State funds could decrease with Poly plan

By Rebecca Strick
July Staff Writer

Cal Poly's share of the state's tax funding could decrease if it raises student fees to fund the Cal Poly Plan. According to CSU Chancellor Barry Munitz, the state may provide less tax money to Cal Poly after the plan is launched so that other CSUs could opt to form a similar plan.

Munitz spoke to a crowd of about 300 faculty, staff, students and administrators at an afternoon forum in Chumash Auditorium on Thursday, holding a question-and-answer session for the plan.

State funding would not decrease for three to five years after the plan is enacted, Munitz said.

But, "there needs to be some written language that assures us that tax money from the state's general fund will be available to us for the next three to five years," said Harvey Gunther, senior professor and Academic Senate chair.

The chancellor said he hopes that one day, one of the CSUs will be able to offer free tuition, which would meet the increased demand for higher education and make a college education more affordable to more students. After the funding anxiety was settled, Muniz encouraged the university to proceed with the Cal Poly Plan.

"The world is gradually concluding that we cannot provide higher education in the same way, at the same cost, time and places that we have been," Munitz said.

Within the CSU system, the Cal Poly Plan is one of many steps taken up by the state (proposing solutions to problems) with limited resources and a growing student population.

Another U.U. at south end of campus

By Greg Manfield
Daily Staff Writer

You grab your coffee, check out a library book, read your textbook on the way to your tutorial and then head off for your 9 to 5 job. It's what we're accustomed to when it comes to managing our lives. But what do you do when you get to Poly?

Currently, that chain of events might leave you out of breath from running across campus— but in the future you may be able to do all these things in one building.

A plan to bring Cal Poly into the 21st Century proposes a northwest complex. The complex may contain several different entities, including Associated Students, Incorporated (ASI), the library, Foundation and Student Affairs.

Ideas for what to include in the complex include an expansion of the library, an extension of El Corral Bookstore, more food services, a campus store, more meeting rooms, tutoring support and a room capable of showing movies.

The proposed site is on parking lot E2, just north of the library. The project is still in the planning stages and wouldn't be finished for five to seven years. The complex is unique because so many campus organizations are coming together for one project.

"It's a joint partnership between the state, ASI and Foundation," said Juan Gonzalez, vice president for Student Affairs.

"We're trying to develop a complex that would be an extension of several campus services, as well as a place for supplemental education and instruction."

Foundation Executive Director Al Amaral said none of the organizations are counting anything out.

"We're looking about trying to figure out ways and means of improving the chances of succeeding above .500."

Student group, CSU argue proposed cut of remedial classes

By Joe Brooks
Daily Staff Writer

Students who require remedial math or English classes might not immediately be admitted to California State universities. The CSU Board of Trustees has proposed to deny admission to any student who requires remedial courses in math or English. James Gray, a trustee board member, said that they are trying to eliminate the cost of providing remedial classes as well as the time professors must spend teaching them.

The time for students to learn math and English is high school, he said. Universities are strapped for cash as it is and they cannot afford to allocate money toward remedial programs, Gray said. But according to Marc Levine, chair of the California State Student Association (CSSA), the cost of providing these services has been blown out of proportion.

"There are very few resources being used by the CSU system on remedial education. I would estimate less than 1 percent of our student body is being allocated toward this," Levine said.

The proposal will work with high schools to better prepare students for college and also for those students as they enter high school.

"Students will take the test throughout their high school career," Gray said. "This will show what areas they need to focus on."

Community colleges will also be involved in this new proposal, he said.

Students who do not pass the required level of entry to a CSU program will need to complete the required courses at a community college during the summer following graduation from high school. As long as they pass, the students would be admitted into the university, Gray said.

Students who do not have English as their first language are not excluded from this proposal, Gray said.

Students who cannot speak or understand a minimum amount of English will also have a difficult time passing other classes. This proposal will help them because they cannot afford education in college, Gray said.

Although the proposal calls for phasing the program in over a two year period, Levine does not see it being implemented before the year 2000.

