Gunman fires shots at the White House; none injured

By Nancy Bons

WASHINGTON — A 26-year-old Colorado man sprayed bullets from a Chinese-made assault weapon into the White House on Saturday, but neither President Clinton nor anyone else was injured, the Secret Service said.

The man was taken into custody immediately.

"The president was in no danger whatsoever," said Richard Griffin, assistant Secret Service director for protective operations.

The shooter was identified by the Secret Service as Francisco Martin Duran of Colorado Springs, Colo., who wielded an SKS Chinese semi-automatic rifle, similar to an AK-47 assault weapon, said Griffin.

Chief of Staff Leon Panetta said at least eight shots struck the White House, including three that hit the mansion portion were Clinton was watching football upstairs.

Panetta said Clinton would not alter his schedule because of the shooting and would attend a previously planned public dinner Saturday evening and church on Sunday as usual.

"We’ll all go to church tomorrow and be thankful that no one was injured," said Panetta, who was in the White House at the time of the shooting.

Briefing reporters in the same room where a bullet remained lodged in the wall, Panetta said Clinton expressed his appreciation for the citizens and Secret Service agents who captured Duran.

Asked about Clinton’s demeanor, Panetta said, "He wasn’t shaken at all.”

Griffin said there was no indication that Griffin was working as an assassination attempt at all, no way,” Griffin said.

He said there was no reason to believe anyone other than the gunman was involved in the shooting.

Bystanders ran for cover as the gunman fired 20 to 30 shots from just outside the iron White House fence on Pennsylvania Avenue, but then two men tackled the gunman.

Both Griffin and Panetta said a review of White House security would be broadened in light of the shooting. That review was begun after an incident in September when a despondent truck driver drove his truck through the gate and into the on-campus field Saturday as members of the Corps Club prepared to close the gates to their nearly-empty field.

"The quality isn’t good,” said Mason, a plant protection scientist senior. “But we’ve sold a lot more than any other year.”

But business management senior Shannon Decker, carry-

Pumpkins peter out; pilferers, purchasers pick prime produce

Rebeca Storick

Pumpkins carriers waiting until the last minute are out of luck if they were planning on picking their favorite gourds at the Cal Poly pumpkin patch — the best ones have already been picked.

The patch had to close due to the lack of quality pumpkins, according to one of the pumpkin patch’s directors, Mark Mason.

Vehicles kicked up dust as the on-campus field Saturday as members of the Corps Club prepared to close the gates to their nearly-empty field.

"The quality isn’t good,” said Mason, a plant protection scientist senior. “But we’ve sold a lot more than any other year.”

But business management senior Shannon Decker, carry-

Halloween prank turns gruesome as student assaulted after party

By Maxine Stringer

A Halloween trick turned grim for a Cal Poly student who was assaulted and left unconscious after a party Saturday night.

According to a report to the San Luis Obispo Police Department, 21-year-old Casey Brown, a Cal Poly graphic communications junior, was assaulted at 12:56 Sunday morning on South Tassajara Drive.

Police said the suspect, 21-year-old Stephen Laurensen of San Luis Obispo, was wearing a clown costume and became angry when someone took his clown wig off of his head.

Laurensen asked a friend, Craig Michaud, 24, of Dean Roles, to help him get the wig back.

Michaud is listed in last year’s Cal Poly ASI Directory as a soil science senior. He could not be reached.

Police said Laurensen returned angry even after his wig was returned and branded a knife at one of the party guests.

Students may pay computer fee to access mainframe

By Nicole Hedge

Cal Poly students may soon be required to pay a quarterly fee to connect the mainframe computer system on campus.

Because of the increased use of the AIX accounts by students and faculty, the system has become overloaded and harder to access, according to campus administrators.

"More and more classes are requiring students to get on the internet to make use of information not otherwise available," said Interim Associate Vice President for Academic Affairs Charles Crabbe.

"So many people were logging into their AIX accounts (two weeks ago) that the system simply shut down," Crabbe said, "We don't have the infrastructure right now to accommodate the demand.”

He also said the school doesn’t have the funds to upgrade the technology to keep up with the students’ needs. The “Information Technology Access Fee” — the proposed title for the fee — would be collected quarterly or annually to cover additional costs.

