CAPTURE survey will probe students’ priorities

By Rodney de la Cruz
Daily Staff Writer

Come fall quarter, Cal Poly students will once again be asked to answer a survey question before they register for classes.

But this time, students will be surveyed about the Cal Poly Plan to accommodate a projected enrollment increase while maintaining quality education.

“The intention is that the student and parents surveyed will be used to gauge the various aspects of the Cal Poly Plan,” said Daniel Howard-Greene, executive assistant to Baker. “As new funds become available, the quantity and quality of services provided will be emphasized by the students’ and parents’ choices.”

Some students may remember a similar survey while registering for classes spring quarter. Students were asked whether they had the interest or the ability to participate in NCAA athletics and given three options: “yes,” “no” or “prefer not to answer.” Students were not allowed to register without first answering. “yes,” “no” or “prefer not to answer.”

An executive order signed by Wilson Thursday promises to reform hiring standards within state agencies, prohibit preferential treatment based on race or gender and reinstate “zero tolerance” for discrimination.

Within the order, Wilson said the University of California system, California Community Colleges and the CSUs “are requested to take all necessary action to comply with the intent and the requirements of this executive order.”

However, according to Vice President for Academic Affairs Bob Koob, Wilson’s mandate is aimed more at other state agencies.

Wilson blasts state affirmative action; Poly ducks fallout

By Cynthia L. Webb
Daily Assistant Managing Editor

Cal Poly and other California State Universities are holding their breath to see how the Board of Trustees will respond to a demand by Gov. Pete Wilson that state agencies report affirmative action programs.

An executive order signed by Wilson Thursday promises to reform hiring standards within state agencies, prohibit preferential treatment based on race or gender and reinstate “zero tolerance” for discrimination.

Within the order, Wilson said the University of California system, California Community Colleges and the CSUs “are requested to take all necessary action to comply with the intent and the requirements of this executive order.”

However, according to Vice President for Academic Affairs Bob Koob, Wilson’s mandate is aimed more at other state agencies.

An executive order signed by Wilson promises to reform hiring standards within state agencies, prohibit preferential treatment based on race or gender and reinstate “zero tolerance” for discrimination.

Within the document, Wilson states that “nothing in this executive order shall be construed to require an action that would result in a violation of a court order or a loss of federal funds.”

Ex-ASI employee convicted of siphoning student money

Daily Staff Report

A former ASI employee was convicted Wednesday of embezzling student money, according to a University Police news release.

Sharon Crain, former assistant to ASI Executive Director Polly Harrigan, was convicted of shifting $3,132 into a fictitious payroll account over a three-month period, the release stated.

But on a trip to campus the next day, she was thanked by Czeslaw Milosz enthralled a packed audience Jan. 26 at Chumash Auditorium with his poems and personal experiences.

According to the release, Crain created a fictitious student payroll account under the name Olivia Olivarez.

Between October and December 1994, Crain issued a total of six payroll checks to this fictitious student.

The release stated that Olivarez had never been a Cal Poly student and is supposedly the father of Crain’s child.

According to the release, Crain claimed she hired Olivarez to complete a Tax Sheltered Annuity program for ASI part-time employees. The release stated that Olivarez is in the insurance business but is not licensed to sell insurance in California.

Crain and Olivarez were not listed in the phone book or directory assistance and could not be reached for comment Thursday.

ASI Executive Director Polly Harrigan did not return a phone call Thursday evening.

“We don’t know at this point what the sentencing will be,” said University Police Sergeant Bob Schumacher.

Sentencing is scheduled for June 26, 1995 in San Luis Obispo Municipal Court.
AmeriCorps will create opportunities to help youth

By Karen F. Speyer
July 7th, '95

Their movement aims at "Getting Things Done" — something San Luis Obispo County is asking for.

County probation officers and homeless shelters are bursting at the seams with paperwork and caseloads of underprivileged or delinquent youths. And AmeriCorps National Service workers want to help.

Created by the National and Community Service Trust Act of 1993 through President Bill Clinton's efforts, AmeriCorps is comparable to the Peace Corps, but works on the domestic front.

