Parking, safety plans set for anticipated Open House crowds

By Michelle Margilho Daily Staff Writer

Concerns for public safety and crowd control have arisen as two festivals — one being Open House — are scheduled to take place during the same weekend.

In an unprecedented scheduling situation, the second annual Open House and the city's long-running La Fiesta event happen over the same April 21-22 weekend.

"It kind of caught everyone by surprise," said Louise Brown, chair of the Open House committee.

But Brown said he has been in contact with the La Fiesta committee, and "it's not anything that anyone sees as a major problem.

La Fiesta, a celebration of San Luis Obispo's cultural heritage, includes a parade, arts and crafts show, and cultural demonstrations. It is scheduled to take place in the downtown area.

"Our events don't really conflict each other," said La Fiesta spokesperson Jackie Basters.

"Most Cal Poly events are during the day and most of ours are at night," she said. "We don't feel that it's an issue."

Still, Brown said the Open House Committee has been working with San Luis Obispo Police Chief Jim Gardiner on a weekly basis.

"They'll be deploying extra officers to keep a tight watch on what's happening," Brown said.

Meeting informs Open House clubs of festival details

By Michelle Margilho Daily Staff Writer

With Cal Poly's second annual Open House just two weeks away, about 150 participating club and organization representatives received details from the executive board Thursday.

Opening the first collective meeting of the quarter, Executive Board Chair Louise Brown told the crowd they were there "to see where we are, and to see what needs to happen," before

Despite informal declaration, Wilson still seeks presidency

By Justin MacEachron Daily Staff Writer

Though he's made no formal declaration, California Gov. Pete Wilson said he will be seeking the presidency in 1996.

Wilson recently returned from the East Coast where, according to his campaign press secretary Kevin Herglotz, he was offered financial support from Washington campaign contributors urging him to get involved in the race against President Clinton.

Wilson has been a controversial figure among college students for supporting expansions in the prison system while cutting funding for higher education. He also made his way into college news last year when he supported Proposition 187, a measure banning illegal immigrants from public education and other tax-funded social services.

Last week at the state Capitol, the 61-year-old Wilson held his first news conference since he announced the formation of an exploratory presidential committee last month.

Although he promised not to run for president in his campaign for re-election to the governor's post, he said at the news conference that he feels obligated to break the pledge.

"He says he believes he has a better chance of beating Clinton than two other Republican contenders. "I feel that he is the person to lead the nation," Herglotz said.

Wilson said his experience as governor will promote him as the favorable candidate over better-known candidates such as Senators Bob Dole of Kansas and Tom Daschle.

See WILSON, page 10

INSIDE TODAY'S MUSTANG DAILY
OPEN HOUSE: Up to 50,000 are expected during Open House weekend

From page 1.
Cal Poly Police Chief Tom Mitchell said he anticipates crowds of 40,000 to 50,000 at Open House.

"We're prepared for anything, but expecting more public-service calls than fights, thefts or drunkards," he said. Public service calls include searches for lost children and vehicle or building lockouts.

Community Safety Officers will guard club booths throughout the day, according to Mitchell. Mitchell said University Police will work in conjunction with San Luis Obispo police to guard open dorm rooms and control problems. There is no issue of theft, but events are expected to be larger than normal.

The San Luis Obispo County Health Department has set up an AIDS testing booth in University Union where students can test themselves. What are we going to do about seven cents worth of stolen plastic. (Maybe he can use it as a coaster when he entertains at the hideout.) So relax. You only have to pay for stuff you bought.

AIDS Tests Available Through Health Department
The San Luis Obispo County Health Department offers free, anonymous HIV/AIDS antibody testing on a limited basis. The department offers testing on a walk-in, first-come, first-served basis. Tests also are available for $15. Testing is offered at 2191 Johnson Ave. in San Luis Obispo on Mondays from 1-3:30 p.m.; Thursdays from 9:11 a.m. and 1-3 p.m.; and the third Wednesday of each month from 4-6 p.m. and the first Saturday of each month from 9 a.m. to noon.

For more information about testing or HIV disease, call 781-5560.