"If a fee were added it could be up to $72 a year," however, cautioned that the plan is in preliminary stages and an actual amount has not been determined.

"As it stands now, the school provides the service," Crabbe said.

"If you were facing with is, do we continue to provide access as an institution and remain unable to upgrade the system to the demands of the people, or do we consider a user fee which will offset the cost of providing the service?”

The proposal was brought to the CSU Chancellor’s Office by the presidents of Cal Poly, Sonoma State and Humboldt State Aug. 1, according to CSU spokeswoman Colleen Bentley-Alder.

Business strife rooted in deep internal unrest

By Ajay Mandal

Upheaval in the College of Business stemmed not from racial tension but from turmoil in core management and deep philosophical conflicts, participants on all sides have emphasized.

A vote of "no confidence" in former Dean Allen Haile pushed him out of his position and into another post in Cal Poly’s central administration earlier this month.

Business strife rooted from just outside the iron White House fence on Pennsylvania Avenue, but then two men tackled the gunman.

As a result of dissenting ideas on his management style and contrast-

While the three presidents also said all students should have 24-hour access to a personal computer, Crabbs said the emphasis has shifted to making campus networks more accessible.

The proposal originally had suggested that students be asked to buy computers as a necessary tool for education, much like textbooks. The administration has since de-emphasized that possibility.

Jan. 20, the proposal will be brought to the Board of Trustees for a final vote.

"The proposal, as approved by the Board of Trustees, the concept will be sent to the three schools to see how it fits each particular policy," said ASI President Erica Brown.

Crabbs explained the purpose of the fee would be to expand usage of the mainframe.

"The fee would be used to finish the wiring in the dorms, increase off-campus network access, allow more processing time and to increase the number of computer labs," he said. "We want to be able to insure that if a student logs in or dials a modem in, that he or she will have access.

"Three stages have been considered as a way of charging the fee," Crabbs said. "The first idea is to charge a flat fee. In this case, the student would have to pay the fee whether or not the services were being used, kind of like the Rec Center fee.

"The next stage would be to make a fee based on student need. Here the student would only have to pay the fee if he or she perceived a need for the service that particular quarter.

"The last stage is a more sophisticated model," he explained. "The student would pay a fee for certain services. Beyond that he or she would pay additional fees to access other sources."

Although Crabbs explained that the second stage would be preferred, this may not work for all the campuses.

"The campuses would have to be given flexibility on how to distribute the fee," he said. "A proposed fee structure for Cal Poly may not work for Sonoma or Humboldt."

If there is to be a fee, it is slated to go into effect next fall, Crabbs said. But with the continual increase in fees, some students are wary about another cost being added to the list.

Business senior Jodi Orr said she doesn't agree with the need for another fee.

"There should be a budget set aside for computers and upgrading," she said. "Students pay enough money as it is. The school already provides this service and should try to continue doing so."

Statistics senior Jason Barnhart has mixed feelings about another fee.

"I wouldn't pay it if I didn't have to," he said. "But the school needs to keep up with technology and the computers should have it available to them.

"If a fee is the only way they would be able to do this, then I guess it's necessary."
Los Angeles Republican mayor endorses Feinstein

By Anh Bui
Accused Fees

LOS ANGELES — Republican Mayor Richard Riordan endorsed Democratic U.S. Sen. Dianne Feinstein on Sunday, saying she has helped the city with crime and earthquake bills.

"I am supporting Sen. Feinstein because she has shown an ability to work with Republicans and Democrats to solve the problems of Los Angeles and California," Riordan said at a Studio City news conference.

He said his endorsement was not the result of an exhaustive search by Feinstein's Republican challenger Michael Huffington, who is under fire for employing an illegal immigrant nanny.

"I am not against anybody. I'm for Dianne Feinstein," Riordan said. "Dianne has proven herself. If he's elected, he can prove himself, but she has already proven that she's a friend of Los Angeles."

Huffington said he was not surprised by the Riordan endorsement.

"She's got a natural affinity toward old-style politicking. She's part of the establishment — and clearly that's where Dick Riordan feels most at home," Huffington said in a statement issued by his campaign.

Riordan is the second major Republican mayor to endorse a Democratic candidate. Last week, New York Mayor Rudolph Giuliani endorsed Democratic Gov. Mario Cuomo.

