Food sales plan forwarded

Foundation receives ASI proposal but shelves it for now

By Michelle Van Der Linden
Staff Writer

ASI President Kristin Burnett submitted a resolution to the ASI Board of Directors to the Cal Poly Foundation Friday morning that would allow clubs to resume selling hot food on campus.

"I don't mean for this to be an antagonistic thing," Burnett said.

"This is merely the only means our student government has of compiling a student opinion and taking action on it." Discussion of the resolution was not on the Foundation board meeting agenda.

Foundation board chairman Howard West accepted the proposal for review but did not indicate if it would be considered at a future meeting.

The resolution was drafted in response to the Foundation’s moratorium banning clubs from selling hot food on campus.

It calls for all of "the restrictions being eliminated," according to ASI board member Steve Schram, who authored the resolution.

"The resolution is really what I'm going to argue for," Burnett said.

"We don't want restrictions. We want (food sales) opened up again on Dexter Lawn and we want it opened up to all days."

"We want (food sales) opened up again on Dexter Lawn and we want it opened up to all days."

Kristen Burnett
ASI President

"(The Foundation) would like the opportunity to make more money so they can continue to meet the demands of President Baker, who has to meet the demands of state legislators."

"So we are all locked up over who needs more and right now the students' most important demand is the funding of clubs," she said, adding that her role as student president is "to make sure the students needs are expressed."

SLO man critical after cliff fall

By Carolyn Nielsen
City Editor

SANTA BARBARA — An 18-year-old San Luis Obispo man is in critical condition after plunging 100 feet down a cliff near the 6600 block of Del Playa Drive in Isla Vista Saturday night.

Damon Ashley was suffering from head injuries Sunday night at St. Francis Hospital in Santa Barbara, according to nursing supervisor Leal Grant.

Grant said there had been "no significant change" in his condition. She could not disclose the extent of his injuries.

According to a published report in the Santa Barbara News Press, the Los Padres Search and Rescue Team and paramedics lifted the man up the hill from the beach.

Sheriff's Department spokesman Tim Gracey said Ashley was not conscious when the search and rescue team reached him. He was first taken by ambulance to Goleta Valley Hospital then transferred to St. Francis.

Fremd's family were keeping vigil at the hospital Sunday night, Gracey said.

Past student candidate recalls stint on City Council

By Michelle Van Der Linden
Staff Writer

Brent Peterson is not the first Cal Poly student to eye a seat on San Luis Obispo's City Council.

As an architecture junior, Keith Gurnee traveled the campaign trail and beat nine candidates, including an incumbent and a former City Council member in the 1971 city election.

Each of the Vietnam War were two hot topics when the then 22-year-old Gurnee decided to run.

"The country was ready for a change and so was the local government," Gurnee said. "I felt (the city thought) students were something to be tolerated and their money to be enjoyed without their being involved in local affairs," he added.

Gurnee said he didn't know much about campaigning and precincts back then. Without the existence of groups like polySCOPE, Gurnee said he was left to organize the campaign to create a voting awareness among the students and run his $400 campaign.

Gurnee created his own posters, went door-to-door throughout the community and spent a lot of time at class registration, when students stood in lines to enroll, he said.

"I used to print up a whole bunch of these schedules with my campaign statement on the back of them and I spent a lot of time at registration passing them out," Gurnee said.

"But we organized the campus pretty well," he added.

Although confident about his campaign, Gurnee said he questioned his odds of actually winning.

"On election night, I really didn't expect to win," Gurnee said. "I was as surprised as anybody."

Not only did the students support him, Gurnee said, but he also drew votes from the business community "because there were a lot of people in business who felt Cal Poly needed to be better represented."

After being elected, Gurnee changed his major to city and regional planning and after graduation, he was re-elected in 1975.

While on the council, Gurnee said his input created a better community-student relationship while providing a student voice on issues. He added a student on today's City Council would help to keep these lines open, but said more student representation is needed in other areas.

