Is this town big enough for the two of us?

By Sondra Naughton
Daily City Editor

Just as books should not be judged by their covers, neither should San Luis Obispo full-time residents.

In the past, students have looked across the street and viewed their permanent neighbors as enemies, or at least as adversaries. One group, Residents for Quality Neighborhoods, symbolized the epitome of this oversimplified student vision. Although this neighborhood association has been labeled as an anti-student group in the past, it has welcomed many residents as members of the group.

One former Cal Poly professor and present RQN member proposes a self-contained housing community north of Kennedy Library on land currently used by the university. "There is better communication between all entities within the last three years. It is changing because of the efforts among the students themselves, city and university. Residents for Quality Neighborhoods, symbolized by the epitome of this oversimplified student vision. "Students have been very active, not to say they haven't been in the past," Conner said, adding that she has met with ASI President Steve McShane several times to discuss his and RQN's concerns. "This year's group of officers really try to do something positive rather than just talk," McShane said improving students' relations with residents is one of his top priorities. He became a member two years ago and has tried to increase student involvement in the group's efforts.

"Students are definitely part of the equation and solution," said Larry Batchelbor, RQN chairman, said since he became a member two years ago he has tried to increase student involvement in the group's efforts. "Students are definitely part of the equation and solution," said Larry Batchelbor, RQN chairman, said since he became a member two years ago he has tried to increase student involvement in the group's efforts. "It is not anti-student," said Dotty Conner, a former RQN chairperson. "It is anti-student," she said of the city's precedent of pitting residents and students against each other. "They need to be involved, and have been getting more involved in the past few months," Batchelbor said that since fall, RQN has focused its efforts on creating solutions for the student housing problem.

With 838 more students attending Cal Poly than a few years ago, it has tried to increase student involvement in the group's efforts. "It is not anti-student," said Dotty Conner, a former RQN chairperson. "It is anti-student," she said of the city's precedent of pitting residents and students against each other. "They need to be involved, and have been getting more involved in the past few months," Batchelbor said that since fall, RQN has focused its efforts on creating solutions for the student housing problem.

Hundreds die in Indian jet collision

By Donna Bryan
Associated Press

NEW DELHI, India — A Saudia jumbo jet climbing from New Delhi's airport collided with a Kazak plane coming in for landing Tuesday, creating twin fireballs that turned the sky red as dawn and scattered the bodies of up to 351 people over farmland below.

If the death toll is confirmed, the crash would be the third-deadliest in aviation history. Wreckage dropping from the sky left big craters and body parts, baggage and clothes strewn across six miles of fields near the town of Charkhi Dadri, about 60 miles west of New Delhi. Those who arrived at the scene said the dusk air was filled with an unbearable stench. Rescue vehicles tried to navigate the area's poor roads, arriving at the crash site after the first curious villagers. Within a few hours, thousands of people gathered in the dark and solemnly watched the search.

"I saw 60 or 70 bodies, but only about 15 were identifiable," said Manjot Singh, a 25-year-old college student who lived at the site on his motorcycle after seeing the collision from his home. The faces of the rest of the victims were horribly disfigured and charred, he said.

The Saudi Arabian-bound Saudia jetliner with 312 passengers and crew members had been in the air for only seven minutes when it collided with Kazakhstan Airlines Ilyushin-76 cargo plane, which was on a landing approach, aviation officials said.

Seventeen foreigners were on board the Saudia jetliner, including two Americans and a British. Press Trust of India news agency See CRASH page 5

Common thread' bonds war veterans at local cemetery

By Dawn Kalmar
Daily City Editor

Despite the appearance of pride, patriotism and American emotions cut deep at the Veterans Day celebration at Los Osos Valley Mortuary. Nearly 600 people gathered to remember veterans of all Americans.

"We are not anti-student," said Dotty Conner, former RQN chairperson. "We are not anti-student," she said of the city's precedent of pitting residents and students against each other. "They need to be involved, and have been getting more involved in the past few months," Batchelbor said that since fall, RQN has focused its efforts on creating solutions for the student housing problem. VKTS: Six men remember six past wars

From page 1

"I really didn't know what war was about...it still hadn't dawned on me until I heard the first sound of incoming," Tozzi said.

