variety of drawings, however, the war veterans focused on the Madonna, hence the name I Madonnari.

Since the 16th century, the street painting tradition has been celebrated each year at the International Street Painting Festival held in Grazie Di Curatone, Italy. The festival has also been celebrated in Santa Barbara for the past five years.

Kathryn Friend, North County project coordinator for the Children's Creative Project, said that the festival expanded to San Luis Obispo because of all the success Santa Barbara was having.

"We're hoping it will become an annual event (in San Luis Obispo)," she said.

More than 165 sponsored pavement squares, ranging in size from 4-by-6 feet to 12-by-12 feet, will be used by local artists, architects, graphic designers, students and children to create their own unique product on their pavement canvases.

Each of the squares is sponsored by businesses, individuals or organizations. In return for their financial support — squares cost $75 to $450 depending on the size — sponsors will be advertised by having their name written above the image being drawn.

Patricia Groves, owner of Main Lighting in Morro Bay, is one of the many sponsors who will participate in this year's I Madonnari.

Groves purchased a $75 square with the request that someone from Morro Bay do the drawing: "I thought it would be neat to see some people from Morro Bay involved in the drawings," she said.

Sponsors can provide their own volunteer street painters, or, if they choose not to, the festival will arrange artists themselves for interpretation. Each of the squares will be advertised by having their name written above the image being drawn.

Since the 16th century, the roundy moundies occasionally, but prefers sculptures, which lend appeal and a sculptural appearance.

Most commercial flower shops create what he calls the "roundy moundies" — those arrangements made with a large amount of baby's breath.

Gordon said he will make the roundy moundies occasionally, but prefers sculptures, which lend themselves to interpretation. Having his distinctive work all in the gallery will be a delight, La Barbera said.

"I've been a fan for a long time," La Barbera said.

"He's the kind of person that if he doesn't do what he wants, whether they are real, dried or silk," La Barbera said. "His manipulation of floral elements is impressive to those who appreciate that type of work, because in his hands he has the feeling of organic growth."

In the exhibit, Gordon will display how new trends of floral design can be used to enhance the home. Presented upon a movable partition draped with a swath of cloth, a floral arrangement blooms from a picture frame, demonstrating one example of this avant garde form of art.

He described his technique for arranging flowers as a more creative approach that contains a linear appeal and a sculptural appearance.

Most commercial flower shops create what he calls the "roundy moundies" — those arrangements made with a large amount of baby's breath.

Gordon said he will make the roundy moundies occasionally, but prefers sculptures, which lend themselves to interpretation. Having his distinctive work all in the gallery will be a delight, La Barbera said.

"I've been a fan for a long time," she said.

"He's the kind of person that if you attend a fund-raiser or a gala event and you see very creative floral arrangements, people will most undoubtedly say, 'Oh, Bob Gordon did them,'" she said.

Retiring after teaching for 25 years, Gordon did these," she said. "I have been a fan for a long time," she said. Social Distortion dominates driving punk show

Group performs to sold-out crowd at Loco Ranchero

By Carissa Wreden
Staff Writer

Social Distortion played to a sold-out show at Loco Ranchero Sunday, and the more than 400 fans who showed up in search of a night filled with classic punk tunes, for the most part sticking to material off its new album, "Somewhere Between Heaven and Hell." The band's new single, "Ring of Paul," came across clear and twangy, with all the pain of the original song done by Edwin Brucé in 1987.

The crowd, a mix of hardened punkers and average joes, went wild when Social D. sparked up some early tunes off their self-titled 1990 release. The song "Ball and Chain" turned into an audience participatory sing-along, while a roaring rendition of "Black Boys" ignited the slam pit to a feverish pitch.

The night sailed high on a wave of energy that seemed unstoppable. The show, which lasted about 2 hours, seemed to stretch on endlessly as one tune followed another. But the crowd never tired.

Even after hours in the hot, sweaty pit, where bodies were packed so tightly it was difficult to breathe, concert-goers yelled and whistled for more.

The evening took a downturn during the encore performance when the crowd roared for the band to play "Prison Bound" off its 1988 album by the same name.

Lead singer Mike Ness and his cohorts, however, refused. Instead, they sang a tune Ness said was "about love." The crowd was not satisfied, begun to chant for the song again. They were disappointed.

