Prop 209 affects admissions process

By Christian Speere
Daily Staff Writer

Recently the Supreme Court unanimously rejected a challenge to California’s Proposition 209. The Supreme Court appeal was made by the American Civil Liberties Union which claimed government sometimes has a duty to employ race preferences to make up for past or present discrimination against minorities.

The justices agreed with a lower court ruling which said the U.S. Constitution requires the government to treat all people equally, regardless of race or gender.

Until the beginning of the fall 1998 admissions process, bonus points were given to Cal Poly applicants for race, gender and ethnicity. This practice is now illegal under Proposition 209.

Cal Poly Admissions Director Jim Maraviglia said the applicant selection process has remained the same except for the area in which Proposition 209 applies.

There are still a number of areas in which applicants can receive bonus points, Maraviglia said. "If a student is a local resident, or is a transfer student from any California community college or is a veteran, bonus points are applied.

Maraviglia also said special consideration could be earned through the "university interest" process.

This category would include athletes or any other area in which a particular college may be interested in bringing in a group of specialized students. It also includes faculty and staff children who have completed all the requirements in local community colleges but cannot relocate due to family commitments.

He said university interest points are earned and applied for after one is rejected through the application process, except in the case of athletes.

"Unlike any other place in the state of California, this is a selective admission process," Maraviglia said. "Unlike any other CSU, our faculty has actually designed tools to select students. And unlike any other (SU, meeting minimum standards isn't enough in all majors."

Maraviglia said Cal Poly receives over 20,000 applications, but can only admit about 3,000 students each year.

"Cal Poly is a highly selective campus. That selectivity is one of the major reasons why we are always listed as one of the best public institutions in the West by U.S. News (and World Report)," Maraviglia explained that he had "lost" the most applicants to other CSU, our faculty has actually designed tools to select students.

"We don't know who is going to be within the pool of applicants and how competitive they're going to be or if they're going to meet the academic cut," he said. "The demographics differ each quarter."

"Everyone enrolled at Cal Poly should know that they earned admission into this institution," he added. "They each had to meet standards that the faculty set. And those that they just don't want CSU eligible, they want better."

Drunk driving simulator comes to campus

By Telson Luy
Daily Staff Writer

Students are invited to drive drunk on campus Tuesday. No alcohol, however, will be involved.

With the help of the Chrysler Corporation's Dodge/Plymouth Neon Dking Simulator car, students will be able to see the effect alcohol might have on their driving abilities.

The DU L simulator car uses a special computer program that simulates the number of drinks needed for a person of a specific weight to become driving impaired.

Jeff Cole, owner of Stanley Motors Chrysler Plymouth Dodge, was responsible for bringing the car to San Luis Obispo.

Mary Peracca, prevention specialist for Drug and Alcohol Services of San Luis Obispo County, said she and Cole worked at getting the car to San Luis Obispo for more than a year.

"We've worked together and wanted to bring the car into the area when he heard about it," Peracca said. "He just thought that our youth needed to have that experience. We were just thinking about the same thing at the same time."

Public Safety Officer Lori Hashim was able to arrange the DUI car's campus visit through her involvement with Drug and Alcohol Services of San Luis Obispo County.

Hashim, who's on special assignment at the dorms to educate students about drugs, alcohol and crime prevention, said the car will help students learn about the effects of alcohol on driving.

"I think the car will awaken students not to want to drink and drive," Hashim said. "Sometimes a person can have two drinks and think it's no big deal and they're not drunk, but we'll show them that two drinks can impair you."

Hashim said an obstacle course with cones and fake pedestrians will be set up at the Transportation Services parking lot, behind the Receiving Warehouse and across the street from the North Mountain dorms, between 11:30 a.m. and 3:00 p.m.

Hashim said each participant will drive through the obstacle course twice. The student will drive the first lap sober without any computer simulation. Then he or she will go through the course again. This time an instructor will ride in the car, and the computer will simulate how that person would drive after drinking a specific amount of alcohol.

"They take the student's weight and height and whether they're male or female and they punch a button on how many drinks will be needed to impair that person," Hashim said.

She said when the students drive...
Hey...it's Rose Float Week!

