Patterson will leave Cal Poly; takes job with New England Patriots

By Melissa M. Geisler

Three years of coaching the Cal Poly football team and turning down two different NFL coaching positions after his first two seasons, Andre Patterson finally got offered a job that he just couldn’t refuse.

When the Kansas City Chiefs and the Tampa Bay Buccaneers came a-knocking on Patterson’s door after the 1994 and 1995 seasons, many were surprised he gave them both the big “NO”.

But just last Tuesday, the New England Patriots tried Patterson’s door and this time there was no hard wood closed in their faces, rather an announcement was made three days later that he had accepted a job as Assistant to the Defense Coordinator.

Not many college football coaches can say with a smile that they have said no to not one, but two different NFL coaching positions.

Andre Patterson says he got a call Tuesday at home from new Patriot head coach, ex-San Francisco 49ers defensive coordinator, Pete Carroll.

“My wife called me up and told me Carroll was trying to find me,” he said. “Carroll told me, ‘I want you to get on a plane Wednesday morning and come visit with me.’

“So, I got on a plane, met with Carroll Wednesday evening, interviewed with the coaching staff Thursday morning and came home late Thursday,” Patterson continued. “Then they called me late Friday and told me I had the job. It all happened pretty fast.”

On Friday, Cal Poly Athletic Director John McCutcheon and Senior Associate Athletic Director, Dr. Phil Puser announced Patterson had accepted the new position.

Friends of missing paraglider Rejlek looking for help to continue searching

By Christine Spone

The search for missing paraglider pilot Peter Rejlek is now in its second month. Rejlek, 35, was reported missing the evening of Jan. 28 when he failed to return to his take-off point at Montana De Oro State Park.

A group of friends and volunteers have searched for him daily since then.

Kathryn Ryan, press liaison for the Volunteer Search Group, said Saturday that a few key members of the group plan to meet with San Luis Obispo County Sheriff Ed Williams today to discuss the future of the search.

“Our efforts to find Peter have been stymied at the local and state level because of some confusion at the office of Sheriff Ed Williams,” Ryan said.

Ryan said that in order for the volunteers to get help for the search, Williams needs to issue an official emergency order calling for volunteers or military assistance. So far, Williams has not issued an order.

"Our efforts... have been stymied at the local and state level because of some confusion at the office of Sheriff Ed Williams."

Judge Ware remembers civil rights movement in Cuesta College speech

By Selena Loy

His speech has received standing ovations at Cal Poly and Cuesta College. U.S. District Judge James Ware of the Northern District of California, spoke at Cal Poly’s 1996 commencement and was a guest speaker at Cuesta College last Friday.

His speech marked the end of Black History Month celebrations at Cuesta College. Ware, born in Birmingham, Ala., took the audience through events that shaped his life.

As he spoke, pictures of his family and Dr. Martin Luther King Jr. were shown on a big screen.

He remembered having a happy household.

“I learned in the course of that time not to be afraid of anyone,” Ware said.

He spoke about going to school in segregated Alabama. “It wasn’t until I got to school and started to have my eyes open to the system that I started to realize the impact of segregation,” Ware said.

He started at an all-black elementary school in 1954.

“You will recall that in 1954 the United States Supreme Court declared segregated education unconstitutional,” Ware said. “Eight years later, I graduated from an elementary school still segregated.”

Ware also spoke about steps he took in attempt to end segregation in Birmingham.

“In January of 1963, George
TUESDAY

Study Spanish this summer in Mexico. The foreign languages and literature department is having an open meeting March 4, 11:10 a.m.-12:00 p.m., building 02, room 126-127 or 11:45-12:30 p.m., building 10, room 236. For more information, call 756-1205.

The Zoological Society of San Luis Obispo County presents an orientation for new and prospective docents and volunteers of the Charles Paddock Zoo on March 4, 10 a.m.-12 p.m. at the zoo. For more information, call 461-5083.

WEDNESDAY

The Big Brothers/Big Sisters of San Luis Obispo County will be holding a Volunteer Orientation on March 5, 6:7 p.m. at the Juvenile Services Center in San Luis Obispo. For more information, call 781-3226.

The Pacific Rim Group presents Art and Design Professor George Jewisch who just returned from Thailand. Come share in his journey as he shows slides from his recent sabbatical leave March 5, 11 a.m. in building 54, room 127. For more information, call 756-2011.

