Baker defends pipeline agreement

By Steve Indes
Sidle Inset

Cal Poly President Warren Baker, in a lecture Tuesday, defended the compromise struck with the Department of Water Resources (DWR) over the water pipeline scheduled to cut through Blanee Canyon.

Baker said there is no more who the monitor will be yet. It may be a graduate student under the supervision of biological sciences chair V.L. Hendoll, or even a neutral third party.

In an agreement reached last week, the DWR will not remove roughly one-third of the 21 trees originally tagged for destruction.

Despite declaring victory, Baker admitted that the best solution was not yet in sight, because Cal Poly could not pool enough resources at the time. Baker's plan was originally drafted two years ago.

"Hindsight is good in this case," Baker said. "This all came about when funding for universities was going down, and we didn't have the foresight to achieve the goals established in the pipeline project." Daily photo by Joe Johnston

Battle rages for access to local beach

By Randy Holcomb
Sidle Inset

A battle is brewing between CalTrans and the Sierra Club over a proposed realignment of state Highway 1 near San Simeon.

According to CalTrans, the realignment is necessary for safety reasons. In its report to the California Coastal Commission, CalTrans cited the need to straighten out curves present in the proposed realignment area to reduce accidents.

But Sierra Club chief of environmental management for CalTrans District 5, said the realignment would also help ensure adequate buffer zones between the rapidly increasing elephant seal population and the highway.

The dispute concerns a 4.77-acre stretch of coastline south of Piedras Blancas Point which would be returned to the control of the Hearst Corporation.

In return, Hearst would provide two new turnouts totaling 7.64 acres.

Although Hearst already owns the underlying land, CalTrans controls it via an easement contained in a 1989 agreement.

The easement gives the state authority over the land for such purposes as maintenance and law enforcement.

However, the Sierra Club sees the situation as a giveaway of a state beach to Hearst. The Sierra Club claims that the area in question is part of Arroyo Grande State Beach.

However, Hearst Castle supervising ranger Bill Miller said there is an area called Arroyo Lagoon, but it is not a state beach.

Director of Sierra Coastal Project Mark Massara said his organization is concerned that the realignment will allow Hearst to cut off public access to a popular windsurfing and diving location.

He said Hearst is planning to build a golf course on the land.

In order to block the transfer, the Sierra Club has begun circulating a petition. Massara

Clubbings prompts FBI investigation; Mexico indignant

By Jeff Wilson

LOS ANGELES (AP) - The FBI opened a civil rights investigation Tuesday into the videotaped clubbing of two illegal immigrants, and the Mexican government condemned the beating as a "flagrant violation" of the rights of its citizens.

Sheriff's deputies clubbed the immigrants Monday after chasing a battered pickup crammed with people suspected of sneaking across the border. TV news helicopters captured the beating on video in broad daylight.

During the chase, the pickup reached speeds of 100 mph, its shabby camper top disintegrating in the wind to reveal the people crammed inside. It finally stopped on the side of the freeway and the passengers in the trunk badgered their way out.

One deputy, holding his baton two-handed like a baseball bat, videotaped clubbing the driver on the back and shoulders with a baton, even as the driver fell, face down, on the ground.

When a woman got out of the cab, the same deputy beat her in the back with the baton, then grabbed her by the hair and pulled her to the ground. At least one other deputy struck her with his baton.

Neither person, both Mexicans, appeared to resist or attempt to get away.

Truck driver Andrian Flores Martinez, 26, of Mexico, was treated at Riverside General Hospital for bruises and a possible broken elbow, authorities said.

The woman, identified as 33-year-old Leticia Gonzalez, was bruised on her face and arms and released Tuesday to the custody of her lawyer, David Ross.

Police, who initially said the truck carried 21 people, said Thursday that 17, besides the two good faith," Baker said.

