Cal Poly trails national average in number of women on the faculty

By Donna Hoekes
Daily Staff Writer

Cal Poly employs fewer female faculty members than any other campus in the CSU system, according to a National Education Association study.

On a national average, 30 percent of college level teachers are women. At Cal Poly, the figure is about half the average at 16 percent—and some Poly professors have claimed they have been discriminated against because they are women.

Cal Poly’s problems with alleged gender discrimination began in 1981, when Adelaide Harwom-Elliot won a gender discrimination suit against Cal Poly.

And complaints by Laura Freberg, psychology professor, and Alexis Olds, an assistant professor in the speech communications department, were both filed in June with the Department of Fair Employment and Housing (DFEH). Both women accused the College of Liberal Arts of gender discrimination.

According to California Faculty Association spokesman Gary Epstein, a member of the CFA’s grievance committee for 15 years, most of the committee’s grievances from Cal Poly come from the College of Liberal Arts.

Freberg’s complaint goes to a peer review committee today for recommendation to Baker.

Raymond Zeuschner, chair of the speech communications department, denied Olds’ claim that there is gender discrimination within his department.

“I can’t recall a time when race, sex, marital status or age has ever entered into our discussion,” he said. “Safeguards are built into the system so bias doesn’t become a factor in decisions.”

Of the three women and seven men in the speech department, only one woman and five men have full professorships.

Zeuschner noted that expectations for promotion and tenure have increased recently.

“They aren’t what they were 20 or even 10 years ago,” he said. But Olds said she met the promotion and tenure expectations.

“I won’t be driven out. I was born and raised here; I’ve taught here and in England, gone to school all over the country—this is my home,” said Alexis Olds.

Speech communication professor

Olds, who has been teaching at Cal Poly for six years, noted that initially her evaluations were good.

But in a routine fourth year review—which although her department voted 4-1 to retain her—she was terminated, Olds said.

Zeuschner told her that “she didn’t fit,” according to Olds.

CFA peer review committee members heard her case—and she was then reinstated by Baker.

But according to Olds, tensions within the department were so high, she took a year off to teach at a university in Michigan. She said when she returned to her duties at Cal Poly in the summer of 1994, she received outstanding evaluations from her students.

College of Liberal Arts intern dean Harry Sharp said he had not been notified about Olds’ actions with DFEH beyond knowledge of any gender bias.

Despite problems with her department, Olds said she wants to stay at Cal Poly.

“I won’t be driven out,” she said. “I was born and raised here; I’ve taught here and in England gone to school all over the country—this is my home.”

Committee addresses concerns about fee increases in Poly Plan

By Rebecca Streich
Daily Staff Writer

Many questions remain about the Cal Poly Plan—but the university is trying to find answers.

On Thursday, the plan’s steering committee reviewed a page titled, “Cal Poly Plan—Emerging Principles.” The page outlines the plan, set to be submitted to California State University (CSU) Chancellor Barry Mazitz Dec. 15.

The page attempted to answer some lingering questions such as how much the Cal Poly Plan fee increase will be and what the funds will be spent on.

The outline proposes a $150 to $500 fee increase—which would be in addition to a 10 percent fee hike proposed by the CSU to balance the state budget.

To help offset the possible system wide fee increase, Cal Poly will charge 10 percent less than whatever final amount is established, said Budget Director Rick Ramirez.

To assist students in footing the bill, the plan’s outline proposes a third of the fee increase will be directed toward financial aid, Ramirez said.

The fee could be imposed all at once, or be phased in over three to five years.

With any fee increase, students need to see their money at work, said Tony Torres, ASI board chair.

“I would argue for the higher end of the increase,” Torres said.

Students have been paying higher fees for years, he said, without seeing any benefits.

“Let’s change that quickly,” Torres said.

If fees increase slightly, Poly will not be expected to make as many changes than if there were a substantial increase, said English professor John Humprey.

But students may not see immediate results.

It could take a year to hire faculty to teach additional courses, as proposed in the plan’s outline, said Harvey Greenwald, Academic Senate chair and math professor.

The fee increase should occur gradually, he said, so that some of the money from the first phase of the increase could be put aside for hiring more faculty.

“Because of the way the hiring process works,” Greenwald said, it takes almost a year to attract an acceptable applicant pool in accordance with the university’s affirmative action standards.

“It would take 22 new faculty members to increase student’s course load by 1 1/2,” said Linda Dalton, interim associate vice president for academic resources.