Political experts said Riordan's endorsement may polarize conservatives and moderates in the GOP.

"I think that the conservative wing of the Republican party will be angered and will probably then be more likely to vote for Huffman than they would otherwise," said Stanley Moore, a political science professor at Pepperdine University.

"Nevertheless, it will deter some people from Huffman. A lot of moderate Republicans will very likely be swayed by this in Southern California," he added.

All four major-party candidates for the U.S. Senate and governor had full campaign schedules on Sunday.

Wilson appeared at a GOP candidate barbecue in Elk Grove, and Democratic challenger Kathleen Brown spoke to a labor rally in Pico Rivera.

Huffington was at the same Republican barbecue in the Sacramento suburb where the nanny issue continued to haunt him.

"I've said I take the responsibility (for the hiring)," Huffman told reporters. "But in the end it won't have any significance. There may be a few people who will be influenced, but most people are more concerned about their taxes going up."

Possible student broadsided by drunken driver Friday

By Matina Guliger
Staff Writer

A former or current Cal Poly student was injured in a car accident early Friday morning after allegedly speeding on a rural road.

According to the California Highway Patrol, Steven Wong, 25, was struck by a car near the Los Osos Valley Road.

Mooney, 22, approached the intersection at an unknown speed and entered Wong against a red light, according to a police report.

Wong's vehicle, forcing it off the road.

Police later arrested Mooney for driving under the influence.

Wong was left pinned in his car. The San Luis Obispo Fire Department responded to the accident, and freed Wong from his car within five minutes.

Wong was rushed to the Sierra Vista Regional Medical Center where he was treated for a concussion and a fractured left leg.

A hospital spokesperson said he was released Sunday.

Wong, a San Luis Obispo resident, was listed in last year's ASI Directory as an electrical engineering senior, but he could not be reached for comment.

BUSINESS: Divided management created unrest

From page 1

A business that tried to keep a low profile this past fall because the early meetings with new faculty members were calm enough, has been something of what emotional," Koob said.

"Faculty were emotional about the dean to solve the problems," Koob said.

It was instances such as those, Halle said, which were emblematic of the problems he encountered as dean.

Halle surrounded himself with six faculty members who acted as his advisers and managers for the College of Business.

Halle said he was in a difficult position because his management team was making decisions without consulting him.

Halle also said he was in a bind because while faculty members were getting angry at him, his own management team rebelled when he redirected the blame toward them.

President Warren Barker, who played a vital role in hiring Halle to Cal Poly, was disappointed that Halle in his brief tenure was not able to bring stable leadership to the college.

"He placed a good deal of trust in BUSINESS, page 6

ASSAULT: Tempers flare after Halloween bash

From page 1

Brown left the party at around the same time as Miahaud and Laurenson, according to a police report. Laurenson wanted to start a fight and allegedly followed Brown down the street.

Laurenson reported that Laurenson punched Brown, causing him to fall to the ground. Then he allegedly proceeded to kick Brown around with his boot. Witnesses also reported that Laurenson was seen chasing Brown, according to police.

Police said they found Brown unconscious a short time later.

Brown was taken by ambulance to the Santa Maria Regional Medical Center. He was treated for a fractured leg and released two days later, according to Santa Maria spokesperson.

Another officer discovered the suspects' vehicle soon after the incident. Laurenson and Miahaud were booked at the San Luis Obispo County Jail for assault with a deadly weapon and battery causing serious bodily injury.

The investigation is still pending. Police now believe a third suspect may have been involved.

The truth shall set you free

Has anyone noticed the Lutheran Church on the corner of Higuera and Los Osos? Did you know that you see that Black man portrayed on those stained glass windows? He has many names in just as many tongues, but most Americans refer to him as Jesus Christ. He has many faces, but I almost never see a white face. When I do, I wonder if I have dropped something. When I return it, I find he has never seen the real face. How does that happen? He has many names, but most Americans prefer to call him Jesus Christ.

Now, I am not going to insult your intelligence and spend paragraphs proving that fact that Jesus is a Black African. No, that would be totally incomprehensible on my part, because I am not an intellegable human being. I believe that you should think for yourself without delusion, perceptual distortion, or outright bigotry. I am also not going to recognize the lateralized (left, right) description of Jesus' face (eyes, hair of wool, skin color).

