Snap approved by board

By Todd Hogan
Staff Writer

Student patrols may soon be on the streets as the ASI Board of Directors gave the go ahead Wednesday for peer policing in the San Luis Obispo community. The Student Neighborhood Assistance Program, or “SNAP,” was approved by directors on a 23 to 3 vote. The fate of the program now rests with the San Luis Obispo police chief.

“It’s a great opportunity for (students) and the community in general.”

Jim Gardiner
SLO Police Chief

Cal Poly’s $14-million recreation center is almost done; UEC plans to do student survey on alcohol sales

By Martin R. Schuyver
Staff Writer

Cal Poly’s $14-million recreation center is 80 to 85 percent complete and is well ahead of its construction schedule, the ASI executive director said in a Thursday interview. “I think it’s a great opportunity for the University of San Luis Obispo community and the student community in general.”

Once the proposal, or Bill 9301, is signed by ASI President Kristin Barnett, Gardiner will review the finalized proposal. His staff will then “work out the nuts and bolts” with ASI, nailing down specifics on who does what, Gardiner said.

Finally, the proposal will go before the City Council with a staff report and recommendations for funding, Gardiner said. However, it isn’t likely to be brought before the council before January 1993, he added.

Gardiner is optimistic the program will be effective in San Luis Obispo. “It takes a little bit of time,” he said. “It will work out.”

“I think (SNAP) will be seen as a positive thing in the community,” Gardiner said. “If it works like it does in other communities, (it) will free up police officers, help reduce cost to the city and, in conjunction with other programs, decrease noise complaints.”

College of Business member James Johnson-Hill, one of the three directors to vote against the program, disagreed, questioning the program’s effectiveness.

“I don’t think it will work in our community,” he said. “I realize it works in Illinois, but it’s different here.”

PolySCOPE picks candidates

Endorses Reiss for mayor; Settle, Petersen for council

By Brad Hamilton
Staff Writer

PolySCOPE announced Thursday at a news conference that it endorsed mayoral candidate Jerry Reiss and City Council candidate Mike Schmidt.

PolySCOPE student caucus director Jason Dennis said, “I am excited about Mustang Daily and polySCOPE endorsing me. It tells me something has happened in the past five years that is positive in the students’ eyes, and I give credit to Mayor Ron Dutin.”

Settle, too, was pleased. “I am honored to receive the endorsement. I am very pleased to have been given the opportunity to serve as the bridge between students and the community.”

Settle said the endorsement will be indicative if the students turn out to vote.

Reiss said his support for the organization of the caucus. “I totally agree with what polySCOPE has done,” he said.

One of those differences is the structure of the campus. At the University of San Luis Obispo, the campus — the model school for San Luis Obispo’s peer policing program — is centralized. Most of the student housing areas patrolled by students are adjacent to the campus, according to Illinois Student Patrol officials.

“Our community just isn’t centralized enough for the program to be effective,” Johnson-Hill said.

The College of Engineering’s student center is adjacent to the campus, and the Engineering building is next to much authority to students.

“Student patrols are supposed to be our own ‘no noise’ patrols,” Johnson-Hill said. “We’re sending a message that we can’t be ignored.”

The endorsement was the second phase of the student caucus program. The first phase took place last spring when students chose Brent Petersen over Mike Schmidt and Todd Fernandes to represent the campus in the City Council race.

The “Student Caucus” official — with a notice to all ASI clubs on campus, which said they will receive one vote for a City Council candidate and one vote for a mayoral candidate. Each club’s vote was turned in by 5 p.m. on Wednesday.

All clubs were given an election packet in their boxes which included a description of the courses, and official ballot and the candidate’s statements as they appear in the city’s sample ballot.
Boy robs mom at gunpoint

CLOVIS, Calif. (AP) — She loves her 14-year-old son, but a Chowis woman still wants him prosecuted for helping two boys rob her at gunpoint.

The 59-year-old woman came home for lunch Monday and found her son there with two companions ages 14 and 16. The other boys were armed with pistols, and one stuck a pistol in the woman's face, she told police.

Her son told her "I treated him like a dog" because she had grounded him for getting poor grades.

But the son talked his friends out of tying his mother up with a telephone cord, although they forced her to sit on the floor, then took the keys to her van and left. The boys said they planned to run away and live off the land.