TODAY
Resume and Cover Letter Workshop • The workshop will be held in Career Services, Room 224, 9-10 a.m. — 756-2501
Cal Poly Deadlines • Check CAPTURE schedule for further details.
Deadlines for April 10 include: Last day to register for spring term and pay fees (4 p.m.); last day to add a class (7 p.m.); last day to withdraw from the term to qualify for refund of registration fees; last day to submit a petition to audit a course; and last day to get late add and pay fees (4 p.m.); last day to add a class (7 p.m.); last day to fill by 9 a.m., according to Mitchell.

Informal Meeting for Recruitment of Peer Advisers • Psychology and human development academic peer advising positions are being filled for the 1995-1996 school year. Applicants must be of junior standing and give a one year commitment. The meeting is FOB 24-6. 6 p.m. — 541-4548

Groups rally against violence on women

Connie Cass
Associated Press

WASHINGTON — Women's rights supporters rallied near the Capitol Sunday to protest "violence against women" — a term they applied not only to rape and battering but also to political assaults on welfare spending, abortion and affirmative action.

"As women have been able to take some small measure of power, we're facing a fierce backlash," Patricia Ireland, president of the National Organization for Women, told the crowd.

Thousands of people spread across the National Mall for the rally, organized by NOW and endorsed by more than 700 groups, including abortion-rights supporters, labor unions, civil rights groups, gay and lesbian organizations, environmentalists, socialists, victims' rights advocates, and welfare recipients.

Ireland estimated the crowd at 250,000. The National Park Service planned to release its own estimate, which was expected to be lower.

Coming at the end of the first 100 days of the new GOP-led Congress, the "Rally for Women's Lives" focused heavily on the conservative agenda of House Speaker Newt Gingrich, R-Ga.

Gingrich has said he wants to say to you, help stop the violence and defend a woman's right to choose," said Mrs. Barrett, who was injured in the attack.

An assortment of celebrities, including Sharon Gless and Tyne Daly of television's "Cagney and Lacey," rock singer Joan Jett, and Toad the Wet Sprocket were also scheduled to appear.

Defending livestock water use

Production agriculture often is criticized for its outlandish consumption of water, when most water consumption by livestock can be justified.

Jeremy Rifkin of 2,464 gallons of water per pound of milk and meat lacks popularity in our culture. Those truly concerned about the amount of water consumed by livestock may want to adjust their diets to include goat products.

While cattle are relatively inefficient in water utilization, they are the most creditable of sources, are out of control. Cattle, horses and pigs have the highest water requirements, while sheep seem to have adapted for warmer, dryer conditions. There is no simple solution to the controversy over animal agriculture often is criticized for its outlandish consumption of water, when most water consumption by livestock can be justified.

Elections for the Associated Students, Inc. are being held Wednesday and Thursday of this week. While it's easy to get wrapped up in the number of candidates seeking the 17 declared positions, the following is some brief information on those students. These two questions were asked:

**QUESTION 1:** What will you do for students and how will you keep them informed?

**I and another director...**

I and another director... introduced a bill which called for nine campus-wide directories, an information board, and lastly, the Mustang Messenger. Another project I've been working on is the Agriculture Council Information Board, which will contain ASI, Agriculture Council and college news and events.

I'm anxious to look at ASI from a much more knowledgeable perspective on how our corporation has been run. I will increase students' involvement, opinion and action — this will be a big part of the ASI evolution scheduled for 1995-1996.

**My main concern is to do a good job, and I have a...**

My main concern is to do a good job, and I have a good track record to prove that I follow through with what I set out to do. I plan on researching problems so I can make a good decision. I know a lot of people from the many clubs and groups I have been involved in. I plan on keeping students informed by talking with them.

Many programs need to be targeted, and there is a lot of diversity within the student body. I feel that we need more direction and focus within these programs. I believe that there needs to be more efficiency and less waste of all resources.

**I have had experience sharing news with clubs as an Agriculture Council representative.**

I have had experience sharing news with clubs as an Agriculture Council representative. I'll place more ads in the paper announcing important meetings, place banners in the U.U. and in display cases... and publish each meeting's minutes, making them available to students in display cases.

I'm consistent in going to meetings... therefore, I can disseminate information. I would like to personally challenge all board members and staff to put their job above other activities... I take pride in voting on the college board and participating in discussions. It gets me when others don't throw something into a discussion they are concerned about.

**I plan to be a liaison between the Engineering Council and the Board of Directors,...**

I plan to be a liaison between the Engineering Council and the Board of Directors, either get a newsletter for engineering purposes and hand them out to the head of the departments and make them available if the students want to know what's going on. For one, my number will be available so engineering students can call and talk to me directly.