THURSDAY

The Senior Cabinet is sponsoring Winners for Seniors March 6, 11 a.m.-1 p.m. All graduating seniors of 1997 are welcome for free hot dogs on Mott Lawn. For more information, call Jessica Saldana at 548-9692 or Kate Picten at 541-0871.

There is a mandatory Open House meeting March 6, 11 a.m. in the business building, room 217. All clubs must attend and booth placement will be jeopardized if you do not attend.

The College of Architecture and Environmental Design and Department of Art and Design presents its second workshop to show the Cal Poly Plus funded Rendering Animation and Modeling Lab (RAML) March 6, 6 p.m. in RAML, Deuter 193. For more information, call 756-1313.

The Provost’s Office presents “When Worlds Collide: The Impressive Emerging Cooperation Between the Arts and Technology,” a presentation by Larry Fredland, English Literature and Theater Professor at Stanford University March 6, 11 a.m. in building 03, 213.

FRIDAY

Nominations are due for the Twelfth Annual President’s Awards For Community Service March 7 at the U.U. 217 desk. Forms are available at the Student Community Service Center or The Student Life & Activities desk. For more information, call 756-5839.

SATURDAY

The Fibromyalgia Support Group presents a meeting March 8, 1-3 p.m. at the Sierra Vista Regional Hospital Audiorium. For more information, call 773-8779, or 473-9376.

ANNOUNCEMENTS

Zeta Beta Sorority, Inc. presents Fine Womanhood Week which runs through March 8 to celebrate and acknowledge the principles of scholarship, service and sisterly love. Such activities will include a Black nutrition health workshop, career workshop, and a weekend dance. For more information about the planned events, call Kebbie at 547-6720.

The IRS’s Volunteer Income Tax Assistance program and Cal Poly Accounting Students are offering a Free Tax Preparation Service from 9 a.m.-1 p.m. Saturdays, 4:30-8:30 p.m. Wednesdays at Central Coast Plaza and from 1-4 p.m. Saturdays in the Santa Maria Mall next to Sears. For more information call 756-2667.

There is a proposal to increase the Campus Academic Fee, and A.S.I. Is Seeking Student Input!! A voter pamphlet will be sent to all students on the Cal Poly Plan Poll This pamphlet will include a "pro statement" and a "con statement." Students are encouraged to submit "pro" and "con" statements to A.S.I. for possible use in the pamphlet. To complete a statement, pick up forms at the: A.S.I. Executive Office, UU 217A

Forms must be submitted by March 5, 1997

There’s a proposal to increase the Campus Academic Fee, and
Coffee and hard drives - New cybercafe opens in Morro Bay

By Jenny Justus
Daily Staff Writer

Imagine being able to travel from an ice world to the desert in a matter of seconds with just the click of a button. You can do this if you visit the virtual reality chat room put together by the owners of 2 Dogs Coffee in Morro Bay.

The new coffee shop is one of two cyber-coffee houses in the county, but it is the only one with its own cyber chat house done in virtual reality.

2 Dogs Coffee owner John Der Garabedian said the virtual reality chat house is just a part of the whole 2 Dogs experience.

"We're not a stiff corporate Starbucks-type coffee place," Der Garabedian said. "We have local artists displayed on the walls and feature local bands. We also offer the highest quality coffee we can put out."

Der Garabedian and his partner Billy Clayton started selling coffee on the Morro Bay Embarcadero a year and a half ago, and moved into their current location two weeks ago.

"I decided that we should have a web page," Clayton said. "I thought like everyone else if I put up a page I'd sell lots of coffee and make lots of money."

Clayton approached his friends, animators Scott Grocott and Ross Jerdin, and asked them to build a 2 Dogs web page. They put the page on some search engines and didn't get many people looking at it, so Clayton began to research what was popular on the Internet.

"I found that newsgroups and chat houses were the most popular pages, so I looked to see what the next step for chat houses was and came across the virtual reality chat room," Clayton said.

So, Grocott and Jerdin created a chat house for 2 Dogs.

According to Grocott the chat house is a three-dimensional navigational environment. People go into the site and pick an avatar, or character, and walk through the environments chatting with other people present.