"I think there are a couple things that can be done to strengthen the relationship between students and the City Council," Gurnee said.

See GURNEE, page 6
WASHINGTON (AP) — In the debate about President Bush's Iraq policy before the Gulf War, one fact has emerged clearer than before: By design or neglect, the United States contributed significantly to Saddam Hussein's arsenal of bombs, missiles and nuclear devices — the very arsenal it set out to destroy with massive bombing strikes 22 months ago.

An explosion of recent information, much of it generated by pre-election Democratic politics, shows that not only did the United States contribute directly to the Iraqi arsenal — but some government agencies knew it was happening.

"The simple answer to the question of whether U.S.-produced equipment and technology has been found to be part of the Iraqi nuclear weapons program is 'yes," said David Ray, who led three U.N. teams to Iraq after the Gulf War to inspect what was left of the Iraqi nuclear program.

Experts who investigated the list of dual use items sold to Iraq identify about 200 of the 770 licensed exports as destined for weapons programs. They include software used to design projectiles fired from a Super Gun — a kind of low-technology long-range missile; an electron beam welder used in Iraq's uranium enrichment program; and personal and mainframe computers found at Iraqi defense plants.

The Commerce Department approved these sales after an inter-agency review process designed to weed out militarily useful equipment — even as intelligence information was poring in about Iraq's ambitious drive to become the region's military superpower.

---

SAN DIEGO (AP) — A Halloween haunted house staged by a fundamentalist Christian church featured graphic skits showing aborted fetuses, angering parents who said their children were terrified by the images.

The Spring Valley haunted house was sponsored by the 100-member PhttePs House Christian Fellowship.

Parent Mary McQueen said she took her 5-year-old daughter to the attraction Thursday night. McQueen, a 40-year-old San Diego mother, said she was too frightened to show her daughter any of the images she saw.

The first scene in the 10-minute tour depicts a party where drugs and alcohol are consumed by teenagers. A boyfriend and girlfriend are shown having a fight, and the boy, drunk and high on drugs, gets into a car.

A loud crash is heard and the tour group is taken to the scene of an auto accident. A boy lies dead next to a car. Fake blood covers his body and matter simulating his brain oozes out of his head.

Those taking the tour then move to another room, where they are told the girl is pregnant with her dead boyfriend's child. A new boyfriend tells her she must get an abortion if she wants to remain with him.

The next room features a stark white wall upon which are flashed graphic slides depicting aborted fetuses.

The State Water Project Cannot Deliver

- The project has contracted to deliver twice the water it can.
- The project has failed in both droughts since its creation.
- New regulations limiting the quantity of water pumped from the Sacramento Delta will make the project even less reliable than in the past.
- By early in the next century, experts say the project will have to ration its water nine years out of ten.
- Yet the way state project contracts are written, we must pay for every drop we order, even if we receive nothing at all.

Quote: "Why are people surprised that we've got a problem? We've been telling the world for a long time now that we're oversubscribed." — David Kennedy, director of the state project responding to criticism of the project's inability to deliver water.

The State Project Makes No Sense

Why tie our pocketbooks to a $509 Million project that's a failure? We have better, more reliable, cheaper local alternatives.

- The project has failed in both droughts since its creation.
- New regulations limiting the quantity of water pumped from the Sacramento Delta will make the project even less reliable than in the past.
- By early in the next century, experts say the project will have to ration its water nine years out of ten.
- Yet the way state project contracts are written, we must pay for every drop we order, even if we receive nothing at all.

Quote: "Why are people surprised that we've got a problem? We've been telling the world for a long time now that we're oversubscribed." — David Kennedy, director of the state project responding to criticism of the project's inability to deliver water.
State political candidates tangle at local debate

By Marla R. Van Schuyver
Staff Writer

It was a night for attacks, especially on opponents who were not around to defend themselves.

