Building alliances

Women's work: Poly grads break free from stereotypes

By Lisa J. Hersch
Daily Staff Writer

There are five things in life that will help get you to where you want to go. Knowing what you want to do in life — or thinking you know what you want to do — is only the first step.

The next step is to be persistent, because nothing worth having is easy, not at work or school. And you should also know your limitations, perform quality work and look to your self to excel. These words of wisdom, and many others, came from four women who, since graduating from Cal Poly, have excelled in fields not normally chosen by women.

“I went to the high school career day and there was a woman dressed in a police uniform. I thought — ‘I’d look good in that.’”

Isabel Funaro
San Luis Obispo Police detective

Embellished political science professor Philip Fetzer enjoyed a small victory last week as his struggle for tenure overcame an important hurdle.

According to a committee of his supporters, university officials allowed Fetzer an arbitration hearing by agreeing to ignore a deadline Fetzer alleged was first denied tenure last year. Grinde said he is pleased with the decision to give Fetzer a tenure hearing.

“I think it’s a more straightforward approach,” Grinde said, “rather than deciding the case on a technicality.”

Last month, three members of the committee announced that an arbitration hearing between the university and Fetzer’s committee was scheduled for March 6. According to the committee members, the hearing was necessary because university officials said they received Fetzer’s request for arbitration after the deadline.

Gloria Velasquez, foreign language professor, said they received Fetzer’s request for arbitration after the deadline.

Behind the scenes:

Muir residents angered over stolen computer

By Rodney de la Cruz
Daily Staff Writer

A $1,700 computer theft in Muir Residence Hall forced El Corral to close a pilot computer lab, leaving stranded residents angered.

“Everybody here enjoyed using (the computer),” said chemistry junior Mike Fallon, who lives in Muir Hall. “I don’t know why anybody would want to take it.”

El Corral donated four computers to Muir Hall to establish a computer lab at the beginning of fall quarter. The lab was implemented due to concerns that not all students have access to computers.

According to Public Safety Investigator Ray Berrett, the computer theft occurred somewhere between Feb. 4 and Feb. 6. The computer, an Apple Macintosh Quadra 610, was taken when the burglar entered and broke the lock. “The burglar used some kind of pry tool,” Berrett said.

The theft is still under investigation. As a security measure, El Corral was forced to close the computer lab.

Academic Senate clashes over honors college

By Erin Mussen
Daily Staff Writer

Several members of the Academic Senate on Tuesday blasted the proposal for an honors college, calling it elitist and predicting it would take away resources from other Cal Poly students.

If approved, the honors college would start in 1997. Between 40 to 50 students would be accepted, required to maintain a 3.9 GPA and take 14 units of specialized general education classes. Planners also have discussed the possibility of having all the honors students live in the same residence hall.

Education professor Dennis Nulman called the proposal an "elitist program encouraged by the idea of an all-honors dorm."

Nulman and other senators felt the special treatment of the honors students — both in class and in the residence halls — would take away from the education of non-honors students.

"The students are concerned that the non-honors students will get a second rateing to the honors program," she said.

But arts-business professor William Amaphacer countered opponents’ arguments.

"I believe that this program would bring the overall standard of Cal Poly up," he said.

"The advantages in the (honors) program are the interaction of the honors and regular students," said foreign language professor William Martinez. He added that an honors program would attract students who might not otherwise come to Cal Poly. In turn, the program would allow both honors and regular students to learn from each other.

John Harrington, chair of the ad hoc committee which wrote and presented the proposal, addressed the issue of an honors residence hall.

Deadline debate ignored; Fetzer’s case to be heard

By Justine Frederiksen
Daily Staff Writer

Enembled political science professor Philip Fetzer enjoyed a small victory last week as his struggle for tenure overcame an important hurdle.

According to a committee of his supporters, university officials allowed Fetzer an arbitration hearing by agreeing to ignore a deadline Fetzer alleged was first denied tenure last year. Grinde said he is pleased with the decision to give Fetzer a tenure hearing.

“If Fetzer, this is a significant step. ’It’s good,’ he said. ‘It’s what we wanted.’”

