Wrestler stabbed at Thursday frat party

By Stacey L. Johnston
Daily Staff Writer

A Cal Poly wrestler was stabbed at a Phi Kappa Psi party Thursday night.

During an outbreak of fights, Tyson Rondeau, 22, was stabbed twice in his upper right leg while at the fraternity located at 1439 Phillips Lane. He arrived at the fraternity at about 8:30 p.m. He said he "had a couple beers" and was "having a good night." At about 10:40 p.m. a fight broke out on the back deck of the fraternity house, police said. "I was trying to break up the initial pushing and shoving and someone from behind hit me in the jaw," said Vieler, whose injury will require jaw surgery.

Rondeau said he was trying to help his friends who were involved in the argument, which turned into a brawl.

Michael French, a social science major, said he saw a few people involved in the argument.

"All of the sudden I got a tingly feeling in my leg and I just grabbed it," said Rondeau.

Tyson Rondeau, wrestler and industrial technology senior

Rondeau denied having been asked to leave.

"That is not true," said Rondeau. "The fraternity is going to say anything they have to so they don't get in trouble."

Rondeau had not been invited to the party which began Thursday afternoon with a barbecue. Vieler said.

According to Rondeau, an industrial technology senior, he arrived at the fraternity at about 8:30 p.m. He said he "had a couple beers" and was "having a good night."

He received some potential leads on Friday, but no charges have been filed.

Rondeau said he became involved when he saw his friends arguing:

"I went to stop the fight or help my friends," Rondeau said. "Somehow I just got caught in the middle."

Deputy Detective Steve Tolley of the San Luis Obispo Police Department.

"Tyson Rondeau, 22, was stabbed twice in his upper right leg while at the fraternity located at 1439 Phillips Lane.

"I went to stop the fight or help my friends," Rondeau said. "Somehow I just got caught in the middle."

Ru-dolf Vieler, 22, a CSU-Chico student, said he was watching the fight when he was stabbed.

"Tyson Rondeau, 22, was stabbed twice in his upper right leg while at the fraternity located at 1439 Phillips Lane. He arrived at the fraternity at about 8:30 p.m. He said he "had a couple beers" and was "having a good night." New biotech center first of its kind
By Jessica Yamada
Daily Staff Writer

What do deer dung, soil and milk all have in common?
They are all part of ground-breaking research at the new environmental biotechnology institute at Cal Poly, the first of its kind in the California State University System.

Seven Cal Poly faculty members founded the institute, designed to involve students in research, during the summer.

Through the institute, professors and students from the environmental engineering, agricultural engineering, soil sciences and chemistry departments will be working together to explore various approaches to problem-solving through the use of microorganisms.

Microbiology professor Raul Cano is heading the institute’s studies of microorganisms and expects that the innovative biotechnological research will aid developmental measures to clean up environmental pollution.

Biotechnology has been used to measure the well-being of ecosystems, transform pollutants into harmless by-products, generate biodegradable materials from renewable sources and develop environmentally safe manufacturing and disposal processes.

“Although microorganisms have been around for years, however not much is known about it.”

Cano said that although the institute deals with environmental problems, its main focus is on research and development.

“Our mission is not to go out and clean the environment, but to develop new methods so others can go out and apply them,” Cano said.

According to Christopher Kitts, microbiology professor who helped start the institute, biotechnology such as composting has been around for years, however not much is known about it.

“Eventually, we hope to be directly solving pollution problems in the areas, such as an oil spill at a local beach or contaminated areas at Fort Ord,” Kitts said.

However, Kitts said their first hurdle is securing funds for the program.

According to Cano, the institute was put together with undergraduate research in mind. He said students will be active in all aspects of the research and activities. See BIOTECH page 9
Students question ability to use Performing Arts Center

By Jenny Justus
July 25, 1996

As the new Performing Arts Center (PAC) is getting ready to officially open its doors, many are questioning how much Cal Poly students will be able to utilize it. Ron Regier, the PAC’s Managing Director said it is difficult to say exactly how often Cal Poly stu­dents will be using the PAC this year, but that it is accessible to everyone.

As far as scheduling events, Regier designed guidelines based on a survey of 12 other similar facilities. He molded those proce­dures to suit the operation agree­ment approved by the center’s three partners — Cal Poly, the city and the Foundation for the Performing Arts.

Two thirds of the construction cost for the Performing Arts Center and the land was provided by the state, and one third of the construction cost (was donated) by the community,” Regier said.