The total cost of the coastal branch of the state water pipeline is estimated at about $500 million, according to Pillbury. The cost of rerouting the pipeline around the oak grove, by the DWR's estimates, would have been between $45 million.

Baker and Pillbury both stressed the importance of local media relations in helping to achieve the goals established in the negotiations with the DWR.

MUSTANG DAILY

2 WEDNESDAY, APRIL 3, 1996

TOP OF THE

AGENDA

April 3

37 days left in spring quarter
TODAY'S WEATHER: mostly sunny
TOMORROW'S WEATHER: sunny, light winds
Today's high/low: 76/40, Tomorrow's high/low: 70/40.

April 5 is the deadline to sign up at the cashier's office for the spring quarter Writing Proficiency Examination (WPEX) which meets the Graduation Writing Requirement (GWR). The exam will be April 13 at 9 a.m. and the fee is $20. For more information, call 756-2667.

Today

The most accurate film about the most debated topic, the life of Jesus, is playing in Chumash Auditorium at 7:30 p.m. Admission is free.

Upcoming

A mandatory Open House club meeting is April 4 at 11 a.m. in building 3, room 213.

Fernando Zapada, senior associate, Patent and Associates, is speaking April 4 at 11 a.m. in Science North, room 202. For more information, call 756-2840.

The Physics Colloquium is having a discussion titled, "The Kinematics of Galaxy Halos Using the Keck 10-meter Telescope" April 4 at 11:10 a.m. in building 52, room E-45.

Dr. Ian Blech will present "Stresses in the Thin Films - A Brief Review" in Fisher Science, room 286 from 11 a.m. to 12 p.m. April 4.

The College of Business Council is presenting the spring club luau on April 10 from 10 a.m. to 1 p.m. in the College of Business breezeway. For more information, call Ryan Aze at 541-6077.

PIPELINE: Route crosses riparian habitats, creeks

By Ceci Barish

LITTLE ROCK, Ark. — A small-time banker at the center of the Whitewater case testified Tuesday that he secretly loaned $300,000 in the mid-1980s to then-Gov. Bill Clinton and his Whittier partner James McDougal.

It was the first time it has been alleged publicly and under oath that the president benefited from the illegal Whitewater-related transaction. The exact amount Clinton is alleged to have received was not immediately clear from the testimony, but the witness, David Hale, said that he had agreed at one point during his discussions with Clinton to lend him $150,000.

Hale did not say what the money was for.

Asked about the possibility of criminal charges against the president in light of Hale’s allegations, W. Hickman Ewing, the associate White House counsel, said: “I’m not going to say. We’re still evaluating the overall investigation. ... We’re not making a comment on who knew what when.”

Hale said that he, Clinton and McDougal agreed at a meeting in early 1986 that Hale’s lending company would make a $150,000 loan on property to a woman, Mrs. McDougal’s, Susan, but that the money would be transferred to the president.

Hale testified that Clinton said, “My name can’t show up on this.” And McDougal responded, “I’ve already taken care of that.”

Hale said he was paid by the McDougals after the meeting and told him to “load the boy up” — or make it payable to Mrs. McDougal’s marketing business. The witness said that he made the loan and that the money ultimately went to James McDougal and Clinton, whom Hale said are not clear how the money was split.

Hale had testified previously outside court that he made the $300,000 loan to Mrs. McDougal after Clinton pressured him. However, Hale did not immediately testify Tuesday about any such pressure, and the president has maintained that the money was his personal loan.

“After Hale testified, we’re not making a comment on what Hale said,” said a Clinton administration official. “We’re still evaluating the overall investigation. ... We’re not making a comment on who knew what when.”

Hale testified earlier that the money was for the “frugal president” to use as “a bunch of bull.”

Hale is the government’s star witness in the fraud trial of the McDougals and Gov. Jim Guy Tucker. The three were charged by the Whitewater prosecutor with obtaining $3 million in federally backed loans under false pretenses. The $3 million includes the $300,000 loan to Mrs. McDougal.