I want to find out more — make ASI more accessible. Basically I just want to make it a little more fun, a little more enthusiastic and a little more known to the students. I want to see if we can maybe do a homecoming just for ASI, activities that stem from ASI, to get more student participation working with ASI.

**The only promise that I can make is that I will work to the best of my ability and be as fair as possible.**

The only promise that I can make is that I will work to the best of my ability and be as fair as possible. I won't break a promise like that. I plan on keeping myself readily available, going to as many meetings as possible, and making myself seen.

My main goal is to listen to the people's needs and keep a fresh outlook. I know my way around campus now, and I have the ability to keep an open mind. In fact, I usually put the needs of others before myself. I plan on being very energetic and being there for other people.

**I don't know as far as bringing 'fresh ideas'...**

I don't know as far as bringing 'fresh ideas'... I think for me it'd be a great learning experience. I'd like to put as much time into it as I can.

I've also worked as an alternate board director so I've been exposed to it and I see, as with all organizations, the bureaucracy involved. I'm good at business. I'd like to help out through the "red tape" and accomplish more in student government.

**Everyone believes communication is the biggest...**

Everyone believes communication is the biggest problem and having worked with student council as a publicity person, I feel I have a greater ability to reach the students and tell them what's going on and hopefully represent them accurately.

**I don't know as far as bringing 'fresh ideas'...**

I don't know as far as bringing 'fresh ideas'... I think for me it'd be a great learning experience. I'd like to put as much time into it as I can.
**ECTORS CANDIDATES**

I up in the races for president and chair of the board, there are also 22 positions to be filled on the Board of Directors, with 14 candidates who responded to Mustang Daily’s inquiries:

**QUESTION 2:** What fresh ideas do you feel you can bring to ASI?

California Democrats vow to defend affirmative action

By Doug Williams

Sacramento — The California Democratic Party on Sunday promised to defend affirmative action programs for minorities and women against an initiative to repeal them that opponents want to put on the 1996 ballot.

A resolution enacted by a near-unanimous vote contained none of the words of sympathy for free of affirmative action that President Clinton voiced in his speech to the convention Saturday. It pledged party funds to fight the repeal effort.

But some delegates at the state party’s annual convention argued that it should have gone even further. They tried unsuccessfully to include sanctions such as stripping party support from candidates who support or take a neutral stand on repealing affirmative action.

The resolution described all attempts to roll back state or federal affirmative action programs as "politics of divisiveness and scapegoating." It also created a party task force to campaign against the expected 1996 ballot initiative and pledged an unspecified amount of money to the campaign.

That position is far less conciliatory than the stance Clinton took in his Saturday address. He said Democrats must reexamine affirmative action programs and defend those which are worthy. But, he said, they also must consider that "this is psychologically a difficult time for a lot of white males."

That received a cool response, but no open hostility, from most of the 4,000 delegates and guests to the convention, which was organized on a theme of unifying behind Clinton’s re-election.

"I am not interested at all in having people tell me we have to find some way to make (compromising affirmative action) more palatable," Assembly Speaker Willie Brown said in a speech following Clinton. "The Democratic Party, if it stands for nothing else, must stand and be counted on this issue."

Asked if he was disappointed with Clinton’s stance, Brown replied, "Absolutely," but predicted Clinton would eventually take a stronger stand supporting affirmative action.

Affirmative action programs, which mandate racial balance in the workplace, college admissions, contracts and other government activities, have come under sharp attack as "reverse discrimination" by Republicans nationwide, including Gov. Pete Wilson. He has made repeal a major part of his campaign for the Republican nomination for president.

That position is far less conciliatory than the stance Clinton argued for in his Saturday address, he said. He responded, "Absolutely," but predicted Clinton would eventually take a stronger stand supporting affirmative action.

An initiative backed by Wilson to ban affirmative action is planned for California’s 1996 statewide ballot. But the formal petition drive to qualify it has not yet started. Republican-backed bills to repeal affirmative action laws have all been blocked by Democrats in the Legislature.

The Democratic convention also adopted resolutions Sunday opposing two other 1996 ballot measures. One would let voters cross party lines and cast ballots for either Democrats orRepublicans in primaries. The other is Wilson’s initiative to prevent Democratic Lt. Gov. Gray Davis from automatically succeeding him as governor if he is elected president.