Two thirds of the event dates scheduled in the center are geared toward the university’s educational mission.

This does not mean that those performances will be student pro­ductions. Groups outside of the university who support the school’s educational mission can use the facility with President Warren Baker’s approval.

As far as scheduling events, Regier designed guidelines based on a survey of 12 other similar facilities. He molded those proce­dures to suit the operation agree­ment approved by the center’s

students will see the inside of the center for purely acade­mic reasons. Classes are already being held in the center’s multimedia lecture hall including electrical engineering, political science and music classes, such as a music appreciation classes taught by professor Craig Russell.

Although some students argue that the center should be used in

academic reasons. Classes are already being held in the center’s multimedia lecture hall including electrical engineering, political science and music classes, such as a music appreciation classes taught by professor Craig Russell.

To obtain an elegant lecture hall for instruction,” said Russell, who previously taught his class in a 120-seat classroom in the music building. “The (PAC) lecture hall seats 180 so that means more students can take the class.”

Russell said the music depart­ment hopes to utilize the lecture hall for more than just lectures.

“The music department is hop­ing to schedule student recitals in the evenings as well as lectures during the day,” he said. “It will be a beautiful setting for student recitals.”

Students can use the PAC for rallies, club meetings and other events, if space is available and they can pay the fee — equal to that of using the Cal Poly Theater. Regier said according to the center’s policy he cannot dis­criminate based on the content of the presentation.

Although some students argue that the center should be used in

Step right up, take the maturity quiz

By Dawn Pillsbury

It has come to my attention that many people at this institution see me as a child. I say this despite the WOWics who are infecting San Luis Obispo. They are a throwback and soon they’ll settle down and be mildly disturbed that gum impregnated with their saliva adorns the walls of Bubble Gum Alley.

It all happens so quickly. One day you’re a perfectly normal kid, getting into minor trouble with local law enforcement, giving your parents premature wrinkles and staying up all night doing strange things like listening to Blue Oyster Cult and drinking that bottle of orange liqueur you found in the pantry. And suddenly you wake up and you are a grown up. You own at least one business suit. You worry about dietary fiber and the depletion of the ozone layer. Whoa. How did that happen?

While how it happened is a question for those with far more spare time than I, such as human development majors, I can help you determine how far this affliction has gotten in your case:

1. When you come across a sprinkler watering a lawn, you:
   a) Carefully circumnavigate the water, making a mental note to call maintenance and tell them it is sounder ecological practice to irrigate at night.
   b) Ignore it.
   c) Before the Health and Safety Inspector or your mom visits.
   d) Under a pile of clothes.

2. You clean your room:
   a) In one year and three quarters, plus or minus one quarter depending on class availability and senior project status.
   b) Every couple weeks.
   c) Every once in a while.
   d) Under a pile of clothes.

3. You know you will graduate:
   a) Carefully circumnavigate the water, making a mental note to call maintenance and tell them it is sounder ecological practice to irrigate at night.
   b) In a year and a half, or near enough.
   c) Before a newly-evolved life form lashes a tentacle out from under your bed, looking for nourishment other than old socks.
   d) Under a pile of clothes.

4. Your computer is:
   a) A Cray.
   b) Fine for theme parties.
   c) Before the Health and Safety Inspector or your mom visits.
   d) Under a pile of clothes.

5. The way you are:
   a) A Cray.
   b) Mostly loaded with word processing, spreadsheet and other use­ful programs.
   c) Great fun. All sorts of games and access to MUDDing and such.
   d) In a year and three quarters, plus or minus one quarter depending on class availability and senior project status.

6. Your photo album:
   a) A Cray.
   b) In a year and three quarters, plus or minus one quarter depending on class availability and senior project status.
   c) Before the Health and Safety Inspector or your mom visits.
   d) Under a pile of clothes.

7. When your adviser, whoever he/she is, tells you when and where the ceremony will be:
   a) Before the Health and Safety Inspector or your mom visits.
   b) In a year and a half, or near enough.
   c) Before your money runs out.
   d) Under a pile of clothes.

8. What you are doing Saturday:
   a) A Cray.
   b) In a year and a half, or near enough.
   c) Throw up your arms and run shrieking through.
   d) Repeat c until you fall on your butt then make mud pies to fling at passersby.

9. Who you will date:
   a) In one year and three quarters, plus or minus one quarter depending on class availability and senior project status.
   b) Before the Health and Safety Inspector or your mom visits.
   c) Before the Health and Safety Inspector or your mom visits.
   d) Under a pile of clothes.