With the election just a few days away, candidates for the 32nd Assembly District and the 22nd Congressional District took the opportunity to blast their opponents in Thursday night's debate at the Veterans' Memorial Building in San Luis Obispo.

While Thursday's debate drew more than 70 spectators, Assembly candidate Andrea Seastrand and Congressional candidate Michael Huffington were not among those in attendance. Both sent statements saying they had prior engagements.

Despite his explanatory statement, Huffington's opponent, Gloria Ochoa, took the chance to attack him in her opening statement.

"I think it's especially notable that Mr. Huffington is not here," she said. "I think it's disrespectful of him to omit attendance of this particular event because the League of Women Voters provides an especially good forum for all candidates to come forward."

The format of Thursday's debate provided audience members an opportunity to write out questions for the candidates that were then asked by the moderator. Concerns from the audience included the issues of student loan repayment, health care, abortion, gun control, nuclear power and women in combat.

Candidates were specifically asked about Presidential candidate Bill Clinton's plan, whereby students who do not fulfill their obligations on student loans are held responsible for community service equal to the amount of the loan.

"I think Gov. Clinton's plan is a good one and I support it heartily," Ochoa said. "Right now, opportunities are dwindling for the children of working families. We need better government responsibility to the needs of children."

Libertarian Congressional candidate W. Howard Dilbeck said he is against the government providing student loans at all.

"Unpaid loans are just another example of government and its programs," he said. "If those students went through a local bank, they would be required to pay that loan back one way or another. Government needs to get out of the banking business and leave it to the private sector."

 Andersen candidate Stephen McClenathan, who both work at the plant, challenged the others to come up with viable means for alternate fuels.

"We're going to have to start using uranium and other things, but this is the fuel we'll probably use," he said. "But, they do have control over their own bodies and if that's what they want to do, then more power to them."

While Ochoa and Assembley candidate John Ashbaugh all said they are either ready to decommission or not extend the operating permit for the Diablo Canyon Power Plant, Dilbeck and Assembly candidate Steve McClennen, who both work at the plant, challenged the others to come up with viable means for alternate fuel.

"I do believe nuclear power is the power source of the future, at least the foreseeable future," Dilbeck said. "PG&E developed a meltdown out on the Carrizo Plain and found it to be ineffective. Until something better, and more cost efficient comes along, this is the fuel we'll probably use."

Shawna Snider, a Cal Poly student, challenged Ochoa to answer the debate question on the women in combat issue.

"I do believe women should be able to serve in the military," Ochoa said. "But, it's something he'd have to see. I'll guess I'm a male chauvinist, but I love women and I don't want to see them all shot up."

"Well, I guess I'm a male chauvinist, but I love women and I don't want to see them all shot up," Ochoa said. "But, they do have control over their own bodies and if that's what they want to do, then more power to them."

Brent Petersen has come a long way in a short time. He has dedicated a great amount of time to informing himself and has constantly remained open to other's ideas. Although he still has room for further improvement, his hard work has resulted in his being more qualified for a job as city councilman than several of his opponents. Petersen's motive has always been to improve government, and that motive counts for a lot; he has held back nothing in regards to his fulfillment of that motive. He has ideas and his ideas have relations with the student community, as current Mayor Ron Dunin has done. We think he will.

Normally, Jerry Reiss, a conservative candidate, would not be the obvious pick of an assumed "liberal" campus newspaper staff, but we recognize the need for communication in this city, and healthy, constructive communication will be something Jerry Reiss can deliver.

City Council: Allen Settle and Brent Petersen. Allen Settle effectively proved to the editorial staff that he had a long and shining standing issue. Settle's plan for strictly controlled development carefully takes into account both resident and business interests, and seems to be the most plausible plan, as San Luis Obispo desperately needs to be pointed in a positive economic direction.

Allen Settle's thorough and detailed approach to city issues and his involvement with Cal Poly, combined with his experience and fraternity adviser assure Mustang Daily that he is definitely the most qualified candidate for the job.