Fetzer’s battle for a tenure hearing has been a long and difficult process. Members of his committee said they hope the latest development signals a new spirit of cooperation on the part of university officials.

History professor Donald Grinde is a member of the committee which formed after Fetzer was first denied tenure last year. Grinde said he is pleased with the decision to give Fetzer a tenure hearing.

“If it’s a more straightforward approach, Grinde said, “rather than deciding the case on a technicality.”

Last month, three members of the committee announced that an arbitration hearing between the university and Fetzer’s committee was scheduled for March 6. According to the committee members, the hearing was necessary because university officials said they received Fetzer’s request for arbitration after the deadline.

Gloria Velasquez, foreign language professor, said they received Fetzer’s request for arbitration after the deadline.

that justice delayed is justice denied.

Velasquez said.

By Nancy Boc
dated him.

SAN FRANCISCO — A combative President Clinton accused congressional Republicans Tuesday of approaching education as "just another area to cut and get" and promised to fight them.

"Their proposals will cut investments in our future and increase the costs of student loans to our neediest students to fund tax cuts for the wealthy," Clinton charged. "I want you to know that all of this I will say no to."

Clinton criticized GOP calls to abolish the Education Department, repeal the national service program, eliminate certain student loan subsidies and curtail direct lending to students.

House Speaker Newt Gingrich, R-Ga., has labeled Clinton's national service program as "forced volunteerism" and suggested cuts in other federal educational aid programs.

Rescue workers in Grozny care for sick and wounded

Associated Press

GROZNY, Russia — For six nightmarish weeks she huddled with the corpses of an elderly couple who died after taking shelter with her. She was too afraid to come out.

This week, 61-year-old Valya Ushakhiyeva finally emerged, blinking, her hands and feet with grime and sores.

"What's the date today?" she asked as she was lifted into a truck bound for a Russian army hospital Monday. "Is the shooting over for good?"

"Nobody knows, granny dear,"

said rescue worker Grisha Chukov, a member of the 40-man rescue unit in Russia's Emergen­ cy Situations Ministry. The rescue workers have begun trying to pick up the pieces in Russian-controlled north Grozny after weeks of bombing, artillery at­ tacks and gun battles.

THEFT: Residents won’t have to pay $10 charge for missing computer

Associated Press

By Julia Rubin

Jones said.

"It usually works out to about 60 percent honors to 40 percent non-honors."

"There is no charge for the computer," Jones said. "We knew what we were getting into when we opened the lab."

Jones said he doesn't feel the residents should be punished for one person's actions and hopes the computer will be returned.

Carole Schaffer, assistant director of Housing and Residen­ tial Life, said Muir Hall Coor­ dinator of Student Development Jeff Valone had inadver­ tently told students the computer theft fell within hall policy, in which any hall articles damaged or taken must be reimbursed by the residents.

Valone declined comment and referred all questions to Schaffer.

HONORS: Senate will discuss program further in two weeks

From page 1

"The honors dorms would not be all honors students," he said. "It usually works out to about 60 percent honors to 40 percent non-honors."

The class and living condi­ tions associated with the program were not the Senate's only concern.

"The students are also con­ cerned about the cost of the program, said Archibeque.

"There are other programs that need the money the honors program would be taking. Espe­ cially with the current budget crisis, we are concerned where the money would come from."

Several senators backed Ar­ chibeque. Senate Chair Jack Wil­ liamson recommended the ad hoc committee have an in-depth report of the program's costs for the next meeting.

Harrington agreed to provide a detailed outline but said that generally in other university honor programs, gifts and en­ dowments support the programs.

"The students' discussion stemmed from the first reading of the proposal," said Harrington, "and Harrington is scheduled to give a more in­ depth report in two weeks. At that time, the Senate will have the option to vote, but may also choose to delay action."

Michael Geringer supported this idea and added that "this is the start for getting money for other programs. The money is out there."

The Senate's discussion stemmed from the first reading of the proposal, and Harrington is scheduled to give a more in­ depth report in two weeks. At that time, the Senate will have the option to vote, but may also choose to delay action.

