Two students rescued at sea after night on capsized boat

By Michelle Stephens
Staff Writer

Two members of the Cal Poly Sailing Club who were in danger by challenging the rough waters of San Luis Harbor spent last Thursday night sitting on the hulls of their capsized boat before being rescued by passing fishermen.

Despite high winds and small craft advisory warnings, statis-
tics sophomore Erica Raymond, 22, and mechanical engineering senior John Russell, 25, launched an 18-foot catamaran from Port San Luis around 6 a.m., said Mike Sansoucy, acting senior officer for the Port San Luis Harbor Patrol.

"We know about the warning, but felt the waves needed to be challenged," Russell said. "These conditions are great for sailing — if you're experienced and you don't tip over."

The two sailors intended to reach the "mile buoy," a marker three miles off Avila Beach. While turning around at the buoy, wind caught the underside of the boat and flipped it over.

"It flipped over so fast — much faster than normal," Russell said. "One second we were in the boat, the next second we were in the water."

Gusty winds made it difficult to tilt the catamaran upright, Russell said. They decided to sit on its inverted hulls and use the remaining sunlight to dry off and wait for help.

Up in the sky ...

Financial Aid boosted
Cal Grants increase $400 per student

By Suzanne Hook
Staff Writer

Cal Poly students who depend on Cal Grants to pay for academic fees will find a welcome surprise this fall in the form of a $400 increase in their awards.

"We have seen an erosion of Cal Grant support in the past due to the budget crisis," Ryan said.

But despite past uncertainty, Cal Grant awards for Cal Poly have increased for the 1993-94 academic year, Ryan said.

The state Legislature increased money for Cal Grants by $51.2 million when it passed the state budget June 30. Cal Grant funding will increase to an average of $1,640 per California State University student as a See FINANCIAL AID, page 2

Financial aid:

From page 1 of the new budget. Currently, CSU students receive an average of $914 to $1,300 per year.

The $1,440 figure covers the entire fee for Cal Poly students face in the upcoming year.

"We have over 6,000 students on financial aid at Cal Poly," Ryan said. "We are trying to help students stay in college. It has become exceedingly tough to do so.

The conference, held in San Diego, brought together more than 2,000 financial aid administrators from universities all over the country. Attendees received regulatory updates concerning state and federal policies.

Ryan said she returned with new information and ideas for Cal Poly's Financial Aid Office.

Ryan said the implementation of a voice-response phone line is of specific interest to her. With the new line students could call to inquire about their financial aid status.

Extended Education dean named
Barnes sees 'many opportunities' to expand Poly program

By Michelle Oelze Staff Writer

A new dean has been chosen to head Cal Poly Extended Education.

Carol E. Barnes, the dean of Extended University Programs at Central Washington University, was appointed by Robert Koob, vice president for academic affairs.

Barnes was selected from 130 applicants, said Michael Suess, director of faculty affairs.

"She was chosen primarily because of her strong background in extended education as well as her leadership potential," Suess said.

Barnes will begin her duties at the end of August. She will succeed Howard Volmer, who retired June 30.

"I think it will be a great challenge," Barnes said. "I think there are many opportunities for continuing education to grow at Cal Poly."

The program offers various adult education courses, ranging from one-day workshops to 10-week sessions. Formal enrollment in the university is not necessary; however, no course credit is given.

Barnes is expected to work closely with Cal Poly's Faculty Development program. According to Suess, she will help bring new technology to the classroom and improve faculty teaching skills.

For example, "distance learning education" is an area Barnes intends to expand upon. She said the program would use telecommunications and other media resources to provide coursework to people who can't attend classes on campus because of work or family-related constraints.

The Ellensburg, Wash., resident is an adjunct professor of gerontology — the science which studies the aging process and its social implications.

Barnes' new ideas and fresh perspective (and) we're ready to experience (and) we're ready to go to court.

ARRESTED?
Have you, a member of your family, or a friend been charged with a DUI or other criminal offense? If so, we know what you're going through and we can help.