No, I am simply going to state, because we already agreed that the man known today as Jesus is an African and had descended from a long line of Africans (See "The Black Man, the Father of Civilization Proven by Biblical History," James Morris Webb). My point is to get you to work with me to correct some wrongs and see if they stay right.

Now, don't you all agree it would do this world some justice if in this time of need we finally do Jesus a favor. We are always asking favors of him, but let's give him his due. We should consider the kind of people that we would expect to see, and then think of yourself for yourself without delusion, perceptual distortion, or outright bigotry. I am also not going to recognize the lateralized (left, right) description of Jesus' face (eyes, hair of wool, skin color).

Louisiana haunted house attracts vacationers

By Mary Fast
Associated Press

ST FRANCISVILLE, La.— It’s midnight at The Myrtles, an antebellum mansion with a dark, bloody history. A bright moon highlights thick Spanish moss draping the trees and the mist that swirls up from the Mississippi River.

On the wide veranda sit several guests who have paid to spend the night despite — no, make that because of — the ghosts said to roam the house and grounds.

“As soon as we heard about them, we said, ‘That’s where we’re going,’” said Kathy Cavanaugh of Grand Rapids, Mich. “My kids thought it was a hoot when I called them and told them where we were staying.”

Debbi Gatten of Monroe brought her mother, Eunice Boyer, visiting from Maryland. Gatten’s fiance stayed down the road at a motel.

“He had dinner with us and left,” Gatten said. “He wouldn’t stay here because it’s haunted.”

The house, built in 1796, is rumored to be haunted by at least six people. Plus, an Indian is sometimes seen behind the house. According to legend, the mansion sits on an ancient Indian burial ground.

“When I first heard about the ghosts, I thought they were the greatest marketing ploy ever,” said Teeta Moss, who with her husband John bought The Myrtles two years ago. “I wasn’t a believer then.”

But she had heard the legends. Even in West Feliciana Parish, where ghosts are said to be as common as the ancient houses, towering oaks and Civil War battlegrounds, The Myrtles stands out.

Bed-and-breakfast guests report hearing music, children crying or talking, and other strange noises. They also insist they smell perfume in the rooms.
BUSINESS: Variety of disagreements pitted college's faculty against Haile

From page 3

in people to follow through with a few ideas and it appears there were significant violations of col­legiality," Baker said. "I would have preferred to have more time with this and see if we could develop a better working relationship." Baker and Knob both confirmed that differences in management styles led to dis­agreements within the college. However, some business professors, who have been push­ing for changes within the col­lege, said Haile's lack of a defined strategy for restructuring the college led to 80 percent of the faculty voting no con­fidence in Haile back in September.

College of Business faculty have been tight-lipped about the tensions leading up to Haile's transfer. The negative publicity, several said, is unhealthy for the college.

However, one tenured profes­sor agreed to recount the events from a faculty viewpoint, but only on condition of anonymity.

"The biggest problem was (that) a strategy wasn't developed first, and then once he attempted to change the struc­ture, he didn't follow through with a good enough process," the professor said. "He probably could have gotten the structure changed but he didn't go through the appropriate process. And at a university, if you neglect to go through the process you develop real problems."

The professor cited an event which occurred last spring which further divided the two sides on the restructuring issue. "We had a structure commit­tee (that) was evaluating all this back, there wasn't any clear win on the structure. At that time Dr. Haile disbanded the struc­ture committee, saying 'thank you very much' and it's clear that the College of Business wants change, which was true. But there wasn't any settle­ment on where we wanted to go with the structure from the faculty. "But what occurred was (that) at the end of spring quarter a structure was sort of announced without the positions being defined very well," said the facul­ty member.

The restructuring of the col­lege was redesigned this summer when the college's five depart­ments — accounting, business, administration, economics, in­dustrial technology and manage­ment — were eliminated. Three new departments were created: undergraduate, masters and faculty.

"(Haile's management team) redesigned the structure with the players they had left and basically came out with this mandate of: This is the way it's going to be," the faculty member added. "And even that's not all so bad if you pass it through the faculty, but the faculty went away this summer."