The mother called police who checked the 16-year-old's home and found that his father's .38-caliber and .22-caliber revolvers were missing.

A few hours later, police dispatcher Darlene Myatt got a telephone call asking if officers were searching for three runaways. She suspected the call came from the runaways, so she asked the caller to use the emergency 911 line.

The 911 system tells law enforcement exactly where calls come from, so Myatt was able to dispatch patrol officers to a laundry where they took the boys into custody.

Maggots give good clues

DES MOINES, lowa (AP) — Most people shudder at the image of a maggot-infested body, but Ken Holcher figures those bugs can help solve a murder.

Holcher, an assistant professor of entomology at Iowa State University in Ames, says insects can tell a detective how long a body has been dead and even, sometimes, where it came from.

William C. Rodriguez, a forensic expert at the Pentagon's Institute of Pathology, said insects are useful because many indicators experts use, such as tissue changes and chemical tests, are only useful during the first 24 or 48 hours after death.

"First come the flies. They'll find a body within one or two days. Then the ants will be there. After that, it's 48 days later, probably two to five days later, you'll still have flies but there will also be cockroaches and ants," he said.

In five to 12 days the beetles arrive, he said. In 12 to 16 days, most of the fleshly parts have been devoured and the flies depart. Mites are the final creatures to arrive.

Holcher said he helped solve a double murder in Louisiana, which he estimated the slaying had occurred 60 hours before the bodies were found. The information helped police direct their investigation toward a man who eventually confessed to the crime, admitting he had done it 63 hours before.

Man charged drunk riding

PIKEVILLE, Ky. (AP) — A man charged with drunk driving says he doesn't think his horse should be considered a non-motorized vehicle under the law.

"She's got a mind of her own," said Mark A. Whitt of Pikeville. "I don't think a vehicle has a mind."

Kentucky amended its drunken-driving law in 1991 to include drivers of non-motorized vehicles. At least 23 Kentuckians have been charged under the new law, including a bicyclist (twice) and a man in a wheelchair.

But officials say the Pike County case might be the first involving a horse.

"It's humorous," Pike District Judge Howard Keith Hall said Friday. "But I don't know where it'll end up in court or how it might affect his (driver's) license. We just don't run into these things."

Whitt, 20, of Ranson, was arrested on early Oct. 10 when a state trooper found him sitting on his horse in the middle of a state highway talking to a man on a motorcycle.

Sinead Brigade rips Pope

NEW YORK (AP) — After two weeks of steady bashing, Sinead O'Connor got some support Sunday from a loosely knit group that tore up pictures of Pope John Paul II in front of St. Patrick's Cathedral.

Calling themselves the "Sinead Brigade," about a dozen women and several men from different activist groups held a brief protest outside the church as Cardinal John J. O'Connor said Mass inside.

Mary Lou Greenberg of the group. Refuse and Resist!" she said.

"We are here to demonstrate our support for Sinead O'Connor in her efforts to expose the Catholic hierarchy as agents of oppression, and to say that there are many, many people who stand with her in this," said Mary Lou Greenberg of the group, Refuse and Resist!

Two weeks ago, the Irish singer tore up a picture of the pope on "Saturday Night Live." She said she wanted to draw attention to child abuse, which she believes stems in part from the teachings of the Catholic Church.

Carrying signs reading "The Pope Must Apologize. Not Sinead," one woman and one man separately tore up pictures of the pope while a crowd gathered.

Baby girl ends string of boys

FARGO, N.D. (AP) — It took 110 years, but the Westerholm family finally has a newborn it can dress in pink.

Skyler Dae Westerholm was born Thursday, breaking a string of 16 boys born in the Westerholm family during the past 110 years.

"I've been telling people this is going to be news when it does happen," said Bill Westerholm, the father. "But I think everybody thought I was kidding."

Westerholm, who is the stepfather of two daughters, has three brothers — Douglas, John and Tom. Their father was an only son; their grandfather was one of four brothers.

Medical tests had shown that the family was going to have a girl this time, but Westerholm's wife, Dee, said her husband was skeptical.

"First come the flies. They'll find a body within one or two days. Then the ants will be there. After that, it's 48 days later, probably two to five days later, you'll still have flies but there will also be certain wasps and ants," he said.

