Grenade explodes near U.S. post in Haiti

By John Rice
MEXICO CITY — Police kept quiet Thursday about their investigation into the slaying of a leading politician, feeding a swirl of speculation and uncertainty that helped feed fears of political violence in Mexico.

The murder of Jose Francisco Ruiz Massieu, secretary-general of the ruling Institutional Revolutionary Party, brought more questions from a public already suspicious of official explanations for other recent spectacular killings.

Thursday marked the first day of a 10-day government crusade against drug traffickers, a campaign that has already netted 70 arrests and 11 deaths.

One of the guards at the door has a badge that says "security guard," but he prefers another name.

"We generally call ourselves food monitors," said civil engineer David Walch. Citations will be referred to Judicial Affairs where penalties will be assessed on a case-by-case basis.

Two guards are posted at the front door, asking people entering the library to finish, discard or put offending materials in their backpack.

Student security guards — with the power to issue citations — have been hired this quarter to enforce the library's policy of no food, no drink and no chewing tobacco.

The guards are part of an intensive campaign by library staff to reduce the amount of damage to library materials and facilities caused by students, food and tobacco.

"The Program Board used to be made up of five or six subcommittees," Stipicevich said. "Programming such as concerts, films, special events, speakers and fine arts events are covered by Program Board.

And the first convoy of American Humvees to arrive after the blast did not stop, and ran over the body of one wounded Haitian, AP photographer Rick Bowmer said.

At least 140 guards are on the payroll, including 100 U.S. military police and 40 Haitian police officers.

But now programming falls under one expense account overseen by Program Board, which has the power to approve and authorize money for different events.

The Program Board was divided into many subcommittees with separate expense accounts, according to ASI Director of Programs and Facilities John Stipicevich.

Program Board brings big-name concerts back to Cal Poly campus

By Nicole Medgin
The reorganization of ASI's Program Board last spring has provided more money and flexibility for ASI Concerts to schedule popular bands like The Pretenders and Toad the Wet Sprocket.

ASI Concerts Chair Mike Wasserman said, "ASI wouldn't allow the risk of major programming.

But concerts weren't even a possibility last year, according to ASI Concerts Chair Mike Wasserman. "Last year we were shut down due to losses from the Children's Center," Wasserman said. "ASI shouldn't allow the risk of major programming."

In January, ASI instilled a first-ever hiring freeze to bail out the center's debt, which was in excess of $100,000.

Last year, Program Board was divided into many subcommittees with separate expense accounts, according to ASI Director of Programs and Facilities John Stipicevich. Programming such as concerts, films, special events, speakers and fine arts events are covered by Program Board.

But now programming falls under one expense account overseen by Program Board, which has the power to approve and authorize money for different events.

TOP OF THE AGENDA SEPT. 30

62 school days remaining in fall quarter.

TODAY'S WEATHER: Early morning fog, mostly sunny. Tomorrow's weather: Morning fog, mostly clear.

Today's high/low: 78/58. Tomorrow's high/low: 74/NA.

Breaking the habit
If you want to quit smoking but have had a hard time breaking the habit, the San Luis Obispo County Health Department has a "Quit Kit" to help smokers.

The free kits come with a complimentary consultation from a cessation expert.

The kits are available on a limited basis. For more information, call the Tobacco Control Program — 781-5564.

TODAY

Last Day To Drop A Class • Can go through CAPTURE until 7 p.m. — 756-7777.

Life Choices Group • Meets every Friday, 12-1 p.m., Health Center — 756-5252.

Casino Night • Chinese Students Assoc. — Chumash, 7 p.m.

WEEKEND

Science Lecture • League of Women Voters sponsor event with Cal Poly physics professor Randall Knight, "Energy, Transportation and the Environment," District Meeting Room, SLOHS campus, Oct. 1, 9:30 p.m.

Job Search Seminar • University Christian Church sponsors "Sell Yourself" seminar, 135 San Benito, 1490 Southwood Dr., Oct. 1—773-1662.