The chant went up once more, this time angry and filled with slurs directed toward the band. Guitarist Denis Daniel looked pointedly at Ness, as if to say there's no way we're playing that now.

Musically, Social Distortion put on a great show, but the band members' attitude toward the fans left something to be desired.

Though the crowd may have been disappointed, it wasn't surprise. Punk musicians aren't known for their manners.

The real surprise of the night came with the opening band, Pigboy.

The group of native Chicago punkers lived up to its reputation as a hot up-and-coming band.

The group's blend of heavy, raging guitars and strong, tight rhythms left fans panting for more.

Friend noted that the money raised from the festival will be used to help build the current elementary schools in San Luis Obispo and to expand the arts program to new elementary schools in the San Luis Obispo Unified School District.

"The whole direction of it (the festival) is to show the importance of art at all age levels," Friend said.

"Unless the public is educated (about art), people won't know why we need to reduce the costs involved with art," she said.

The Children's Creative Project originated in Santa Barbara in 1974. The project reaches more than 20,000 children in 62 elementary schools throughout San Luis Obispo and Santa Barbara Counties.

The Project provides ongoing workshops in dance, theater, vocal music and visual arts. It also provides school site performances by professional touring companies.

Besides street paintings, the weekend festival will also offer appropriate entertainment, consisting of Renaissance music, Italian street painting, Italian food booths will include appetizers such as lasagna, pizza, wine, beer and soda. Also, no words or symbols intended as advertising may appear within the image.

The festival is scheduled to run from 11 a.m. to 6 p.m. on both days.

Poly show to benefit homeless

By Katherine Gill Staff Writer

Cal Poly art and design junior Jen Gutler decided in January that she wanted to do something for the city's homeless people. She wanted to do it at Cal Poly, and she wanted it to be fun.

This past December, Gutler's idea will come to life on the Cal Poly Theatre lawn when she presents an afternoon of music to raise money for the San Luis Obispo Homeless Shelter.

The show, which will run from 11 a.m. to 5 p.m., features Gutler and local rock bands Peter Will and Oedipus Rex. A $2 donation is required.

Gutler said the benefit has been an all-year project. "It's just come together in the last two months," she said.

Gutler added that she decided to hold the benefit at Cal Poly because she thinks it is "a gorgeous campus.

The show also will benefit the Earth Day Coalition, Gutler said. "Most of the money (60 percent) will go to the San Luis Obispo Homeless Shelter," Gutler said. "The rest will go to an international Earth Day cause."

Gutler has been a源自 Cal Poly, she said. "it is a chance to play somewhere other than a bar, to get to play for a cause other than people getting drunk," he said. "it benefits more than a cherub's back.

FLOWERS

From page 5

years in Cal Poly's ornamental horticulture department, Gorden plans to remain in San Luis Obispo while devoting time to traveling abroad. This coming September he plans to lecture and demonstrate his work throughout southern Africa.

"It is going to seem strange in September to not have to do the daily class routine," he said. "But it's time to be on to other things.

"When I came to Cal Poly, I came to develop a curriculum in floral design. I said then that I would stay a maximum of 28 years, so it is time to go and do something else."

Reflecting on memorable accomplishments with Cal Poly students, Gorden remembers the first time he assembled lighted, hanging center pieces, elaborate decorations that were hung over the Cal Poly Theatre stage last Christmas for a performing arts fundraiser.

The entire project was a "That was quite an experience," he said. The entire atrium and corridors to the balconies of the Embassy Suites were decorated with a floral display featuring dendrobium orchids. In its creation, he and his students created the center pieces for 40 tables.

He said it was one of the largest events San Luis Obispo had ever seen.

A free, public reception will be held today at the Galerie from 4 to 6 p.m. The exhibit runs through May 15.

KCPR

From page 5

yet."

Bands that have already made their top-30 list include: Buffalo Tom and Louh. "Occasionally there will be mainstream groups like The Cure," Janisse added.

Doing the show with Janisse and Watson is The Weeknd Tour, a "cast of idiots" who come in and help the two out. "They say stupid things," Watson said.

When asked how the first show went, Watson said they did not know. "We don't have the numbers yet," he said jokingly.

Janisse added that someone had equated the show to "The Morning Zoo" on KZOZ FM 93.3. "We don't have the numbers yet," he said.

Watson said what really needed to be done was to interview the bands, Janisse added.

Janisse said the two created the show so they would have a format to showcase music that is popular around the country.