The Senate's discussion stemmed from the first reading of the proposal, and Harrington is scheduled to give a more in­ depth report in two weeks. At that time, the Senate will have the option to vote, but may also choose to delay action.

Last Friday night I had the opportunity to witness one of today's most inspiring contemporary poets, Al Young. His world-weary poetry, smooth blues vocals, and down-to-earth beliefs had the whole audience in admiration. But it wasn't as if I was personally in­
vited member of the crowd. Young's reading was open for anyone to attend (free!); I still can't believe it though the San Luis Lounge (the quiet room where you always fall asleep) was filled from couch to wall, I still couldn't believe that such a small area wasn't pack­

ed solid. Maybe it's because it was Friday night — but come on, even I know that at 7 p.m. happy hour is over and solid. Maybe it's because it was Friday night — but come on, even I know that at 7 p.m. happy hour is over and night life has barely opened its eyes.

But it was a guy there who could raise his voice like the audience listened, danced, or watched in awe at the sold-out U2 show during the Joshua 'Tree' tour. All of

However, you must realize it wasn't like getting into a
time segment with loads of information, from who's
teachers made it mandatory for their students to at­

Then what's the problem here? I can hear it now:

Listen to the radio; most shows have an entertain­
to get her to fall in love with me. This was a monumental
task, because, by that time, the girls had rushed passed
me that

"Right then a sensation rushed over me that I hadn't felt before, except for the time I downed an entire tablespoon of Crisco."

"spots" that inevitably involved me getting pummeled with those stupid orange gym balls. He explained the facts of life in a two-hour lecture that included obscure hand motions, and pictures that I still don't understand. He never talked about what I really needed, and that was to get her to fall in love with me. This was a monumental task, because, by that time, the girls had rushed passed us guys in every field of social development. To them,

Sure, there is lots of cool stuff in post-junior-high

for the time I downed an entire tablespoon of Crisco (note: just because something looks like Cool-Whip doesn't mean it tastes like it). Running to the bathroom, I realized this

But I didn't even know these people were perform­

ers, but I say that in comparison to the sporadic numbers of people at other similar functions where you wonder how many teachers made it mandatory for their students to at­
tend, as they should have. The point is, you should have wanted to go, if for no other reason then Milsha's Nobel Laureate prestige.

Then what's the problem here? I can hear it now:

"But I didn't even know these people were perform­
ing. Sorry, it's time to let go of that ignorant excuse and start opening your eyes to all this town has to offer. I can't tell you how many times I've enjoyed a

time feeling that I hadn't felt before, except for the time I downed an entire tablespoon of Crisco (note: just because something looks like Cool-Whip doesn't mean it tastes like it). Running to the bathroom, I realized this

The main problem was that everything I knew about girls I had learned from Coach Dading, a man who derived some weird pleasure from organizing so-called

For the time I downed an entire tablespoon of Crisco.

out of the flame schoolhouse, mere seconds before it col­
lapsed, she would have to notice me. I would be a hero —
no longer would they laugh at my Pro-Wing Tennis shoes, no longer would I miss the really cool parties, no longer would I be Dan "scrambled" Egger — from then on I would be Dan, the Mr. T of Junior High.

My second idea was to send her a letter. Granted, this would not have the impact of the first idea, but it was a lot less complicated. Following strict seventh grade procedure handed down since the days of Shakespeare, I crafted what I still believe to be the most romantic letter ever to spring from a twelve-year-old, and it went something like this:

Will you go with me? (choose one)  Yes  No

(By the way, this is from Dan)

Oh you, don't let any of your friends read this.)

When the letter returned marked "yes", I almost passed out. I don't remember the rest of that day, but the next was perfect. I skipped school and spent the whole day at home eating out pies and an entire box of Otter Pops while I listened to New Edition. Finally, I got it — the songs were about me; I knew love, and had matured through that awkward barrier of puberty. Somehow Scooby Doo just didn't seem funny anymore.

Like most of History's great romances, ours ended in tragedy. Six days after we started going out, she dumped me for my old friend Nate, just because — this is totally true — he got some Michael Jackson parachute pants.