"It's basically a real fancy chat room that looks like a video game," Grocott said.

Grocott said the 2 Dogs chat room is a prototype type for what can be done in the future.

"There are companies working on software for this stuff right now," he said. "Eventually it will evolve into people being able to come into 2 Dogs and talk to people from all over the world. We are way out in front of the technology right now, we're waiting for the technology to catch up with us."

The mayor of Morro Bay, Kathy Novak, cut the ribbon of the new cyber café to the new shop Feb. 15 both in real-life and in virtual reality.
Pols, referendums and surveys...oh my!

**STEVE ENDERS**

The comments to the right serve as "an open letter to the Cal Poly Community." Usually this newspaper chooses not to run such letters. We feel that students can make up their own minds, and don’t need propaganda to come from their campus papers. Unfortunately, a majority of the "news" in today’s media consists of the same type of writing you just read. With such inundation of other people’s agendas these days, the opinion page is definitely not the place for this kind of thing.

Why did we run it?

So we could offer a reply and shed light on the doings of the Steering Committee. I’ve heard criticism over the past two quarters that Mustang Daily hasn’t done enough to inform on the Cal Poly Plan. I disagree wholeheartedly. We feel that we need to offer a reply and shed light on the doings of the Steering Committee. I’ve heard criticism over the past two quarters that Mustang Daily hasn’t done enough to inform on the Cal Poly Plan. I disagree wholeheartedly.

Unfortunately, a majority of the "news" in today’s media consists of the same type of writing you just read. With such inundation of other people’s agendas these days, the opinion page is definitely not the place for this kind of thing.

Why did we run it?

So we could offer a reply and shed light on the doings of the Steering Committee. I’ve heard criticism over the past two quarters that Mustang Daily hasn’t done enough to inform on the Cal Poly Plan. I disagree wholeheartedly.

Without getting into one of my rantings about apathy and non-participation, I’d like to critique the survey the Steering Committee has done. I have not heard a lot of talk about how "Baker’s just going to do it to them," but if you don’t mind, I’d like to ask you why you think Baker is going to do it to you, why, oh, why?

To assist the Steering Committee in prioritizing how the funding is used, please indicate the level to which you support increased funding for each of the following purposes:

1. Increasing the availability of classes in majors.
2. Improving teaching effectiveness.
4. Obtaining state-of-the-art equipment for laboratories and classrooms.
5. Improving academic advising.
6. Expanding student access to advanced computer laboratories.
7. Increasing availability of general education classes.
8. Obtaining advanced computer technology (hardware and software) to support instruction.
9. Improving electronic access by students and advisers to student records.
10. Improving and expanding course scheduling.
11. Providing efficient on-line access to data bases, instructional services and student information.
12. Expanding academic assistance programs, (e.g., study groups, tutorials).
13. Reforming curriculum to improve educational quality.

The seven choices range from "do not support" to "strongly support" and include an undecided option.

**AN OPEN LETTER TO THE CAL POLY COMMUNITY**

Who came up with the goals for the Cal Poly Plan? How were the priorities set? And who decided on the financing? Much of the current publicity about the Cal Poly Plan emphasizes its purposes—such things as improving educational quality and helping students progress toward their degrees. And the campus is host to a lot of the projects under way to meet these purposes.

Other discussions focus on how the plan is financed—building a funding partnership with the state and private contributors, freeing up resources by being more efficient in how we support education, providing for financial aid and charging students a campus academic fee.

However, letting the campus know how the Cal Poly Plan was developed and is being managed is just as important as what it is trying to do. Shared governance and campus consultation are the foundations of the Cal Poly Plan.

This has to be precisely the way they wanted it. I’m sure that’s the way the constituents wanted it.

Late in the summer, I offered general support of the Cal Poly Plan. I still support its goals, probably like most on campus do. On the other hand, I’ve heard a lot of talk about what students want, how they’re feeling. I understand why student participation is important. I just wonder if it’s the only way to meet these goals.

The comments to the right serve as "an open letter to the Cal Poly Community." Usually this newspaper chooses not to run such letters. We feel that students can make up their own minds, and don’t need propaganda to come from their campus papers. Unfortunately, a majority of the "news" in today’s media consists of the same type of writing you just read. With such inundation of other people’s agendas these days, the opinion page is definitely not the place for this kind of thing.