MONDAY
Calling all architecture majors! Award-winning architect Mark H. Singer will speak in the College of Architecture and Environmental Design’s “Hearst Lecture” series. This free lecture is called “Spaces Suspended in Time” and will take place in Building 3, room 213. That’s the rotunda room of the Business Building. Be there at 7:30. For more information, call 756-1321.

“Women and Welfare Reform” is the topic of this Women’s Studies Lunch Time Seminar in the Staff Dining Room from 12:10 p.m. - 1 p.m. Political science professor Dianne Long will explore the issue.

TUESDAY
There’s a Poly Forum about the Rose Float from 7:30 a.m. - 9 a.m. Weather permitting, it will take in the Rose Float flower field. If the field is too wet, there will be a sign posted directing attendees to the event. Presentations on float building will be given by those in charge of designing, decorating and constructing the float. For reservations and directions, call 756-1590.

Dr. Rene Bravo, who announced then withdrew his intention to run for the 22nd District Congressional seat vacated by Walter Capps, will come to campus to speak. The lecture will be at 11 a.m. in Building 10, room 231. It’s sponsored by the Cal Poly College Republicans.

WEDNESDAY
Career Services is having a workshop about preparing for a job fair. Be there in Building 124, room 224 at 2 p.m.

THURSDAY
It’s Rose Float night at Farmer’s Market. See the “50 Years of Floats” display and learn about the different aspects of producing an award-winning float.

Listen up...English professor John Battenburg is going to talk about his experience as a Fulbright Professor in Tunisia. The lecture will highlight his professional and personal insights gained from his two years in the North African country. Everyone is invited to this free presentation at 7 p.m. in room 202 in the Science North Building.

FRIDAY
Everyone’s invited to the lecture, “Aces of Dutch Graphic Design: 1920 - 1940.” Lecturer Michael Braley will examine influential graphic designers and educators from the Netherlands. Braley is a graphic designer from San Francisco whose printed work is widely respected in his field. Be there in Building 34 (Dexter) room 150 at 7:30 p.m. Non-members of the Art & Design Department Club 34 will be charged a $2 fee.

Career Services is having a workshop about preparing for a job fair. Be there in Building 124, room 224 at 10 a.m.

ANNOUNCEMENTS
Alcoholics Anonymous is holding meetings every Tuesday from 11-noon at the Health Center, room 153. Everybody is welcome.

Special Olympics needs your help! Volunteers are wanted for the “Floor Hockey Fiesta” on Saturday, Dec. 13. The event will be held from 9 a.m. to 4 p.m. at Cuesta College. Volunteers are needed for all aspects of the tournament and no experience is necessary. Call Special Olympics at 544-644 to sign up.

Just what you’ve been waiting for...the Open House Poster Contest is here. Open house isn’t until April, but the your poster could be the one used to advertise the event on campus, throughout SLO County, and statewide. The poster could be painted, drawn, or created using any medium that can be printed on paper. For guidelines, visit the Open House website at www.csc.calpoly.edu/~open_house. Designs are due in U.U. room 217 by Dec. 4. Get creative!

Mustang Daily wants to take this moment to tell you to have a wonderful week!
Speaker discusses violence factor in 'millennial religions'

By Kelly Victoria Yonker
Daily Staff Writer

Branch Davidians, Heaven’s Gate—two examples of a group of ordinary people who committed to their religious group so greatly they got caught up in systems and a cult-like environment. Ultimately, the result was violence and death.

"The presentation was part of the 'Philosophy at Poly' speakers series, sponsored by the philosophy department," Wessinger, associate professor of religious studies at Loyola University in New Orleans, commented and discussed Jonestown, the Branch Davidians, Aum Shinriko, the Montana Freeman and Heaven’s Gate in order to present features of "millennial religions" which have the potential to end in violence.

"Religion is defined as 'ultimate concern,' it is the most important thing in the world," Wessinger said. "These groups would do anything for their ultimate concern.

As the year 2000 approaches, millennials increasingly seek a collective salvation as a part of the "millennial kingdom. Salvation in all forms is desired because of the limitations of the human condition.

Some groups believe this new era will occur on earth, while others believe it will be in heaven. Though the year 2000 is significant for these groups, Wessinger said it is not as momentous as some might think.