10. 4. Your computer is:
   a) A Cray.
   b) Mostly loaded with word processing, spreadsheet and other use­ful programs.
   c) Great fun. All sorts of games and access to MUDDing and such.
   d) Under a pile of clothes.

11. 5. The way you are:
   a) A Cray.
   b) Fine for theme parties.
   c) Before the Health and Safety Inspector or your mom visits.
   d) Under a pile of clothes.

12. 6. Your photo album:
   a) A Cray.
   b) In a year and a half, or near enough.
   c) Before your money runs out.
   d) Under a pile of clothes.

13-16 You’ve managed to keep your youth well. Be wary of signs of maturity, such as an interest in golf, politics or getting a corporate office with huge windows.

17-20 What are you doing Saturday? I know some great sprinklers.

**Clinton calls Mideast summit to cool down ‘Out of control’ tensions**

By Barry Schweid
Associated Press

WASHINGTON — Gambling that he can define tensions and revitalize moribund peace talks, President Clinton is bringing feuding Israelis and Palestinians leaders to the White House for up to two days of talks after they flatly refused to meet on their own in the Middle East.

Clinton will participate directly in the sessions beginning Tuesday between Israeli Prime Minister Benjamin Netanyahu and Palestinian leader Yasser Arafat. He will meet both with them individually and together, senior administration officials said Sunday.

King Hussein of Jordan is joining the summit while Egyptian President Hosni Mubarak is weighing the president’s invitation to come here, as well. Hussein has proposed appointing a commission of inquiry to delve into disputes surrounding the Temple Mount in Jerusalem, with its Muslim and Jewish holy sites.

Netanyahu’s unilateral decision last Tuesday to open a second entrance to a tunnel for tourists ignited a Palestinian uprising that led to exchanges between Israeli troops and Palestinian police and exacted scores of casualties.

Then, despite a flurry of telephone calls from Secretary of State Warren Christopher and other senior U.S. officials, Netanyahu and Arafat could not agree on terms for a meeting that was supposed to be held Saturday night or Sunday at a border crossing between Israel and Gaza.

The Washington talks are to be held at the White House and also Blair House, the presidential guest house across Pennsylvania Avenue.

A senior U.S. official, speaking on condition of anonymity, acknowledged Clinton was taking a political risk in intervening in a volatile dispute just five weeks before the presidential election. But the official said, “the consequences of a breakdown in the peace process were evident.”

The President made the decision after weighing the risks of inaction against other risks,” the official said. “And, basically, the two leaders wanted to get into negotiations even though they differed on how to get there.”

Netanyahu’s tough stand — the entrance was reopened after a temporary closing for the Muslim and Jewish Sabbaths — could put Clinton in a position of having to

See MIDEAST page 7
TOUR: The PAC has more women’s bathrooms than any other performance facility in the state.

"The PAC contains more women’s restrooms than any other performance facility in the state," Sinheimer said proudly. This will eliminate the ever-present lines flowing out the door.

"This building can be a bit of a labyrinth at times," he said, yet he led the tour as if he had been living in the place for the past year.

Take the bathrooms once again. Those little infrared, flush-it-for-you devices were cut from things that could’ve been cut, it made a lot of sense," Sinheimer said.

Sinsheimer knows every inch of the center, and every inch has been completely thought out, starting with the bathrooms.

"The PAC has more women’s restrooms than any other performance facility in the state," Sinheimer said proudly. This will eliminate the ever-present lines flowing out the door.

"They took an interest in this facility," Sinheimer said. "JBL agreed to donate (the gift) and use this as a designated test site."

Sinsheimer said the move by Harmon Industries will allow Cal Poly engineering students to have the chance to see some of the best sound equipment — and on their own campus.

"The building is cut into pieces, allowing the center to hold events in two separate sections on the same night," Sinheimer said. "Almost every room is a separate room acoustically," Sinheimer said. "There’s about four inches of airspace in the wall (separating the two performance chambers)."

The sound system for the complex will continue to remain the best for many years to come, Sinheimer said, thanks to a gift of one million dollars worth of equipment from Harmon Industries, the makers of JBL sound systems.

"This building is nevertheless what I’d call spare," Sinheimer said. "The main focus of this as a designated test site."

Supporters of the measure say it is intended to eliminate all forms of discrimination while opponents say it will abolish affirmative action.