Aquila pipeline leaking: Unocal to close beach

By Travis Money
Daily Staff Writer

To avoid beach contamination and health hazards from a long-term pipeline leak, Unocal is mounting a cleaning operation at Avila Beach which will block off most of the beach and take several weeks to complete.

Aged pipelines running from Unocal's front terminals to the pier have caused oil to leak from the pipes to Avila Bay according to Jim Bray, a spokesperson for Unocal's Santa Maria refinery.

"The pipes are three to four feet deep," Bray said. "It probably wouldn't be filled with water, up to 150 percent of the line's normal capacity."

"There are very few resources being used by the CSU system on remedial education. I would estimate less than 1 percent of our student body is being allocated toward this," Levine said.

The proposal will work with high schools to better prepare students for college and also for those students as they enter high school. "Students will take the test throughout their high school career," Gray said. "This will show what areas they need to focus on."

Community colleges will also be involved in this new proposal, he said.

Let me begin by saying that I do not wish to per­petuate a verbal battle that in the end will solve nothing. But after reading Brian Kropp’s commentary on Novem­ber 7, I felt compelled to respond, both for the gay population and myself.

Mr. Kropp, guided by his own ignorance, has tar­geted the reputation of my personal moral values and against his god, an American citizen, Brian Kropp is allowed to have opinions, practice the religion of his choice, and express his beliefs rather than logic or reason. Mr. Kropp sees his faith as his strength. I see it as his crutch.

Mr. Kropp, I am not a rapist, thief, traitor, adulterer, or pervert. I feel it is important to point out to Mr. Kropp what it is that the power of the Chris­tian God does our government endorse Christianity or acknow­ledge God as a higher power. In fact, as a government­funded institution, the California State University sys­tem is required to observe the “separation of church and state,” and it is not allowed to favor one religion or cul­ture over another. That means Cal Poly cannot choose Christianity over Buddhism or Islam or any other religious belief system. I realize it is sometimes difficult to see just how many different trees are in the forest when you’re living in the middle of the Christian Garden of Eden, but as Americans we are responsible for respect­ing the beliefs of our neighbors. Was it not Jesus himself who said, “Love thy Christian neighbor, and heap scorn and retribution on the others.”

Mr. Kropp also has some of his hard facts mixed up. Homosexuality is no longer listed as a psychological dis­order in the DSM III, the psychoanalyst’s bible. Legally, homosexuals are not “sick,” they are not “criminals,” and damnit, they’re people who breathe the same air and walk on the same earth, you know? I think you might as well learn how to deal with them. Furthermore,

This is a response to Brian Kropp’s commentary on bias, where he attacks “sexual deviancy” as an offense every day there is more scientific proof that homosexuality is transmitted genetically, so it CAN be a trait one is born with, and it CANNOT be gotten rid of. Then we got to the Hebrew science fiction... Mr. Kropp chooses to defend his beliefs with his idea of Truth, the literal word of the Bible, which I had the time and space for a truly philosophical discussion of the nature of good and evil, but nowhere in any of these passages do I see anything that explicitly condemns homosexual behavior.

Mostly I see Christian hype about the Good and the Light, and the Evil and the Darkness. Actually, the duality of the Light and Darkness is not a Christian in­vention at all, and comes from the pagan roots of Zoroastrianism, but I don’t have the time or the space to go into any deep discussions about the non-Christian origins of Christianity.

Rather than force himself to deal with the problem of differences in sexuality, and make a decision on his own, Mr. Kropp takes the easy way out and is spoon-fed Chris­tian dogma about what is right or wrong, good and evil. Certainly one can, on their own and without God, decide that homosexuality is not something they agree with. But to force your beliefs down the throat of another freethink­ing individual in a desperate attempt to “save” them from Hell because you are unable to deal with the guilt as­sociated with another person’s failure to meet your moral standards is, at the very least, impulsive. I can’t even say I admire Mr. Kropp’s faith, which must use 2,000 years of Christian imperialism and spiritual totalitarianism to support his beliefs rather than logic or reason. Mr. Kropp sees his faith as his strength. I see it as his crutch.