In five to 12 days the beetles arrive, he said. In 12 to 16 days, most of the fleshly parts have been devoured and the flies depart. Mites are the final creatures to arrive.

Holcher said he helped solve a double murder in Louisiana, which he estimated the slaying had occurred 60 hours before the bodies were found. The information helped police direct their investigation toward a man who eventually confessed to the crime, admitting he had done it 63 hours before.

Chicano college students face extra challenges

MEChA hosts two-day conference on problems

By Cynthia Nelson
Staff Writer

Rare is the Cal Poly student who does not have to walk the tightrope from freshman year to graduation. Each must juggle schedules to beat the looming threat of bankruptcy, academic probation and social isolation.

But some find themselves with added pressures. Many Chicano or Mexican-American students also battle feelings of guilt and isolation.

Coming to Cal Poly can be a culture shock, even to students from Santa Maria and Los Angeles. The campus of 16,360 students — of which 13,580 are white and 1,903 are Chicano — presents challenges to their norms.

Beginning today, Cal Poly will be the site of a two-day conference of Chicano college students from across California. Cal Poly's Movimiento Estudiantil Chicano de Aztlán, or MEChA — will host the event.

Armando Pezo Silva of Cal Poly's Student Academic Services said Chicano students need reinforcement and knowledge of their history.

"They are told to give up their music, language and family to become like us (white students)," Pezo said.

The traditional Latino family consists of the nuclear family and all distant relatives. The ties are very strong.

"We hate being away from our family," said one Chicano student.

Some who come from a large, immediate family feel guilt, Pezo said.

Their parents and siblings may be struggling financially to put food on the table and pay rent, often working some of the same jobs and most dangerous jobs, he said.

Then, one child goes to college. This becomes a source of pride for the family, but can also cause more stress as the need for added income increases, Pezo said.

Take, for example, Pedro Arroyo, president of Cal Poly's MEChA.

He said his family of six was living comfortably in a runny house. However, when he began college, they moved into a one-bedroom apartment to help support him financially.

Chicano students, like many others, continue to work to support themselves. "They may still have to send money home to their family," Pezo said.

According to a June 1992 study by Cal Poly's Institutional Studies department, it takes six to seven years for Chicano students to graduate from Cal Poly — if they remain.

According to the report, underrepresented ethnic groups tend not to continue their education at Cal Poly. If they attend another California State University, half are unaccounted for after five years.

"It's a hostile environment," Arroyo said. "I sense it in the classroom."

The enrollment of Chicano students is increasing, but Chicano faculty is declining. Over the past year, four Chicano instructors have left Cal Poly for various reasons.

Needing role models and professionals to go to for guidance, Chicano students say they feel frustrated by the lack of mentors.

"We don't have anyone to go to for help academically," said José Juan Urguizo, a Chicano freshman at Cal Poly.

When political science lecturer Jorge Agustín was dismissed earlier this year, students protested the department's reasoning.

"Unco and others rallied and sent letters voicing their concerns. However, they said, they received no reply."

"We weren't taken into consideration," Urguizo said.

Chicano students say they are also frustrated by the lack of an ethnic studies program, which Arroyo said would easily fall under the school's learn-by-doing motto.

Arroyo said exposure to many cultures will prepare students for the future.
When I went away to college four years ago, so did my parents and my little brother. When I began my college life, my parents did too, only better. It’s been right about the same for the last year, for the past four years, that’s all I am reminded of my parents’ college life.

Yes, this is the time of year when the witches, goblins and jack-o’-lanterns remind me just when the day I was 13. Four years ago, so did my parents and my little brother. Exploding with a three-game win streak in the second half of last week's Northridge game, Cal Poly entered Saturday at Santa Clara to face the Broncos, who are 3-6 overall and struggling to keep their noses above the playoff waters.

"The Broncos were idle last weekend and they're hungry," said Setencich. "A lot of the guys played together before entering the league. They're good measuring sticks for us.

Thomas and Wade's combination for the Mustangs' chances? "I think everybody understands that Thomas is our major offensive threat, and Wade has to get us some points with some big plays," Setencich said. "It's good to have two starters who are always going to make big plays for us."

Playing a game with two teams who are struggling to keep their noses above the playoff waters, Cal Poly (2-4-1 overall) entered on a four-game winless streak while Santa Clara scored once in its third straight shutout.