Increasing access to classes, she said, decreases the time it takes students to get their degree by 7 percent.

There are some unanswered questions, said Interim Vice President Paul Zingans, and nothing is written in stone at this time.

Survey data, not yet released, will prioritize how initial investments are made, Dalton said.

In other business, the plan’s steering committee formed a group responsible for creating a five to 10 minute video about the plan to be circulated during winter quarter at students’ club meetings.
**Electric substation will cut costs**

By Paul Queary

The construction of the new substation is essential to other campus improvements, he said, such as the Utilidor project.

"We want to make sure there is no lack of communication between the projects," he said.

Along with the new substation, Cal Poly plans to implement several energy conservation measures.

"I'll take at least a hand-truck to file," Burr said.

"I think it would be difficult to find a place in America that hadn't had quite a bit of exposure to the case," Mullins said. Defense attorneys plan to present a new substation in Oklahoma City would be

State Department spokesman, reporters "it could be an initialing at a ceremony Monday. "Clearly, we are approaching the end," Nicholas Burns, the State Department spokesman, said. Cautiously, he told reporters "it could be an initialing ceremony or it could be a press conference that marks the end of these peace talks without an agreement."

If there is an accord, President Clinton is pledged to contribute some 20,000 U.S. troops to help enforce it. The House voted Friday to deny the administration the funds for deployment. House Speaker Newt Gingrich said Sunday "the President has done almost nothing to explain to the American people why his Bosnia policy makes sense."

The agreement would set up two ethnic republics in the former Yugoslav republic, one controlled jointly by Muslims and Croats, the other by Serbs. The central government would be in charge of foreign affairs and little else. There would be a collective presidency and the United States would help arm and train the Bosnian army, U.S. officials told The Associated Press. A draft agreement provides also for a separation of rival armies with a demilitarized zone four kilometers wide and for the Bosnian Serbs to retain control of Srebrenica and Zepa, Muslim enclaves they overrun even though the United Nations had designated the zones to be safe havens.

Last week, the U.N. war crimes tribunal indicted Radovan Karadzic and Ratko Mladic, the Bosnian Serbs' political and military leaders, as being in control of killing squads that murdered thousands of Muslim civilians in Srebrenica after it fell in July. Chief prosecutor Richard Goldstone urged the settlement parties to turn them in for trial along with some 50 other war crimes suspects. Burns has said the United States was insisting on cooperation with the tribunal, but he has declined to say how specific the provision in the accord may be. The Muslims would retain Gorazde, another enclave that was on the verge of a Serb takeover before NATO air strikes prompted a cease-fire Oct. 5. The officials told The Associated Press on condition of anonymity.

The draft also provides for the creation of a 5,000-man Bosnian police force to help enforce the accord. Burns said the accords would help arm and train the Bosnian army, U.S. officials told The Associated Press. An agreement would help establish a collective presidency and the United States would help arm and train the Bosnian army, U.S. officials told The Associated Press. A draft agreement provides also for the separation of rival armies with a demilitarized zone four kilometers wide and for the creation of a 5,000-man Bosnian police force to help enforce the accord. It was not clear how many American military forces would be involved in a central government.

Balkan sources said, meanwhile, the Croats had yielded to Bosnian Serbs control of a chokepoint along the land link between Serbs' holdings in eastern and western Bosnia. The Serbs, meanwhile, were said to have agreed to a constitutional provision banning secession from the future Bosnian state. Explaining the imposition of a deadline, Burns said, "We just feel that after 19 days the parties have had a lot of time to debate these issues."

WE ARE LIFE LONG LEARNER! COMMITTED TO HONORING AND PRACTICING THE TRADITIONS OF OUR PEOPLE.
KI NO YI (UNTIL WE MEET AGAIN)
Although I haven't conducted any scientific surveys, I'm guessing that fees hikes are not a popular idea among Cal Poly students, especially for struggling students who are drowning in debt, working two jobs and juggling work and school. To those with two jobs to make ends meet, it seems reckless and plainly irresponsible to propose a plan that would tax and threaten the very existence of those it's supposed to help the students.

If we do not stand up and denounce the Poly Plan, we say that the plan is acceptable. By standing on the sidelines like stumped perpetrators stuck with a bad case of bystander effect, we're contributing to our own death. That is, we're perpetuating the idea that students are willing to pay higher fees to "strengthen institutional quality, enhance funding and expand access." (Please note that this means fees will be hiked, teaching quality will deteriorate and we'll be stumbling over one another more often on Via Carta.)