"The year 2000 is just an arbitrary date on the calendar," she said. "People get excited about it. The year 2000 was not 2,000 years after Jesus was born since scholars generally believe that he was probably born in 4 or 6 B.C. But millennialism is rooted in destroying the old world before entering into the new one. Those who embrace it believe the millennial kingdom will come violently.

Wessinger said all millennialists have a strong belief in dualistic beliefs: God vs. Satan, and us vs. them. The first group Wessinger spoke of was the 'apocalyptic communist' community. This was active in California before moving to Ghana, and dubbed Jonestown after leader, Jim Jones.

The people of Jonestown believed they had found refuge in Africa from nuclear destruction, sexism, ageism and racism.

Jones, their 'messiah' or leader, set the goal of equality that were impossible to achieve. This combined with Jones's drug addiction posed a threat to the group.

In Ghana, unwanted visits from concerned family members, reporters and Congressman Leo Ryan made the people of Jonestown feel threatened and unable to fulfill their 'ultimate concern.' Jones opened fire at the airport and killed five of the visitors, including Congressman Ryan.

Following this incident, the entire Jonestown community adults and 260 children committed the now-infamous suicide by drinking cyanide.

Wessinger showed a slide presentation of the people of Jonestown to illustrate the human condition of the individuals, emphasizing that such groups are composed of ordinary people. She said the media had portrayed the people of Jonestown, not merely corpses—not humans.

Wessinger contrasted the people of Jonestown with Waco, Texas Branch Davidians, a group who called an assault on millenialist-type groups of this sort, she said, felt very threatened by outside intervention.

"When groups such as these feel they cannot fulfill their religious goals, or 'ultimate concern,' it can lead to drastic results," Wessinger said. "Some groups believe this presentation showed how practical religious situations can be, as momentous as some might think.

"I believe this presentation showed how practical religious situations can be, as momentous as some might think. I thought it was fascinating," said Stettler. "I found her discussion of the dualistic approach in our society interesting (as well as her) rejection of that idea. I think that it is an important group we need to try to prevent violence and to create an understanding between different views.

Sewage on campus field drains to creek

By Phil Ashley

In a letter to the editor published in the Oct. 21 Mustang Daily, dairy science unit personnel criticized my comments made in the Tuesday, Oct. 14 Mustang Daily article on drainage ditch water. They indicated that I did not research for the article. However, it was not my article. I was simply providing input when contacted for the article.

The Friday before the Oct. 14 article, a Mustang Daily reporter phoned me and asked if I had any environmental concerns with the dairy unit runoff water flowing into Stenner Creek the week before the article, it is not comforting to know that it originated from fresh water rather than from untreated water. As a fisheries biologist, I stand by my observed that drainage in this ditch can come from rainy season overflow from the dairy unit sewage pond culvert about 100 yards from Stenner Creek.

But I was surprised by an unexpected, but equal concern. A large tanker truck was dumping several inch-thick layer of fresh dairy unit sewage pond sludge onto the field adjacent to the drainage ditch and Stenner Creek. When I expressed concern, the tanker operator pointed to the drainage ditch and said dumping the sewage on the field was no different than the fresh cow manure in the drainage ditch. He also said that the sewage would be plowed into the field later that day. But a week later even more sewage remained atop this field. Whether plowed or not, when heavy rains start any day now, some of this sewage will be carried into Stenner Creek by runoff. In the original article, dairy science department head Dr. Lee Fevre said, "they plan to cut back on irrigation in the fall". However, I assume this will not happen. They neither told me nor Cal Poly, the largest land owner of the creek, were the article deadline, as they were not mentioned in the article.

Still, I felt the article was informative and fair. The first two pages included dairy science faculty, staff and students discussing the modern operation and the academic- mics of this relatively new facility. On page three, I raised dairy unit water quality concerns in the letter appearing on Oct. 21, the dairy unit personnel said my comments were misleading.

They stated that if I had done some research, I would have known that: 1) times more dairy cows in the county in the 1950s than there are now, and 2) the very enriched dairy unit runoff water flowing into Stenner Creek, that I complained about, was from a fresh water source rather than from untreated water. On the first point, I appreciate the information about the 30-fold decline in dairy cows since the 1950s. If the implication is the decline is due to environmental regulations, I believe a different cause is mostly responsible. For decades I have watched vast areas of the San Joaquin Valley pasture and grazing lands being invaded by vineyards and subdivisions. I am watching the same thing take place in this county, primarily from vineyard development.