President: Bill Clinton. The editorial board of the Daily feels that Clinton offers the most avenues for change out of this year's field of candidates. His strong stands for social reform aimed at aiding a struggling "middle-class" are sorely needed. Clinton's stances on environmental issues and defense budget spending also demonstrate a concise group of current issues which have yet to be addressed. Clinton brings to this group not only good ideas but a competent team as well. His choice of Al Gore for a running-mate helps to round out a Democratic ticket which would work well with a congress of the same bent, hopefully resulting in a government more responsive to the people's needs.

City Council: Allen Settle and Brent Petersen. Mustang Daily feels Brent Petersen would adequately represent the views of both the campus and the city as a council member. Petersen's motive has always been to improve government, and that motive counts for a lot; he has held back nothing in regards to his fulfillment of that motive. He has ideas and his ideas have relations with the student community, as current Mayor Ron Dunin has done. We think he will.

WILL IT EVER COME BACK?

- Haven't the good students of Cal Poly suffered enough for the actions of a few bad apples from out of town?

- Poly Royal needs to come back. It's good for the students and good for the community.

- Wendy Nogle will fight to give Poly Royal back to the students.

GURNEE

From page 1

tween Cal Poly and the City Council," Gurnee said. "One would be to make sure a Cal Poly student appointee is on certain commissions, like the housing authority and the parks and recreation and human relations commissions.

"Building in student representation as a fixed member and letting the students decide who those people will be, rather than the council, would open up communication," he added.

Gurnee said the years of experience he gained while on the council is immeasurable.

"To have that type of experience and to be that responsible, making decisions for a city of over 30,000 people, at the ripe ole age of 23, you can't replace that kind of experience," he said.

While on the council, Gurnee helped make many national and local decisions and offered some suggestions of his own.

"I was a very active member of the City Council throughout my term," he said, "always proposing things and always trying to make things happen."

On a national level, Gurnee worked with then-Secretary of State Jerry Brown to lower the voting age to 18 and he also authored a resolution calling for the resignation or impeachment of Richard Nixon after Watergate.

On the local level, Gurnee helped create bike lanes and had bike racks installed in the city. He said this was not an easy task.

Gurnee helped stage a "bicycle-park-in," on a Thursday night, which involved 400 cyclists parking their bikes in metered parking so automobile drivers could not find a place to park.

"Within a week, we had bike racks all over town," he said.

The bike lane issue has been before the council many times in past years and is once again currently, Gurnee explained many of the city's issues move in a continuous cycle without ever being completely resolved.

"Environmental issues will always be of paramount importance in this county," he said. He added that these issues were hot and just starting to form when he was elected.

"It was a time when nobody really thought about growth and development," Gurnee said. "I was trying to get people to open their eyes to the needs of open space and greenbelt protection and the need to make sure we have the resources before we grow." Many of the candidates running for City Council are against any type of growth, Gurnee said, but the key to the issue is finding a common ground.

"I think you need to find a balance between the two rather than engaging in this civil war of extremes," he said. "Rather than fighting whether or not we should grow, we should be thinking about how best we can direct our growth so it is environmentally and economically balanced."

Some say Gurnee has changed his views since his early City Council days. But he says only his perspective has changed.

"I am perceived to have changed by a lot of people, but that is only perception," he said.

Gurnee said the best thing he did while a council member was to increase the environmental awareness of the community.

but the Mustangs answered with a touchdown three minutes later from a 10-yard quarterback keeper by Stainbrook. Although Bob Thomas suc­cessfully kicked Cal Poly's first three extra-points, he was replaced by Tom McCook on the fourth conversion attempt. McCook had been Cal Poly's kicker for the last three years until he was sidelined Sept. 26 with an injured ankle. His at­tempt was blocked.

Santa Clara cut the 27-7 deficit when Wise scored from 1- yard out.

Once again, Cal Poly responded with a touchdown of its own - a 1-yard run by Fitz up the middle to give Cal Poly a 33-14 advantage at the half.

