Illegal immigrants at Cal Poly may pay the price in spring

By Karen E. Spoden

Beginning spring quarter, illegal immigrants at Cal Poly may be required to pay out-of-state fees. A Los Angeles appellate court ruled Tuesday that illegal immigrants enrolled full-time at any of the 20 CSU campuses will no longer be eligible for a discount in fees. This means these students could be paying as much as $8,864 for fees and tuition at some CSUs, rather than California residents’ cost averaging about $1,585.

The ruling will affect those who are illegal immigrants and are not U.S. citizens, but who may have established California residency.

Beginning spring quarter, students at Cal Poly and other quarter-system CSUs will be asked to prove their United States citizenship, said Stephen MacCarthy, a spokesperson for the CSU Chancellor’s Office.

Students benefit from exchange of cultures

By Jennifer Otzen

When Kolkailah arrived at Poly in 1984, only one class was offered that covered his area of expertise — fracture mechanics. Fracture mechanics, Kolkailah said, is the study of the reasons why aviation equipment fractures. Now, Kolkailah has managed to change the course catalog by adding nine different classes.

Kolkailah has established an exchange program with several universities in Egypt. The professor developed the program while he was on sabbatical in Hawaii in 1991.

During this time, Kolkailah made a trip to his homeland, Egypt, to lecture on his recent research. While touring Egypt, he decided to begin the program after meeting several students who wished to study under his expertise.

In the past several years, Kolkailah has received recognition for his work and has been asked to present his research at conferences worldwide. He has also been asked to do research by NASA at Aeronautics and Edwards Air Force Base.

Because of Kolkailah’s outstanding work and reputation, some of the students he met in Egypt petitioned their government to finish their aeronautical research under Kolkailah in the United States.

Currently there are three Egyptian students studying at Cal Poly. The students are working on their doctorate or post-doctorate degrees.

“We’ve always said we’d obey,” said Jason Koehn, ASI vice president for finance.

“The average amount requested was $6,500, but a lot of the requests were both over and under that amount,” Koehn said.

“All of the requests were worthy of being funded,” said Finance Committee member Craig Simmons, also the University Union’s controller. “I wish we could have helped all of the clubs, but due to a lack of money that wasn’t possible.”

Some of the clubs requesting funding include MEChA, the College of Liberal Arts Student Council and a variety of club sports.

Koehn said he hopes the committee will be able to reach a final decision at Monday night’s finance committee meeting.

“The money became available in April 1993, when the Rodeo Team became an Instructionally Coded club, which became an Instructionally Coded club,” Koehn said. “The money was originally budgeted for the Rodeo Team. Despite the open call, none of the committee’s members expected to receive requests from 28 clubs totaling more than $190,000.

The committee will make a final decision on which clubs and organizations receive funding at Monday night’s finance committee meeting.

“I expected the number of clubs to apply, but not the amount of money they requested,” said Jason Koehn, ASI vice president for finance.

**Hotline setup to field questions on Prop. 187**

By Jennifer Olmstead

A group of concerned Southern California legal organizations have set up a hotline to take calls from people wanting more information on the status of Proposition 187.

Proposition 187 denies medical and educational services from illegal immigrants. Although the proposition passed by a landslide in the November elections, it is currently on hold while courts test its constitutionality.

The hotline, 1-800-MEX-LAWS, was established last November, shortly after the election. It is staffed on a rotating basis by various legal firms who are participating in the program.

"We're getting a lot of immigration questions," said Mike Jackson, CRLA Attorney.

The San Diego County branch of California Rural Legal Assistance (CRLA), is one of the organizations participating in the hotline.

From page 1

Related Activity (IRA). This means the Rodeo Team is now funded by student fees instead of by ASI, according to Vicki Stover, associate vice president for administration and finance.

"To become an IRA, there must be a class given that directly relates to the activity," Stover said.

According to Koehn, the additional money was not given out last year because the ASI Children's Center was more than $100,000 in debt — which triggered the first-ever ASI hiring freeze.

"This year the Children's Center is doing a lot better, so we decided to let the clubs apply for the money," Koehn said.

Because this situation has never occurred before, the Finance Committee allowed interested clubs to apply for the money. The clubs were required to fill out a line-item application, which allowed the committee to review how much each organization intended to spend in the request.

This is the same annual process required of the coded clubs, which are subsidized by ASI.

"This won't happen again next year, because the money will be allocated through the regular budget process," Koehn said.

"Any money awarded is to be used this year and for this year only. If it isn't, it will be absorbed back into (ASI's) general reserve."

The committee set up three meetings during the first quarter so each club could be reviewed on a case-by-case basis.

"All the requests would really benefit the campus community and the students," he said.

For example, Christa Vihbert, treasurer for the College of Agriculture Student Council, said her group's funding request of $2,500 focused on this year's spring quarter Open House.

"We requested funds to put an information booth in the College of Agriculture area, and for an Open House barbecue for students admitted for next year and their parents," she said.