"The format is good for those bands who bridge the gap between mainstream music and top 10," Watson added.

Watson said what really makes the "College Music Countdown" great is that it does not last four days.

"We don't do the top 300 from the last 30 years," Watson said.

“FACER ISLANDS CLUB has full-service beach resorts in the Pacific that cater to guests who want to be active, entertained and have the time of their lives! We have openings in our SPORTS, ENTERTAINMENT AND ACTIVITIES DEPARTMENT FOR . . .

Students to spend summer biking for bucks

Poly seniors will ride coast to coast for charity

By Gregory Rieber

Two Cal Poly students are going to go across the country this summer so they can raise money for their favorite charity, and do what they love to do.

Todd Hogan, a journalism senior, and Mark Ruis, a natural resources management senior, are going to mountain bike from Seattle, Wash., to Asbury Park, N.J., to raise money for the Rails to Trails Conservancy.

Rails to Trails is a non-profit organization that acquires abandoned railroad lines and turns them into bicycle and pedestrian trails.

These roommates, and best friends, are riding as part of the annual "Coast to Coast Bicycle Classic," one of the largest bicycle fund-raisers in the United States.

The event is sponsored by Tim Kneeland and Associates, Inc., a non-profit organization that specializes in long-distance bicycle fundraisers. The organization is based in Seattle.

Hogan said that in the past five years more than 1,100 participants in seven bicycle fundraisers have raised more than $6 million for various charities.

The cross-country trek is going to open three mountain ranges, 11 states and approximately 3,400 miles. Hogan and Ruis will leave Seattle June 9 and arrive in Asbury Park on July 25.

We hope to raise approximately $12,000," Hogan said. "Rails to Trails says $3,000 up front for each of us to ride. Then both of us have to raise the $4,000 back and then double it in order for us to ride. We have raised about $3,000 so far.

"Thirty-three people are going to ride in this year's classic," Ruis said. "Todd and I are two of four people from California that are riding."

Hogan and Ruis first got started in the cross-country road trip when they called Rails to Trails for general information about some various routes.

"We wanted to ride around the Western Region of the United States, exclusively, on trails," Hogan said. "They told us that they did not have the specific amount of trails available which we wanted to ride on."

After being somewhat disappointed, the two were given an alternative plan.

"About a week after we had called Rails to Trails, we received this phone call out of the blue," Hogan said.

"It was Tim Kneeland and Associates, Inc. They wanted to know if Mark and I would be interested in riding across country this summer for our favorite charity, Rails to Trails called Kneeland and Associates and told them to give us a call."

"We chose Rails to Trails because we wanted to give something back to biking," Ruis said.

"Biking is our favorite sport, so we thought Rails to Trails would be a logical choice for us."

"We are hitting up Farmer's Market, going door to door, going to bike stores and corporations asking for donations," Ruis said.

"We also have a booth set up in the U.U. every Thursday, for donations from the students."

Today, Hogan and Ruis are going to be at Dexter Lawn as part of Earth Day.

Hogan said their fund raising is coming along pretty well, but slowly. He thinks because it is a recession year, the money is harder to come by.

"We have 17,000 students at Cal Poly," Hogan said. "If every student were to drop one dollar in our tin cup, then we would be riding across country this summer."

"We have 17,000 students at Cal Poly," Hogan said. "If every student were to drop one dollar in our tin cup, then we would be riding across country this summer."

As for their training, Hogan and Ruis are doing the best conditioning they can. Ruis said fund raising, though, takes priority over training.

"We know it is very important to train, but if we don't raise the money then we will not be riding at all," Ruis said.

SPEAKER

From page 3
center, Soares pushed for
additional student funds to build
the present Julian A. McPhee
University Union.
Soares now lives in Havana
and is currently on the Board
of Directors for the Cal Poly Foun-
dation.
He is a benefactor to Cal Poly
and sponsors an achievement
scholarship for the year’s out-
standing ag student. Additionally,
he has an affinity for stu-
dents, having hired many interns
and employees from Poly,
Amorell said.
But it will be Soares’ speaking
experience that should set him
apart from traditional gradu-
tion speakers, said Roger Swan-
son, associate vice president of
Student Affairs and producer of
commencement ceremonies.
“I think he will deliver a real-
ly strong message to our
graduates,” Beason said. “His
message will be a very broad-
based one, but particularly
relevant, both to Cal Poly
gradients and to their peers—who are residents of the state.
Since he does a number of
presentations to governmental
agencies he will probably be a
very forceful speaker.”
Soares was selected by Presi-
dent Warren Baker based on
recommendations from the Graduation Speakers Screening
Committee, made up of students,
faculty and administrators.