Airport Open House • San Luis Airport's "Airport Day" to showcase aviation and the aerospace industry, Oct. 1, 9 a.m. to 4 p.m. — 781-5205.

UPCOMING

Last Day To Add A Class • Can go through CAPTURE until 7 p.m. — 756-7777.

Agenda Items: To Gndy Webb, Graphic Arts 226, Cal Poly 93407 — 756-6784

LIBRARY: Security guards posted at doors to check for food, drinks

From page 1

gineering senior John Talcott.

He says their main job is just to inform people that they are not allowed to eat or drink in the library. "We're really just a glorified sign post," he said.

After confronting someone, Talcott records the incident by noting whether the person was compliant, questioning or bellicose.

"Fuss has been minimal," he said. "I don't get a lot of back-talkers."

One student questioned Talcott when he asked her to put her water bottle in her backpack.

"I just wondered what they were doing standing outside telling people what to do," said English senior Teri Lynne Wankum. "Now I know that they get paid. I guess it's all right."

After being confronted at the door, one student later sought out a remote corner of the library to snack on a muffin and drink from the exact water bottle that Talcott had asked her to put away.

But human development senior Sile Foley said she felt justified in her offense.

"If you're careful and you're not using library materials, I don't see the problem," she said.

But cockroaches, silverfish, ants and other pests are the problem, Walch said.

In a recent letter to faculty and staff titled "Precious Dollars Thrown Away," Walch noted that the library recently spent $40,000 to replace carpet that was largely damaged by spilled food, drinks and tobacco.

Walch made special note of chewing tobacco.

"The custodians have found chewing tobacco in drinking fountains, on walls, in corners and in the elevators," he said.

Walch said the security guards are necessary because the problem is difficult for regular staff to monitor.

"We're surrounded by food outlets," he said, "and students love to eat and study."

There's still time to get money for this semester from Citibank.

Whether you’re an undergraduate or graduate student, Citibank has a student loan to meet your needs.
If you’re short on funds this semester, you’re not alone. During the 30 years we’ve been in the student loan business, students have often told us that they need extra money during the course of the semester to pay for tuition, books, and other expenses. If this sounds familiar, you can count on Citibank, the nation’s Number One student loan lender, to provide you with the best financial aid products and services with these important benefits:

- No payments while you are in school
- Low interest rates
- Loans for students of all incomes
- Monthly payments as low as $50
- No penalty for early repayment
- You don't have to be a current Citibank customer to qualify!

The faster you respond, the faster we can get you the funds you need. Or call us at 1-800-692-8200, ext. 594. Call today, and we’ll get an application out to you the next business day!

Video professor needs to adjust his set

Re: “Architecture student now can take their professor home with new video lab” Sept. 23

I came away feeling a bit disappointed after reading the article that appeared in last Friday’s Mustang Daily. In describing why he allows his Architecture 106 students to watch his lectures on videotape instead of attending class, professor Howard Westfall was quoted as saying “students are busy people” and “why punish them?”

I hope he was misquoted or that what he said was taken out of context. I also think that my students are busy, in part because their classes are full of people who come and go at different times. Setting expectations of themselves.

Frank is an individual who has taken advantage of the ways computers help people. He does his homework, his shopping and his banking on the computer. He has even fallen in love while using the computer. He told me so several months ago. Frank became involved in a relationship while using the Internet.

The Internet is a loose connection of thousands of computers that enables people to communicate just about anywhere in the world. The Internet allows people who might be in geographically different lands to communicate with one another quickly and efficiently. People can talk on the Internet without ever having to leave home. Another unique feature is it is relatively inexpensive to use to comparison to long-distance phone calls.

HAITI: Grenade kills three, wounds at least 30

From page 1

rounds into the door to open it, then fired another 100 rounds in­side.

American soldiers detained a man and took him away in a Humvee. Two other suspects were detained a at garage next door by an American MP with a 9mm pistol and a German shepherd dog.

Later, hundreds of people began looting the cement warehouse. Cheers went up from the festive crowd as even the metal doors were taken off their hinges and carried.