The last point I will make is in Mr. Kropp’s closing state­ment, “Why does this qualify them (homosexuals) for spe­cial attention and protection at my school?” To answer your question, Mr. Kropp, this is not YOUR school. This is OUR school. That means you, me, the homosexuals, the Buddhists, the Molesom, the Jewish, the Irish, the Liberales, the Conservatives, the Buddhist, the Hottentot, the Panke, the Near-Sighted, the Gravely De­banged, and the Clinically Sane. It’s all of us, and we have just as much of a right to be here as you do. You do not have a right to agree with the beliefs of your neighbors, but you must RESPOND to them. Not because your god told you to, but because they are your fellow human beings.

Assembly speaker may lose position when legislature reconvenes

By Doug Wills

SACRAMENTO — Assembly Speaker Brian Setencich's job may be on the line when the California Legislature reconvenes in January.

His fellow Republicans are gunning for Setencich, and they may try to use it to remove him from the Legislature's most powerful office if two local elections in the coming month turn out as expected.

But the 33-year-old Fresno lawmaker seems confident and unconcerned.

He says he has met with 70 of his 79 Assembly colleagues since the Legislature adjourned in September, visiting most of them in their home districts.

He claims the support of at least a dozen fellow Republicans today, and predicts he will have more than half of the Assembly's 41 Republicans supporting him by January. With the 39 Democratic seats allotted for him in September, that's more than enough to retain the speaker's office.

It isn't that simple, of course.

"Now more than ever we need to make sure that we all make children our top priority."

James Steyer
President of Children Now

"Now, more than ever, we need to make sure that we all make children our top priority," said James Steyer, founder and president of the nonprofit child advocacy group.

The report also found:

- Forty-five percent of California children live in low-income families.

- One in three children are affected by the state's child-support system, but many don't receive regular payments.

- California's high school dropout rate has declined slightly to 4.9 percent in 1995, but only one-third of high school graduates are prepared for college.

- Nearly 6 percent of expectant mothers received late or no prenatal care. Rates for black and Hispanic women were more than double that for whites.

- Infant mortality has improved, but the rate for black babies remains higher than for white babies, 15.7 deaths per 1,000 live births compared to 8.7 deaths per 1,000 white infants.

- Falls were the leading cause of preventable injuries.

"Nobody ever campaigns saying, 'I'll never deviate from the caucus position.' " he said. "Everybody says they will be the most independent lawmaker Sacramento ever had. We have an opportunity to actually allow people to do what they said in their campaigns."

After 14 yrs of political strum ung Willie Brown's reign, Setencich seems too young, inexperienced and naive to survive as speaker.

He is more of an accidental speaker than a political force.

That has never been a winning formula in the past. But the Legislature's collective character is changing quickly as veteran lawmakers are being phased out by term limits.

Fifty-five of the Assembly's current 80 members have served five years or less. By the end of next year, the Assembly's senior member may have just four years seniority.

That's a very different kind of Assembly to the house which picked Jesse Unruh as speaker in the early 1960s or Willie Brown in the past two decades. Setencich's unassuming manner and inexp erience may be more in tune with an Assembly made up of short-term lawmakers.

Nevertheless, most Capitol observers give Setencich little chance of succeeding as speaker.

Democrats have made it clear they will abandon him the moment they get a 41-seat majority. And while some Assembly Republicans may be ready to work with Setencich today, they also are expected to dump him if they can increase their current 41-vote majority to 43 or 44 seats.

That means if Setencich does survive as speaker, it will be because the Assembly remains closely divided. He will never amass the kind of power Brown or Unruh wielded. But in the new political environment of term limits, there may never again be another Assembly speaker of either party as powerful as Unruh or Brown.

Setencich may be temporary speaker, but he may also be a preview of a new breed of legis lative leadership.

Plumas and Trinity counties had no youths shot during that period.

"Contrary to media highlights, elementary schools are not exclusive to particular groups of children or to certain areas of California," the report said.

This year marked the first time Children Now looked at the fathers in teen pregnancies.

"Young mothers, of course, are only half the story of teen births," the report said.

California's teen birth rate is 21 percent higher than the national average.

In 1993, 68,519 babies, nearly 12 percent of all births statewide, were born to teen mothers. In the 58,809 cases where paternity was reported, 66 percent of the fathers were over 18.