Service workers in San Luis Obispo County, who must be at least 17 years old, work for one or two years with delinquent youths or those who are at risk.

The volunteers are placed in various social programs in exchange for educational awards and other benefits.

San Luis Obispo County will inaugurate its first AmeriCorps class Sept. 1, with service running through July 31, 1998. Not all communities can obtain AmeriCorps programs. San Luis Obispo County received the grant in September 1994.

Service workers must have a high school diploma, a General Equivalency Diploma (GED) certificate or be willing to work toward one during service. Applications for joining San Luis Obispo's AmeriCorps program are due by July 10.

According to Dale Magee, program director for San Luis Obispo's AmeriCorps Community Service Center, the county's AmeriCorps program will plan 20 full-time and 18 part-time projects.

“Our focus is what these kids need to be successful. This is multifaceted. AmeriCorps will come in and assess the whole person.”

Dale Magee
SLO County AmeriCorps director

SURVEY: Student population will be asked different questions

From page 1

Stanton said the student population will be divided into quarters for the survey. Each division will be given a separate question.

The problem with the survey, Stanton said, is that only a limited number of questions can be asked. But he said an advantage is that a large number of people can be reached through CAPTURE.

He said the CAPTURE survey is only part of a variety of sources Cal Poly will utilize. Others are discussion groups, small focus groups and telephone and mail-in surveys.

Introduced on May 2, the Cal Poly Plan outlines the survey and three other basic points aimed at improving Cal Poly.

The plan calls for a redistribution of allocated campus money, implementation of discounts for students through programs such as scholarships and the expansion and improvement of the summer quarter.
West rejects talks on hostages; food runs low in Sarajevo

By Seba Lest
housbeh

SARAJEVO, Bosnia-Her­
segovina — Western allies refused to deal with the Bosnian Serbs and pushed instead Thursday for a rapid deployment force to add muscle to their diplomatic efforts to free hundreds of hostage peacekeepers.

Bosnian Serb leader Radovan Karadzic warned that any at­
tempt to rescue some 370 U.N. diplomatic efforts to free hostage peacekeepers being held by the Serbs would result in butchery.

The pilot of a French fighter jet on reconnaissance over Bosnia Thursday for a rapid deployment force to add muscle to their diplomatic efforts to free hostage peacekeepers was the target. It was not hit.

The United States dismissed Serb overtures for talks on the hostage crisis, but sent a top envoy to try to persuade Serbian President Slobodan Milosevic to isolate his former Bosnian partners by recognizing Bosnia's Muslim-led government.

The Serb rebels had called for immediate negotiations on the hostages — seized after NATO bombing raids last week — but insisted that NATO guarantees there would be no more ari streskBefore the peacekeepers would be freed.

"We are not prepared to go into talks on that basis," Secretary of State Warren Christopher said Thursday in Lisbon, Portugal.

Speaking on Bosnian Serb television, Karadzic warned against any attempt to rescue the peacekeepers.

"We constantly change their location," Karadzic said, adding that any rescue attempt "would resemble a butchery shop. We must defend ourselves."

He again claimed that the detained U.N. soldiers were "POWs because their com­
mander ordered NATO bomb­ings." But he added: "They are in good condition and I can send a message to their families that nothing will happen to them."

"We are not prepared to go into talks on that basis."

Warren Christopher Secretary of State

Karadzic repeated demands that U.N. "safe areas" be demilitarized and that clandestine arms shipments to the government be ended as condi­
tions for releasing the peacekeepers.

In Belgrade, U.S. envoy Robert Prasure offered new con­
sessions to Milosevic, the region's power broker, that would effec­tively lift U.N. trade and travel sanctions on Serbia for inciting the war in Bosnia.

Hitting at potential rewards, which could include loans from international banks, Christopher said that "it would be useful to him in the future if he does em­
phasize that he is no longer an ally of the Pale Serbs."