The only scoring in the second half came from a 21-yard Stainbrook pass to Cory Bowen with 11:55 left in the game.

Although Setencich said it wasn't Stainbrook's best perfor­mance of the season, the senior quarterback completed 15 of 18 passes for 224 yards with no in­terceptions.

The Mustangs' passing attack had been struggling, having com­pleted 11 of 35 passes for 152 yards in Cal Poly's prior two games.

WOMEN'S SOCCER

From back page

Kassis blasted another shot that thundered into the net similar to her first goal. Kassis' second goal came from a cross pass by senior midfielder Michelle Vernon.

Kassis recorded an assist at 17:10 left in the first half when Jones booted Kassis' corner kick into the left side of the net for a 3-0 lead.

Azusa Pacific scored its lone goal when Jen Horchak broke loose from her defender and chipped a shot over the head of Cal Poly goalkeeper Jana Fermili.

After leading 3-1 at halftime, Cal Poly added its fourth goal 17 minutes into the second half when Kristen Johnson passed to Jones, who lobbed her second goal of the game over the goalie's head from 15 yards out.

Kassis said this year was a learning process, and next year the team will know how to play at this competition level.

"I wish I could be around a lit­tle longer," said Cal Poly's Marci Trubell, one of three seniors on the team. "This team is going to be incredible the next couple years."

**NonStop Availability, the concept of a business-critical On-Line Transaction Processing system that never requires any scheduled downtime, forms the heart of Tandem's plans for future product difference.**

Another important part of our future success is hiring innovative college graduates who can help us maintain our competitive edge in our ever expanding market.

**Software Development and QA**
We're looking for Bachelors and Masters grads with Computer Science degrees. Tell us where you want to go with your software development and applications ideas, and we'll match you with a challenge in areas like OLTP, fault-tolerance, RISC technology, POSIX®, Common Communications platform, or NetWare®.

Opportunities exist in Operating Systems, Compilers/Languages and Tools, Systems Software, NonStop SQL, and Data Communications/Networking.

Ultimately, this is a chance to get your career off to a great start with Tandem, a company known for technical excellence. Stop by our Information Session for more details, and be sure to contact the Engineering and Placement Offices to sign-up on our interview schedule. If you're unable to attend, send your resume to: Tandem Computers, Attn: College Relations, 10600 Ridgeway Court, LO: 239-17, Cupertino, CA 95014-0724.

An equal opportunity employer.

POSIX is a trademark of the Institute of Electrical and Electronic Engineers, Inc. NetWare is a registered trademark of Novell, Inc.
Why did we join Andersen Consulting?

"Andersen is the place to be in the 90's -- they are an industry leader. The people are great, the challenges never end."
Jeff Stought, Business/Finance 1989

"...besides the kind of work, it's the people. There is no doubt about it, that the people who work here are top-notch people. With every new job I am meeting people who continuously impress me"
Jon Krause, Industrial Engineering 1986

"...to avoid the industry upturns and downturns within Aerospace"
Jack Levy, Aeronautical Engineering 1982

"...because of its variety and because of its motivational capabilities; a good opportunity to work in a variety of industries"
Lisa Cox, Industrial Engineering 1992

"Andersen offered the most opportunity in terms of learning experience and a training ground for learning good business practices and developing more of an expertise than what I came out with from college."
Jim Voos, Business Administration 1982

"...challenging roles...a lot of variety...prestigious place to work"
Cheryl Chin, Industrial Engineering 1986

"Variety...Variety...and Variety -- I get bored easily."
Lisa Phelan, Business/Finance 1988

"AC could offer me the challenges, variety and the kind of people that I wanted to work with"
Amy Cameron, Industrial Engineering 1992

"...the work environment is not stagnant...the amount of learning is tremendous, even more than in college."
Kristin Bringard, Industrial Engineering 1991

Tank runs dry for Mustangs

By Brad Hamilton

NORTH RIDGE — Cal Poly women's volleyball team rode a five-game win streak into the championship game of the Cal State Northridge Invitational, where it was treated like Gen. Custard in his last stand.