Looking back, I can't blame her; they were really cool shoes. But that time, love has never lived up to the bill­ing. Sure, there is lots of cool stuff in post-junior-high love, but it just can't compare. If you don't believe me, just try a tablespoon of Crisco. Then you'll know what real love feels like.

Dan Egger is a civil engineering senior who once showed his hand in protest of dating.
WOMEN: Engineering and coaching are not just for men; professionals urge women to enter non-traditional fields

From page 1

The conference room was
dominated by female students
and staff members. Each woman
provided a quick glimpse into the workings of
their individual fields and ex­plained the di­fficulties they had
overcome.

The reasons for getting into their fields were as varied as the
women themselves.

For Isabel Funaro, one of only
four female detectives with the
San Luis Obispo Police Depart­ment, her high school's career
day led to her current position.

"I went to the high school
career day and there was a
woman dressed in a police
uniform," Funaro said. "I thought
— I'd look good in that."

Funaro said she thought she
could make a difference in
people's attitudes toward law en­forcement officers.

"Not too long before, a relative
of mine had an unpleasant ex­perience with law enforcement," she
explained. "I thought then it
didn't have to be that way, and
that if I did the job, I could be fair.

Because of the lack of women in the
field, Funaro said, it was a challenge.

"Each woman athletic and com­petitive, and knew I could do it," she
said.

Funaro has since spent 14
years as a police officer. She is
the first female member of her
department's sex offense unit.

"I was always good at math
and science," she said. "I liked to
design things and then come up
with new ways of applying them.

Shetler said she decided to go
into the field of electrical en­gineering when she was 16 years old.

"I've always explained why I chose this
field ever since," she
said.

"Engineering shouldn't be a
non-traditional field for women," Shetler said. "I've always
wondered why people think women
can't do engineering."

When she decided to enter the Ph.D. program, Shetler's male
colleagues suggested she talk to the dean to tell him she "was
going to be hanging around" to
go for her Ph.D., she said.

"The guy spent an hour trying to
talk me out of it," she said.

He suggested I'd be happier just getting my master's
degree, but I couldn't pass the entrance exam.

"It turned out that the only
thing I was really good at was
softball, but I got sidetracked
during my junior year and
couldn't play, so I had to turn
myself around academically.

Grant said the first person
who took an interest in her fu­ture was Marty McNeil, a
colleague at Texas A&M, who
asked her if she was interested in
being a research assistant during
summer.

"My association with (McNeil)
reinforced my desire to be a role
model for stereotypes that depict in­
"I've been explaining why I
do the job, no matter what
other people say," she said. "It's not easy," she said. "Just
last week, someone stole home
plate from our softball diamond,
cement and all."

The third guest speaker, Al­lian Grant, Head Coach for
Cuesta College women's fast­pitch softball team, worked here at
Cal Poly one year ago. She has
returned, this time enrolled as a
graduate student.

She said it's important not to
come back and beat them
another time."

"I didn't enter school as a P.E. major—I didn't like the jock
stereotype," she said. "I had in­
tended to be an English major, but
I couldn't pass the entrance exam.

"I didn't find out that I had an)
unnatural passion for mathematics
until my junior year and

Shetler did a co-op with a
winery while attending Cal Poly
and said this is where she real­ized she was good at working
with people.

"Before then, I thought I
wanted to be a surgical nurse," she
said and wrote. "I realized then
the light of day." She said she
wanted to be a surgical nurse,
but didn't have to be that way, and

But Grant didn't receive a
warm welcome to her new coach­
ing position, she said. Instead,
she has had to endure practical jokes and

She said women in sales and
marketing have the potential to
excel.

"Cagliero did a co-op with a
winery while attending Cal Poly
and said this is where she real­ized she was good at working
with people."

"There's nothing you can't do," Funaro said. "You don't have to
think and act like a man, just be
yourself. Most of all, have con­
fidence and share your success."

Shetler said women should
develop mentoring networks.