British Defense Secretary Malcolm Rifkind, meanwhile, said Britain and France would establish a rapid-reaction force to protect peacekeepers that would be "robustly equipped to counter potential attacks on U.N. personnel."

Formation of the strike force will be discussed by diplomats in Paris this weekend and by a meeting of NATO defense mini­
sters next week.

Rifkind also welcomed Presi­
dent Clinton's new flexibility in offering to send U.S. ground troops to Bosnia to help redeploy U.N. peacekeepers — not just to pull them out.

"It is certainly a significant change in the American posi­
tion," he said.

Foreign Office minister Douglas Hogg said he expects Americans to be asked to help redeploy some peacekeeping forces from the strife­

More British soldiers and e­

terprise on Croatia's Adriatic coast, fol­

In Bosnia, Serbs detained a Swedish U.N. official Thursday in the Serb stronghold of Banja Luka. "We were assured he hasn't been mistreated," said U.N. spokesman Chris Guinness.

In the Serb-besieged capital of Sarajevo, and workers warned that hungerloomed, and senior U.N. commanders pondered using force to open lifelines into the city.

ACTION: Minority scholarships at Cal Poly may be in jeopardy from Wilson's decree on state minority job programs

From page 1

Koob points to this loophole as a boost to Cal Poly's affirmative action programs.

"Because the university is a heavily funded entity, it's my opinion that the effect will be minimal," Koob said. "The student aid as one area that receives a big chunk of federal funding.

Koob also said that because the order focuses on affirmative action policies within employ­

ment and hiring practices, ad­
ministration policies for Cal Poly and other CSUs most likely will not be affected.

"The way Cal Poly could be affected, Koob said, is if the trustees decide to voluntarily fol­

low the order.

And according to Steve Mac­
Carty, the CSU Chancellor's Office, such an action is unlikely. MacCarty explained that the trustees have the option of voting either to follow or dis­
regard the order.

"They do not serve as the governing body of the CSUs, so they're not considered to be a part of the governor, MacCarty said.

"Ultimately, it will be up to the board to decide if they want to re-examine the issue," Mac­
Carty said. "At this point, I wouldn't anticipate any changes.

If the board decides to ignore the governor's order, MacCarty said it is out of Wilson's hands.

"He can not direct us to com­
ply with this (order), none of that is undone," he said.

However, even though change in Cal Poly's affirmative action policies is unlikely, some administrators are taking a closer look at programs that could be

Prescription: Attend three Happy Hours a week, and call me in the morning, (except not too early)
The first time is always the best

Civil engineering senior Dan Eggert made us laugh on Valentine's Day with his stories of preteen romance — something we could all relate to.

...So true love didn't really hit me until junior high, when a new school shipped me off to school. She was like Martha Stewart, but with braces and feathered hair. My love began when she said those five words I will never forget: "You're standing on my backpack." Right then a sensation rushed over me that I hadn't felt before, except for the time I doused an entire tablespoon of Crisco... Running to the bathroom, I realized this was a whole new ball game...

What ever happened to dating?

Compton congressman charged with two more extortion counts

By Justin McNoughton

Located in a warehouse off Broad Street, the tiny, brightly lit shaping room was decorated with tools of the trade. Custom order slips pasted on the wall and a fan in the middle of the floor, buried beneath a quarter inch of surfboard shaping dust. Stan Cole Tucker — absorbed with shaping a custom order — was already doing extensive research on the surfboard he was about to begin. A California native, Simler had only lived on the Central Coast for two years before this time. His surfboard shapes, however, have been the backbone of support for his family's success from the beginning. "I was around all these guys for Simler's success from the ocean or the lifestyles of surfers, either."

Meet Dick the Graduate.

Dick is calling everyone to tell them his new phone number — especially Jane. He's saving with AT&T True Savings! It's perfect for calling anyone, anytime, anywhere in the U.S.A.

Dick really needs some cash.

Dick knew he'd save money with AT&T.

Dick called his local phone company to ask for AT&T Digital Answering System 1750.

Dick got a job and moved into an apartment.