Why not install a giant jacuzzi in the middle of the U.U. allowing students to cavort with attractive members of the opposite sex between classes. We could go skinny dipping during "activity" hour and engage in gratuitous sex during finals week.

I have never seen any picket-signing student protest marches through the U.U. demanding more techno-wiz-bang computer crap for the library, or more fitness machines for the Rec Center or more of those protest signs, "support our students - the students.

As we know these events are past. Yet we have to say, "Never again the burning," for we know it could easily start again. I say that we should follow a religion that encourages the legacy of blood. We pagan don't burn your churches; don't burn us.

Federal agencies to reopen soon?

By Dave Sidkinner

WASHINGTON — With the government on the verge of a second week of partial shutdown, the Clinton administration and congressional Republicans moved closer to settling their budget standoff Sunday and reopening federal agencies.

After a day of offers and counteroffers, Majority Leader Bob Dole, R-Kan., told reporters he and Speaker Newt Gingrich, R-Ga., had reached a very close offer. He held up a thumb and forefinger about an inch apart but declined to describe a done deal.

"We're very hopeful," he said on the Senate floor.

White House Chief of Staff Leon Panetta was traveling to the Capitol for an evening meeting with lawmakers from both parties over an emergency spending measure that would reopen the government for several weeks while the White House and Congress negotiated over how to balance the budget.

"We need to find a way and reach out to one another," Dole said as the Senate opened its first Sunday session in five years and only the 16th since the founding of the republic.

Meanwhile, Clinton signed two appropriations bills, one funded the other White House, Treasury Department and Post Office. About 143,000 employees of those agencies, including the Internal Revenue Service and Customs Service, will be able to return to work Sunday even if no deal is sealed on the short-term measure.

As new for the temporary spending bill, GOP leaders have demanded that Clinton commit in advance to eliminate annual bills for the fiscal year that starts Oct. 1. Clinton has said he will do so but has not sent to Clinton.

House Speaker Newt Gingrich, R-Ga., in the meantime, suggested if the impasse isn't resolved soon, Republicans may be able to deal with congressional Democrats directly and bypass the White House. Forty-eight House Democrats last week supported a temporary spending bill adopted by Congress but not yet sent to Clinton.

"The fact is the leadership of both parties is losing control of their party," Gingrich said on ABC's "This Week With David Brinkley." "I think we could easily, in another day or two, potentially have the votes to override the president's veto."

The negotiations between Panetta and lawmakers, in Dole's office, occurred amid increasing signs of restlessness among federal employees and the public. Forty percent of the federal work force — nearly 600,000 employees — have been furloughed since Nov. 13.

National parks, including the Grand Canyon, have already turned away tourists, the Centers for Disease Control in Atlanta has tracked flu cases and National museums have locked their doors.

Panetta said Monday that 1,000 hotels, restaurants and other tourism-related businesses in Washington would be in receivership in Sunday editions of The Washington Post appealing to area residents to turn their headslight on during the day as a protest of the shutdown.

Protesters from the National Treasury Employees Union, chanting "Hey, hey, ho, ho. This furlough has got to go," swarmed around Gingrich's car in an alley as he left the taping of the ABC talk show.

However, 20 Republican governors, meeting in Nashua, N.H., urged Dole and Gingrich to stand firm and hold out for a balanced budget over decades. Utah Gov. Mike Leavitt said Congress was "the verge of literally making history and we're not going to let it happen."

Republican politicians might test Republican unity on any compromise. Dole's GOP rival, Texas Sen. Phil Gramm, said changing to new economic assumptions was a "code word for more money" and vowed to oppose any change. So did Sen. Robert Smith, R-N.H., a Gramm ally.

The gulf between Congress and the White House over larger budget issues remains wide. Seven of the 13 appropriations bills for the fiscal year that began Oct. 1 remain to be signed. One on Clinton's desk, funding the Defense Department, is expected to be vetoed.

3-D technology to hit personal computers

By Constandina Ortiz

LAS VEGAS — PC users, hang on to your eyeballs.

The wild three-dimensional entertainment is driving the hottest topics at Comdex, the computer industry's biggest U.S. trade show playing 3-D games at the Las Vegas Convention Center.