Cal Poly Remembrance Pond

Limited Edition Art Print by Robert C. Reynolds

This beautiful watercolor of the Cal Poly Remembrance Pond was created by Robert Reynolds, Professor, Cal Poly Art and Design Department. His paintings are in public and private collections throughout the United States.

Now is your chance to own a full color limited edition fine art print by a renowned Cal Poly artist.

This fine art reproduction is a limited edition of just 500 signed and numbered prints. Each print is hand signed by the artist and comes complete with historical information and a Certificate of Authenticity.

Edition: 500 signed and numbered
Image Size: 18-1/2" x 24"
Paper Size: 24" x 30"" Issue Price: Unframe - $125; Framed - $265 10% discount to all members of the Cal Poly Alumni Association

Signed by the artist in pencil and consecutively numbered.
Printed on rich, high quality, acid free 100% cotton fiber paper.

Cal Poly’s Animal Science Department is constructing a new Poultry Unit with state-of-the-art technology.

"The approximately $3 million Poultry Unit, scheduled to be completed in July, will allow students to use new facilities for the 1995-96 school year.

"We expect to see more student involvement in the poultry curriculum," said Ken Scott, head of the Animal Science Department. "We will have the technology to bring Cal Poly back up to par with the competing universities.

The new unit, being built by Rarig Construction, Inc. near the Dairy Science building, will hold seven different production buildings including a main instructional facility. Some of the modern technology includes a pathology lab, mechanical feeding equipment, egg processing and an egg hatchery. Call Poly will be able to use its own chicks in the new unit.

A $3 million bond issue passed in 1990 from the state of California helped to fund the construction of the new unit.

Polystyrene molding has managed to build an aeronautical engineering lab on campus. The lab was made possible through donations of equipment and money he received from private industries and the state. The current Poultry Unit, located off Bishop Road, uses technology from 1950, when most of the equipment was manually operated.

"There’s no need to teach old technology," Spiller said.

According to Spiller, students have already shown an interest in the poultry concentration.

"Animal science senior Chris Bassia said, "I’ve never really heard anything about (the new unit) but I’ll probably take advantage of it next fall!"

The last time the Animal Science Department restructured the curriculum, a poultry class became part of the mandatory curriculum. Since the requirement to take poultry was created, Spiller, said at least 30 students enroll for Poultry Management each quarter.

Students introduced to the Poultry Unit tend to enroll for a second class because they enjoyed the class, he said.

"Daily Managing Editor Joy Numan contributed to this report"
I have some predictions of my own for this year.

First, my psychic powers show me buckets of rain pouring down on us. I advise investing in a raft to float to class. Well, at least a pair of rain shoes to wade through the water.

Second, I can see another quarter of school coming. I see people falling behind and procrastinating. I see some waving goodbye to a school where they couldn’t make it. Other students will be saluting a school they graduated from.

Almost everyone has seen this commercial. Call 1-900-555-1995, psychic friends are standing by — only $3.99 a minute to find out what this year has in store for you.

In 1985, Nahed worked part-time while completing her Electronic Engineering degree. Today, Pacesetter’s 31-year old Director of Design Assurance has many achievements to her credit. Her children, for one. Her technical contributions, for another.

"I could have worked as an EE anywhere," says Nahed. "Healthcare is the most rewarding. We strive for the best technology, the latest in IC design and we help people live better lives."

If technical excellence and personal dedication are part of your profile, we encourage you to find out more about the openings available on the Pacesetter team.

PaceSetter Day
Tuesday, January 24

In the tent on Dexter Lawn
10:00 am - 3:00 pm
- View and explore some of the projects and activities that drive one of the world’s largest manufacturers of pacemakers.
- Visit informally with Pacesetter representatives to learn what co-op and career opportunities are available.
- Bring your personal resume.

Information Session
Staff Dining Room A&C
6:00 pm - 8:00 pm
We are seeking individuals from the following majors for co-op and career opportunities:
CPE, CSC, EL, EE, IE, MFG, ME and MATE
Join us for pizza.

Interviews will be held on Wednesday, 1/25/95.

INTERVIEW PREFERENCE GRANTED TO THOSE ATTENDING

ATTENDANCE REQUIRED TO INTERVIEW

When it comes to product quality, reliability and innovation, Pacesetter is writing the book. The Professionals who join us will play a key role in future chapters. As a worldwide leader in cardiac rhythm management technology, we offer competitive compensation and benefits. AA/EEO.

Paragon™ III, Pacesetter’s newest dual-chamber pacemaker, weighs less than an ounce and is approximately 1/4” thick. The internal circuitry is controlled by an 8-bit microprocessor and operates at 2.8V. It is powered by a lithium-iodide battery.

Pacesetter Day is sponsored by Pacesetter and the College of Engineering. For more information call (805) 756-2853.
MUSTANG DAILY

BEVERLY HILLS — "Forrest Gump" can add three Golden Globe awards to its stashes of chocolates. The feel-good blockbuster was named best dramatic picture Saturday night and Tom Hanks was chosen as best dramatic actor. Robert Zemeckis won as best director.