Affirmative action is a conservative remedy to open up closed doors and to make this a one, big-tent America. The fact is, it’s working. It’s working for the majority of citizens," Jackson said.

Hopson added tickets for the Who’s rock opera “Tommy,” set for Oct. 17 are still selling well despite a clash with the upcoming Bob Dylan concert in the Rec Center the same night.

"That might hurt Dylan," Hopson said, "but it won’t hurt us."

Los Angeles — Invoking memories of the 1960s civil rights freedom rides, the Rev. Jesse Jackson and his wife, President Patricia Ireland on Sunday began a two-week bus tour campaign to oppose Proposition 209.

California must be to the equal opportunity movement in 1990 what Birmingham was to the public accommodations struggle in the 60s and Selma was to the voting rights movement," Jackson said.

Californians will vote in November on Proposition 209, which would prohibit racial or gender preferences in public hiring, education and contracting.

"It’s working. It’s working for the majority of citizens," Jackson said.

Environmentalists: pact protecting redwoods doesn’t go far enough

By John Howard
Associated Press

ARCATA — Some 400 environmentalists gathered in a chilly mist Sunday to denounce a cash-for-land pact aimed at protecting 7,500 acres of the last privately owned stand of virgin redwood forest.

"No deal! No deal," protesters shouted.

Their major complaint is that the tentative agreement protects only part of the more than 60,000-acre forest and allows continued logging in the remainder.

They says it’s a sweetheart deal for Texas financier Charles Hurwitz, whose Pacific Lumber Co. owns the land covered in the agreement and is one of several owners of the rest of the forest 300 miles north of San Francisco.

"This deal can best be described in three words: ‘smoke and mirrors,’" said Daryl Cherney, who helped organize an anti-logging protest two weeks ago that resulted in more than 1,000 arrests, including singers Bonnie Raitt and Don Henley.

The agreement is "slimy, an unmitigated sellout," added Kurt Newman, one of the first outsiders to hike extensively through the Headwaters in the 1980s.

The $380 million pact reached Friday between Hurwitz, the Clinton administration and state officials would turn 7,500 acres of Pacific Lumber land over to the public.

The land includes the 3,000-acre parcel on which Pacific Lumber had planned to begin salvage logging Monday. That’s the

CLINTON: Dole not playing expectations game

From page 7

ich director Doug Sosnik said. "The debates tend to be the final event in most of these campaigns in which the voters make a final, last definitive decision about whom they’re going to vote for. And their final choice tends to be the same choices they had made by Labor Day.

In 1992, Clinton went off the campaign trail, rested, studied and turned in a stronger performance than his main rival, George Bush.

In one debate, Bush was seen on television glancing at his watch, as if in a hurry to get it over with. In another debate, Bush gave a wooden answer when a woman asked about the impact of the national debt on the lives of average Americans. Clinton seized the moment to talk compassionately about voters’ economic anxieties. He got off his debate stool, microphone in hand, to be closer with the audience—a move that earned more debating points.

While insisting they are not taking the debates for granted, Clinton’s team appears a little cocky. Spokesman McCurry sarcastically referred to the debates as "a very important encounter with the Titanic juggernaut of debaters" — the 73-year-old Dole.

On the other side, the Dole campaign seems to be trying to lower expectations for their candidate and even Dole himself has quipped that ‘Bill Clinton’s gonna clean my clock, so if I show up we win.’

"No, we’re not playing the expectations game," Dole campaign manager Scott Reed insisted Sunday on CNN’s "Inside Politics." But then he added, "We all know Bill Clinton’s a great debater. He’s capable of charming the birds out of the trees every day."
Hearing starts on bombing suspects' severance motions

DENVER — Timothy McVeigh and Terry Nichols, who forged a friendship on a shared distrust of the feds, return to court this week as enemies challenging each other for the Oklahoma City bombing.

McVeigh's attorneys argue Nichols is a contumacious character behind the bombing that killed 188 people and that McVeigh ingeniously trusted him. Nichols' attorneys say McVeigh's "violent extremism" appalled Nichols.

"They hope to convince a judge that they should be tried separately, arguing that jurors will be unable to distinguish between the evidence admitted against each man and fairly judge them individually," said Nichols' attorney, Michael Tigges.

"The cases against Mr. McVeigh and Mr. Nichols differ dramatically in every relevant respect: the quantity and quality of the evidence against each, the degree of culpability for the crime demonstrated, and the character of each defendant," said attorney David Kaplan, a criminal defense attorney and a former president of the Colorado Criminal Defense Bar.