"Northridge is a very good team," Mustang head coach Craig Cummings said. "We ran out of gas. We didn't have enough in our tank to finish." Cummings said Northridge ambushed his team with a schedule that allowed the Mustangs only 1 1/2 hours to rest before the final.

"We should have been more up," he said. "We had our chances, but they just didn't fall." Gartner said his team was disappointed, but reminded that failures are part of sports.

"If we wanted to get back at us for embarrassing them at their home two months ago," he added. "But the game's over. You just look to the next one and finish the season." Cal Poly's next game is Thursday at Grand Canyon University in Phoenix.

Perlstrom led the Mustangs against the Titans with 13 kills and 14 digs. She also had three aces.

Kaylor led the Mustangs in blocks in the Cal State Fullerton and Northern Illinois matches. She had 11 blocks against the Titans and eight against Northern Illinois.

The Mustangs finished the weekend 4-1 and improved their record to 19-7. Their next matches are at home Friday and Saturday against Texas A&M and Nevada Reno.

SOCCER

From back page we should have been more up," he said. "We had our chances, but they just didn't fall."
The atmosphere on the field moments after the game was one of dead silence.

Moments before, the Cal Poly men's soccer team's playoff hopes had been dashed by Cal State Dominguez Hills.

Try as they might, the Mustangs couldn't as much as muster a goal Saturday afternoon at Mustang Stadium.

"This (loss) we don't deserve," Gartner said. "It's too bad because it puts a lid on a real good season."

The victory snapped Cal Poly's four-game winless streak and most notably instilled confidence back into the Mustangs.

Steven Kassis began a five minute scoring spree when she took a pass from forward Erik Jaramillo and dribbled 20 yards before launching a shot past the rushing goalie.

The Mustangs, 11-6-1 overall and 7-4-1 in conference, had won their last four games, including three straight shutouts, before Saturday's heartbreaking loss.

Cal Poly's best chance at a goal came with 12 minutes left in the half when forward Todd Henry's shot glanced off sliding Toro goalkeeper Erick Miseroy.

The Tbros finally broke the deadlock with 17 minutes left in the game. Cal State's Dominguez Hill's Ken Hodge scored from 15 yards out when he shot to the upper right corner of the net past outstretched Cal Poly goalkeeper Greg Schwartz.

"Except for the first 10 or 15 minutes, we basically kind of took it to them," Gartner said. "Balls that have gone in in the past just didn't go today."

"We won pretty easily," he said. "It was a surprise to me."

The times were slow for a championship event, due to poor conditions.

Rembao said the victory was good, but the team must gear up for the meets ahead.

"We are pretty pleased, but the team must gear up for the meets ahead," he said.

Cal Poly's freshman midfielder Tanya Abston-Sacks recorded his best finish of the season, third place in 25:29.

Other top performances came from freshman Ahmik Jones (10th, 25:43), Scott Werve (11th, 25:41), and Dan Held (15th, 25:44).

Rembao said the victory was good, but the team must gear up for the meets ahead.

"I am really pleased, but the team must gear up for the meets ahead," he said.

Cal Poly's freshman Jennifer Lucarelli won the 3.1 mile women's race in 18:19. She was followed by UC Santa Barbara's Lisa Rickard (18:38) at the finish line.

The times were slow for a championship event, due to poor conditions.

Cal Poly's cross country teams raced away from the competition at the California Collegiate Athletic Association Championships here Saturday.

In the men's race, Mustang runners captured the top three spots. Here's the breakdown for their first five finishers:

1. Cal Poly's,0
2. Cal Poly's, 2
3. Cal Poly's, 3
4. Cal Poly's, 4
5. Cal Poly's, 5

The team of the top three runners put on a sight to behold for the first time since this race began.

Rembao said the victory was good, but the team must gear up for the meets ahead.
