### Open House picking up steam

*Poly admin agrees to help finance event*

By Lisa M. Hansen

Daly Staff Writer

Cal Poly administrators agreed this week to have the university fund part of the $15,000 needed to operate the April Open House — a move that has ended months of worry for the festival's planners.

Student Affairs, Administration and Finance and Academic Affairs have agreed to pay approximately $3,000 each. ASI will pay an expected $4,000.

Since the outset of festival planning, Open House planners have worried that the two-day event would be financed. Planners were thrown for a loop early this week when safety and facilities costs estimates came in at $13,000. In early January, Open House was projected to cost about $5,000.

The ASI Board of Directors authorized a $5,000 subsidy for Open House three weeks ago. Open House Assistant Chair Louise Brown said that money would act as a cushion if expenses over $13,000 were incurred.

"When we heard that news, it was a big blow," Brown said. "Basically we were told, 'How does this affect us? We just hoped that they would come back to us with good news.'

Vice President for Administration and Finance Frank Lehnen said mutual cooperation is expected.

"There is a spirit of cooperation," Lehnen said. "We just hoped that they would come back to us with good news."

Vice President for Student Affairs Kerry Fisher Science building all the way out to Poly View Drive.

Almost every club, organization and major had representatives at the sign-up session for the approaching Open House scheduled for April 22 and 23.

The line went from Room 286 of the Fisher Science building all the way out to Poly View Drive.

"We're expecting between 150 and 200 people to sign up today," said Assistant Chair of the Open House Committee Louise Brown.

Many students seemed angry for having to wait in such a long line but were excited about the event itself.

"This is going to be a great weekend," natural resource management sophomore Matt Milton said. "I'm really fired up about it. I just hope people come to our Smoothie booth."

Milton was there to represent Phi Kappa Psi fraternity.

To plan for the gala event, the Open House Committee has been meeting on campus for weeks. The main assignment for the latest meeting was to file the proper forms and requests for the upcoming event.

---

### Hot temperatures expected to vanish

Daly Staff Reporter

The unusually high temperatures experienced over the past week won't carry over into the weekend, according to the National Weather Service.

Cool air coming in off the Pacific Ocean will drop high temperatures into the low 60s for Saturday and Sunday. A 20 percent chance of rain was possible from a storm front scheduled to hit Northern California on Saturday.

### Poly bio wants to build aquarium

By Yelena Talley

Daly Staff Writer

Some Cal Poly marine biology students may be getting hands-on experience — and the Central Coast a new tourist attraction — if a proposal for an aquarium at San Simeon is accepted by the San Simeon City Council.

Chairman of the Biological Sciences Department V.L. Holland, along with other biological sciences department staff and professors, has been working on a project called "Central Coast Aquarium." The project group recently met with San Simeon City Council members to discuss the aquarium.

"The project would give Cal Poly students in the marine biology and fisheries concentrations an opportunity to enhance their education and research skills. Additionally, the aquarium would be open to the public as a tourist attraction.

Holland said the project's organizers think it is necessary to have community support to ensure the project's success.

Students in the marine biology and fisheries program currently use the Pacific Gas & Electric Co. marine laboratory at Pismo Beach for their research.

The proposal hasn't been formally submitted to the San Simeon City Council because the plan is only in a discussion stage. The project group recently met with Pismo Beach Mayor Tim Bittner to discuss plans for the aquarium. Bittner said he wants the aquarium to be open to the Shell See AQUARIUM, page 6

### U.N. seeks more troops to hold Bosnian truces

More than 11,000 soldiers requested to quell increasing cease-fire violations

By Robert K. Reid

Associated Press

SARAJEVO, Bosnia-Herzegovina — French peacekeepers fired a warning burst from a machine gun Thursday to quiet another truce violation along the Sarajevo front, and U.N. officials appealed for nearly 11,000 more soldiers.

Yasuhi Akashi, chief of the U.N. mission in former Yugoslavia, said the troops are needed to secure truces between Serbs and the Muslim-led government in Sarajevo, and between Croats and Muslims in central and southwestern Bosnia.

He said both cease-fires generally were holding but expressed concern about increasing violations.