Cal Poly Plan Survey

Below are the questions asked on the Cal Poly Plan survey administered to 1000 students last week. The same questions will be asked of students during the upcoming poll, April 30 and May 1.

---

STEERING COMMITTEE

First, the Cal Poly Plan Steering Committee represents all parts of the campus community.

Beginning in the summer of 1996, student leaders have been participating as equal partners with faculty, staff and administrators to develop the plan. Meetings are open, attended regularly by a Mustang Daily reporter and other observers.

Second, members of the Steering Committee are committed to working with the students and the Academic Senate and staff to improve programs.

Students report to the ASi Board of Directors about the plan, faculty brief the Academic Senate and staff use their newsletter to keep everyone informed and to ask for their input. The California Faculty Association is represented on the committee.

Third, the priorities for the Plan are based on systematic analysis of what students need to be successful.

To get this information, the Steering Committee has asked questions during CAPTURE registration and sponsored a series of formal surveys. During fall 1995, students, parents, alumni, faculty, staff and advisory group members were asked about Cal Poly’s needs. The Steering Committee also sponsored focus groups and forums to provide opportunities for a deeper discussion of issues.

---

DRAFTING AND CONSIDERATION OF FIRST YEAR

Using this information, the Steering Committee is developing a plan that was circulated to the campus in spring 1996. Also, we decided to select projects using the Responsibility and Priority Plan process to encourage the entire campus community’s involvement in the Plan. The priorities in the RFP emerged directly from the survey results.

The Steering Committee went back to the students in May 1996 to review the plan’s emerging goals and priorities, and to ask students for support for the Plan and the campus academic fee.

Again, students were asked through formal surveys, but students not served through the surveys also had a chance to voice their opinions by completing the campus-wide ballot. While the detailed answers varied a bit, both the survey and the open process showed that the majority of the students supported the Plan and the proposed fees.

With this evidence, Cal Poly took the Plan to the CSU Board of Trustees in June 1996, and the Chancellor’s Office approved the first year, with the expectation that Cal Poly would continue to consult students and the rest of the campus community as the Plan moved forward into its next phases.

---

NEW SURVEYS AND POLLS

During 1996-97 the Steering Committee has continued to refine the Plan, working primarily on the second year of projects. Another major task is keeping the campus informed to ensure ongoing support. That is why we designed a new set of scientific surveys and two polls.

To keep up-to-date with student needs and opinions, the Steering Committee is sponsoring surveys during winter and spring quarters. Some of these are focused on new freshmen and transfer students who have come to campus since last year’s surveys were completed. Others will go to continuing students and to parents.

In addition, the campus will follow all of the rules established by the Board of Trustees for seeking student opinion through surveys and interviews.

The Steering Committee chose the term "poll" to describe this process because it is a legitimate form of student consultation and not a referendum. We felt that we need- ed student opinion about all parts of the plan —its goals, project priorities, funding strategies— not the campus academic fee alone. This more complete form of consultation is yet another way in which the Cal Poly Plan is innovative and inclusive.

The Steering Committee approved the same 16-questions for the formal surveys as for the poll. That way, we felt that students will become familiar with the Plan as a whole before they register their opinion on April 30 and May 1.

Submitted by the Cal Poly Plan Steering Committee.

"Let’s all come in a circle"
The B.O.B. Trailer Nationals brought some comedy relief for fans and racers in the creative cargo.

The manufacturers. "It gives us a chance to thank local suppliers during long trips.

Each participant in the B.O.B. nationals was required to pull a loaded B.O.B trailer around the country’s largest and of the most bicycles and can be used for touring, commuting and camping.

Noller an employee of B.O.B Trailers, the local manufacturer. "It gives us a chance to thank local suppliers during long trips.

The gene appears to be about 20 times more abundant in the body than the protein from UCPI. So the newfound protein is probably a better bet for weight loss, he said.

That would raise body temperature, estimated researcher Craig Warden of the University of California, Davis.

"I think this is probably a major discovery for obesity," said Dr. Albert Stunkard, University of Pennsylvania.

If scientists can prod the gene into making more of this energy-stealing protein, cells would have to burn still more calories.