"Follow water," was the rite in World War II and characterized the thread that togetherness.

The Vietnam War brought different feelings, feelings of loneliness and expendability.

"We knew we were expendable. We knew we were on our own," said Joe Martin, a retired Marine Corps corporal. He has 't changed," he said.

"It fosters patriotism and respect for those who have fought for all these years," she said. "It's just inspiring."

"The success of the whole depends on the success of the individual, the survival of the individual," said Dr. Larry Gay, a Cal Poly packaging professor.

"The purpose of war is to achieve and preserve peace. War brings out the best and worst in human nature," he said. "The American men and women who represent the best in human nature — it is to those men and women who form the common thread and to whom we pay tribute."

"Tribute was specifically made to one man next to Laurent, 98-year-old Donald Crain, who fought in World War I. Although Crain didn't speak to the entire crowd, he later talked to reporters about the importance of "patriotism, our love of God and country."

A piece of his "common thread" helps him walk, it's a case made

VETS: Six men remember six past wars

Cal Poly's egg drop makes a crack

An event combining the tactics of both United Parcel Service and MacGyver was the big attraction at Farmers Market Thursday.

The Cal Poly Packaging Department brought eight dozen eggs, a lift, KS9Y television crews and a crowd of people to the corner of Chorro and Higuera streets for its 25th annual egg drop contest.

Students signed up earlier in the week to construct a package that would keep an egg intact as it dropped from a 15- to 22-foot height.

"These packages don't look like much of anything," said Dr. Larry Gay, a Cal Poly packaging professor. "But some of them were something, especially the five that made it to the final round."

Most participants enjoyed the event.

"It was kind of funny. I felt like MacGyver," said packaging minor Kathy Jong. "I knew I wanted something that was light weight and that had air pillows," she said. Jong went on to take second place and win the scuba diving prize.

One judge praised the contest as one of Cal Poly's hands-on approaches to learning.

"When I went to school they didn't have practical things like this — designing," said Jerry Shea, a representative from Richter Packaging. "It takes a special school, a special faculty, a special program to do this."

Part of the event was to teach. When industrial technology senior Gabe Austin was asked what he learned he said, "We'll see," just before he dropped his package, shattering the egg inside.

RQN: Members have joined the police department's volunteer program

From page 1
buildings in an attempt to house older students. Increased noise levels and heavier traffic flows resulted. But residents' biggest complaint, as a result of the housing crunch has been an increase in loud parties.

"The police log clearly indicates an increase in complaints and activities inappropriate for any area — noise, parties and general traffic citations," he said. "Those things are always an issue when population density is increased in an area."

Although hesitant to blame the increase in noise and party complaints solely on students, San Luis Obispo Police Chief James Gardiner said the housing shortage caused concern within the community.

"There was a peak period where people thought things were pretty bad," he said. "The influx of students doesn't help the situation, but I don't believe the increase in students is the driving or major reason." He added that the growing bar scene downtown and the new Performing Arts Center could also be contributing factors.

"This year there has been some correlation to Greek events. A little more friction than normal," he said, pointing to the Sept. 26 stabbing incident at Phi Kappa Psi fraternity as an example.

Overall, the police have been busier since Cal Poly's fall quarter started.

"Through September noise complaints are up 5 percent, with 3,208 noise complaints filed, an increase from the average of about 2,500 in the early 1990s. (They) have been increasing at a rate of 3 to 5 percent," he said, adding that although not exclusively, most noise complaints arise from parties or loud music.

"We are concerned about overall noise levels as more students are getting and how many we are responding to," he said adding that he has been carefully monitoring the level for three years.

"As for RQN, parties have always been one of its concerns, which is why it joined the police department's volunteer program last year. RQN members regularly donate their time to a program in which a postcard is sent to the property owner when a citation for noise or a similar disturbance is made.

However, the increase in parties, noise pollution and traffic flow have increased to an intolerable level after the some 900 residents of students came to the city this fall, forcing RQN to become involved in solving the student housing problem, Batchelor said.