"We very much need not only the full compliance by the parties of the agreements they have already accepted or reached, but also we need additional resources, additional personnel," he said in Zagreb, Croatia.

Akashi said he needed 4,000 more soldiers for Sarajevo and 6,050 for the rest of Bosnia.

With the United States declining to commit troops without an overall peace accord, and Britain, France and Canada reluctant to send more troops, it was unclear where Akashi might get additional peacekeepers.

The U.N. mission's military chief, Gen. Jean Cot of France, said reinforcements were needed immediately to avoid "losing what has been done."

Cot had harsh words for the U.S. decision not to commit ground troops unless the Bosnian factions work out a peace settlement. That policy is "not very courageous," he said.

### Would-be VPs vie for job at campus forums

By Lisa M. Hansen

Daly Staff Writer

A nationwide search for a new vice president for student affairs — students' most vital link to the university's policymakers — is in its final stages.

The position is expected to be filled by July 1.

Representatives from Health and Psychological Services, Ethnic Studies, Residential Life and Education, Vice President for Academic Affairs at Allan Hancock College in Santa Maria, spoke at Thursday's forum, June Gonzalez, vice president for student services at Allan Hancock College in Santa Maria, spoke Tuesday.

At Thursday's forum, Juan Gonzalez, vice president for student services division at California State University, San Bernardino gave his presentation.

Other candidates hail from Wisconsin, Pennsylvania, Maryland and Washington, according to Selection Chair

BOSNIA: U.S. commander says Serbs have almost reached arms compliance

From page 1

The United States does have a large contingent of warplanes in the NATO force that patrolled Bosnia's skies. Two U.S. F-16 fighter jets shot down four Serb warplanes that U.N. officials said bombed a Bosnian government army factory Monday about 45 miles northwest of Sarajevo.

A NATO threat to use warplanes to bomb Serb artillery around Sarajevo ended the shellings of the besieged capital by the Hebron mosque massacre, from Jewish extremists.

"This release won't change the hatred between us and the settlers," said 17-year-old Yasser Levy, a Jewish settler who was killed at the late Meir Kahane, an extremist anti-Arab militant. "One of the fugitives, Nathan Van Den Akker, 20, was arrested at his residence at 210 Grand Ave., Public Safety Investigator Raymond Berrett said. Police said they recovered 84 grams of marijuana, marijuana seeds, a scale and a pager.

The arrest came in the wake of recent reports of an increase in marijuana use on campus. Berrett said Public Safety has been working with the Sheriff's Narcotics Task Force on the issue.

"Last quarter, there were more incidents of marijuana use than in all of the previous quarters combined. Most calls were for the smell of marijuana, according to police reports.

POLY STUDENT ARRESTED ON MARIJUANA CHARGES

By Joy Neiman

Police arrested a Cal Poly student Feb. 23 on charges of possession for sale and cultivation of marijuana.

Math sophomore Jon Van Den Akker, 20, was arrested at his residence at 210 Grand Ave., Public Safety Investigator Raymond Berrett said. Van Den Akker was later released on $4,000 bail. Police said they recovered 84 grams of marijuana, marijuana seeds, a scale and a pager.

The arrest came in the wake of recent reports of an increase in marijuana use on campus. Berrett said Public Safety has been working with the Sheriff's Narcotics Task Force on the issue.

"Last quarter, there were more incidents of marijuana use than in all of the previous quarters combined. Most calls were for the smell of marijuana, according to police reports.

It's everywhere you want to be.
There is nothing more pleasing to the eye than a nicely shaped, naked woman. This is true not only for the beholder but for the artist as well. The most beautiful work of art on the planet is the most beautiful of women.

The problem with this is that it is not always the case. The world we live in is not perfect. There are many things that we need to improve in order to make it a better place. One of these things is the way we treat each other.

The issue I am going to discuss today is the way we look at people. And usually, the less our object is appreciated, the more we try to humiliate them.

For example, the most beautiful work of art on the planet is the most beautiful of women. But when we look at pictures of women (either fully-clothed or naked) in a magazine or on TV, we often see them in a compromising position. This is not only a violation of their privacy, but it is also a form of sexual harassment.