Declining with dairy cattle are many species of valley-dependent wildlife, as both lose their shared valley foraging habitat to grape production. As a result of this change, except for increasing numbers of monoculture induced pest species, many species of valley wildlife are living on the precarious edge of rarity and endangerment. From an animal husbandry perspective, I wonder why cattle operators do not seem to be concerned about this escalating takeover of critical valley grazing lands. Soon, all that will be left for livestock and wildlife foraging will be the inadequate, low productivity thin soils of steep hill and mountain sides.

On the second point, regarding the highly enriched drainage ditch water I reported flowing into Stenner Creek the week before the article, it is not comforting to know that it originated from fresh water rather than from untreated water. As a fisheries biologist, I stand by my original position that native fish, like steelhead, would not have been able to survive in the polluted dairy unit water I saw flowing into Stenner Creek.

However, I took their advice in the letter and did more research for this article. About noon Wednesday, Oct. 22 I went to the same drainage ditch and took photos of the inappropriate practice of allowing dairy cattle into the drainage ditch. This causes excessive erosion from trampling of the bed and banks and water pollution from cow manure in the channel. I also observed that drainage in this ditch can come from rainy season overflow from the dairy unit sewage pond culvert about 100 yards from Stenner Creek.

But I was surprised by an unexpected, but equal concern. A large tanker truck was dumping several inch-thick layer of fresh dairy unit sewage pond sludge onto the field adjacent to the drainage ditch and Stenner Creek. When I expressed concern, the tanker operator pointed to the drainage ditch and said dumping the sewage on the field was no different than the fresh cow manure in the drainage ditch. He also said that the sewage would be plowed into the field later that day. But a week later even more sewage remained atop this field. Whether plowed or not, when heavy rains start any day now, some of this sewage will be carried into Stenner Creek by runoff. In the original article, dairy science department head Dr. Lee Fevre said, "they plan to cut back on irrigation in the fall".

STONEMOUNTAIN, Ga. — By the light of a blazing cross, the Ku Klux Klan proclaimed its 20th cen­
tury rebirth on the granite moun­
tain that gives the town its name. For decades a white-hatted Klansman flocked here for annual gatherings, and Confederate heroes are sculpted into the side of the mountain.

Today, the mayor’s office once held by an imperial wizard of the Klan is about to be filled by a black man, who also lives in the former KKK leader’s house.

Elected with bipartisan support, Chuck Burris is more concerned about getting new sidewalks and more police than with Stone Mountain’s old image of racial divi­

Burris, a city councilman, defeated a six-year incumbent in the Nov. 4 election and will lead a black majority City Council in January.

The election campaign focused on the need for more sidewalks, drainage, police and economic development, rather than race. But he acknowledges the historic benchmark of a black mayor in the town where Klansmen held that office from 1915 to 1917.

“I’ve lived in the South all my life. This was the South change, and I’ve seen it remain the same. My becoming the mayor of Stone Mountain wasn’t as much a question of race — but it still is a step forward,” he said.

Hailing from Louisiana, a son of educators, and said he twice witnessed cross-burnings there, one in his family’s own yard.

He entered Morehouse College as a teenage freshman early enough to attend some lectures by the Rev. Martin Luther King Jr. and, later attended law school. He worked as a crime analyst in the administra­
tion of Maynard Jackson, Atlanta’s first black mayor, and held other city jobs in the 1970s before help­
ing to start a computer consulting firm.

Morehouse schoolmate John Brown, who owns an Atlanta-area real estate and mortgage company, describes Burris as a racial “trail­blazer” whose ability and qualifica­tions attracted a coalition of voters.

“Here I think it’s of great significance that Chuck was elected by a combi­
nation,” Brown said. “It’s synony­
mous to the type of movement that really speaks well of the South and America.”

Stone Mountain has 1,681 white and 1,812 black registered voters, but only 560 people voted in the mayor’s race. Burris got 49 per­
cent of the vote against two other candidates.

White businessman Arthur Bourdon said he supported Burris “for what he wanted to do for this city. I think he’s going to do it an out­
standing job.”