A surprise winner was Jessica Lange as best dramatic actress for her role of an angry Army wife in the little-seen "Blue Sky," which even the star called "a strongly and peculiar little film." "Gump," a retrospective of the 1960s through the eye of a slow but goodhearted country boy, has earned $306.6 million but only mixed reviews.

By contrast, the nearly universally acclaimed "Pulp Fiction" has earned only $70 million and took only one award at the 52nd Golden Globe Awards. The two movies have been considered frontrunners for best picture at the Academy Awards.

HOTLINE: Hotline to update Prop. 187 status.

"I think that the hotline is a great idea," he said. "There is a lot of fear because of Prop 187." "We want to inform people of their rights." "The restraints against Prop. 187 were put into effect to halt all action until its constitutionality can be determined," said Coordinator of Multicultural Programs Everardo Martinez-Inzunza.

"(Illegal immigrants) are going to get a better education here than anywhere," said animal science sophomore Ashley Clark. "That's why they're here — not to cheat the system." Clark feels such illegal immigrants should be allowed to pursue their education in California because they could, in turn, contribute to the economy and society.

"(Illegal immigrants) are going to get a better education here than anywhere," said mechanical engineering freshman Colleen Martinez. "People opposing immigration are harassing individuals and misleading them." "I think the hotline is a great idea," he said. "There is a lot of fear because of Prop 187." "We want to inform people of their rights." "The restraints against Prop. 187 were put into effect to halt all action until its constitutionality can be determined," said Coordinator of Multicultural Programs Everardo Martinez-Inzunza.

SUPER BOWL: Chargers heavy underdogs

Sun Dogs, the 20-point underdogs, has four players who have been here before, led by Stan Humphries, the winning quarterback in Washington's 37-24 win over Buffalo three years ago. Giordano is the third-stringer for four straight years. His biggest win was back up while Darren Carrington (Denver, 1989) and Steve Frederickson (49ers, 90') are also on the roster.

But most important may be Bobby Beathard, the general manager in two Washington teams that win and the architect of a third. If anyone knows how to deal with the hype, he does.

What does all that mean?

Barton, San Francisco's designated weather, thinks it's just another item working against his team.

"To be such a heavy favorite is a burden," he says. "It hinders your preparation, everything tiny- ing you how good you are."

"There's a lot more pressure on us," Ross adds.

Indeed, the Chargers come in with nothing to lose. A defeat and everyone shrugs, a victory and they're in the history books.

"I think we're going to play well," coach Bobby Ross says. "I'm not going to worry about it all. I'm sure they'll have a good crowd, if for no other reason than it's a big social event."

"And we're going to show up."

Mustangs let one get away

By Rodney de la Cruz

When Cal Poly overcame a 10-point deficit to pull within two points in the last half, it seemed a second win was in reach.

But what the team didn't realize was that Cal State Northridge wasn't the only team it had to play, it had to play against themselves.

In their American West Conference opener Friday night, Cal Poly lost 76-69 to the Matadors before 1,124 fans at Mott Gym.

The Mustangs committed three personal fouls, sending the Matadors to the line to convert three of six free throws. Matadors junior forward Mike Dorsey ended sealed the win with a break away dunk with in the closing seconds.

Sophomore Kellie Quinn led the women's team with a seasonal best performance. She had three first-place finishes, winning the 100-yard (59.29) and 500-yard freestyle (5:23.14), and the 1,000-yard freestyle (10:54.80).

Sophomore Krista Kiedrowski also picked up three victories Saturday, winning the 100-yard breaststroke (1:08.17), and also the 200-yard breaststroke with a career-best time (2:26.63).

"Kellie turned in another stellar performance for us today," Coach Rich Firman said. "She picked us up and had the best day by far."

Winning his opening match. Wins by BYU freshman John Kelley (126) and senior Justin Judkins (142) gave the Cougars an 11-8 lead.

Sophomore Kellie Quinn led the women's team with a seasonal best performance. She had three first-place finishes, winning the 100-yard (59.29) and 200-yard breaststroke (2:08.53), and the 200-yard individual medley (2:12.80).

Freshman Monica Huszcz contributed with three first-place finishes. Huszcz won the 100-yard freestyle (54.79), the 500-yard freestyle (5:23.14) and the 1,000-yard freestyle (10:54.80).

"It was a good day for us," Firman said. "We were down but the team turned back around as expected and we were able to win three of four (meets) on the afternoon."

"Kellie turned in another stellar performance for us today," Coach Rich Firman said. "She picked us up and had the best day by far."

Wrestlers split weekend meets on the road

Cal Poly women sweep Northridge and UCSC

In their final home meet of the season Saturday, the Cal Poly women's swimming team won both their meets against UC Santa Cruz and Cal State Northridge.

The team split their weekend meets beating UC Santa Cruz 166-163 but falling to Cal State Northridge 148-145.

"Sophomore Kellie Quinn led the women's team with a seasonal best performance. She had three first-place finishes, winning the 100-yard (59.29) and 200-yard breaststroke (2:08.53), and the 200-yard individual medley (2:12.80)."