Bobby McDaniel, Mrs. McDougal’s lawyer, said: “What you heard from David Hale today is a different story than what he’s said before. It’s a fabrication, period, that this money was to go to Bill Clinton. Bill Clinton is the president, period.”

According to Hale, Clinton offered at the 1986 meeting to put up as collateral some land in Marion County, where Whitewater was — Clinton did not mention Whitewater — but McDougal said that would not be necessary.

The meeting took place at night at McDougal’s temporary office at Castle Grande, an Arkansas development. Hale said he and Clinton arranged at the books at McDougal’s Madison Guaranty Co., and Loan, and McDougal didn’t like to be around when the auditors were afoot.

Hale was sentenced last week to more than two years in prison for defrauding the Small Business Administration, which was financing his lending company with matching funds.

Hale had testified earlier that McDougal and Tucker feared jail while they plotted to blow up the $3 million in loans with Hale. Hale said the possibility of prison came up while the men discussed the need to repay the ill-gotten funds.

“It was very important,” Hale recalled. “If we didn’t pay it, you would have regulators coming in and examiners coming in, and we would all go to jail.”

Whether the loans were repaid — some of them weren’t — is not an issue at the trial.

Tuesday was Hale’s first full day on the stand.

The government alleges Tuck­er and McDougal arranged an $250,000 loan that would in­fuse Hale’s Capital Management Services Inc. with $500,000 in federal capital. Hale purportedly used the money to obtain a 3-for-1 match in SBA funds that he dis­tributed contrary to SBA policy.

Hale’s early testimony centered on his alleged meetings with Clinton centered on his alleged meetings with Clinton about how loans would be made, includ­ing a $145,000 loan to Larry Tucker that for land at the Campbelle Island resort in Canada.

While loan papers indicate Kiska borrowed the money to run his real estate company, prosecutors say the money went instead to McDougal to buy land on the island, where Kiska said he and D. Roosevelt had a retreat.

SBA policies prohibited Hale from lending money to someone for buyout property.

Banker says he loaned Clinton and McDougal $300 thousand
We and they

by Dawn Pillsbury

Always we vs. they.

Saturday at 10 p.m. at the Tulare Renaissance Festival, a falconer and his two golden eagles beat up a dummy gas­ goer. They used a chain, and he had to be hospitalized.

Everyone of us, and our_upd Supervisor, will be charged with the fault assumed they were. Last year, two gas members pulled guns at another_ event, and two more were round­ by 50 Cal McCoy guild members with drawn swords and convinced to give up their arms.

This runs deeper than a conflict between a few people. People always circle the wagons and define themselves by group membership. Idahmahs instead of Missourians. Romans instead of Germans. Even though no one else can tell the difference, it’s a matter of life and death to them.

Randy Davis, English major

LETTERS

Questions about the pipeline

Editor,

Cal Poly’s attempt to win a victory from the fabric of the agreement with DWR is too little, too late. To claim a victorious “compromise” when state the agreement with DWR is too little, two years too late. To claim a victorious “compromise” when state water has dictated the plan, the route, the method, the order against DWR when it was perfectly clear that Cal Poly” (Telegram-Tribune editorial March 23).

Maybe if we all just belonged to our groups for the fun of it and didn’t consider how people will al­ ways have their different tribes. No social planning agency or playground supervisor will change that. (By the way, the guy was released from the hospital the next morning with nothing more serious than some bad bruises). Dawn Pillsbury is the Daily Opinion Editor.

Mustang Daily

Of dream catchers and crosses

by Erica Jimerson

Last quarter your column asked what Native Americans thought about dream catcher earnings. Well, I can’t speak for all Indians, but I asked some fellow students and here is our response.