The project hopes to create a technologically advanced complex so it will provide students with the best services possible. Gonzales said.

Funding for the project will depend on how many organizations remain interested in the idea. The financial matters will clear up later this year when there is a better idea of what is going into the complex.

"We're asking, what if you could have more study areas, a new computer center, more space and study areas. We have an awful lot of students that are in that end of the campus a lot."

By having all these different things in one spot, it will save time for students, according to Director of Facilities Planning Robert Kitamura. The complex will also attempt to be more functional, using space for different things depending on the time of day.

"You can do multiple things at the same time," Kitamura said. "It will also tie faculty closer to student study spots."

The purpose of the complex will be to accommodate an increase we expect in the number of students, it still might be a waste of space if students don’t use it."

"If they are going to be enrolling in so many more students, it would be ridiculous not to accommodate them," Jacob said. "We're asking what if you could have more computer services, more study areas that need at the end of the complex? That's where we are at right now," Amman said.

The project was proposed in the fall of 1993 and the project committee approved the project in May 1994. The project design is expected to be completed in the fall of 1995, and the project is expected to be completed in the fall of 1996.

The complex will be designed to accommodate an increase in the number of students, it still might be a waste of space if students don’t use it."

The Chinese government
summoned a search
committee, and the reincar­
says the Cabinet must approve
the 11th reincarnation of the
Panchen Lama as Bedhun
the second-highest Tibetan
Lama, and the highest-ranking
leader inside Tibet.
The Chinese government believes
the Panchen Lama is Amitsaba
the Buddha of Light, and that
has a special connection to an infant when he died in 1989.
The search committee has been looking for that boy for six years.
The Chinese government says the Cabinet must approve
the three boys named by the committee, and the reincar­
nated Panchen Lama will be
chosen by drawing lots from a
golden urn.
The Dalai Lama recognized the 11th reincarnation of the
Panchen Lama as Bedhun
Cheokyn Nyima, a herder's son
found in a Tibetan village by
the search committee.
The date of the drawing was
not immediately known.

The government accused him
Sunday of choosing the child
"through fraud" that "violated
the cardinal principles of Bud­
dhism," Xinhua reported. For
that reason, it said, the boy can­
not be the reincarnation.
The Dalai Lama adamantly
denies the allegations.
"Of all Tibetans, the boy
recognized by the Dalai Lama is
the only authentic reincarna­
tion, no matter what methods
the Chinese government
use to put a stamp of legitimacy
on their present move," said
Lodi Gyi, a representative
of the Dalai Lama in
Washington.

Serbs will give back Croatian holdings

By Julijano Mocisic
Associated Press

EDDU, Croatia — Rebel Serbs agreed Sunday to submit the last of their holdings in Croatia to government authorities, resolving a dispute that threatened to derail U.S.-led talks in Ohio on peace for the Balkans.

"This is a historic signing," U.S. Ambassador Peter Galbraith said. "For the first time, in this conflict an issue has been solved by a signature and not by a bullet."

The agreement, signed in this Serb-held town in eastern Croatia and witnessed by Galbraith and chief U.N. envoy Thorvald Stoltenberg, also averted the imminent threat of more fighting.

Croatian troops in May and August regained most Serb-held territory taken in 1991 war, sending about 140,000 Croatian Serbs fleeing to Bosnia and Serbia.

Croatia threatened to attack the remaining bit of Serb-held territory, known as eastern Slavonia, if rebels refused to accept the plan for its reintegration.

Such an attack on the territory, which borders Serbia, could have drawn in the Serb-led Yugoslav army, leading to a renewed war and a collapse of the peace agreement that has held for more than a year and a half.

The agreement, signed in Zagreb, the Croatian capital, where the government's lead negotiator signed for Croatia.

The agreement calls for a three-year transition period and U.N. monitoring. Croatia insisted on no more than one year and wanted a NATO presence, similar to that which could enforce peace in Bosnia.

The agreement also gives anyone who moved to the area from other parts of Croatia the right to remain — a reference to ethnic Serbs who fled Croatian army offensives last spring and summer and resettled in eastern Slavonia.