Dick moved away from the San Clemente Surf Industry between Santa Cruz and San Luis Obispo is the unique surfboard shaping industry between Santa Cruz and San Clemente. Simler has never been a stranger to the ocean or the lifestyle of surfers, either. At 18, he started surfing on a pro tour along the West Coast for Hobie surfboards. Within this atmosphere, he was constantly in contact with top surfers like Gary Linden and Phil Edwards, and he had access to the facilities and tools needed to practice the trade. Under Hobie he shaped longboards, but was still several years away from taking his talent to the professional level.

Under Hobie he shaped longboards, but was still several years away from taking his talent to the professional level.

Born in Newport Beach and raised in San Clemente, Simler has never been a stranger to the ocean or the lifestyle of surfers, either. At 18, he started surfing on a pro tour along the West Coast for Hobie surfboards. Within this atmosphere, he was constantly in contact with top surfers like Gary Linden and Phil Edwards, and he had access to the facilities and tools needed to practice the trade. Under Hobie he shaped longboards, but was still several years away from taking his talent to the professional level. "I was around all these guys that shaped a lot, it was cool 'cause I got to check out a lot of different styles," Simler said. At 23, he linked up with Roy Gonzales, a famous surf artist, to share ownership of a San Clemente-based surfshop. The business lasted three years until he decided to give it up and move on. "It was an endless financial headache," Simler said. "I got sick of doing that whole thing — breaking even for a few years — so I sold that and moved up here."

After experiencing much of what San Clemente had to offer, Simler moved north to attend Cuesta College. Suddenly outside of familiar surroundings and faced with the reality of living within a small surfboard market, he was pressed to find business. "When I got up here, it got harder and harder to get boards," Simler said. "Finally I said, 'I just going to make my own.'" While putting himself through school, Simler got a job at CCS and started shaping more surfboards to help pay the bills.

"I started selling boards out the back door, out of my garage," Simler said. As he made the transfer to Cal Poly with a focus in forestry he realized the potential that shaping surfboards and attending college were in conflict. "When I got started going to Poly is when I really got into shaping full time," Simler said. "I was able to do that and school at the same time as well as help pay the bills."

According to Dan Robertson, assistant manager of Moonshadegs surf shop in San Francisco, Simler was a specialist when it came to surfboard shaping. "I was around all these guys that shaped a lot, it was cool 'cause I got to check out a lot of different styles," Simler said. At 23, he linked up with Roy Gonzales, a famous surf artist, to share ownership of a San Clemente-based surfshop. The business lasted three years until he decided to give it up and move on. Recruiters like Poly, but that doesn’t guarantee a job

By John Hatcher

Social sciences senior

the liberal arts professions,” Hayden said. “Recruiters don’t come on campus to recruit those majors, but other resources can be utilized to find a job.”

Hayden said the Career Center helps with the interview process, including resume-building skills and providing books on how to find a job.

“Liberal arts majors get jobs through professional associations, job fairs, internships, networking and through their individual departments,” Hayden said. “Cal Poly even has a job resources page on the Internet.”

Hayden emphasized the importance of establishing relationships with those in your desired profession. She said in liberal arts majors, getting established can be difficult.

“Students have to use available resources to their full extent,” Hayden said. “There are alumni contacts and temporary agencies that can help you start your career.”

Most experts agree that liberal arts majors have to be especially creative and networking for job opportunities.

“They have to sell themselves,” Hayden said. “Jobs are out there, but you have to work at it.”

Caccese said. “Most employers want things nailed down early, but we still get lots of last minute calls.”

Top employers of Cal Poly graduates for the 1993-94 year were Deloitte and Touche, Ernst and Young, Andersen Consulting and Hewlett-Packard, according to Caccese. Statistics for this academic year are still being tabulated.

According to Caccese, students who have difficulty finding interviews and information through Career Services will often go to their individual departments for help in their job search.

“I went to a few workshops... they gave me some good ideas of how to start out,” he said. “More than anything, it motivated me.”

Todd Anderson

Business senior

Construction management, but we will begin work with DPR, a well-known Northern Californ­ ian construction company.