But Haile said the college was on the verge of becoming one of the top programs on the West Coast. Universities looking for ways to revamp their business schools were inviting Haile to speak to their faculty to share ideas he was implementing here. Haile now believes the reputa­tion of the college has declined.

"We (the College of Business) have established ourselves as a mediocre school," Haile said. "We were perpetrators of greatness just this past summer just with the new products we rolled out al­ready — the new executive MBA program and the new leadership training and management cen­ter."

Although most faculty mem­bers in the college rejected Haile's management style, many were in favor of the changes, in­cluding business professor Wil­liam Huff.

"The changes were needed," Huff said. "What he was doing is exactly what business schools need to do."

While others within the col­lege, who wished not to be quoted, criticized the former dean's leadership skills, Haile defended his approach by saying he chose not to take a commanding role.

"Folks expected me to have a commanding control. I don't."

LOCATED DOWNSTAIRS IN THE UNIVERSITY UNION
FOOTBALL: Mustangs get flagged 16 times for 114 yards, but still beat the Gaels by 14 points

From page 8 yards culminating in a 27-yard touchdown catch by sophomore receiver Jon Peck from junior quarterback Mike Fisher. The Mustangs regained the lead 14-10.

Then the Mustang defense forced a St. Mary’s punt after three plays. On the ensuing punt return, Mustang junior receiver Ryan Thomas took the ball at the St. Mary’s 47-yard line and cut the left sideline open. He broke two tackles and bounded into the end zone for a touchdown, bringing the 6,233 fans to their feet.

Shortly before the half, junior safety Chris Henry picked off a pass that resulted in an 18-yard field goal for freshman kicker James Tuthill. Cal Poly led at the half, 24-10.

The third quarter saw the referees tossing flags left and right. Cal Poly was whistled for eight penalties in that period alone.

The Mustangs were penalized 16 times for 114 yards in the game. St. Mary’s wasn’t exempt from the flags either. The Gaels finished the game with nine penalties for 97 yards.

A Cal Poly illegal motion penalty negated a 27-yard touchdown catch by Peck. The Mustangs were forced to settle for a 38-yard field goal from Tuthill.

St. Mary’s got back into the game with a long kickoff return and a trick play. Gaels quarterback Coley Connolly tossed a backward pass to Ellis on the left.

Ellis threw it back across the field to Connolly, leaving the Mustangs out of position. Connolly stormed 24 yards down the right sideline for the touchdown.

On their next possession, the Gaels drove the ball downfield and a trick play. Gael quarterback Mike Fisher then dropped a pass on the left sideline for the touchdown. The Gaels out of position. Connolly strolled 24 yards down the right sideline for the touchdown.

On their next possession, the Gaels drove the ball downfield and a trick play. Gael quarterback Mike Fisher then dropped a pass on the left sideline. Ellis threw it back across the field to Connolly, leaving the Mustangs out of position. Connolly strolled 24 yards down the right sideline for the touchdown.

**Poly celebrates Homecoming with 34-20 win**

By Jeffrey Jen<br>Staff Writer

The Cal Poly Mustangs won their inaugural Division I-AA Homecoming football game Saturday afternoon, utilizing a record-breaking defensive performance to key a 34-20 victory over St. Mary's.

In contrast, the Mustang defense had been allowing more than 32 points and 400 yards in total offense per game. But Saturday the defense rose to the challenge.

We had a couple of goals," said senior defensive end Ron Madeo. "One, we wanted to allow In the second quarter, the Mustangs made a half performance.

"Our defense played an awesome game," said Cal Poly Coach Andre Patterson. "We wanted to make (the Gaels' offense) one-dimensional during the game by taking away their running game. We did that."

The tone of the game was set on St. Mary's first possession. On the first play of the game, junior linebacker Alex Gerweid sacked Gaiter and forced him to fumble as he scrambled and then some. Cal Poly's defense made Gaels' quarterback Sean Laird unloads as a St Mary's defender bears down on him. Some frustration resulted in a minor skirmish in the first half as the team beat New Mexico 1-0 at Irvine.

San Diego State's No. 1 team, Cal Poly's defense held firm, allowing only 237 yards of total offense.

"That didn't affect us that much," Storey said. "This game was lost because of a lack of heart."

"Rhythm's goal was very important," said senior defender Martin Cannon. "It set the tone for the rest of the game.