RQN held two committee meetings addressing the housing shortage, during which suggestions such as building on-campus housing or creating a fraternity row were made.

"We are just trying to get the ball rolling, but we are encouraging a fraternity row," he said. "We think having a common area where fraternities and sororities could have activities and shared resources is a good idea. It could also possibly benefit the neighborhood that has fraternities now because they'd have less noise and party complaints.

Batchelor said RQN would support such an area on or off campus, although some say there are problems with both options.

"The city has looked a number of times at a potential fraternity row in the city and we haven't found anywhere suitable," said city councilman Bill Ballman. "So, I don't think (we) really see an avenue for a Greek row now."

He explained that such a community would have to be located in a part of the city zoned for apartment or multiple-family housing.

And although Cal Poly has more than 6,000 acres of land, a proposal to build a fraternity row on campus might also meet obstacles.

"Creating a fraternity row on campus has been discussed, but we would need to have that in the initial phase of a request for a proposal," said Frank Lebota, Cal Poly vice president for administration and finance.

He said the administration aims to complete a request for proposal, a document soliciting investors or developers to submit plans, by the end of the year.

"There are some trustees limitations of investing state funds into that type of housing," he said. "It is clearly a lower priority than securing housing for all students."

He said the administration plans to focus more on providing apartment-type housing on campus.

"On-campus housing is certainly an understandable and viable alternative since we do have so much land and some tentatively ear-marked for expansion. And although Cal Poly has And although Cal Poly has private housing complexes of all sizes, we do have so much land and some tentatively ear-marked for expansion. And although Cal Poly has 3,000 students living in the library, out toward the California Men's Colony."

With 3,000 students living in the library, out toward the California Men's Colony. Nordquist has a grand plan to solve the housing crunch with details down to gardens and parking spots.

"I see a little community of small-scale cottages with three students to a unit, front porches, alleys and tucked in real close to campus," Nordquist said of his proposal for on-campus housing. "There should be a general understanding that this type of housing is very different from what we have at Pomona."

Nordquist suggests building this housing community on Cal Poly's agricultural land north of the library out toward the California Men's Colony. With 3,000 students living in the library, out toward the California Men's Colony.
Opinion

RAMBLINGS
By Karen E. Spaeder

Ode to Good Stuff (Not an Exhaustive List)

1. Coffee. Thankfully, Trader Joe's is in town now and poor folks like me don't have to take out a loan to have a good cup of java in the morning.
2. Potato medley. If you haven't tried it, you're missing out. Go to Trader Joe's.
4. Pasta. The college student's dream food.
5. Bagels. The perfect breakfast for those of us who snooze the alarm five times every morning.
6. Snuzo alarms. True, they can be my downfall when I should be up and about instead of rolling over in bed. But I've been snoozing for 10 years and I'm not about to change my ways now.
7. Lint traps. I still haven't invested in a lint roller for my clothes, so this feature is particularly attractive in a clothes dryer.
8. The "touch-up" cycle on the dryer. For all your ironing needs.
9. Fabric softener. Face it: stuff can't be very attractive if you spill coffee on them and it'll come out in the wash.
10. "Butch Cassidy and the Sundance Kid.
11. Aeronautical engineering freshman.
12. Free freeways as possible.

LETTERS TO THE EDITOR

Editor,

This letter is for all who voted "No" on Proposition 209 and is in regards to the article that ran last Friday, Nov. 8: "U.C. grams are no longer racist.

Karen Spaeder is an English senior and took happy pills this week. I liked her better before.

By Justine Frederiksen

Could you please stop that?

People who want to bring scantrons and/or pencils to a test. Hey, I know, I forgot stuff, too. But I always remember two seconds BEFORE class and run to the bookstore and go BUY a scantron or a pencil. The last thing I need on the day of a midterm when I've gotten so deep the night before and spent the last two hours cramming all the crap into my brain is some yahoo begging me for a scantron. I don't care if I've got a whole package in my bag. I smile sympathetically and say, "No, sorry."