GRADUATION

From page 3
on or before June 1 can be ac-
sured of receiving guest tickets.
Guest admission will be by ticket
only, and additional tickets will
not be available, according to a
Spring Commencement Press
release.
Mandatory meeting Mon. April 27

The program was reviewed the programs in the mission of the university, Davis said. "It is one of the programs in the state education code that Cal Poly is supposed to offer." As with Engineering Dean Lee, School of Professional Studies Dean Henry Basselin received a memo from Koob suggesting phasing out the home economics department, as well as the recreation administration program and activities courses in physical education.

Reports from page 9

From page 9

That marked a growth rate only slightly more than half last year's 4.1 percent inflation rate measured by the government's index for personal expenditures.

In California, eighth-highest among the states with per capita income of $29,950, the growth rate was 1.3 percent, or less than one-third of the inflation rate nationwide.

It was the first time since 1992 that growth in income per capita failed to keep pace with rising prices.

Eisenhower Drive at Kirby

Erica Cacciatore contributed to this report.

From page 9

that the economics department

be completed until June 1993.

Davis said he will meet with

Lee Friday to discuss other pos-

sibilities besides the termination

of the BT department. On

Monday, Lee will then take his recom-

mendations to Koob, who will make the

final decisions regarding the School of

the economics department. He said

was unhappy with the response time

indicated by the dean.

Basselin also faces a Monday
deadline for decisions for his

school.

Weber also emphasized the

possibility that circumstances

could change and that additional

funding may be negotiated to

keep additional faculty.

"Nothing is etched in stone," he

said.

According to Crab, the
decision to cut specific programs

would be made after extensive discus-

sions among the deans of the

seven schools, President Warren

Baker and Koob.

Decisions were based on a wide

range of factors, Crab said, and no one

set used across the board.

"The deans and the vice presi-

dent (Koob) looked at a variety of

issues and a variety of criteria in

making their decisions," Crab said.

The two try to get in a 50- to 60-

mile ride at least one day out of

the week as they can, though, they
do interval training, which is a mix of

interval running and flat-surface running.

For information, call (805)

528-1078 or write to 500 High-

dale Ave., Los Osos, CA 93402.

STATE

From page 7

as a result of the School of

the economics department to discuss

the program. The program was

last year and was not slated for any

reductions, she said. "Home economics is one of the

programs in the missions of the

university," Weber said. "It is one

of the programs in the state

education code that Cal Poly

is supposed to offer.

As with Engineering Dean

Lee, School of Professional

Studies Dean Henry Basselin

received a memo from Koob

suggesting phasing out the

home economics department, as well

as the recreation administration

program and activities courses in

physical education.

Reports administration

Head Dean Dwayne Head

could not be reached for com-

ments Wednesday.

If ET is cut, Davis said, the

department would either have to trans-

fer to other universities or other
departments in the school.

He thinks no consideration has

been made of the students.

"I think they've been left

hanging," Davis said.

The home economics depart-

ment will retain two or fewer fac-

ulty members and a "skelleton

crew" of staff in order to

graduate seniors that are close to

their graduation date, Weber

said. "Under the circumstances,

other students will not be able to

finish her," she said.

Crab said that the univer-

sity will work to allow students

who are close to graduating to

finish with their degree.

"If a student is reasonably far

along, every effort will be made to

accommodate them," he said.

Students with more courses

remaining in the degree program,

however, will not be able to continue

in the program.

"If a student is a freshman,

it is probably unreasonable to

assume that student would

graduate with home economics," he

said.

Those students face a choice

of either transferring to another

university or another degree

program, Crab said.

Crab continued that if the

home economics department is

phased out, the process will not

begin until fall 1993, and would

not be completed until June

1993.

Davis said he will meet with

Lee Friday to discuss other pos-

sibilities besides the termination

of the ET department. On

Monday, Lee will then take his recom-

mendations to Koob, who will make the

final decisions regarding the School of

Engineering.

Weber said he was unhappy with the response time

indicated by the dean.

Basselin also faces a Monday