For example, we have represented thousands of people in Courtroom appearances in Santa Luis County and throughout California. Simple calls for information ormake an appointment for a consultation. There is no charge to answer your questions, discuss your rights and let you know what will happen in court. We don't mind taking the time to talk to you and we know from experience that you will feel much better knowing exactly what is going on. If you want a public defender, we will tell you how to go about that too.

If we review your case, if you would like us to represent you, we will meet you in court.

NEW LEAGUE

From page 1: At Athletic Conference, a Division I league which includes the University of Hawaii, Fresno State, San Diego State, CSU Northridge and Sacramento State. He said a minimum of six schools are needed in a conference to participate in postseason play.

Cal Poly Athletic Director John Mcgutchan said some of Cal Poly’s programs will remain aligned in leagues they already compete in. For example, wrestling currently competes in the Pacific 10 Conference and will remain in that league.

Women’s volleyball, a Division I independent, will join the AWC in 1994-95. Cal Poly volleyball head coach Craig Cummings said he thinks the conference will have a positive effect.

“T think it will be nice to have a home and say we are in a conference now,” Cummings said.

McGutchan said the AWC is a major factor in Cal Poly’s transition to Division I. “It’s a big step for us,” he said. “But we still have a long way to go.”

He said resources are still needed to make the teams ready to compete at a Division I level.

Cal Poly President Warren Baker agreed, although he stressed the importance of keeping expenditures in line with resources. He will chair the executive committee of the AWC.

“The highest priority is to embark on a program to expand the conference with institutions that have the same objectives as we do,” Baker said. One of those objectives is to keep athletic programs cost-effective.

“The ultimate objective is to provide an opportunity for students to compete and ultimately achieve a degree,” Baker said. “The athletes are students first and athletes second.”

PAY RAISE

From page 1: Salary adjustments will be given to those faculty and staff whose exemplary service warrants a raise.

MacCarthy said union negotiations may be finished by January, and appropriate pay raises will be distributed immediately following the outcome.

Negotiations between the unions and the CSU does not necessarily mean differences exist between the two sides, according to Bob Gurian, legislative advocate for the California Faculty Association.

“Under the law, the Board of Trustees cannot (independently) give a pay raise (to faculty and staff) of any sort,” he said.

Gurian said the two sides are required to exchange proposals and negotiate a mutually satisfactory plan.

“It may be that the parties have no disagreement,” he said. “The parties (still) have to get together and exchange proposals.”

Gurian said a timeline hasn’t been worked out for the negotiations.

“Hopefully (it will be) weeks, rather than months,” he said.

Located on the lower level, UU, next to McPhee’s Games Area.
By Joseph Ripp

Well, it appears that we as a nation are once again toying with the point. Our topic for today is the enlistment of homosexuals in the U.S. have trotted out the old "Disorganization." "Sober- minded-seeing what have you."

But I think they're fibbing. The real problem is our discom­bination, for various reasons that they themselves will scrupulously un­derstand. Maybe they can't get over that $.65 gouging at the box office ("Confirmation of God for six-and-a-half cents!!! I remember when proof of the Divine Being could not be found in four bits, including popcorn"), or perhaps they hold that God's final direct revelation to humanity was Marilyn Monroe.

For this reader who, at this point, would consider my approach the most profoundly important of subjects as flippant, I assure you that I am very much in earnest. I've been all around this great big world and, truly, I've yet to see anything much better — more divinely beautiful — than the women of California girls. And you know, I'm not making this up; excuse me of literal-mindedness if you will, but our own sacred texts state that God has created humanity in the divine image. Remember? Quite a nob doesn't seem to.

And I suspect many of these girls are not out to bother anyone, but rather to be free from the bondage to nothing less than beauty and pleasure. The tenacious hold of many moralists seize on is­sues of the flesh, like so many righteous pit bulls, their fangs on things they hold taboo, always make me wonder what emotional skeletal might be lurking behind the cowled form, in their own cerebral closets. It's too easy to gauge a man by his enemies than by his friends.