The looters later moved down the block to an automotive parts supply store, where they carried away everything from oil drums and engine parts to propane tanks.

U.S. military police drove by in Humvees with mounted guns but initially did nothing to stop the looting. Later, a dozen sol­diers armed with M-16s entered the store and many of the looters scattered.

U.S. Ambassador William Being condemned the attack but said it was not unexpected and would not derail the U.S. effort to restore Haiti's elected govern­ment. "The enemies of democracy will resort to any ends and means to stop the democratic change process," he said.

People carried the dead and wounded in pushcarts, hoping to find medical attention.

"After what happened today after I will go back to my neigh­borhood and destroy them," said Daniel Fleurimond, 25, whose cousin was wounded.

Earlier, the Port-au-Prince mayor entered City Hall under the protection of U.S. soldiers who landed in Haiti Sept. 19 and was greeted by cheering, singing crowds.

MEXICO: Assassin's identity remains uncertain

From page 1

political elite, led by President Carlos Salinas de Gortari, filed past his closed coffin.

The young, crewcut gunman was captured immediately, and police said he was still being questioned Thursday.

The federal attorney general's office announced Wednesday that the killer was named Joel or Hector Resendiz. Officials in Guerrero state, where Ruiz Massieu was once governor, said the suspect was a 30-year-old man from the Acapulco area who had been investigated for armed rob­bery.

But the newspapers Excelsior and El Nacional reported Thursday that unidentified federal police investigators iden­tified the man as Daniel Aguilar Trevino. They said he worked on a ranch near Ciudad Victoria in the northern border state of Tamaulipas.

The government-owned El Nacional said Aguilar was hired by two other men to kill Ruiz Massieu for 50,000 pesos — about $15,000.

The attorney general's office declined to comment on the report.

Many Mexicans are skeptical about the honesty of police and of their willingness to solve such crimes.

Suspicions remain high over the government's contention a Roman Catholic cardinal slain in May 1993 was accidently caught in a crossfire between rival drug dealers. Many also reject the theory a lone gunman was be­hind the March 23 killing of Luis Donaldo Colosio, then the ruling party's presidential candidate.

"The people think that there is something behind this, as in the assassination of Colosio," said Adolfo Suarez Rivera, presi­dent of the Roman Catholic Church Episcopate.

Ruiz Massieu was governor of Guerrero, a poor state noted for violence and drug cultivation, from 1987 to 1993. This year, he became No. 2 man in the ruling party and was elected to con­gress in August.

why just spend your life racing, you know?' "

"What's the point -- you're done when you're 30 and what are you going to do with the rest of your life?"

I was just looking way ahead and thinking that if I stay in school the whole time I'm racing and I could have racing support my school that's the kind of life I want to live," Smith said.

"I want my brain and my body to be strong," he added.

Markakis characterized Smith as an athlete who dedicates himself to following a rigorous training schedule and whose racing instincts give him the edge over his competitors.

"In racing there's normal mode and then there's race mode -- it is like this instinct kicks in when he's racing," Markakis said. "He thrives on challenge."

Smith agreed with Markakis and said that it was his discipline in his training that has made him a successful racer.

"Cycling is such a long race, that it kind of boils down to your discipline with training -- a person who is the most prepared with the most training in their legs usually comes out on top," Smith said.

Although there is prize money for winning races on the pro tour, Markakis said that is not his primary motivation.

"To think that at 22 he reached the top 18 in his first year and if he works as hard as most of the top pros have, the potential is scary," Markakis said.

CONCERTS: The Pretenders come to Poly

From page 1

"I had no natural talent for swimming, it was frustrating because I worked harder than everybody else, went to every single workout, trained super hard, and wasn't really getting anywhere," Smith said.

"I started riding mountain bikes for fun in my spare time and noticed I had a lot more natural talent. I figured if I applied myself the same way I did for swimming to something I was naturally talented at, I could do a lot more," Smith said.

He was right. A year later he placed fifth at the junior nationals.

Markakis, who will accompany Smith and more than 20 other Wheelmen competing in Saturday's race, said Smith has the ability to become one of the top racers in the country, adding that's motivation enough.