"This is really the frontier — the way we use computers, the way we think about them," said Todd Redder, vice president of marketing for Diamond Multimedia Systems Inc., of San Jose, which showcased its recently released Edgel 3-D line of multimedia accelerators.

Comdex attendees certainly got a fast-paced glimpse as well as gamers with pentaports were happily glued to personal computers playing 3-D games at a slew of exhibit booths.

"What you're seeing is better than what you see on most game systems," said Todd Redder, marketing director for Mutlicom America, a Phoenix company that makes game cards for personal computers. "It's a lot of fun," he said after trying out an auto racing game at the Creative Labs Inc. booth.

Comdex Labs, based in Milpitas, unveiled its new 3-D Blaster accelerator while Brooktree Corp. of San Diego and writi MediaStream's new R1 MediaStream 3-D chipset. It can work either alone or with 2-car., $179 glasses by StereoGraphics Inc. of San Rafael, Calif., that add a stereoscopic effect, much like a Viewmaster.

Meanwhile, other chip and multimedia companies — including Number Nine Virtual Technology Corp., 3DV Interactive, Inc., and 3IE Inc. — are expected to have new products on the market early next year.

"Granted, 3-D doesn't have its big impact until next year. But it starts on the down path in which the PC becomes a really powerful game machine and keeps on taking on the video game industry and Sega have had," said Tim Bajarin, senior analyst for Creative Strategies Research International in San Jose.

The boards — ranging from $250 to nearly $500 — are coming bundled with software by such video-game companies as Denark, Archim and Electronic Arts. Sega of America is producing games to go with Nvidia Corp.'s multimedia chip used in Diamond's boards.

But games are just the first step. 3-D will also enliven a wide range of consumer multimedia programs, giving useful all-new means of glancing in home-repair software or a virtual "walk" through a foreign city on a travel CD-ROM.

"There's a wide range of applications out there," said Craig Rappaport, StereoGraphics' product marketing manager. "People now think they'll have any use for 3-D beyond games, but that will change, he predicted.

"When you bring a product down... in price, people who might have considered it map-peater for their market jump out of the woodwork," he said.
SOCCER: UCLA went on the offensive attack during the first half

The Mustangs entered the game with an all-out attack that attempted to put pressure on the offensive juggernaut of the Bruins, who have scored 61 goals this season.

But it was UCLA that went on the offensive attack and managed to overpower the Mustangs. Cal Poly's defense was ready for the challenge, despite a barrage of UCLA shots.

Goalkeeper Connell came up big for the Mustangs, fighting off 13 shots and gathering four saves in the first half alone.

The Cal Poly defense avoided disaster early when midway through the first half the Bruins had a flurry of chances during a three-minute stretch that netted no goals.

In the 35th minute, Connell came up big again with a spectacular save off a header by Bruins midfielder Justin Selander. Cal Poly was given a few offensive chances, but wasn't able to convert on any of them.

The Mustangs were lucky to escape the first half with a scoreless tie because UCLA controlled the ball much of the half.

"We were lucky it was (scoreless) at halftime," Gartner said. "The way soccer is, it could easily have been 1-0 or 2-0."

Cal Poly substitute Justin Pearce broke the tie early in the second half with a goal at the 48-minute mark.

Pearce described his first goal of the season, which gave the Mustangs an early lead to the delight of the Cal Poly faithful who traveled to the game.

"The defender got a few steps behind the ball, I cut it, and put my butt in the way of the defender's progress," Pearce said. "Then it was one-on-one with the goalie and I went for post. If I hesitated any longer (the goalie) would have blocked it."

For a while the goal was one of the biggest goals of Pearce's life, but that rapidly changed when UCLA tied the score and took the lead.

"For about 20 minutes it was the biggest goal of my life — it means nothing now," Pearce said.

Cal Poly wasn't intimidated by UCLA in the early going.

"Nobody went out there scored," he said. "UCLA puts their left shoe on their left foot, and their right shoe on their right foot just like us.

The Bruins continued to battle back — and in the 54th minute UCLA forward Ante Razov broke across the middle and fed the ball to Selander on the left side of the field. Selander scored his first goal of the season, under an outstretched Connell. This goal tied the score at 1-1.

At the 85-minute mark, UCLA pulled ahead when forward Tom Poltl fed a centering pass to Razov, who found the back of Cal Poly's net.

The Bruins controlled the second half, like they did the first, with 18 shots.

Connell recorded six saves for the Mustangs and said the game was one of his better ones.