For those students using Career Services, a combination of job-related services are available to Cal Poly students and alumni, according to Career Services Director Richard Equi.

These services include career-planning placement, workshops, employer information, student employment, cooperative and alternative career oppor­ tunities.

“There’s a wealth of information here,” Anderson said. “Agreed with Equin, the page students to use all of the search opportunities we offer,” she said.

Business senior Todd Anderson said he took advantage of several job search options at Career Services.

“I went to a few workshops... they gave me some good ideas of how to start out,” he said. “More than anything, it motivated me.”

Anderson will graduate next week and said he is still looking for a job.

“I was able to research companies I would interview with through Career Services,” he said, “and found that most of the companies recruiting were not looking at what I’m looking for. For do I have one waiting for me to start.”

Anderson said he considered having some fun.

“Some of my friends were really good - some found jobs and some didn’t,” he said. Without a job, Anderson said he will go to Gap and work for Oakas this summer and work in his family’s pool cleaning and construction business.

“I’m not too worried,” Anderson said. “I’m lucky that I have something to go home to in the meantime.”

WEIRD: Troubles just wouldn't end for buses, trucks and car antennae in a year that saw few of the normal perversions

San Luis Obispo Police reported that the suspect had been wearing a clown costume and became angry when someone took his clown wig off his head. He then asked a friend to help him get it back, according to police.

The suspect apparently remained angry even after his wig was returned and brandished a knife at one of the party guests, according to police.

Both the suspect and the victim left the party around the same time, and the suspect allegedly wanted to start a fight, police said. Police reported that the suspect then proceeded to kick and punch the victim.

The victim was found unconscious a short time later.

9. Does in showers

In October, two students weren't drowning a crush in front of the football

SURF: Over 2,000 boards shaped in five years

By shaping 50 to 50 boards a month, he's managed to shape more than 2,000 boards in his five years as a professional on the Central Coast.

The lifestyle suits him well. Waves permitting, there's often time to surf twice each day and still get enough work done to pay the bills.

But there is a limit to what he can accomplish locally. By keeping San Luis Obispo and CCS as his central market, Simler hopes to work with shops along the north and south coasts, much the way he does with CCS, and open up more connections in the international market.

He has already sent boards to Chile, and has opportunities to shape boards in Japan and in Europe.

"It's where I really want to go, but I don't want to give up what I have here to travel. I'd like to keep this," he said, pointing to his shaping room, "as my home base."

Agricultural business juniors Troy Wheyland and Pete Dwyer, who live in Atascadero, said a waterway was leaking from the shower ceiling for two weeks before it was "washed up". "We put up a funnel with a tube and duct tape going into a bucket," Wheyland said in the time. "They have the same setup down the hall. Their bathroom is covered with this junk."

According to Residential Life and Education director Preston Allen, the liquid had been tested twice before and was determined not to be hazardous. He said it resulted from leaks in the ceiling.

"It's not like something you'd see on Star Trek," he said. "It's not that kind of ooze."

A pair of thieves

Most people called the winter storms that drenched San Luis Obispo a disaster. But as the

From page 2

Reality methamphetamine, she said.

Many Cal Poly students expressed interest in the program when Chuck Simler, an AmeriCorps representative attended Cal Poly's Second Job Fair, Magee said.

The program is more geared toward those who want to work with adolescents as a career. Human development and social science graduates, particularly good candidates, she said.

"It's a great opportunity to work with high risk youths and these agencies," Magee added.

"We're hoping for somebody with counseling or teaching experience, or those kinds of goals," Graher said.

The agencies want energetic, motivated individuals, Williams added.

Service members would work strictly with clients — not in the clerical department, Magee said.

At County Probation, workers would act as a Big Brother or Sister might, attending Alcoholics or Narcotics Anonymous meetings with the youths' parents.

"Generally, skill levels of both the parent and child are lower," Williams said. "They need personal help.