I had a professor who circumvented all of this, mostly for his sanity I'm sure. He'd bring a stack of scantrons and pencils to every test and selling them, with no profit markup, of course. That was beautiful.

People who snuffle and/or cough during a test. Sure, this sounds unsympathetic, too. I get colds, but I always BLOW MY NOSE. I figure it is the worth the minor and few interruptions to go outside and blow your nose and breathe easy for 10 to 20 minutes than to sit there and snuffle every 30 seconds and drive everyone around you bonkers. I have more sympathy for people coughing — that is harder to control, but have you heard of cough drop?

Finally, I abhor people who finish their test early, make an incredible amount of noise packing up their stuff, and then let the door SLAM as they leave the classroom. There should be a special place in Hell for these people. I am positive there was at least one person in one of my classes who, on the day of the midterm, walked in late, asked me for a scantron and a pencil, alternated sniffing and clicking his eraser, and then finished his test early and let the door slam as he left. If you, as a professor see all do that, don't you think he deserves an "F" on principle alone? I've never happened to grades for citizenship.

I am so grateful I only have one set of finals and then I'll be free of test periods with snuffling clickers forever... only to meet up with them in movie theaters.

Justine Frederiksen is a journalism senior and the Daily opinion editor. She was the alleged perpetrator of the first click-eraser stab in history.

CRASH: U.S. Embassy could not confirm that two Americans were killed

From page 1 reported.
All aboard the two planes were believed killed. There were no reports that anyone on the ground died.
The American pilot of a C-141 Air Force transport plane who was bringing in supplies for the U.S. Embassy in New Delhi witnessed the crash's fiery aftermath from 20,000 feet.
"We noticed out of our right-hand (side of the plane) a large cloud lit up with an orange glow, from within the clouds," the 39-year-old captain told reporters in a conference call from the Indian capital.
The total number of passengers and crew members was reported by the local news agency, which quoted civil aviation authorities, and was confirmed for The Associated Press by an airport police official.
The U.S. Embassy could not confirm that two Americans were on board; the British Foreign office said one of its citizens was believed killed.
The Indian government announced a judicial inquiry into the cause of the accident.
At about 6:40 p.m. local time, as the sun was setting, the Saudi plane was cleared to climb to 14,000 feet, while the Kazak aircraft was authorized to descend to 15,000 feet, said H.S. Khola, the director general of civil aviation. Suddenly, he said at a news conference, "the radar blip of both aircraft was lost."
Tuesday's crash appears to be the third-deadliest air accident.

VETS: Don't want to forget what has happened

From page 2 of a World War I-era plane pellor that a soldier made for him in 1918.
"We don't want to let them think they're forgotten because some of them do," she said.
Similarly, Pam and Jim Gerhardt don't want to forget and want to teach their three children the same thing. When asked why they think it's important to bring their family to such events, Jim Gerhardt reflected on a statement made by one of the speakers earlier in the program.
"In time of war people think of God and remember the soldiers," Gerhardt said. "In time of peace people forget God and slight the soldiers. We don't want that to happen in our family."

You don't need a gun.

San Francisco Chronicle

Theft of MCAT Foiled in S.F.

By Henry K. Lee and Catherine Brown
SAN FRANCISCO CHRONICLE STAFF WRITERS

A young masked gunman burst into a room full of students taking a medical exam Saturday in San Francisco and demanded a copy of a test section but was thwarted when several outraged proctors and would-be doctors punched him out, police said.

Police said the youth grabbed a green folder at the front of the room, disappeared into a bathroom and then re-emerged, cursing. He then confronted a proctor, demanding the physical sciences portion of the test.

As the proctor fumbled for the test section, the youth may have been careless with his gun — the proctor grabbed it, and suddenly the intruder found himself at gunpoint.

The youth then apparently snatched the proctor in the face. Enraged, at least five proctors and test-takers surrounded the suspect and threw punches at him, drawing blood, witnesses said.

So, even though RQN has not formally submitted his plan to the administration, he has talked it over with fellow RQN members.

Although Nordquist has not formally submitted his plan to the administration, he has talked it over with fellow RQN members.