Now correct me if I'm wrong, but don't beauty and pleasure seem like good things, things that would spring from a benevolent God? I have no idea whether human beings, like other animals, have instincts, but we certainly gravitate by nature toward the beautiful.

Yes, I said it: We are animals (although truly the pinnacle of a good creation, fall or no fall). But why should this worry us so? We've tried for many centuries in many ways to sever the physical from the spiritual and guess what — physical, winner by knockout in the first round. This should tell us something.

The problem is not that the spiritual sphere has a glass jaw; it's that our idealized anti­criminal self does not offer enough defense, but that we offer any at all. To be human is to strike a reasonable balance between our opposing tendencies.

I know that this may seem a hopelessly modern notion, but we are acknowledging our urges as our own and get on with it already. And perhaps more important, we need to allow others the same freedom.

And if someone's predilection is for a person of his or her own gender, or someone glimpses that slight divine spark in a person with gonads similar to his or her own, hell, then be it. You will never convince me that the pursuit of love is wrong, however the pursuit manifests itself.

The mistake we make, maybe the mistake I am making right now, is that many moralists seize on an opinion is even warranted. Whatever one is born homosexual, or chooses to be homosexual, or becomes homosexual as a result of his environment — whatever the case — really makes no difference. None. Zip.

That someone finds his or her own gender sexually attractive is neither my business, nor yours, nor that of a bunch of old men in Washington. End of story.

The amazing and depressing part of sitting here, pontificating, is that no one will remember this simple fact, except maybe the odd bored coronary looking down from its perch.

Joe Ripp is an English M.A. student and Opinion Editor for Summer Mustang.
ENJOY THE SUMMER WITH ADDITIONAL SIGHTS

With the exception of the hilarious Hunter and the unassuming Hackman, the movie fails to provide the audience with the same excitement and fury the book created. Cruise is believable as the lead character and it’s nice to see him in a situation where he’s vulnerable. It’s Tripplehorn, playing his wife, who is weak and boring. She tries to make an Academy award-winning performance out of every scene. Yet Tripplehorn’s weaknesses are made up for by Hunter, who

SLO Little Theatre opens its season with the jazz musical "Chicago." The Firm' is on shaky ground
Grisham's novel adapted, Hollywood style

By Kelly Rice
Senior Staff Writer

One of the summer’s most anticipated movies has finally arrived, and it’s a bitter sweet arrival at best.

"The Firm" opened in theaters recently and, while packed with some Hollywood’s best actors and actresses, the film is a disappointment.

With stars like Tom Cruise, Gene Hackman, Holly Hunter, Hal Holbrook, Jeanne Tripplehorn and Ed Harris, "The Firm" should have been a sure-fire hit. Instead it proved great actors and actresses can’t ensure a film’s success.

"The Firm" is based on John Grisham’s book about an ambitious Harvard law graduate who forgoes offers from top law firms to accept a position with a small, yet wealthy, partnership in Memphis.

It doesn’t take long for Cruise to discover the firm is not what it seems.

The tax-specialist lawyers at Bendini, Lambert and Locke are hand-picked from the field’s best and brightest. Cruise soon discovers the firm is a front for a law firm for organized crime.

Homemade telescope views the stars
Enthusiast lives out of car to share passion for astronomy

By Len Arends
Staff Writer

Two pinpricks of light — one bright yellow, the other reddily orange — rest in the middle of the field of view. They appear about a half an inch apart.

"That’s Alhrez, a double star in the constellation Cygnus, the Swan," Steve Overholt said from the bottom of the ladder.

"The brighter star is about three times as much light as our sun," he said. The dimmer one orbits it at a distance equal to Neptune’s distance from our sun. In a turnout on Highway 46, about ten minutes west of Highway 101 in the Santa Lucia Mountains, a starship has been assembled for a nighttime spin around the cosmos.

Starship 30 is a telescope, custom-made during a four-month period by San Juan Capistrano native Steve Overholt.