County Drug and Alcohol workers would be involved in the Substance Abuse Screening for Teens, or SASSY, said. They would provide case management and group counseling, and would encourage youth and parent education.

"We're hoping their tracking will provide accountability and evidence that our services are effective," Graher said. "It will also provide increased services to the youths and their parents."

In addition to the obvious hazards associated with drug abuse or teen pregnancy, Magee said, these youths risk being unproductive adults.

According to Magee, pregnant or substance-abusing teens have a 50 percent school dropout rate and are prone to poverty, especially those who have more than one child. Working with these youths as a tutor and mentor can be beneficial, Williams said, rather than as someone who may intimidate them or appear to be policing them.

AmeriCorps members are compensated, Williams said, so they are not strictly volunteer workers. But it isn't much, he added.

Full-time members will receive a $27,000 monthly stipend and have the option of receiving a 900-hour service award for their higher education. Part-time members will receive a $2,362 educational award after 900 hours of service.

"Since the person is basically a youth, a volunteer will respond to that," Graher said. They might say, "Here's someone working with me who is a little younger than I am."

The county has excellent probation officers, Williams said, but they are often viewed by juveniles as an arm of the court.

"There's always a little bit of a barrier there," Williams said.

AmeriCorps workers may be able to overcome that barrier through their intense contact with the youths.

But the program may face an even greater barrier in Congress as Republicans push for a reduced federal deficit.

Critics cite the administrative costs and question the results of the program, which received $575 million in federal funds this year.

"We're hoping their tracking of cases will provide accountability and evidence that our services are effective," Graher said. "It will also provide increased services to the youths and their parents."

Weird

From page 7 Floodwaters approached ornamental horticulture graduate Larry Canick’s front porch, he was more concerned they wouldn’t be deep enough. For a jet ski, that is.

With a creek spilling into his yard near This Old House on Foothill Boulevard, Canick and several friends found a temporary lake occupying the backyard.

The skiing wasn’t too bad, Canick said, laughing and showing off a video the next day. The worst part was plowing into submerged plants.

“That hurt,” he said. “I’m sore as hell today.”

9. Nacked people

Maybe it hasn’t been hot enough. Maybe students have calmed down. But no one was caught this year snuffing people’s butts in the library or running around campus nude — until Monday.

According to a police report, an anonymous caller reported three naked males running behind the Sierra Madre residence hall shortly before 2 a.m. on Monday.

The report said that two of the suspects living in the dorms got together and decided to go streaking. The third male then decided to go along.

The group started at Sierra Madre, ran through Dexter Lawn and down toward Mustang Stadium.

One suspect was temporarily detained near Crandall Gym by a campus security officer who found the man only wearing shorts.

University Police Investigator Ray Berrett said the three suspects were not charged but given a warning for indecent exposure.

10. Humboldt wants to secede

And you thought Cal Poly’s ASI makes some strange decisions.

Apparently, there were enough elected student representatives at Humboldt State this year to push through an official resolution calling for the secession of Northern California from the United States.

The government is completely out of touch with student needs, the Humboldt Associated Students declared, and they aren’t going to take it any more. They’re leaving.

So... are they gone yet?

ACTION: Poly waiting to see if Wilson decree will impact CSUs

From page 3

ing for research and other projects that usually help professors who are seeking tenure.

Suess said these programs "It may also impact the Faculty Diversity Hiring Program," the university recruit minority faculty members.

"But Suess cautioned against jumping to conclusions without word from the CSU trustees. "We have to wait and see what we are dealing with," he said.

MacCarthy concurred, emphasizing that only the trustees can dictate whether changes will be in store for the CSUs.

He said the Board of Trustees for the CSU met May 10 and 11 in Long Beach for a regular meeting, and affirmative action was one of the prime topics discussed.

According to MacCarthy, the trustees discussed affirmative action policies within the CSU and seemed comfortable with them at the time.

He said he hasn’t heard any response from the trustees in support of Wilson’s executive order.

The trustees aren’t scheduled to meet again until July 11 and 12. Whether or not the new order and the future of affirmative action policies within the CSUs will be a topic of discussion is purely speculative, he said.