Dream catchers are originally Sioux, as far as I know. They are used on babies’ crib/badabooks, to keep them occu­ pated, and to assure only good dreams reach the infant. Adults use them for sleeping purposes and keep bad spirits and dreams away. In some form, they are also religious symbols, “medicine” if you will. A Lakota man told me this during a presentation. Given, dream catchers are highly valued and prized by the recipient.

If I see a person sporting a cross on a necklace, I can at least assume this person is a Christian. If I see a woman wearing dream catcher earrings, do I assume this person is a Lakota?

In essence, wearing dream catchers is sort of like wearing a cross. If I see a person sporting a cross on a necklace or a chain, usually I can discern their religion, or at least assume that this person is a Christian. Crosses are religious articles, used in many different Christian sects.

Who reads the Daily?

Editor,

In the March 5 edition of the Mustang Daily, Jennifer Cornelius laments the lack of “positive feedback” from readers of the Mustang Daily and asks, “Does anyone read the articles?”

Ms. Cornelius might find it encouraging to know that numerous people in need of information for papers and projects, and here is our response.

Who uses the “old rag?” Since January, over two dozen researchers have used the Mustang Daily in the University Archives. These include students researching Senior Projects, speeches and English papers, campus administrators working on facilities planning; student organization planning events and research projects. Dawn Pillsbury, City Editor

Keeping Cal Poly's Promise...

The Cal Poly Plan

Background:
In order to maintain its quality programs, Cal Poly must respond to serious external pressures facing all of public higher education: pressures to enroll more students, operate under tighter budgets, and answer demands for greater accountability. These challenges are especially threatening to a polytechnic university with many high-cost programs. Cal Poly has to change, or it will slowly and predictably lose its ability to provide a superior education.

What have we done?
A Cal Poly Plan Steering Committee was developed with three members from each constituency on campus (students, faculty, staff and administration), and one member from the Labor Council.

The Committee was charged with the development of a proposal which would address:

- Renewal/enhancement of educational quality,
- Increased student learning and timely progress to degree completion,
- Improvement in institutional productivity, and
- Development of accountability and assessment measures and procedures.

How did we find out what was important?
During Fall Quarter, survey information was gathered from students, parents, honored alumni, former ASI Presidents, Advisory Board Members, faculty and staff. The surveys provided a picture of what people feel to be special about Cal Poly and what we could do to make the University even better. Some common themes in the student survey responses: class availability, especially in major courses, was a top concern, followed by teaching effectiveness, career planning services, library access and academic advising.

How can I find out more?
Copies of the Steering Committee's initial report are available in the library, the Academic Affairs and Academic Senate Offices, the Associated Students Executive Office in the University Union 217A, and can be accessed through the Cal Poly World Wide Web Home Page. (Student members of the Steering Committee: Cristin Brady, ASI President; Tony Torres, Chair, ASI Board; Mike Rocca, ASI Board.)

What happens next?
The final proposal will be submitted to the California State University Chancellor's Office.
The entire campus is welcome to comment on the proposed Plan by participating in campus forums, or sending comments to the Committee via the Academic Affairs Office or through e-mail at polyplan@calpoly.or.

What about a fee increase?
An increase in student fees is proposed to supplement other sources of revenue. The new fees will be invested to benefit student education directly and visibly.

Proposed investments include:

Starting next year:
- Technology and equipment.
- Instructional programs, especially to support student progress through class access, advising and curriculum revision.
- Financial Aid beginning year one and expanding in two and three, assuming supplementary University fund raising to help meet need.

Starting in Year Two:
- Career Services, and
- Faculty positions for educational quality, student progress toward degree completion, teaching and learning productivity, and implementation of curricular revisions (approx. 30 new faculty, with 15-20 to be hired for 1997-98).

How will the money be allocated?
Proposals by individuals and campus units to make improvements in the investment areas will be reviewed by the deans, vice presidents and Steering Committee. The Committee will then monitor funded activities to ensure they accomplish their goals.