“What we wanted was the best-­
qualified candidate, one that will look after this third party,” said T.J. Weatherly, a white civic activist and 56-year resident.

Burris and wife Marcia live in a two­story brick home they bought last year from the family of James R. Venable, a one-time mayor who died in 1993. Venable, as an imper­
ator guard of a Klan order, orches­
trated annual Labor Day weekend gatherings that brought Klansmen here by the hundreds until the 1980s.

Burris recalled that during his first run for City Council, the then­
elderly Venable readily let him put up campaign signs in his yard.

“We have had good racial rela­tions here for many years,” said Weatherly. “It has not been a racist-type city. That was an image brought about mainly from out­
side.”

“Stone Mountain had a reputa­tion and history for sure,” said Burris, who has lived here about a decade. “But I never saw any evi­
dence of hatred or that kind of activity.

However, that history has attracted attention to his election to a $300-a-month part-time job in a city of 65,000, and Burris wants to capitalize on that to promote “the best-black secret in metro Atlanta.”

“He thinks the community of historical sites, quaint shops and restaurants is ready to move from “sleepy little town” with an abun­
dant reputation into a tourism spot alongside the popular Stone Mountain, acquired for a state park in the 1960s from Venables family members.

“We really have a jewel of a town,” Weatherly said.

Burris said his heard no nega­tive reaction to his election. He did receive an unsolicited newsletter the other day from the Sons of Confederate Veterans, part of a movement denouncing debate that has been involved in about Confederate sym­

Administration confident of Arab support against Iraq

By Jim Abram
Associated Press Writer

WASHINGTON - Despite the outward opposition of Arab countries to a military strike against Iraq, the White House is confident the Arabs won't stand against Iraq, the White House is in the way of any U.S. action.

"In Baghdad, fuel rationing forced U.N. monitors overseeing an oil-for-food program to halt their work Sunday. The monitors, who were unable to drive to work, said they expect to send teams out Monday after they secure fuel supplies.

"The tightly monitored program allows Iraq to sell $2 billion in oil for six months in exchange for food and other humanitarian goods.

"Iraq, fearing the United States might target oil refineries and storage tanks in the event of a military attack, announced Saturday it was introducing gasoline rationing.

The government on Sunday ordered non-emergency patients to be removed from hospitals in Baghdad. It was not clear how many people would be evacuated.

"Unfortunately for the Iraqi people, instead of meeting these requirements, for six years Saddam Hussein has lied, delayed, obstructed and tried to deceive," he said.

IRAQ

from page 1

The administration officials stressed that in the near term the emphasis will be on working out a diplomatic solution. "Failing that, we obviously would prefer that we go multilaterally," Berger said. But he added that if the allies don't join in a military action, "the president has made very clear that he has ruled out no option."

In the event of a military attack on Iraq, Saddam's Deputy Premier Tariq Aziz told Time magazine in an interview, various groups sympathetic to the Iraqis "would be in that mood" to carry out terror attacks against Americans.

Asked about that, Defense Secretary Cohen said terrorist acts against Americans launched at the behest of Iraq "will be met with a rather overwhelming response."

As to when a decision on military force will be made, Cohen said, "There's no artificial deadline, but I think we're all aware of the ticking of the clock.

WESTERN DEVELOPMENT LABORATORIES
(a division of Lockheed Martin)

WE'LL BE INTERVIEWING ON CAMPUS THURSDAY, NOVEMBER 20
SIGN UP FOR CAMPUS INTERVIEWS IN THE CAREER CENTER ASAP

Strike the perfect balance between increased leisure time away from work and the challenge of exciting cutting-edge technology in your new job at Lockheed Martin Western Development Laboratories. WDL offers you the challenges of numerous projects in our matrix organization and a collegial environment in which to learn and grow.

Combine that environment with our 9/80 work schedule affording you alternate Fridays off and you've got the perfect balance of work and play. We work hard at WDL so that we can play hard, too—come and see for yourself!

We're looking for FINANCIAL ANALYSTS for our San Jose, CA location.

You will perform a variety of financial and administrative duties associated with pricing, implementation planning, budget/estimate preparation, cost control and financial analysis. You will perform personnel, equipment control and development, budgeting, estimate forecasts, and performance analysis. On a monthly basis, you will compile actual and forecasted expenditures and variance narratives for internal and external use. Some basic experience in related field of Finance is desired, but not mandatory. The applicant should have a working knowledge of accounting, financial and economic theories and their practical application.