"I happened to have a really good game for me, but that doesn't mean anything without a win," Connell said. "UCLA played great up front and had great depth on the bench — hats off to them for that."

On both UCLA goals, Connell felt he had a shot at stopping them.

"Both goals slipped through my hands," he said. "A couple more inches and we're back 1-1."

Cal Poly was without defender Jonathan Bedrosian, who was forced to sit out one game after receiving his fifth yellow card of the season against Santa Clara.

The Mustangs were also without midfielder Scott Holmes, who was sitting out his second straight game, after he also received his fifth yellow card and a red card against University of California, Irvine.

Soji Sato played in place of Holmes and Wade Stark filled the gap left by Bedrosian.

Gartner was pleased with the play of both players in the game, but said he missed the strength of Bedrosian and Holmes.

The Mustangs will only lose one starter next season, defender Jeremy Oetman. Connell thinks the future will be a great opportunity for the Mustangs.

"We're a really tight group, and we're going to carry that into the next two years," Connell said.

Gartner said if Cal Poly plays UCLA next season, there could be a different result.

"We intend to be back and maybe have them on our field," Gartner said. "Then it will be a different story."
LARSON: Ben adjusted quickly to new style

From page 8

only situation which recruited Larson and offered a scholarship. Larson was overlooked mostly because of his size.

Yet Head Coach Jeff Schneider couldn’t be happier with who he picked up.

"I think Ben is an excellent point guard," Schneider said.

"Somebody everyone is going to wish they had a Ben Larson on their team."

A long way from his hometown of Elkhart, Ind., where basketball pumps through everybody’s veins, Larson is still adjusting to the Cal Poly.envi-

From page 8

ment and a whole new style of basketball.

The foot-pared, full-court, three-point-shooting style employed by Schneider is a 180-

degree turnaround for Larson, who played a slower, half-court game during high school.

"I got a little winded out there," Larson said after playing 37 minutes Saturday night. "But it takes a little while to get into game shape."

Schneider wasn’t too worried about Larson’s stamina for the up-tempo style of game, he said, as he plans on adjusting prac-

tice and practice times during tournaments to keep everybody fresh.

Larson appeared to be adjust-

ing just fine, with 22 points, 10 assists and six steals for the night.

"He seemed like he was really confident and really in control," said Bace Express’ Correll Cal-

ferata, who could not contain Larson for most of the night. "He has a lot of heart."

Cal Poly is a bit of a culture shock for Larson, who is used to playing in front of packed stadiums.

Larson’s description of his high school basketball years was reminiscent of the movie "Hoosiers," in which everybody in town showed up for the big game, including the town drunk.

Larson set a school record for his high school in Elkhart with 103 steals in one season, and led his team to the Indiana State Final Four.

His hometown high school in Elkhart with 103 steals in one season, and led his team to the Indiana State Final Four.

Larson’s home court in high school host almost 8,000 screaming fans who live and die for basket-

ball. Mott Gym holds about 3,000 fans who just enjoy the game.

But wait a minute. Do these numbers reflect the team’s future performance against Division-I teams?

Correll California, a member of the Bace Express team, said Cal Poly was the best Division-I team they have played.

Not that one-state-tall.

Sure, Cal Poly might be the best they’ve played if their schedule consisted of the three new Division-I franchises.

Note: Bace Express hot to future Big West opponent University of Nevada, Reno. Reno for only 12 points. Cal Poly won by 41.

With Schneider’s new up-

tempo style, Cal Poly appeared quickly and at times reduced its pace.

"It’s up-tempo, but then sometimes it goes in a spurt system," Correll said.

**Cal Poly shows off new style enroute to 134-93 victory**

By Franco Castaldini

The first three minutes of the exhibition game depicting the new Cal Poly men's basketball team defined the new Cal Poly.

Colin Bryant lined up behind the 3-point arch — swish.

Shanta Cotright weaved through the defense for the backet — and one.

Ben Larson anticipated the pass for the steal and found Cotright for the easy jumper.

Is this the same Cal Poly team?

Larson raved back down court and forced another turnover. This time he found David Sternlight open under the basket. In the act of shooting, Sternlight drew the foul — count 'em.

Then Damien Levesque cashed in with a spin move for the easy lay-up.

Cal Poly jumped out to a 14-point lead en route to a 134-93 victory over Race Express Saturday night. The Mustangs scored 22 points late in the game against Race Express Saturday night.