In my opinion, this is wrong. We should respect each other and treat each other with dignity. We should not use our power to humiliate others.

This is not only true for women, but for everyone. We should respect each other and treat each other with dignity. We should not use our power to humiliate others.

The problem with this is that it is not always the case. The world we live in is not perfect. There are many things that we need to improve in order to make it a better place. One of these things is the way we treat each other.

SUMMER SCHOOL FOR PEOPLE ON THEIR WAY TO THE TOP.

If you didn't sign up for ROTC as a freshman or sophomore, you can still catch up to your classmates by attending Army ROTC Camp Challenge, a paid six-week summer course in leadership training. By the time you graduate from college, you'll have the credentials of an Army officer. You'll also have the self-confidence and discipline it takes to succeed in college and beyond. Seeking challenging opportunities, management experience or adventure training? Call Captain Eric Wagner at 796-7002.

ARMY ROTC
THE SMARTEST COLLEGE COURSE YOU CAN TAKE.
From page 1
Richard Equinos. The search began last fall, and a job offer to one of the candidates is expected by mid-March.

Equinos said the vice president's salary will depend on the individual's experience. Interim Vice President Kerry Yamada estimated that the incoming vice president would earn between $90,000 and $100,000 per year.

The job deals with all aspects of campus life outside of academics, such as health and career services.

"This is a vital position on the campus," Equinos said. "It is a very key leadership position. The position level has high impact potential. It makes a significant impact on campus environment and all of the university community."

ASI President Marquies Pires emphasized that the position is ASI's direct link to President Warren Baker.

"That is our main conduit to the university president," Pires said. "It is our liaison and our advocate. It is a very key position for ASI and the general student body."

The position was vacated last August when Hazel Scott left to assume a similar post at Occidental College in Los Angeles.

Yamada has assumed the duties until a new vice president is hired. Because he plans to retire, Yamada did not apply for the position.

Yamada said the job is hectic, but well worth the effort.

"It is a very challenging experience," he said. "But the most enjoyable part is to work with the students. Working with ASI has been a stimulating experience for me."

Pires said he currently meets with Yamada on a weekly basis, but in the future the meetings will be at the discretion of the vice president.

"Keep him informed on any hot issues, like the Children's Center and Open House," Pires said. "We talk about budgets, policies and procedures."

Interim ASI Executive Director Polly Harrigan — who oversees the day-to-day operations of ASI — describes the relationship between ASI and the vice-president as critical.

"ASI has a two-way (correspondence) relationship with the vice president for student affairs," Harrigan said. "It is an absolutely critical position because it is our chance to speak on behalf of student issues at a managerial position."

Student Life and Activities is another student organization that reports directly to the vice president for student affairs. Student Life Assistant Director Bob Walters said it is absolutely necessary that the candidates be in touch with the student body.

The remaining open forum is scheduled for next Tuesday.

AQUARIUM: A concept which could benefit both students and tourists

From page 1
Beach public in addition to its educational research use.

Cal Poly is working with Shell Beach because the university needs more support and the community needs more tourists, said adjunct professor of biology Richard Piros.

Orkand said the aquarium would complement and expand existing programs at Cal Poly, including marine biology and aquaculture.

"It will increase the educational offerings at Cal Poly," he said.

Orkand said the aquarium proposal also will provide public educational programs for K-14 schools and the community.

The proposed development plan would immediately benefit the local construction industry by providing employment during the construction phases, Orkand said. These benefits will extend to the coastal cities of Oceano, Pismo Beach, Grover Beach and Morro Bay.

The project also will benefit Cal Poly through expanded educational research programs and private funding for research grants and contracts, Orkand said. If the project is successful it could serve as a model for other small communities, whose economies are linked to.palm oil palm oil palm oil palm oil palm oil palm oil palm oil palm oil palm oil palm Men's tennis draws blanks on the court

Cal Poly men's tennis has encountered its share of adversity.

The Mustangs (5-4) have lost four of their last five games, but have also been on the wrong end of two skunked losses. The two 7-0 defeats of the 5-4 Mustangs have come from the racquets of Division I universities.

"It should be real competitive," Head Coach Chris Eppright said. "We always play hard. They're cocky and do not believe in us.