Researchers already know of another gene that promotes weight gain and fat cells, and drug companies are studying drugs to make it more active. But that gene, called UCP1, is active only in brown fat, which is sparse in adults.

In contrast, newfound gene UCP2 is at work in every human body tissue. Researchers have checked, said exceptionally interesting and provocative," said Dr. Jeffrey Flier, who studies obesity at the Beth Israel Deaconess Medical Center in Boston.

Flier agreed the discovery might lead to weight-loss drug. But first biologists have to figure out what turns the gene on and off, he said.

Still, he said, "I'm pretty excited about where this is going."
Lott suggests possible amendment changes to get Democrat votes

By Jim Abrams

WASHINGTON - Senate Majority Leader Trent Lott offered Sunday to alter the Republican-passed balanced budget amendment, a last-ditch effort to capture the one additional Democrat vote needed for passage.

"If we could make a change or two in a minor way that would get us another vote or two, we would consider doing that," Lott said on CBS' "Face the Nation."

A showdown Senate vote is Tuesday, and Lott confirmed that he still has only 66 votes, one short of the two-thirds majority needed for an amendment to the Constitution.

The showdown over the budget amendment came as Republican leaders renewed warnings that President Clinton's plan to balance the budget by 2002 would result in tax increases while falling up to $80 billion short of the balanced budget goal.

House Majority Leader Dick Armey, interviewed on NBC's "Meet the Press," asked Clinton to reconsider doing that, "We are considering making a change perhaps in the numbers that it would take to get out of the balanced budget in a recession or a national security emergency."

The chief sponsor of the Republican bill, Senate Judiciary Committee Chairman Orrin Hatch, R-Utah, said on NBC that there were two potential Democratic crossovers. He didn't name them or offer details when he said that even if he loses Tuesday's vote, "There are some other things little old Orrin has up his sleeve."

Lott admitted Republican votes might be lost if the amendment is watered down to pick up a Democratic vote. So far all 55 Republican senators and 11 of the 45 Democrats have announced for the GOP measure.

"We need this additional leverage of a constitutional amendment because new figures will show that Clinton's outline for a balanced budget by 2002 will fall $80 billion short, Lott said.

Armey and two other GOP leaders, House Speaker Newt Gingrich and Senate Majority Whip Dan Noggle, sent a letter to Clinton on Sunday asking him to rewrite his tax proposals.

Quoting an analysis by the Joint Committee on Taxation, they said Clinton's budget, which the administration says has a net tax cut of $22 billion through 2002, could result in a $13 billion tax increase in 2001 and a $23 billion net tax hike over 10 years.

"We were extremely disappointed to learn from independent analyses this week that your proposed balanced budget, rather than providing tax relief, would impose a significant tax increase on the American people," they wrote.

The Republicans base their figures on language in Clinton's plan that some of the administration's proposed $98 billion in tax relief would expire on Dec. 31, 2000, if it appears that budget targets cannot be met.

Lott, the White House said Thursday it expects those tax cuts to be extended. "The president's confident that the budget that he's presented will balance by the year 2002 and also achieve the tax relief that he has proposed," said White House spokesman Mike McCurry.

President Clinton addressed the threat of a government shutdown by proposing $98 billion in tax relief this year and also achieving the tax relief he has proposed, McCurry said.

The White House said McCurry was tickled to death that Gore was so aggressive, and that without the vice president's efforts Clinton would have lost re-election.

But a pair of Democrats called the solicitations 'inappropriate.' And Republicans pushed Attorney General Janet Reno to appoint an independent counsel to investigate fund raising during the Clinton administration.

As politicians wrangled over how to address the growing revolts of political fund raisers, irregularities, some saw the wrangling itself as evidence that sweeping campaign finance reform is needed.

"Even what's legal now is a scandal," said Sen. Paul Wellstone, D-Minn.

The Democratic National Committee said Gore was the main attraction at 39 DNC events in 1995 and 1996 that raised $8.74 million.

"There's nothing surprising about the fact that an incumbent vice president is working hard to re-elect an incumbent president," DNC spokesman John Litt said.

The Washington Post reported that Gore's fund-raising network raised $40 million of the $180 million collected by the DNC for the 1996 campaign.

"There's nothing surprising about the fact that an incumbent vice president is working hard to re-elect an incumbent president," DNC spokesman John Litt said.