Nordquist said his proposed housing could be designed to suit student needs and could possibly be cheaper than the "inflated rents" students currently pay.

Although Nordquist has not formally submitted his plan to the administration, he has talked it over with fellow RQN members.

"What would be wrong if they had their own city council to discuss problems, and student police force — it would be nice if it were made up of the football team when they are not busy," he said.

"So, if they wanted to party four nights a week then they would have to live with the consequences."

Nordquist said his proposed housing could be designed to suit student needs and could possibly be cheaper than the "inflated rents" students currently pay.

Although Nordquist has not formally submitted his plan to the administration, he has talked it over with fellow RQN members.

So, even though RQN has not created a definitive proposal to solve the housing crunch, it has taken steps toward possible solutions.

MUSTANG DAILY

CHAMPS: Cal Poly finishes the season 12-9-1 as Big West Champions

From page 7: Anteater goalie Stephanie Boes. Boes punched the ball directly into the center of the penalty box where George was waiting for the pick up and the goal.

"I just sent it into the middle — high and hard — and they were there," Partida said of Holder and George. "We played good, (UGH where George was waiting for the pick up and the goal."

"Holder knocked a shot and they deflected it and I don't know, it was like right there and I went in and hit it as hard as I could and it luckily got in," she said.

UCI left Titan Stadium ranked No. 2 with a 13-7-2 record. Anteater coach Cano said he thinks Cal Poly and his UCI team are the "two best teams in the conference."

"It all came together," Crozier said. "We started off really slow, but hey, we came out on top so all that matters is the trophy," she said.

Like the rest of her teammates, George was ecstatic about the win. "We started off really slow, but hey, we came out on top so all that matters is the trophy," she said.

"We got the proof." Crozier agreed with George. "We are the Big West Champions and that is something that we always thought we should have been to begin with," he said.

"It is kind of nice being fourth seed and then working your way up to the top." When it all came down to it, in the end, the Mustangs wanted more than just the championship, they wanted redemption from a season which didn't reflect how they felt they should have played.

"It all came together," Crozier said. "I think this year was a good year, but it was also a learning year and I think in the future years, that will pay off to this group that we have coming back."

Murphy said the main point of the tournament was for Cal Poly to show everyone that they could do what they had been foreseen to do after a 15-3-1 season last year.

"We had a point to prove and I don't know why it took us this long to prove it, but it did," she said. "We had to prove that we could do it — that we are a great team. We have the heart, we just haven't been showing it and I think we showed it a lot more than we have showed it in the past. It's kind of nice that we were going out for a purpose."

With no NCAA playoff bid, Cal Poly ends its season 12-9-1.

Systems Engineering Trainees

Looking for a career, not just a job? Fireman's Fund is looking for Systems Engineers Trainees who want to solve business problems, not just apply technology. We seek people who are eager to grow and learn and who can demonstrate initiative and ownership.

Fireman's Fund leads the insurance industry in utilizing high technology and state-of-the-art computer systems in every aspect of our business. As a Systems Engineer Trainee, you will work at the Home Office in Novato, California, 30 miles north of San Francisco, near California's wine country.

Following a three month structured training program you will work in a team environment with Business Analysts and other Systems Engineers to develop automated solutions to complex business problems. You will work closely with our business partners and be able to see the impact of your work.

We require a bachelor's degree in MIS, Computer Science, Math or Statistics with a minimum 3.0 GPA and two semesters of the same procedural programming language (e.g C, C++, COBOL, etc.).

Check out our web site at www.the-fund.com.

CHAMPS: Cal Poly goalie Kristina Grigaitis ends the season with 69 saves from page 8.

Trone passed the ball to Teal, who went one-on-one with a UCI defender. With the defender to her back, Teal pushed inside until she was close enough to the goal to turn and shoot. Teal was able to sneak the ball in between Anteater goalie Stephanie Bows and the post to score her third goal of the tournament.

The Anteaters weren't ready to give up after Teal's goal and Cal Poly had to work to hold onto its lead. UCI outshot Cal Poly in the first half, 7-2. Cal Poly came out strong in the second half with 11 shots on goal and a standout performance from goalie Kristina Grigaitis.