"That's how we'll make the
in-roads we need," she said. "I
don't want to be sitting on a
panel 20 years from now and
talking about the same non­
traditional careers for women."

Zedillo matches rebel crackdown with election

By John Rice
Associated Press

MEXICO CITY — President Ernesto Zedillo seems to be pushing Mexico toward greater democracy and freer elections while waging a club to help him keep his political balance.

But how this will improve the lives of most Mexicans remains to be seen.

On Thursday, the president ended a yearlong truce with the leftist Indian rebels in southern Chiapas state, sending thousands of troops to occupy former rebel villages. Federal police fanned out across the state and country to arrest suspected rebels and question sympathizers.

The nation's most famed leftist politician, Guadalupe Cardenas, told tens of thousands of protesters in Mexico City on Saturday that Zedillo had started "a prolonged war that will last many years, causing many deaths."

Yet a day after the angry protest, members of the conservative opposition National Action Party were dancing in the streets of Guadalajara to celebrate what party leaders called a "victory for democracy."

Zedillo's ruling Institutional Revolutionary Party, or PRI, peacefully accepted the worst defeat in its 66-year history in the race for governor of Jalisco state and for mayor of Guadalajara, Mexico's second-largest city.

While the PAN landslide in Jalisco may broaden faith in electoral results, clearer elections are likely to have little effect on the large gap between the rich and poor and the lack of a significant middle class.

In the hills of Chiapas, too, people are reacting to government intervention the way they traditionally have — with fear.

Villages have been abandoned by peasants who may not belong to the Zapatista rebels, but who don't want to be mistaken for one.

The government made another effort to appease critics on Tuesday when the PRI governor of Chiapas, Eduardo Robledo, resigned in hopes of ending a bitter election dispute and helping to pacify a state ruled by rebellion.

"I view the Robledo resignation as a sign of reassurance that political solutions are available and that hard-liners have not taken over the government," said Delai Barre, a Mexico specialist at the Center for Strategic and International Studies in Washington.

China observes Population Day

BEIJING — The People's Republic of China saw it has too many people, and the expected birth of its 1,200,000,000th citizen is highlighting new efforts to do something about it.

Population Day comes Wednesday as officials in the world's most populous nation devise new ways to make population control more attractive to the masses.

The nation instituted a policy of limiting births in the mid-1970s and has enforced it rigorously since then.

It is also the day statisticians predicted that Chinese citizen No. 1.2 billion would be born.

"It's still not easy to be optimistic about the population situation we are facing, and family planning work is still formidable," Vice Premier Zou Jiuhua told reporters Tuesday.

China's family planning program is weak in many areas, especially in the countryside, Zou acknowledged. He called population control the "difficult and urgent duty of the Communist Party and all Chinese citizens."

Most Chinese couples are allowed only one child, though some rural couples are permitted two. Even though the annual rate of population increase has fallen to 11 percent from nearly 26 percent in 1970, there are still as many women of child bearing age as the population is growing rapidly.

Population Day takes place on February 13 and is the day the Chinese government celebrates the birth of their 1,200,000,000th citizen. This is significant because it marks the moment when the total population of China reached one billion.

The celebration is an opportunity for the government to highlight its successes in controlling population growth and to encourage families to have smaller, healthier families.

Population Day is observed on February 13, which is the day the Chinese government celebrates the birth of their 1,200,000,000th citizen. This is significant because it marks the moment when the total population of China reached one billion.

The celebration is an opportunity for the government to highlight its successes in controlling population growth and to encourage families to have smaller, healthier families. It is also a reminder of the challenges China faces in managing its large population and ensuring sustainable development.

China's population policy, initiated in the 1970s, is considered one of the most successful in the world. The Strict Limitation of Births Policy has helped to lower the annual growth rate from 20% in the 1970s to around 1% in recent years.

However, the policy has also been criticized for restricting personal freedoms and causing social and economic problems. As a result, the Chinese government has been gradually relaxing the policy in recent years, allowing some couples to have two children.

In 2013, the Chinese government announced a new policy allowing all couples to have two children, irrespective of their ethnic or religious background.