State Party Chairman Bill Press said the so-called open primary “would destroy the California Democratic Party” by allowing Republicans to pick Democratic nominees for office.

Gray Davis from automatically succeeding him as governor if he is elected president.

State Party Chairman Bill Press said the so-called open primary “would destroy the California Democratic Party” by allowing Republicans to pick Democratic nominees for office.
Today, the chances of survival for critically-ill patients have greatly increased with the success of the first bone marrow transplant in 1968.

In October, experts now have a long-time survival rate of 30 to 40 percent for a transplant in comparison to zero percent to 15 percent without the treatment, according to a pamphlet published by the National Marrow Donor Program.

Marrow, which is found in the cavities of the body's bones, is a blood-like substance that produces red and white blood cells and platelets. These blood components act as the main agent of the body's immune system, according to the pamphlet.

Scientists today are working on a drug that can stimulate the bone marrow to produce more blood cells and platelets. The drug is called Interleukin-3 (IL-3) and is being tested on patients with cancer.

According to national registry totals for volunteer donors, 18.2 percent are African American, 37.4 percent are Hispanic or Native American, 27.7 percent are Caucasian; and 19.1 percent were reported as other or declined to say.

The Ethnic Marrow Typing Drive will take place today from 9:30 a.m. to 3 p.m. in the University Union, Room 204. For more information call 1-800-59-DONOR.

**BRADY: Candidate has experience with ASI**

From page 1

need someone who isn't afraid to voice a controversial opinion.

Brady said one of her goals as president would be to increase communication between students and ASI. She said she wants to make sure ASI is responding to students' needs.

"I'd like to have some type of open forum for students at the end of this quarter and the beginning of next year, where someone could make sure ASI is aware of any concerns they have," she said.

Brady said she plans to hold office hours so that students would always have access to her. These hours would be posted at various locations around campus, she said.

She also said she would like to have a strategic plan, Brady said, which ASI currently doesn't have, that would keep clubs and other organizations informed. She said ASI needs to make sure that clubs know how to get assistance and funding.

"I know that some clubs have had trouble getting funding in the past," Brady said. "If policies are set out clearly, then if there's a problem, everybody can know what's going on."

ASI Vice President of Operations Steven Steinhauer, an architecture senior, said Brady is perceptive about making decisions.

"She's shown herself to be a very hard worker," he said, referring to her work on the ad hoc committee. "She's taken on a lot of added responsibility."

"She's shown herself to be a very hard worker. She's taken on a lot of added responsibility."

**Steven Steinhauer**
ASI VP of operations

Brady said she feels she is the right person for the job because of her experience with ASI. She also believes she has the strong voice that is needed to represent the students to the administration.

She said Cal Poly receives a lot of input from students compared to other campuses.

"If we don't take full advantage of the communication abilities," she said, "then it's a big loss."
Wilson: Presidency is 'far more demanding and far more satisfying'

From page 1

With his overwhelming victory in his campaign for gubernatorial re-election, Wilson has positioned himself as a credible contender for the Republican presidential nomination. Being the most populous state in the union, California has the largest number of electoral votes. But since he won re-election with 1.3 million votes last November, some of California is concerned with Wilson's failure to keep his campaign promise of not running for president during the '96 election. If Wilson won, the governor would be able to run for president during the election last year and is expected to reiterate his position on illegal immigration during his presidential bid.

Wilson was speaking at the news conference in Sacramento last Monday to lend support to Rep. Elton Gallegly of Simi Valley, chairman of a Republican congressional task force on illegal immigrants. Gallegly introduced legislation into Congress which would allow states to deny free education to illegal immigrants.

Wilson estimates that California pays $1.7 billion annually to educate some 400,000 illegal immigrant children in state schools. At present, U.S. Supreme Court rulings require that states educate illegal immigrants.

Wilson praised the legislation as a strong step in recognizing Proposition 187, last year's controversial voter-approved initiative that would cut off government services in California to illegal immigrants, including education.

Wilson used Proposition 187 as a strong platform to win re-election last year and is expected to reiterate his position on illegal immigration during his presidential bid.