PC and Macintosh experience is desirable; one or the other application utilization is mandatory.

Applicants selected may be subject to a security investigation and must meet eligibility requirements for access to classified information. You must be immediately eligible to work for Lockheed Martin Western Development Laboratories without sponsorship.

BA/BS degree in Business/Finance/Accounting/Economics

See our homepage on the world wide web: http://www.lmwdl.com

IRAQ

Interview with CNN that Iraq could resume building biological weapons within a week.

In Baghdad, fuel rationing forced U.N. monitors overseeing an oil-for-food program to halt their work Sunday. The monitors, who were unable to drive to work, said they expect to send teams out Monday after they secure fuel supplies.

The tightly monitored program allows Iraq to sell $2 billion in oil for six months in exchange for food and other humanitarian goods.

Iraq, fearing the United States might target oil refineries and storage tanks in the event of a military strike, announced Saturday it was introducing gasoline rationing.

The government on Sunday ordered non-emergency patients to be removed from hospitals in Baghdad. It was not clear how many people would be evacuated.

Hussein Abdel-Jabbar, a doctor at Baghdad Central Hospital, said the hospital would only admit emergency cases because "we are expecting a strike by the Americans."

The United States and Britain, meanwhile, worked to rally support for a strong action against Saddam.

"He is not a man that is going to listen to any language of reason or sweetness unless the person using it is also carrying a big stick," British Prime Minister Tony Blair said in a BBC television interview.

Secretary of State Madeleine Albright cut short a visit to Qatar and left for neighboring Bahrain. Kuwait and Saudi Arabia to discuss the standoff.

In Qatar, Albright lashed out at Baghdad for refusing to comply with U.N. resolutions demanding the elimination of its weapons of mass destruction.

"Unfortunately for the Iraqi people, instead of meeting these requirements, for six years Saddam Hussein has lied, delayed, obstructed and tried to deceive," she said.

For more information on XonTech and discover for yourself what it takes to join our elite team?

XonTech is a nationally recognized, progressive P&D firm specializing in the analysis of complex physical phenomena and development of advanced concepts and technologies in support of numerous defense programs. Our corporate culture is exciting, demanding and personally satisfying.

We have many stimulating opportunities for individuals with a Ph.D. Master's or Bachelor's in Mathematics, Physics, Computer Science or in Electrical Engineering with an emphasis in signal processing.

Please see the Campus Career/Placement Office for more information and to schedule an interview time.

ATTENTION TO ALL CLUBS

We are rewarding 6000 new immigrants to clubs for community service projects.

Some past projects include:

- Designing a corral for rancho de los Animals

- Presenting interactive science labs at Paecho Elementary School

- Developing a mentoring program for recovering drug addicts

We can help you design or link with an agency in the community.

**MUSTANG DAILY**

**Men's soccer seniors finish season with win, improve to 2nd in league**

**Daily Staff Report**

For the first time in four years, the women's basketball team won their home opener. The Mustangs used an up-tempo offense and pressure defense to defeat Weber State 70-58 in Matt Gym Saturday night.

Senior Bevis Beviern, a 6-foot forward, scored a team-high 18 points and captured eight rebounds to lead the Mustangs to victory.

Bevin, who was just two points short of tying her career best point total, notched 10 of her 18 points in the second half of the game.

Cal Poly opened a 16-9 advantage after spotting the Wildcats the first four points of the game by capitalizing on several Weber State turnovers.

Cal Poly forced 25 Wildcat turnovers.

Shoulder to shoulder with Bevin, senior Stephanie Osorio scored 12 points, dashed out a team-high five assists and grabbed four steals, while Jackie Maristela chipped in 11 points.

Heather Lee, a senior in her first year with the basketball team after playing on the volleyball team for three years, grabbed six rebounds.

Forward Sara Sue Olsey led the Wildcats with 16 points and Andie Willer added 12 more.

Center Sunny Robinson led Weber State with 10 rebounds.

Cal Poly will take their fast-moving style of play to U.C. Berkeley on Thursday.