The policy change was hailed as a significant step forward in China's approach to population control, and it has led to a significant increase in the number of births. However, it remains to be seen whether the new policy will be sustainable and whether it will lead to a decrease in the overall population growth rate.
THE ENTERPRISE TEAM has opportunities for you! We are looking for graduating seniors who are sales oriented and self motivated and want a career in Management. Ideal candidates will have work experience in sales, customer service, fast-paced retail, participated in team sports, or held leadership roles in student clubs. **Mustangs off to the races...**

By Nathan Abler

For most sports teams at Cal Poly, moving into Division I has been a huge step.

Not for Track and Field.

With a schedule last year that included a host of Division I teams, Cal Poly is coming into the 1995 season somewhat prepared for what is expected to include a higher caliber of competition.

“We’re lucky to have the experience of competing with Division I schools on a regular basis, as of last year,” Kerbel said. “It shouldn’t be a huge jump for us.”

Coach Brooks Johnson, a former coach in the 1984 U.S. Women’s Olympic Track and Field team, fields a men’s and a women’s team which are both strong in the throwing events (discus, shot put and javelin) and the middle-distance events (800-meter and 1,500-meter).

“We competed against most of the same teams last year that we will compete against this year,” said Track and Field Coach Brooks Johnson. “Now we do a lot to do with our mental frame of mind.”

The team will get a chance to test their mental frame of mind in their first official meet Saturday at the Bunkit Indoor Invitational in Los Angeles.

Two weeks ago the Mustangs warmed up for their season in an non-scoring meet with Fresno State, Cal State Bakersfield, Cal State Los Angeles, and Fresno Pacific.

“Our first meet went well,” said junior middle-distance runner Angela Orefice. “I think we have a potentially strong team this year.”

“In the middle distances we pretty much dominated, even though they didn’t keep score,” Johnson said.

Senior Erica Ahmann said the team’s strengths lie in the distances and the field events.

“The team strengths are the long-distance running,” she said. “We don’t have as big a group as we used to for the field events, but it is one of our strengths.”

The events which may be the weakest are the sprints, including the 100-meter, 200-meter, 400-meter and the relays.

“Our weaknesses are in the ballistic events and the relays,” said sophomore Ryan Winn.

But for the problems seem to be only technical.

“The sprinters looked pretty good in their races, they just had some problems with the hand-offs,” Winn said.

The program is entering this new era of competition with some confidence from their past Division II years.

Last year, Cal Poly placed second in the California Collegiate Athletic Association in the men’s and women’s divisions.

At the NCAA Division II National Championships, Whitford placed eighth in the pole vault, Ahmann placed second in the discus, senior Allison Eilerts placed fourth in the javelin and Winn placed seventh in the 5000-meter.

The track and field team also has a promising future — freshmen and sophomores make up much of both the men’s and women’s teams. The women’s team has eight freshmen and six sophomores.

“Since we have some graduating seniors, it’s nice to see so many young athletes, it helps build our base,” Kerbel said.

“The good thing about it is that not only are (the underclassmen) talented but they are not afraid to dedicate themselves.”

Among the returnees for the men’s team are junior sprinter John Bellamy, senior middle-distance runner Dan Berkeland and senior jumper Andrew Hill.

The women’s team returns sophomore sprinter Barbara Jones and junior middle-distance runner Nikki Shaw.

Many of the individual athletes said their goal is to qualify for the NCAA National Championships.

Traditional rivals for Cal Poly include UC-Santa Barbara, Cal State Fullerton, Stanford and Fresno State, all on this year’s schedule.

At the NCAA Division II National Championships, Whitford placed eighth in the pole vault, Ahmann placed second in the discus, senior Allison Eilerts placed fourth in the javelin and Winn placed seventh in the 5000-meter.

The team and field events also have a promising future — freshmen and sophomores make up much of both the men’s and women’s teams. The women’s team has eight freshmen and six sophomores.

“The events which may be the weakest are the sprints, including the 100-meter, 200-meter, 400-meter and the relays.”

“The sprinters looked pretty good in their races, they just had some problems with the hand-offs,” Winn said.