Wilson told United Press International, "Or actually whether I am more valuable as a Californian in the White House for four years, or for eight years, sympathetic to the concerns for which we have been fighting this White House for the past two years."

Despite his running for the presidency, Wilson said he would carry out his responsibilities as governor without interference. "I'll do my job here—that is my first responsibility," he told UPI. "My first duty is owed to the people of California."

WAC leaders score 41 runs in 3 games against Mustangs
San Diego State hands Cal Poly its most humiliating loss in school history, 24-0

By Anthony Pedrotti
Special to The Daily

In its most one-sided loss in school history, the Mustangs (12-18, 6-6 WAC) were blown out by San Diego State in the final game of a three-game series, losing by a football-like margin, 24-0.

The Aztecs (23-13, 9-5 WAC) pounded out 27 hits — two shy of its school record — and had two seven-run innings as it hammerd Mustangs' pitching for the second straight day to win its second game of a three-game series at San Luis Obispo Stadium this weekend.

During Saturday's game, San Diego State had 22 hits in a 16-12 win.

A grand slam by senior shortstop Tony Zaragana highlighted the Aztecs' five-run first inning as they never looked back en route to their Western Athletic Conference-leading ninth victory in a row.

Saturday's game was no pitching duel either, as the Aztecs pounded out 22 hits off senior starter R.J. Simons and senior reliever Demi Miller.

Every one of the first eight batters in San Diego State's lineup had at least two hits, with first baseman Travis Lee getting four hits and two RBIs and catcher Erven O'Leary collecting three hits and four RBIs.

After the Aztecs built a 12-3 lead, Cal Poly battled back with a seven-run fifth inning to close the gap to 12-10. But San Diego State put it away with two runs in the sixth inning and two more in the seventh inning, with senior starter Desi Radler taking the loss for the Mustangs as he was rocked for five runs on 11 hits.

Simone lastest only four innings as he was rocked for 11 hits and 10 runs and Miller could do little better, giving up six runs on 11 hits.

Simone lasted only four innings, as he was rocked for 11 hits and 10 runs and Miller could do little better, giving up six runs on 11 hits.

"We've been getting the hits and scoring the runs," Radler said. "But it's tough to get in these offensive opportunities.

Cal Poly finds its winning form again

Daily Staff Report

The 20th-ranked Mustangs returned to its winning ways, taking three of four games in a weekend homestand.

After splitting two games with San Jose State Saturday, Cal Poly (13-8) swept Saint Mary's (17-23) Sunday in a doubleheader.

Mustangs' freshman pitcher Kelly Smith pitched seven scoreless innings of two-hit ball to get the win in the first game.

In the second game, senior Ruth Henry and freshman Denise Knipfer combined on a four-hit blank the Gaels 1-0. Knipfer recorded the win and her career-high strikeout total.

In Saturday's doubleheader sweep with San Jose State, Cal Poly dropped the first game 2-1 before coming back to win the second game 5-4.

Senior third baseman Kelly Bannister and freshman rightfielder Kimber Joy led the offensive attack for Cal Poly.

Women's tennis takes two

After getting by Long Beach State with a 5-4 victory Friday, the Cal Poly women's tennis team (12-5) defeated UC Irvine Saturday, 6-3.

Against Long Beach State, Cal Poly went into the doubles matches tied at 3-3. Mustangs' No. 1 singles player, junior Tracy Arnold and No. 2 singles player, junior Allison Light, both lost their matches as did senior Alisa Bailey at No. 6 singles.

But wins by junior Kristen Simpson, junior Michelle Berkowski and sophomore Christine Walter gave the Mustangs an even split in the six singles matches.

Cal Poly needed to win two of the three doubles matches to clinch the victory — and they did.

While Arnold and Simpson lost at No. 1, double, Walter and Berkowski came up big and won in straight sets at No. 2 doubles over 49ers' Aida Orejel and Veronica Selby.

With the teams splitting the first two doubles matches, the No. 3 doubles match proved to be the deciding challenge as Bailey and sophomore Gina Chelli took the distance and went to three sets before beating Kathy Loyd and Yeatle Rath in a third-set tiebreaker.

Saturday, Cal Poly took four of the six singles matches and two of the three doubles matches to send UC Irvine to its 14th-straight loss.

UCI picked up two early wins as No. 1 Janet-Johnson and No. 2 Aya Furtachi defeated Arnold and Light.