**Today's over, said Young. "I just knew I had to stay within myself though and keep plugging away and eventually good things would happen."

"I was fortunate to be on my game tonight," Young said. "The offensive line opened some tremendous holes and fallback Keith Washington made some great blocks. I just ran through the widest holes I've seen in a while."

Young's runs even got Cal Poly head coach Larry Welsh excited.

"He broke down the sideline - I wanted to run with him and I'm too slow and fat," Young said.

Younng scored his first touch­down on a three-yard run early in the second quarter. He fin­ished the first half with 11 car­ries for 67 yards, but would have to wait until the second half to get the ball on a regular basis.

He lost five yards on his first three touches of the third quar­ter, but on his fourth run Young made up for it with a five-yard touchdown run. It gave Cal Poly a 31-17 lead and was the game-winning score.

The afternoon wasn't with­out its faults for Young.

After his third touchdown, a 60-yard run in the fourth quar­ter, Young was flagged for an unsportsmanlike conduct penal­ty for celebrating after the play.

B-BALL from page 12

A couple plays later and set up Indian forward Freddy Hicks with an alley-oop pass. Hicks double pumped the ball and dunked it with such authority that the 3,300-plus crowd in Mott Gym erupted in excitement, even though he was on the opposing team.

Arkansas guard Jeff Holloway exchanged three-point field goals with Larsen to take the score to 15 to 9 with 12 minutes to go in the first half. That's when the Mustangs went on a rampage. The Mustang defense caused four Indian turnovers and three missed shots in three minutes. Cal Poly's offense continued to create good shooting opportunities both inside and on the perimeter.

With a three-pointer by Favor the Mustangs went up 21 to 9 with nine minutes left in the first half.

A few plays later, Mustang center Ross Ketcham drilled a three-pointer which brought the score to 24 to 10 and caused Arkansas head coach Dekeyt Nutt to call a time-out in which he emphasized harder man-to-man defense.

After the time-out, the Indians launched their most aggressive offense, trapping and double-teaming the guards. It seemed as though they might make a comeback, but the resilient Mustangs were able to hold and end the half with a 3 to 23 lead.

The second half continued th Mustang offensive assault led by sophomore guard Mike Wozniak who had only played four minutes in the first half due to foul trouble. Wozniak hit a three-pointer just 10 seconds into the half and then pulled up and hit a 16-foot jumper, shot the next play after freshman forward Chris Bjorklund intercept a pass from Hicks.

The next trip down the floor Wozniak received a pass from junior forward Steve Fleming an sank another three-pointer to make the score 45 to 27. This forced Nutt to call a time-out to cool the hand of Wozniak.

The Indians once again applied their pressure defense, but Mustang head coach Jeff Schneider answered by switching Wozniak to point guard and Larsen to the two guard position.

"They were really pressure. Ben and I knew that Wozniak would bring the ball down and get us into our offense," Schneider said.

The Indians were able to put within 13 points of the Mustangs with 3 minutes left to play in the game when Fletcher hit a three pointer after receiving a pass from Holloway.

Wozniak continued to light u, the score board with 26 second half points and five assists.

Men's basketball defeats Arkansas State in season opener Saturday

The beginning of the game was the only time that the score was even. The Mustangs broke out with a three-point shooting aerial assault which the Indians could not match. "I think our defense was good and we made some jump shots," said Jared Myers, Arkansas senior forward.

The Mustang long range attack began two minutes into the game when Ben Larson pulled up behind the arc and nailed a three-pointer over Indian point guard Chico Fletcher. Fletcher answered back with a running jump shot over Larsen. Fletcher did a crossover move at the top of the key and a 360-degree spin in the middle of the lane to clear himself from the taller shot blockers.

MUSTANGS crush Dayton Flyers

The Mustangs' 81-47 fans literally brought down the house Saturday. As players jumped up to the stands to celebrate their 44-24 victory over Dayton the ringing of the bleachers came crashing down, but no one was hurt.

The clouds rolled back and the sun came shining through on Cal Poly's homecoming game on Saturday. The Mustangs defeated No. 20 Dayton, 44-24, and snapped the nation's longest winning streak at 26 games.

The clouds moved in again shortly after the game. "I think our defense was good and we made some jump shots," said Jared Myers, Arkansas senior forward.