It also guarantees the right of return for property confiscated or abandoned by force and the right of compensation for property which cannot be restored.

The area will be demilitarized and a temporary new police force created to build "professionalism ... and confidence among all ethnic communities," the agreement said.

Local elections will be held 30 days before the transition period ends, and Serbs will be allowed to have their own municipal council.

"I congratulate the parties for entering into this agreement and avoiding renewed conflict," Clinton said.

In a show of force, the Croatian army had moved crack troops and heavy artillery toward the front line over the past few days. Witnesses also reported seeing a large column of Croatian army troops and guns headed toward the Croatian border late Saturday night.

"The agreement provides for a peaceful solution," Stoltenberg said. "I generally hope that this will have a contagious effect for the remaining bit of Serb-held territory, which borders Serbia.

"We had lightening while it was snowing," said George Stein, a spokesman for Potomac Edison Co. in West Virginia.

Since yesterday's snowfall, about 6,000 customers still had no power Sunday, said Ely, Minn., had a Sunday morning low of 18 below zero.

The electrical outages were one of the earliest signs of fall in upstate New York. The northern end of the cold front continued producing stormy weather Sunday in northern Maine. The southern end of the front had touched off violent storms Saturday in Florida and the Gulf of Mexico.

"Trees down over cars, trees down over houses and trees down over power lines," Gregory Hostetter, a sheriff's dispatcher in Rockbridge County, Va., said late Saturday.

"But the wind wasn't the only problem. In West Virginia, some trees toppled because Hal­

White House had key papers before investigation

By Pete Yost
Associated Press

WASHINGTON — Early in the Whitewater affair, a White House lawyer obtained confidential documents from a key facet of the investigation, hastily returned them after the Justice Department launched a probe to determine how presidential aides used material.

For five or six days in mid-November 1993, then-Associate White House Counsel Neil Eggleston had a report that detailed a series of defaulted federally backed loans by David Hale, a Little Rock judge who was emerging as a central figure in Whitewater.

The report by the Small Business Administration triggered a criminal investigation of Hale, who was indicted just two months before the White House obtained the documents from the SBA, according to documents reviewed by The Associated Press.

At the time, Hale was alleging publicly that he had been pressured by the SBA to award David Hale, a Little Rock judge who was emerging as a central figure in Whitewater.

The loan, which was never repaid, is at the heart of the Whitewater prosecution of Hale's criminal investigation of the investigation of Hale.

Three people familiar with the matter were talking about being pressured to turn over to Congress. All three acknowledged that Hale had a right to the material in order "to track what was being discussed in Congress," the FBI summary said.

The next day, a Saturday, Carver called the FBI and said he was considering making the report available to the Senate Whitewater Committee.

When Hale returned the report to the White House, Eggleston's actions marked the third time Hale's various loans, but insisted that the SBA had obtained the documents after being told by his boss, counsel Bernard Nussbaum, to look into the fact that the SBA was about to turn over material on Hale's company to Congress. All three sources spoke on condition of anonymity.

Eggleston's actions mark the third time the White House has obtained confidential information from an ongoing investigation of Whitewater.

Last year, senators broadly sought the documents because he wanted to get documents back to the White House and all copies and notes had been "shredded" the copy.

"Mr. Eggleston also said that he did not want to do anything inappropriate," according to a memo written by a Justice Department lawyer. "He had sought the documents because he wanted to track what was going on between the SBA and the Hill and did not want to be surprised by leaks from the Hill."

According to internal FBI and Justice Department documents reviewed by the AP, the SBA's top attorneys gave the confidential material to the White House on Nov. 16 or 17, 1993 without telling anyone at the law enforcement agencies.

At the time, the FBI and the first Whitewater prosecutor, Justice Department attorney Donald McKay, were looking into Hale's suspicion about being pressured by Clinton.

The SBA compiled a report containing information on Hale's loans for House Small Business Committee Chairman John LaFalce. Eggleston "requested a copy of the full report" that had been "delivered to Mr. LaFalce," states an FBI summary of how the White House obtained and returned the Hale documents.