Separate trials are "a fairly large inconvenience to the prosecution and to the court," Kaplan said.

However, he added, "Severance motions in these kinds of situations are not unique that he won't take a strong look at it.

From page 6

"We're back to the hate and bombings and killings," she said. "We're all going to have to get on our feet and pull together. We

Jackson also made his push to get people registered to vote. At each stop his staff distributed voter registration cards.

Glen Morse, 51, came to see Jackson because she was part of the 1960s protests in Birmingham, Alabama, and the March on Washington and says there is still much work to be done.

"I went through segregation, integration. 209 leaves a question in my mind, how far are we really come?" Morse said.

"We're back to the hate and bombings and killings," she said. "We're all going to have to get on our feet and pull together. We can't give up."
VICTORY: Mustangs held the Wildcats offense to just 14 points

From page 12

sessions. The first three Cal Poly drivers started within the Wildcats end of the field and led to two Mustang touchdowns.

“We felt we had to establish our running game, so we had to string some of the pressure off the quarterback and the passing game,” Patterson added. “We did a good job of that early in the ball game and that gave us more time to be able to throw the ball.”

The Mustangs gained 296 yards on the ground and 218 in the air.

Mustang quarterback Alii Abrew was 11 for 19 passing, and threw for 185 yards. Running back Mike Allhouse ran for 128 yards on 22 runs. Wide receiver Kamil Loud had four catches for 185 yards and two touchdowns.

Abrew is still ailing from an injured left wrist suffered in last week’s loss to Weber State. He said the wrist was sore, but that it didn’t bother him during the game.

On the defensive end, Cal Poly kept Central Washington’s offense in check allowing only two touchdowns.

“With the line and the linebackers were taking care of business up front so that took a lot of pressure off the defensive backs,” said cornerback Kaaron Cowwright. “The whole defense did its job and that’s why we came out victorious.”

Conwright had one of three Cal Poly interceptions and also blocked a punt.

The Mustangs took control of the game from the opening kickoff.

On the Mustangs first possession, wide receiver Kamil Loud set up Cal Poly’s first touchdown with a 29-yard pass that put the Mustangs at the Wildcats two-yard line. Three plays later, Abrew found wide receiver Ryan Thomas in the right side of the end zone for a touchdown.

The Wildcats were shutdown by Cal Poly on their next possession. Conwright’s blocked punt set up Cal Poly at the Wildcats’ six-yard line. Fullback Keith Washington then took the ball in for the first of two touchdowns of the day. The touchdown gave Cal Poly a 14-0 lead.

Central Washington did respond though.

After a Cal Poly fumble, the Wildcats carried the ball all the way down field just short of a score. From the one-yard line running back Dan Murphy powered the ball into the end zone bringing the score to 14-7 with only four minutes remaining in the quarter.

Cal Poly’s offense took just over a minute to strike back. Abrew found Loud for a 37-yard touchdown pass to give the Mustangs a 21-7 advantage. That score held through the first half.

In the second half it was more of the same for the Mustangs as the offense added four more touchdowns, and the defense only allowed one Central Washington score.

The Mustangs go on the road this weekend to face Idaho.

PECK: Holds Cal Poly record for career catches

From Page 12

catches for 58 yards in the game. “I knew going in I only needed four catches, but it happened in the middle of a drive so it was kinda anti-climactic.”

Peck, a modest athlete and All-American candidate, is the fifth Mustang to record 100 career catches, and his 62 catches last season set a Cal Poly record.

“It’s a credit to the players I’ve played with in the past, the quarterbacks, running backs and offensive linemen,” Peck said.

In addition to the career reception record, Peck is close to breaking the receiving yards record this season.

“That was great,” said Cal Poly Head Football Coach Andre Patterson of Peck’s achievement. “He broke a players record who played in the NFL, and I don’t a great player and a great person.

“Didn’t want any fanfare when he broke the record, he doesn’t say much, he just goes out and plays hard and competes,” Patterson added. “I wish I had 100 guys like him, he’s a real good guy.”

Galaxy beat Clash in MLS playoff

Associated Press

PASADENA, Calif. (AP) — Robin Fraser scored in the 84th minute and Eduardo Hurtado added a goal in the final minute Sunday as the Los Angeles Galaxy beat the San Jose Clash 2-0 to tie the best-of-3 series.