Frequently Asked Questions

Q: Why should students support the Cal Poly Plan?
A: First, students will be able to graduate faster, saving money in the long run. All students will see the quality of their education enhanced. And by protecting Cal Poly's reputation, diplomas will retain their value for all graduates.

Q: Are student fees the only source of income that will be used for improvements?
A: State tax money will be redirected toward Cal Poly Plan priorities, and private donations will be used to support programs as well as financial aid.

Q: Will Cal Poly Plan money go to the Performing Arts Center or new athletic facilities?
A: No. Investments must relate directly to students' educations.

Q: Are computer modem charges part of the Cal Poly Plan?
A: No. Modern charges will be paid only by students who want increased access to the University's computer network. Cal Poly will continue to offer a free modem pool, and students can access the network from computer lab terminals at no cost.

Q: Is the administration going to buy a new campus mainframe computer with student fees?
A: No. The University is addressing this issue through a completely separate process, and no Cal Poly Plan fee revenues will be expended for this purpose.

Q: I heard the administration wants to make changes in student advising?
A: Surveys showed that students want improved advising to help them better meet their academic goals, so the Committee hopes that the campus community will make proposals in this area.

Q: Will deans determine how the money is spent?
A: Deans and vice presidents administer campus units; they will be involved in decisions. But the Steering Committee will review all requests, listen to what deans and others have to say, and then provide advice to President Baker.

Q: How will the campus learn about funding decisions?
A: There will be no secrets. A list of all proposals will be published, and the University will be told the reasons why final selections were made.

Q: How will we know the money is spent efficiently?
A: The Steering Committee will monitor the use of funds, report to the campus, and make future planning recommendations that could include changes in both the proposed student fee structure and Cal Poly Plan expenditures, depending on the performance of campus units.

Q: Why not pay for more library hours?
A: Redirected State money will be used to restore library hours.

Q: What's being done for students with financial need?
A: Additional financial aid will come next year from student fees, private donations, and other University resources. More employment opportunities on campus will also help out. In following years, about one-third of all supplemental fees will be set aside for financial aid.
Suspected killing fields of Bosnia under investigation

By George Esper

Associated Press

BJERUSALEM — Ariel Sharon, when he was Israeli prime minister, mislead my father about Lebanon invasion.

"It is clear he (Sharon) misled me about the invasion," Begin's son, Yona Klimowitki, the secretary, quoted Begin as saying about the army's activities: "There are things I know, and there are things I know retroactively." Begin died in 1992 and never publicly discussed the issue.

An angry Sharon called a meeting with the Israeli-controlled territories in Lebanon.

When the war broke out, Begin promised it would be brief and the army would go no more than 25 miles into Lebanon in order to push PLO artillery away from Israel.

The army went much farther, reaching the capital of Beirut and expelling Yasser Arafat's PLO to Tunisia. Israel remained in Lebanon for three years; hundreds of Israeli soldiers died.

Sharon was forced to resign after Israeli-allied Christian militiamen massacred hundreds of Palestinians in the Sabra and Chatilla refugee camps in Is- 
raeli-controlled territories in September 1982.

A year later Begin resigned and became a reduce, fueling speculation that he was bitter about the course of the unpopular war.

Two other affidavits from the Haaretz case made public this week appeared to support Begin's claim.

In a statement excerpted from Channel 2 TV, reserve Maj. Gen. Amram Mitana argues that Sharon asked the army to conduct a "deliberate measured response, to cover up alleged war crimes."

But Batiste said the sites are still under satellite surveillance, and had not been tampered with, as far as he knew.

But Batiste said the sites are still under satellite surveillance, and had not been tampered with, as far as he knew.

The Christian Science Monitor reported Wednesday, however, that two mass graves American forces were assigned to safeguard have been tampered with and bodies of Muslims buried there apparently are missing.

The newspaper said sections of two mass graves near the town of Karakaj were dug up and bodies were removed. But the site photographed there in October remained.