The newspaper reported that several donors privately criticized that Gore's calls were inappropriate.

Many of those contacted operated businesses that relied on government contracts or assistance.

Such calls, said White House special counsel Larry Davis, are "appropriate so long as there's no promise of a quid pro quo.

In one instance DSC Communications of Texas reportedly gave a $100 million contribution to the Democrats as a "thank you" for the Commerce Department's efforts on behalf of DSC's bid to win a $36 million telecommunications contract in Mexico.

Davis said the Commerce Department's mission is to boost U.S. businesses abroad and that the donation influenced no government action.

"Vice President Gore was part of an effort to compete against the Republicans," Davis said on CNN's "Late Edition."
Fate of first black LAPD chief remains in the air

By Dora Akiko Tom
Associated Press

LOS ANGELES - The man hired to restore the Los Angeles Police Department's reputation has convinced the people on the street but not the cop on the beat.

New his job is on the line.

Wille Williams, the city's first black police chief and the only one hired from outside the LAPD in 50 years, also has angered the mayor and the city Police Commission, which warned in 1995 that he was on thin ice.

Williams inherited a department shamed by the Rodney King beating and its failure to control bloody riots that erupted in 1992, the Los Angeles Times reported last week.

In a letter requesting a second five-year term as the city's 50th police chief, Williams said he fulfilled his promise of more patrols in the nation's second-largest city and promotions for minorities and women.

"Due in large part to my efforts, the once-exceptional reputation of the LAPD has been largely restored," Williams wrote.

In a recent Los Angeles Times poll, 66 percent of residents surveyed approve of Williams, compared with 56 percent last June. More than half feel as safe or safer than they did five years ago.

When he took the job in 1992, Williams pledged to adopt reforms recommended by the Christopher Commission, a blue-ribbon panel that chronicled racism and brutality in the department of his predecessor, 14-year-Chief Daryl Gates.

Since Williams arrived in Los Angeles from Philadelphia, where

Peruvian leader flies to Dominican Republic for meeting on hostages

By Michelle Pou
Associated Press

SANTO DOMINGO, Dominican Republic - Peruvian President Alberto Fujimori flew Sunday to the Dominican Republic for talks on asylum for the rebels holding 72 hostages in Lima. Fujimori played down the sudden, one-day visit, saying before he left Peru that "refuge, or an exit to another country, might be necessary at some point and therefore we're talking about this infor-

Friday, Fujimori flew Sunday to the Dominican Republic for talks on asylum for the rebels holding 72 hostages in Lima. Fujimori played down the sudden, one-day visit, saying before he left Peru that "refuge, or an exit to another country, might be necessary at some point and therefore we're talking about this infor-

nance. Fujimori and the Peruvian leader went directly from Santo Domingo's international air-

port to Fernandez's private residence, an apartment in the El Vergel neighborhood, for closed-door talks.

Fernandez's presidential spokesman declined to discuss the purpose of the meeting. In announcing the trip on Saturday, Fujimori's spokesman, Israel Jimenez, said it was "a matter of conver-

tant." Before leaving Peru, Fujimori said that the Dominican Republic might not be an acceptable destination for the rebels, rais-

ing speculation it might be considered as a temporary refuge.

About 15 guerrillas seized the Japanese ambassador's residence in Lima during a gala Dec. 17. They have freed hundreds of captives but still hold 72 men, in part because of the ambidex of Japan and Balvina and several high-ranking Peruvian officials.

A Peruvian official said he was accompanied Fujimori on the plane said officials had indicated he might also travel to Cuba and Bolivia and several high-ranking Peruvian officials.

Official sources confirmed nor deny the reports, but Fujimori said Sunday morning that he had contacts with other countries "which I cannot make public." See PERU page 9

Bullfight fans angry at empowerment as Spanish matadors begin strike

By Gary Abramson

MADRID, Spain - Furious fans circled an empty bullring Sunday as the bullfighting season began with a matadors' strike unprecedented in the history of Spain's "national fiesta." Thousands of angry fans lined up Sunday for refunds.

"I bought a week's pass for my family," said Carlos, one of the few fans who showed up. "I can't believe they're doing this." "They've done it before," said another fan, "but never like this." "This is a climate favorable to understanding," he said. Politicians and others nearby disagreed and the strike could mean canceled fights and matadors at an advantage.