UCCI came close to tying up the game in the 80th minute mark after Anteater Kori Zimmerman sent a head ball at Cal Poly's goal from five yards out. Grigaitis made the save and sent the ball back into play. With the ball on a goal line one minute later by George, Cal Poly clinched the championship.

Assistant coach Dan Tobias was not surprised with Grigaitis' save. "If she's not one of the best goalkeepers in the West, and maybe in the country, I don't know who is," he said. "I have yet to see that person."

UCI head coach Marine Cans was quite impressed with Grigaitis' performance. "I thought the goalkeeper Grigaitis had a great game in goal and she saved them," Cans said. "I thought during the game that's what it takes, a performance from a keeper like that to keep us back." Grigaitis left the game with 11 saves and ended the season with 69.

The game-winner came with under nine minutes left on the clock when Cal Poly was awarded a corner kick on the right side of UCCIs goal. Peterson took the kick and sent the ball to defender Stacy Bolder who shot on goal directly at the hotel manager was fired and a new convention-booking policy installed.

**Swimming and diving teams lose to Bakersfield**

The men's and women's swim teams lost a non-conference match Saturday when they traveled north to Cal State Bakersfield.

The women lost a close one by the score of 126-112. The men lost 158-74.

The women were led by Kelli Quinn and Krista Kiedrowski. Quinn finished first in the 200 meter freestyle and 200 meter breaststroke.

Kiedrowski finished first in the 200 meter backstroke and 200 meter individual medley relay.

The men had one first-place finish by Eric Wyles in the 200 meter breaststroke to lead the Mustangs.

**OVERTIME LOSS...**

Cal Poly forward Seiji Sato chases down CS Fullerton midfielder Alessio Smith during the Mustangs' 2-0 overtime loss to the Titans at Fullerton.

Three days, two games and again the after the flier with those words printed at the top were handed out, the Cal Poly women's soccer team left Southern California with smiles on their faces and a trophy in their hands.

While the NCAA postseason selection committee still didn't grant Cal Poly a playoff-at-large bid Monday, for the first time in three years, the team isn't as upset as it has been in the past.

Because this year, the Mustangs are Big West Champions!

Cal Poly left San Luis Obispo with a bid Monday, for the first time in three years, the team isn't as upset as it has been in the past.

Because this year, the Mustangs are Big West Champions!

George echoed Teal, but spoke about UCI.

"We wanted to beat Irvine really bad, because they beat us the first time," George said. "Kinds like a whole revenge thing and to prove to everyone that we were better than what our record said."

Friday night's game against Fullerton was delayed by half an hour after the No. 2 seed UCI beat No. 3 UOP in overtime, 2-0, to qualify for the championships.

Head coach Alex Crozier helped ready the Mustangs for the Titans with a few lineup changes and a different defensive stance.

He pulled usual forward Patty Greenman to right wing in defense, moved midfielder Gina Moss to stopper and placed defender Alison Murphy into the midfield.

Crozier said with these changes and a move from a marking to a zone defense, the Mustangs were able to contain the Titans better than they did in the past.

Midfielder Nicole Gunson said the level of confidence that the team had also helped them out.

"I think a lot of it had to do with the attitude we had going into the game," Gunson said. "We were real big on that, being positive with each other, pulling for each other. We had so much confidence going into the game, we knew we were going to win."

Cal Poly's first paced, physical first half of play paid off for the team with an early goal at the 20-minute mark by Gunson.

The second half of the game was no different for the Mustangs, with Teal finding the back of the net once more, this time at 56:56. Teal secured Cal Poly's 3-0 win at the 76:36 mark after Lehtonen headed the ball to midfielder Amy Earle. Earle then passed it off to Teal who drove down the left side of the field and scored.

All told, Cal Poly ended the game with 13 shots on goal, while Fullerton had 10. The Titans ended their season with a 13-4-2 record.

Teal's shooting spree continued into Sunday's championship match-up with UCI.

"Teal was on fire," said midfielder Rhonda Partida. "She was just everywhere."