"They are good enough to make us play well to win," he added.

KENNY: Tennis opponents should watch ball

Form page 8 top-ranked UC-Davis 7-2. The Grand Canyon match comes on the heels of a home-conference contest against Cal State Los Angeles Friday.

"Winning the (Grand Canyon) match will put us on top on them, don't know what will happen in the rest of the season's games," Eppright said. "So, it's not do or do.

"We have to be very patient and wear them down," he added. "If the girls are going to be the best match they have all year, I hope they do not get impatient and start missing their shots."

Friday's match against Cal State Los Angeles starts at 2 p.m. First serve Saturday goes up at noon.

Spring training: New start for Eckersley, Oakland A's

PHOENIX — Dennis Eckersley feels liberated these days. Roberts Alomar's home run is finally gone from his mind, rekindled.

"Everything seems so relaxing," he said Thursday morning, flashing a smile as the Oakland Athletics began their first workout of the spring at their main training camp.

Last year, his mind couldn't escape the bitter ending of 1992, when he gave up a ninth-inning homer to Alomar to Game 4 of the AL playoffs, allowing Toronto to take a 3-1 lead in the series, which the Blue Jays won in six.

All winter long, Eckersley couldn't get it out of his head. To him, it was more significant than becoming the ninth pitcher to win the Cy Young and Most Valuable Player awards in the same season.

"It just seemed like it always popped into my head," he said. "It takes away from all the awards. Awards are great when you look back.

This winter was entirely different. Eckersley needed only one indicator to tell him that Alomar was behind his_occasions.

"I slept better," he said. "He didn't bother to take a vacation. When you're a 39-year-old pitcher, there's just no time.

"I worked out every day," he said. "I'm going to be 40 years old in October."

WEEK 10

TUESDAY
OTHER EVENTS
* Cal Poly has joined the ranks of major international firms who have once again begun to reinvest in South Africa—a country that has suffered more than 10,000 political deaths since 1990. And while the country prepares for its first-ever inter­national elections scheduled to take place in just over a month, those investments may prove to pull South Africa out of a 10-year economic disaster. Cal Poly implemented a ban on at least two companies eight years ago after they violated the investment policy of the Foundation Board of Directors. Wentworth, Hauser & Violich, and Kaspick & Co., which manage equity hold­ings and mutual funds for the Foundation, were con­tinually screened for socially responsible investing, ac­cording to Trust and Investment Administrator Kandy Hart.

Cal Poly's money is back in South Africa.

Cal Poly has joined the ranks of major international firms who have once again begun to reinvest in South Africa—a country that has suffered more than 10,000 political deaths since 1990. And while the country prepares for its first-ever inter­national elections scheduled to take place in just over a month, those investments may prove to pull South Africa out of a 10-year economic disaster. Cal Poly implemented a ban on at least two companies eight years ago after they violated the investment policy of the Foundation Board of Directors. Wentworth, Hauser & Violich, and Kaspick & Co., which manage equity hold­ings and mutual funds for the Foundation, were con­tinually screened for socially responsible investing, ac­cording to Trust and Investment Administrator Kandy Hart.

Based on the activity in South Africa then, the stu­dent body and President Warren Baker requested that the Foundation not do business with companies support­ing ethnic violence and plagued with political upheaval. Nelson Mandela, now president of the African National Congress and a candidate for South Africa presi­dent, was released from prison in 1991—a serious ill, but ready to put the country back on its feet. During this time, South Africa began establishing itself as a democratic nation. Apartheid was abolished. South Africa is a land shredded by ethnic violence and plagued with political upheaval. Nelson Mandela, now president of the African National Congress and a candidate for South Africa presi­dent, was released from prison in 1991—a serious ill, but ready to put the country back on its feet. During this time, South Africa began establishing itself as a democratic nation. Apartheid was abolished. South Africa participated in the Olympics and Mandela and South Africa President F. W. de Klerk soon followed the lead of the UN General Assembly in Oc­tober when it complied with Mandela's request and lifted the trade sanctions against South Africa. The Foundation has been working with re­newed investments are a way to bring in the resources the coun­try will need after the election. The problem is: Will the government have enough money to meet the demands of the black community?