"Those bullfighters better not walk out or risk facing the fury of the crowd," said Juan Sales, a bullfighting professional.

Bullfighting's continuing popularity in Spain is an example of its resilience and its appeal. Its enduring popularity is a testament to the skills of the matadors, the artistry of the bullfighters, and the enduring appeal of the sport. Bullfighting is not only a sport, but also a cultural experience that is enjoyed by millions of people around the world.

time is even better than I could have dreamed of before the season started."

Sunday's game was an offensive show by the Mustangs, who had 20 runs on 22 hits. Eight different players had RBI to contribute to the onslaught. Taber led the way with four RBI, including a three-run double in the third and a run-scoring double in the sixth.

"I thought it was a solid performance. I was really pleased with the way we swung the bat," Price said. "I thought our defense was outstanding. It was a good, solid win."

The series sweep may be enough to get the Mustangs into the top 25 in the country. "I think our players deserve to be ranked nationally, so I hope this will jump us into the top 25," Price said.

Mustang left-fielder R.J. Radker had three RBI and right fielder John Arnold had a two-run home run to give him two RBI for the day. The third inning was the Mustangs' biggest, sending 14 runs scoring 11 players to the plate and scoring 11 runs.

Dolan pitched five innings, giving five runs on nine hits to grab his second win of the season. More importantly, senior pitcher Jason Novi, who is recovering from arm surgery, pitched two innings of scoreless ball, giving up only one hit.

"We came out and attacked and after last night's game it's good that it all came together offensively," Maier said. "It's a good tune-up for next weekend, to pickup three wins."
Wheelnmen sweep the streets with speed

At 8 a.m. Saturday, more than 100 Cal Poly students took off to Santa Margarita Lake to represent the Cal Poly Mountain Cycle Wheelnmen.

As the kickoff to a weekend of competition, the Wheelnmen hosted team time trials and a road race on Saturday. On Sunday, the Juise Criterium was held in downtown San Luis Obispo.

On Saturday, the Cal Poly women came in second behind U.C. Berkeley with a time of 32:02 in the team time trial. The men’s “A” division came in fourth behind Stanford, U.C. Santa Barbara and U.C. San Diego with a time of 28:15, and the men’s “B” division came in second behind UCSB with a time of 28:50.

The race was a 30-mile loop with 2,000 feet of vertical climbing per lap. According to Wheelnmen President Brandt Ferguson, the climb is not very long, but short and powerful.

“Powerful riders do very well in this race,” Ferguson said.

The women’s “A” division road race was won by San Diego State University’s Beverly Anderson. In the “B” division, Cal Poly’s Becki Frasier placed third.

According to race director Brian Chapman, two of the women crashed head-on into an oncoming car. Cal Poly’s Mariah Koeng was taken to the hospital for minor injuries.

In the men’s “A” division road race, Cal Poly’s Frank Moustirats placed fourth behind UCLA and Stanford cyclists. Cal Poly captured first and second place in the men’s “B” and “D” division and first in the “C” division.

Brian Chapman, two of the women 3 in the “A” division, with Jeanne Jenner Nelson took second. and San Diego State University’s Chris Mathis, Brandt Ferguson, and Greg Gilbert taking the top Daniel Pieracci placed first and male dressed in a bra and G-string with a time of 28:50.

The College Series takes place between February and May. Competing almost every weekend, each team’s top 10 races are awarded points. From this, the top 12 schools are invited to confer The crowd out here is wonderful, Ferguson said. “It’s fun to hear everyone screaming your name when you go around the corner.”

Creative cargo ranged from a male dressed in a bra and G-string with bicycle wheels in his trailer, to another male with a helmet camera and generator-powered blender mixing margaritas for fellow racers.

Baseball sweeps again

If the college ranking system had any doubt whatever Cal Poly should be in the top 25, they needed to do is look at the team’s 17-2 record and how they manhandled Portland State this weekend.

The Mustangs swept the three-game series, taking Friday’s win 12-1, Saturday’s game 8-7 and Sunday’s game 20-5.

“The game against Portland State was a really good game,” said head coach Ritch Price. “To be 17-2 at this point in the season is really proud of our low racers. See BASE page 10