"This is a classic case of no harm, no foul play," White House spokesman Mark Fabiani said Sunday. "The Department of Justice investigation of the SBA matter was pursued vigorously and successfully and the documents, which had already been turned over to Congress, were returned as soon as the Justice Department objections were made known."

When Eggleston asked for the report, SBA General Counsel John Spatilla contacted Marty Carver on Nov. 18 about giving the report to the Senate. All three sources spoke on condition of anonymity.

"When Eggleston asked for the report, SBA General Counsel John Spatilla contacted Marty Carver, the agency's ethics counsel, "on the propriety of this request and was advised that there was no ethical problem in delivering this report to the White House," the FBI summary said.

According to the FBI summary, when the SBA acted to remove the Justice Department lawyer Allen Carver on Nov. 18 about giving Eggleston the documents, "Mr. Carver requested that SBA lawyer Mark Stephens "retrieve the report given to the White House and all water and notes made from this report."

"Mr. Stephens advised he would do this and would turn the information over to the FBI when he obtained it," the FBI wrote.

Eggleston balked at returning the documents on Nov. 19, telling Stephens that the White House had a right to the material in order "to track what was being discussed in Congress," the FBI summary said.

The officials to be interviewed include Mr. Eggleston, Mr. Kennedy, Mr. Bruce Lindsey and Mr. Nussbaum, the summary adds.

"It's the officials to be interviewed and the material that matters," John Arterbury, deputy chief of the Justice Department's fraud section.

Eggleston returned the report promptly.
SOCCER: A defensive letdown led to both goals.

From page 12

"It would have been nice to have a chance to see what we could do in the next round," Woolridge said.

Team defense was what let the Mustangs down, said Woolridge.

"We gave up some goals that were both pretty much mistakes and that shouldn't have happened," Woolridge said.

I think there were some defensive letdowns, not on individuals, but as a team. All the way through the field I don't think we played hard enough as a team," Woolridge said.

Woolridge said that next season the Mustangs will come out more determined to reach the playoffs.

"We'll come out next year even more hungry — we let some slip away that we shouldn't have so I guess we learned our lesson about that," Woolridge said.

Clay Harty gave the Mustangs the lead at the 14:00 minute mark, after a pass from Seiji Sato hit Harty in the box, and Harty was able to guide the ball by outstretched Broncos' goalie Joe Cannon.

The goal, Harty's 16th of the season, secured his place in the Cal Poly record books, setting the Mustang single-season scoring record at the Division I level.

Sato, who was credited with the assist, was starting in place of midfielder Scott Holmes, who was forced to sit out the final regular season game after he received his fifth yellow card of the year. Under NCAA rules, Holmes had to sit out one game.

In the 25th minute, Santa Clara got on the board with an own-goal off a shot by Santa Clara's Mike Lynch. The shot rebounded off the post and hit off Santa Clara goalie Joe Cannon.

The goal, Marty's 16th of the season, and Harty was able to guide the ball by outstretched Broncos' goalie Joe Cannon.

The goal, Harty's 16th of the season, and Harty was able to guide the ball by outstretched Broncos' goalie Joe Cannon.

In the 65th minute, the Mustangs added a shot at the playoffs. You never know what can happen, but I think they're as good as any team we've faced all year," Murry said.

Selections for the 22-team playoff are today at 3 p.m. The selection show will be broadcast live on Prime Ticket.

SOCCER: A defensive letdown led to both goals.

Santa Clara scored on an own goal and a header that sailed into the net.

Cal Poly Notebook

Cal Poly Places First

By Jeff Reardon

Cal Poly wrestler Tyson Rankin continued his winning ways from last year by capturing first place at the Cal State Fullerton Open.

Competing in the 118-pound bracket, Rankin defeated wrestlers from Bakersfield, Fresno and Fullerton. He won the championship by forfeiting when he broke his opponent's nose.

Other Cal Poly wrestlers who placed were: Michael French, who finished second; Dan Long, who finished third; and Bobby Bollman and Jeremiah Miller, who both finished fourth.

"The men wrestled quite well to start off the season," said Head Coach Lexis Cowell. "It was an early opportunity to catch up on their skills and we got some good results in the process."