Most of those who played together had to go through some rough times in last year's 15-10 Mustangs' victory. Of Cal Poly's 278 total yards, 194 came from the running game.

Leading the Mustangs' attack is Brian Fitz, who is averaging 5.5 yards per carry and 92 yards per game. His running back, Hector Siquieros, is fourth in the nation with seven career goals and 55 points.

"We saw enough of him (Fitz) over the last couple years to say he's a very good running back," Setencich said.

The Mustangs struggled mightily against Cal Poly's defense, which held them to their lowestoutput since the game at Cal State Northridge was a 1-0 shutout at halftime.

But the Mustangs took a step forward against a much-improved Cal Poly team. With much of the first half gone by, the Mustangs were able to take off his sling and begin rehabilitation, says Wade. He still goes to practice every day and hasn't missed a game.

"I want our team to do well whether I'm ready to go or not. I can't hear them playing," he says. "They've been a bunch of great guys and they all work hard."

Joe Wade, a junior who will be fully recovered and ready to go in his final season, maintains his optimism despite the injury he suffered just less than two weeks ago.

"I was pretty mad (when I realized I was injured)," Wade says. "The (Sacramento State) guy who hit me said, 'That'll teach you to come over on my side.' All I could do was scream at him."

Wade says he wasn't positive how serious his injury was until he got up after the play. "It would've been the ball sliding into my shoulder pad," he admitted. "I think when I realized it, I was just really mad and things weren't looking too good."

The injury is the most frustrating because he's never been 'so close to the point where I couldn't play.'

Watching his team lose in the closing seconds last week at Cal State Northridge was a "— Endorses Measure H

Measure H. I worked to qualify the state water project's a bad deal, and because the city council was wrong in ignoring the previous vote of the people against the project."

Brent Petersen, the student candidate for the City Council.

I wholeheartedly endorse Wendy Nogle because she is the candidate who truly appreciates the contribution of Cal Poly students to our community. She will work for real job and career opportunities for students and graduates.

After all, we Cal Poly students and graduates are not just "tourists." We support this community, and we deserve jobs and better representation.

I'm Mike Knikow, Cal Poly Alumni, local businessman and former pitcher for the San Francisco Giants.

From page 5: "I look out there and there's nothing I can do except cheer the on the field, but I just can't. Wade speaks proudly of the remaining receivers who have stepped up in under tough circumstances. 'The receivers have made it through everything, and they're doing well,' Wade says.

For one of the fallen players, future football prospects are uncertain. Since this is his senior season, it's doubtful that Thomas will ever catch another pass or score another touchdown for Cal Poly.

In order to qualify as a medi­cal redshirt and retain a year of eligibility, a player must play in 20 percent or less of a team's games. By playing the less than one quarter against Cal State Hayward, Thomas pushed him­self over the 20 percent limit. "Basically what I'm going to do is appeal to the NCAA," Thomas said. "Hopefully I'll have a good enough appeal that (the NCAA) will be sympathetic to my case."

Thomas plans to appeal as a hardship in an effort to restore his final year of eligibility. "I'm looking forward to next year," said Wade. "I think we're going to have a great team.""
Re-elect
EVELYN DELANY

Evelyn Delany
Founder, Ocean Sanctuary Coalition

Will Support:
Bike Lanes & Public Transit
Better Community Relations
Preserving the Beauty of SLO County
Protecting Open Space

"We Need Evelyn for Her Strong Community Concern and for Her Environmental and Neighborhood Preservation"
- Allen Settle, Cal Poly Professor

Experienced, Effective and She Listens

Reelect Evelyn Delany
Supervisor, 3rd District
November 3

In other ASI business, Union Executive Committee Chair Bas­
sel Anber said he has begun a feasibility study to determine the
effects of alcohol sales on cam­
pus.
Foundation and administra­
tion officials have said previously
they are opposed to alcohol sales
on campus.
Officials at other California State University campuses say
they have been successful in sell­
ing beer and wine.
Anber said he plans to con­
duct a student survey on what
students like and don’t like about
on-campus services, followed by
another survey directly related
to student attitudes regarding al­
cohol sales on campus.
He said he plans to report
back to the ASI board at the end
of full quarter or beginning of
winter quarter.