The deciding match of the Major League Soccer first-round series will be Wednesday night at the Rose Bowl. The Clash won the opener 1-0 in San Jose on Thursday night.

Fraser’s shot from just outside the penalty area hit the back of Clash midfielder Eddie Lewis’ head and ricocheted into the unguarded goal.

Hurtado took Jorge Campos’ pass, drew goalkeeper Dave Seitzwedel toward him, then shot into the net, delighting the crowd of 27,833.
SOCCER: Midfielder Amy Earle scored two goals over the weekend.

From one of many problems with the calls.

"It was a very physical game. He (the center referee) was consistent," I'll say that," Crozier said. "That's one thing we talked about (during halftime). There were a lot of things we thought were fouls. We were waiting for the whistle and it wasn't there."

Bad officiating aside, fresh­man forward Michelle George and senior forward Patty Geesman, got the ball rolling for Cal Poly at the 72 minute mark in the second half.

In a hectic frenzy in front of Washington's goal, George put the Mustangs on the board. Off a pass from senior forward Geesman, George was one of three freshmen who started the game.

"We had a couple of true fresh­man in there who played 90 min­utes and they did a great job," Crozier said. "They weren't start­ing the first few games, but as they got in the game, it became clear that they were players who could help us right now."

Cal Poly capped the victory 13 minutes later with a goal from junior midfielder Amy Earle.

"Locally it seems like, in the last couple of games, the thing that we have been struggling with is picking out our options early, playing the ball early, in particu­lar to the opposite side of the field," Tobias said. "To do that, and often we have a lot more chances, so it seems like that keeps getting better."

"As long as that is part of the focus and as long as we keep mov­ing in that direction and that aspect gets sharper and sharper, we are going to see ourselves get­ting more and more chances (to score)."

In Sunday's afternoon game against the Loyola Marymount Lions, neither team could get on the board in the first half.

The Mustangs came out shoot­ing in the second half, getting sev­eral good scoring opportunities. It wasn't until 15 minutes into the half that Earle got the Mustangs on the board. It was enough to give Cal Poly the 1-0 win.

Although the team won, Tobias said Cal Poly still has some things to work on.

"Offensively it seems like, in the last couple of games, the thing we have been struggling with is picking out our options early, playing the ball early, in particu­lar to the opposite side of the field," Tobias said. "To do that, and often we have a lot more chances, so it seems like that keeps getting better.

"As long as that is part of the focus and as long as we keep mov­ing in that direction and that aspect gets sharper and sharper, we are going to see ourselves get­ting more and more chances (to score)."

"I'm more happy with Chris getting the big hit than I am win­ning the batting title," Tony said with champagne and beam­ing, said of his younger brother. 'I hate to say it, but I've won it six times, so it's kind of old hat."

"Something like this, when we won the division and my brother got the big hit, that will probably never happen again."
Emily around a ball and you're 0-3, you can't have the kind of focus and determination that you have out there.

* Ali Abrew, Cal Poly quarterback

Mustangs defeat Wildcats to boost record

By Greg Manifold

The Cal Poly football team got exactly what it needed Saturday, and it came in the form of a 49-14 win over the Central Washington Wildcats.

**Football**

The Mustangs' first victory of the season, in front of 4,215 people at Mustang Stadium, improved Cal Poly's record to 1-3. "Our main goal was to win a game with special teams, " said Cal Poly head coach Andre Patterson. "Our special teams played really well in helping set up our offense with a short field."

The Mustangs had a good field position on the start of their posses.

Women's soccer gets two needed wins

By Melissa M. Geisler

Getting back on track.

What's that? We had a chance to win, and we showed up for the match.

Assistant Head Coach Dan Tobias said the Mustangs had to be prepared to catch up, and they couldn't let Washington State dictate "the physical aspect of the game."

"It was a matter of playing a team which was very physical, and first of all realizing that that's the way the game is going to go, Tobias said. "In the first half it seemed like they dictated quite a bit. They were winning a lot of head balls — stepping in front — which is what we have been doing the past couple of games."

"We just didn't do it for whatever reason in the first half," Tobias added.

Head Coach Alex Crozier said it took Cal Poly the first half to get adjusted to Washington State.

"They are a very good, solid offensive team," Crozier said. "They win a lot of head balls and it was getting us a little frustrated."

What also contributed to the first half frustration was the lack of good officiating.

An early yellow card awarded to Cal Poly freshman defender Andrea Stevens was just.