Robbe, the paper's Eastern Europe correspondent, said he was surprised to see the larger and half of the smaller of the two grave sites had been excavated. Robbe first visited the site in October and was arrested and interrogated by Serbian police.

Expressing concern that it would be stretched by taking on too many tasks securing the peace in Bosnia, NATO for months has fought pressure to get actively involved in the hunt for mass graves. The Israeli Prime Minister's newly flexed ability to be on Washington's orders.

On March 23, U.S. Ambas-

dador Madeleine Albright toured a site near Srebrenica where bones and skull fragments and remnants of clothing were found.

Booletore the Internet

MUSTANG DAILY forum ranchers," says Legare's great-associate Piess would probably have been large governments to fully compensate bankrupted himself getting Chief Legare risked his life and nearly dying. Those bombings might be connected to the Montana confrontation. The investigation will focus on whether the crimes were committed by sophisticated criminals or ideologues, they said. "We do not know at this time whether it is ... an elaborate scheme to cover up a bank robbery, if there is in fact a group trying to make a point here," Pasenelli said.

"If he turned his back on the situation at the time, our family would probably have been large ranchers," says Legare's great-grandson, Edward Legare of North Dakota in 1881, Utley said. "Frankly it's about 94 years later," Dorgan said in an interview. "I doubt very much that there is any merit to the claim in that a court reviewed it in 1902." The descendants want an explanation of why Legares didn't get all the $13,000, said Edward Legare.

"W e will not rest until these charges are brought against the Aryan Nations," said Butch Bernhardt in Portland. The group was dismantled in 1989, 11 "detonated a series of bombs in December 1985, when a dozen of us were convicted of racketeering and other federal charges."

"In 1986, Order sympathizers calling themselves "Silent Brotherhood Strike Force II" detonated a series of bombs in Coeur d' Alene, Idaho, that authorities said were meant to divert attention from robberies that failed.

"We have also features photos of the Sugarloaf timber sale in southern Oregon. Boise Cascade cut the timber last summer despite environmentalists' protests. There were some specific groups opposing us on the Internet, so it seemed a good place to find out," said Ann Norris, administrator.

"We're finding that many groups can't even afford the equipment," he said. Efforts now focus on developing electronic mail and networking between groups, but will be expanded to fund raising.

"New technology is going to change the way they do business," he said.

"People on all sides of the timber debate warn that just because it's on the Web doesn't necessarily mean it's true. Each side carries forward its own interpretations of the facts."
LACROSSE: With a 7-1 record, the women's team is hoping to be division champions

According to Kramer, the club has its best turning lacrosse; the rest had to learn

LACROSSE: With a 7-1 record, the women's team is hoping to be division champions

Lacrosse is a collegiate sport, but at Cal Poly it is considered a club. The difference between being a sport and a club, Kramer said, is that a club has minimal funding and they have to accept everyone who comes out to play.

"We are still in a league and play against other colleges, but we have no recruiting," Kramer said.

Kramer said the club begins practice in the fall quarter to introduce people to the sport and teach them how to play the game. Then the season runs from February to April with the playoff game on April 21 at UCSB.

"We had great camaraderie this year and it is good we got along so well," Kramer said.

According to Kramer, the commitment from all the players to the team was a boost in their success.

"We had great camaraderie this year and it is good we got along so well," Kramer said.

According to civil engineering senior and co-captain Neha Patel this year was a building year and was successful.

"We have a lot of young players, and should be really good in the next few years," Patel said.

Patel said she loves the sport because it is so different from the West Coast.

"We had great camaraderie this year and it is good we got along so well," Kramer said.

Fans, players and umpires remember McSherry during Red’s makeup game

By Joe Ray
Associated Press

CINCINNATI — Home plate umpire Jerry Crawford called it the hardest game he’s ever worked. Those around him weren’t having an easy time, either.