MacCarthy said CSU lawyers are reviewing the order to check which — if any — of the new policies can legally be applied to the universities.

He said while he doesn’t foresee the order changing affirmative action policies within the CSU, one possible change could be the elimination of minority scholarship programs.

The CSU currently awards race-based merit scholarships to Hispanic and African-American students, but the trustees could decide to nix the program.

San Diego high school catcher selected by Padres in second round

By David Wilson
Associated Press

SAN DIEGO — Forget the scholarship to Miami and a shot at the Olympics. At 18, Ben Davis is a professional baseball player.

The star high school catcher was selected by the San Diego Padres with the second pick in Thursday's baseball draft. The two sides hadn't even met to terms before the draft, and Davis will receive a $1.3 million signing bonus.

"We've covered all of our bases," Padres general manager Randy Smith said. "The kids want to play." Davis planned to celebrate by going to a friend's graduation party Thursday night. Graduation is next Thursday.

"It's really tough to think about right now," said Davis, a senior at Malverne Prep outside of Philadelphia. "I'm only 18 years old, and I can't believe I have this opportunity ahead of me.

Davis and his family will fly to San Diego on Friday to sign with the Padres. Smith said Davis likely will be assigned to Idaho Falls of the Class A short-season Pioneer League.

"I feel ready to start my professional baseball career," Davis said. "It's something I've looked forward to for a long time.

Smith said Davis has "an excellent overall package." At 6-foot-3 and 200 pounds, Davis has a perfect build for a catcher, and is a switch-hitter with power from both sides.

"His throwing arm is well above average and he can stop a running game," Smith added. Davis threw out 8 of 12 runners this year.

"He loves the game," he said. "I think this is all he wants to do. He has a batting average in his backyard. We wouldn't have selected him if we wanted someone else.

Davis hit .507 with six homers and 37 RBIs in 71 at-bats this spring.

"The No. 1 thing is his arm strength," said Davis' high school coach, Mike Rooney. "He's been clocked at 96, 87 miles per hour as a pitcher. That kind of arm strength is remarkable behind the plate.

Davis signed a letter of intent with Miami, but wouldn't have played college ball unless he fell out of the first round of the draft. "Not going to college is giving up a heck of a lot," he said.

So is a shot at the Olympics. Davis played with the U.S. junior national team last year, and had been invited to a Team USA tryout camp that began Wednesday.

"Seeing the talent that was out there, I felt that I'm ready to go out and prove myself on the baseball field," Davis said. "I want the chance to move up the ladder and hopefully I'll get to the major leagues in a few years."
In its first year in Division I, the Mustangs made an impression lead by seniors Cody Custard and Talia Berkowitz, who were the year’s recipient of the Male Scholar Athlete of the Year award, finished 23rd in the NCAA Regional Championship while their teammate finished 14th overall. They led Cal Poly to a 10-5-8 team-play finish.

The baseball team was led by junior Kellie Flathers, freshman Lea Fusscon and senior Angela Orefice. Flathers took 10th place in the NCAA Regional Championships while Fusscon took 23rd and Orefice finished 34th.

**W. SOCCER**

If the men’s soccer team had a run at the NCAA playoffs, then the women’s team was one of the closest Cal Poly teams to qualify for the playoffs.

The team, along with Coach Alan Anton, made the team’s first-ever appearance in the NCAA Division I tournament. The season ended without a playoff berth for Cal Poly, who compiled a 10-5-8 overall record.

Led by forward forward Kellie Flathers, several young players returned to the lineup and helped the Mustangs win a challenging 199-99 schedule.

**S O C C E R**

After an injury prone year, the women’s soccer team concluded its season with a run to the NCAA championship.

The Mustangs were on a seven-game winning streak before losing to Division II Cal State Bakersfield. The season ended without a playoff berth as Cal Poly compiled a 10-5-8 overall record.

Led by forward forward Kellie Flathers and forward midfielder, the Mustangs scored key wins against Santa Clara and Pacific.