"Our goal at the start of the year was to win enough games to make the NCAA tournament," Gartner said.

Gartner estimates that 13 victories are needed to even be considered for the tournament and 14 to 15 wins are what is necessary to get in.

But one critic says U.S. taxpayers should not have to pay for Barra's elementary and high school education.

"He'll never pay back the education all U.S. taxpayers have paid for him," said San Diego resident Alfred C. Strohlein, who attended the hearing. "He did not play fairly and by the rules.

At least two other California high school illegal immigrants also have won legal residency to live and study in the United States in recent years.

Despite Thursday's good news, not everything in Barra's life remains settled.
**Cross country team heads to Stanford**

The Cal Poly men’s and women’s cross country teams will travel to Palo Alto to compete in the Stanford Invitational Saturday.

The tournament includes all the cross country teams from major California schools as well as some out-of-state schools such as Rice, Washington State, Arizona and Brigham Young.

Cross Country Co-Director Terry Crawford said that the Stanford Invitational is one of the better attended meets in California.

“It will be a good gauge to how well we compare with other California schools,” Crawford said.

The top runners for Cal Poly on the men’s side are seniors Coley Candele, Ryan Winn and Dan Held.

On the women’s side, senior Kellie Flathers and juniors Angela Graff and Jennifer Lacovara are the top Mustang runners.

Francis Castaldini and Jeffrey Jen contributed to Poly Briefs.

Men's soccer comes home to face LMU
Team hopes to halt three-game skid

By Jeffrey Jen

Head Coach Wolfgang Gartner

The men's soccer team entered its first season in Division I this year with high expectations. However, the season, so far, has been disappointing. Halfway through the year, Cal Poly is 4-5 and in the midst of a three-game losing streak.

Tonight, the Mustangs will attempt to turn things around when they host Loyola Marymount at Mustang Stadium at 7 p.m.

Cal Poly Coach Wolfgang Gartner expects a victory against LMU.

"If we do very well this year," Gartner said.

Loyola Marymount hails from the West Coast Conference, one of the two premier soccer conferences in the NCAA, according to Gartner. The other is the Atlantic Coast Conference.

However, Loyola Marymount is a middle-tier team in the WCC, Gartner said.

A home game against a struggling team may be just what the Mustangs need to reverse their recent skid, he said.

This game marks the start of three straight home games.

Senior forward Ryshiem Henderson noted, "We've been on the road for three weeks so playing at home will help. Everyone wants to play well."

Cal Poly lost eight starters from last year and a ninth starter — senior forward Leo Vera — was lost before the season started with an injury. Vera led the team in goals and points last season.

Still, Gartner expected the team to do very well this year. He returned an outstanding player in Henderson and had a host of talented freshmen entering the program.

Henderson is leading the team with seven goals and 15 points in eight games. However, he is quick to credit others.

"It's a lot of help," Henderson said. "I don't think I'm the entire offense. I think of myself as a facilitator.

The Mustangs get off to a tough start this season, losing to Eastern Washington and Humboldt State. Last weekend the Mustangs crushed Sonoma State 64-30.

Next weekend the Mustangs will play at San Francisco State and then return home to host UC-Davis on October 15.

For a much awaited game against the No. 9-ranked Hawaii Rainbow Wahine, the Cal Poly volleyball team will travel to the majestic islands hoping to avenge two defeats last year.

The Mustangs will battle what Coach Craig Cummings describes as the "Galacti-" of volleyball in a two-game series this weekend.

After a disappointing road trip where the Mustangs (6-8) lost to UC-Berkeley, Northern Illinois and Santa Clara, Cummings hopes to turn this season around.

"The team is very excited about traveling to Hawaii and looking forward to playing a nationally ranked team," Cummings said.

"I'm feeling good about our style of volleyball and expect Hawaii's weakness is much as we can.

"An upset is definitely possible," he added.

Cummings said that with a great week of practice and the determination to prove their worth, the Mustangs are confident they can turn the season around.

Women's soccer to face No. 9 Hawaii