A day after umpire John McSherry collapsed and died, baseball returned to Riverfront Stadium in somber trappings Tuesday. No one paid attention to the rock music in the Cincinnati Reds clubhouse before a makeup game with Montreal. Batting practice was subdued. Even the fans got caught up in the emotion by unfurling banners that honored McSherry and giving the umpires a standing ovation when they took the field.

“We kept each other’s spirits up,” Crawford said. “We’re all pretty upset.”

There were no major arguments or disputes in the Reds 4-1 victory, the makeup of a game called Monday after McSherry collapsed in the first inning. He later died at a hospital from heart failure.

The Hamilton County coroner’s office ruled Tuesday that McSherry, 51, died of severe heart disease, including an irregular heartbeat. He also had an enlarged heart and a blocked right coronary artery.

He will be buried following a funeral Mass on Friday at St. Nicholas of Tolentine Church in New York. Players, managers and fans were still grieving Tuesday.

An unknown person left a display of tulips on a table outside an entrance to Riverfront Stadium. Flowers arrived at the umpires’ dressing room. A chaplain gave tribute on the field, and there was a moment of silence before the national anthem.

“For me, going to home plate with the lineup card was exceptionally tough because I remembered what transpired yesterday,” said Ray Knight, who got his first win as the Reds’ manager. “Our clubhouse is generally jovial and loud. This morning, it was not. They were still recognizing what happened.”

Shaken players who had urged the postponement Monday were still grieving when they took the field.

“Walking through the tunnel and past the spot where they were working on him felt funny,” Reds reliever Chuck McElroy said.

“That was a scary sight yesterday,” said Cincinnati’s Pete Schourek, who started both games and got the win Tuesday. “It’s going to be in everyone’s minds for a while. Hopefully, just the playing of the game down on the field will keep everyone’s minds occupied.”

They were clearly were on something else before the first pitch. The mood was reminiscent of the Cleveland Indians’ first spring training games after pitchers Steve Olin and Tim Crews died in a boating accident in 1995.

“We’re not discussing it as a whole,” Reds outfielder Eric Davis said. “You see people reading the newspapers, whispering stuff.”

The four-man umpiring crew — including Rich Reiker, who took McSherry’s place — arrived at the stadium an hour and 10 minutes before the game. They walked past reporters without comment.
They conquered everything but death.

Past world rulers like Alexander the Great, Tutankhamen and Julius Caesar have all had one thing in common: the past. They're stuck in it. It makes more sense to follow a ruler who has conquered death...and a world leader who promises to someday rule the world through peace.

Jesus Christ is that ruler. He claimed to be God, was crucified for our sins, and then rose bodily from the grave. And he promises to return to rule over the earth.

Come see the Warner Brothers film about his life.

said more than 500 signatures were collected in one week.

According to Hearst attorney Roger Lyon, the corporation is in favor of the transfer. Lyon said there is no state beach within four miles of the area to be trans­ferred.

The California Coastal Com­mission will have the final say on the realignment issue. Steve Guiney, a coastal planner with the commission, said it will vote April 11 on whether to approve the realignment agreement.

HARBORING A CRIMINAL OFFENDER

A name from the past which once enabled the nation popped back into the public eye. Parker's most recent denial of the Cal Poly women's lacrosse program shared the same curiosity.

Should Cal Poly Head Coach Jeff Weaver not push for attention on the rules of an athlete who might label Cal Poly as the university that makes him a sexual offender, but at the same time improve its basketball program?

Parker has the athletic ability to become an important figure in the Big West Conference next year and will carry the team to the national level.

If he does play on the floor of Matt Gym, Cal Poly might be labeled as "the university that harbors a criminal for immediate success."

In that the type of image Cal Poly wants for the remainder of its existence?

Or maybe, Cal Poly could be viewed as the university that gets a win, Al英雄Iverson thanks Georgetown that let him go. In his most recent denial of Iverson's most current situation, the NCAA has suspended him from playing basketball during his senior year.