Men's Basketball Signs Recruit

Cal Poly announced the signing of top-recruit Mitch Ohnstad from Fairbayl, Minn. Thursday. Ohnstad - a 6-foot-2 inch 180-pound point guard - averaged 27 points, seven assists and three rebounds a game.

Head Coach Jeff Schneider found Ohnstad at a tournament in Huntington Beach where he was impressed by his ability from the start.

Ohnstad was rated as one of the top point guards in the nation by Bluechip Illustrated magazine.

"Our coaching staff feels that Mitch is one of the hardest working players in the country," Schneider said. "He was our top recruit, and anytime you can get your top recruit, you have to be proud."

Ohnstad shot over 40 percent beyond the 3-point arch, according to Schneider.

Ohnstad was also recruited by Saint Mary's, Montana State, Iowa State and North Carolina-Charlotte.

Kansas City Holds Best Record in NFL

By Bob Wilson

SAN DIEGO — The Kansas City Chiefs have the NFL's best record and maybe visions of a Super Bowl, too.

Steve Bono and Marcus Allen scored on short runs as Kansas City beat bitter AFC West rival San Diego 27-7 Sunday to improve to 9-1, the same start the Chiefs had in 1969 en route to winning the Super Bowl.

It was Kansas City's sixth straight win, one short of the club record set in '89. Kansas City was tied for Dallas for the NFL's best record, but the Cowboys lost to San Francisco 38-20.

While the Chiefs are clicking, the defending AFC champions, Chargers (4-6) are crumbling. Winner of leading rusher Natrone Means, out with a strained groin, the Chargers lost for the fifth time in six games. San Diego is tied with Seattle for last place in the AFC West.

Allen scored the clinching touchdown on a 1-yard run with 1:56 left in the third quarter, giving Kansas City a 19-7 lead. Bono's conversion pass to Lake Dawson failed.

Earlier in the drive, Dawson caught what appeared to be a 28-yard touchdown pass from Danise Hughes, but it was called back because of an illegal double.

Orefice Heads to Nationals

Cal Poly announced the sign-up of top-recruit Angela Orefice headed to nationals.

Mitch is one of the hardest workers," said Angela Orefice. "It is significant for Cal Poly that we hosted everybody in the Big West, especially Big West champion UC Irvine." Crawford said. "We also established ourselves as the third best in California, behind Pac-10 powers UCLA and Stanford."

Irvine finished a distant seventh behind Pacific-10 teams UCLA, Washington, Arizona, Stanford and Oregon.

But what was impressive for Head Coach Terry Crawford was her team's performance against the Big West teams.

"It is significant for Cal Poly that we hosted everybody in the Big West, especially Big West champion UC Irvine." Crawford said. "We also established ourselves as the third best in California, behind Pac-10 powers UCLA and Stanford."

Irvine finished a distant seventh behind Pacific-10 teams UCLA, Washington, Arizona, Stanford and Oregon.
UC Davis returnsgesture

UC Davis cannot capitalize on 636 total offensive yards

Cal Poly was up by three points at the end of the first half. After two Davis touchdowns in the third quarter—one off a blocked field goal that was returned for a 60-yard touchdown—Davis pulled ahead by 27-19 and held off the Mustangs after a valiant fourth-quarter comeback attempt.

The 8-17 Cal Poly volleyball team slipped to 9-18 Saturday night against UC Berkeley (12-14) in Mott Gym. The Pacific-10 Bears held the upper hand in the first game, winning 8-15. Berkeley presented the Mustangs with a nice bag of tricks and was able to hit and block well against the Mustangs.

Cal Poly was able to make adjustments for the second game and claimed a 10-4 lead before the Bears got going and pulled ahead 11-13. A kill by junior outside hitter Heather Lee stopped the Bear drive and got the Mustangs the side out they needed. Cal Poly scored one point on its possession and got the ball back again at 12-13. Freshman outside hitter Melissa Pierre scored a service ace to tie the game at 13-13, and Cal Poly climbed back on top to win, 15-10.

Head Coach Craig Cummings said the high point of the match was "staying tough and finishing the second game."