The instrument has the same light-gathering power as the largest telescope at UC Berkeley. Overholt said. And to the best of his knowledge, it is the lightest telescope for its size.

Overholt next trains his sights on a tiny doughnut of blue-green gas.

The Ring Nebula, he announces. The fluorescent gas ring is the outer layer of a star — burned by the Sun — that is invisible to the telescope.

Overholt has a passionate dedication for astronomy. "I live out of my car, so I can afford to build my telescopes," he says.

His telescope also lives with him. Although 22 feet high and three feet wide when assembled, Overholt can break down the Starship 30 in about 15 minutes and stack it neatly in the back of his Ford Festival.

Overholt says the Starship 30 cost about $6,500 to build, not including labor. The light-gathering power of the telescope — a precision-crafted, 30-inch diameter telescope — accounts for some $5,500 of that cost.

The area of the mirror is the same width as the mirror to the eye — thus creating a more detailed and informative view.

Starship 30 is now pointed at the constellation Hercules. Looking through the eyepiece, one sees a delicate spherical structure resembling etched glass.

M-13, the Hercules Cluster, is populated with over 200,000 stars and is a satellite galaxy to the Milky Way. Overholt said.

"It takes about a hundred years for light to cross from one side of the cluster to the other," he said.

Starship 30 has earned the praise of many in astronomy. Last week, the portable giant telescope was set up as the centerpiece of "Universe 93," a convention held by the Astronomical Society of the Pacific at San Diego State University.

Normally, people who wish to display their telescope at the event have to pay a booth fee. Overholt said he was sought out and invited to show off his creation at no charge.

"It’s probably the biggest honor of my life," he said. Overholt offers "night sky tours" with the Starship 30 for a fee. To get a rate sheet, those interested can write to him under the name Steven Hage, at P.O. Box 2933, Paso Robles, Calif., 93447.

San Luis Obispo Little Theatre Playhouse will jazz up the town and celebrate its 17th season with a new location and a new set of plays on July 23.

Making their move from the converted barn room of the old Hilltop Junior High School, the new theatre is located at 888 Morro St.

The theatre will open with the musical blockbuster "Chicago," created by Bob Fosse, Kander and Ebb.

The same talent that made the musical "Cabaret" a success will bring jazz-age Chicago to San Luis Obispo, based on a 1926 stage comedy of the same name.

"When I found a musical, done by my favorite choreographer (Fosse), I knew I had to do it," said director Sherry Wright in a press release.

Wright said she tried to keep the musical true to Fosse’s dance style and capture the "in­ sequent, satirical" "Chicago" composers are known for.

"The tale takes place in prohibition-era Chicago, when it was easier to get away with murder than buy a drink, according to their promotional flyer.

The play’s heroine, Roxie Hart (Allison Suddarth), is a married, hard-nosed singer. She shows her lower loins and is brought to justice with the help of a slick lawyer.

Other characters include Roxie’s lawyer, Billy (Eric Bendini), the crooked Indiana lawyer (Drv Wiedenckler) as Billy’s previous client. Mrs. Morton (Anna Romero) is the raspy-voiced lady Roxie meets in prison, and Amos (Chad Stevens) is Roxie’s befuddled husband.

Kittie Singer, the theatre’s publicity chairman, said "Chicago" is one of seven plays the Little Theatre is putting on this season.

Founded in 1946 by Cal Poly English professor Agnes Howe, the theatre has had a season every year since then.

Gary Dove, a former Cal Poly student, designed the theatre’s state-of-the-art lighting. Sing said she hopes the lighting, combined with the new location, will draw more people to the theatre.

Sing said Cal Poly students have worked with the theatre before, whether they had actual parts in the plays or worked backstage. "(Students) are espe­ cially welcome to the theatre," she said.

"Chicago" will open July 23 at the City Playhouse in downtown San Luis Obispo. It plays Thursdays, Fridays and Saturdays through August 14.

Theatre’s City Playhouse will hold August 1 and 8 at 2 p.m. for youth ticket information contact 543-3733.
