Delta Tau, a Cal Poly social fraternity, was suspended for 25 years last week for violating the school's alcohol policy. 

**Quick Facts**

- Delta Tau has been suspended for 25 years due to alcohol policy violations. The decision is final.

By Ariel Kogel Daily Staff Writer

Despite the suspension, Delta Tau, one of the oldest fraternities at Cal Poly, from participating in any university recognized programs or activities until Feb. 5, 2023. The fraternity had more than 200 student volunteers needed.

"We're going to try to keep our doors open," said Perry Young, president of Delta Tau. "It's going to hurt us."

The suspension prohibits Delta Tau, one of the oldest fraternities at Cal Poly, from participating in any university recognized programs or activities until Feb. 5, 2023. The fraternity had more than 200 student volunteers needed.

"We're not made such a request, and I don't intend to make such a request," Cohen told reporters accompanying him on a four-day series of meetings with Persian Gulf leaders on the standoff with Iraq. "It's my intent to make such a request because we don't think it's necessary." The surprise admission came as Cohen left Europe, where he had spent six months with a top U.S. official traveling with the U.S. defense secretary to help keep support the U.S. from launching an offensive strike by the United States won't ask to launch Iraq. "It's not my intent to make such a request," Cohen said.

Cohen insisted his approach is working. "The Saudis will allow U.S. support air-craft such as tankers or radar-comunication planes to fly from their bases during any military confrontation, a senior Pentagon official said. Cohen spoke on condition of anonymity.

"I believe the program is going to help the community because it makes it so the public can become aware of the Land Conservancy's work."

By Brit Takerte Daily Staff Writer

Not even the rain kept students away from campus to attend Saturday's third annual International Career Symposium (ICS).

More than 300 students from all over the state, dressed in business skirts and suits, ventured to the Business building for a good five hours to gather information on international internships and careers, attended workshops, spoke to one-on-one with company representatives and attended resume reviews.

The ICS management team, led by Executive Director Brian Barnes, said the purpose of the symposium was to provide students with quality information about international internships and career opportunities, and to provide job contacts for students who want to work and live in another country, work for a company in the U.S. and travel frequently overseas, or remain in the U.S. but work for a company with international operations.

The goal of the ICS is to bring all international information and contacts together on one day, at one place," Barnes, a business senior, said.

Along with other students, Barnes organized the ICS as his senior project. He helped with last year's symposium after which he decided to be part of this year's directing team. The team was formed during Spring 1997 and began inviting companies last summer. Barnes said the team called more than 300 companies, 11 of which confirmed. Because of the weather and one company's cancellation, only six company representatives came from NASA, the FBI, Price Waterhouse, the Peace Corps and smaller companies, Enterprise Networking Systems Inc. and Emelco.

"The FBI is a big draw. A lot of students want that. A lot of students want job contacts, and a lot of students want the workshops," Barnes said.

Making sure people know about the event was critical to the management team and Barnes said it was frustrating at times. Barnes said one reason was because the event was scheduled two weeks earlier than last year's. Also, the symposium usually occurs at the same time as the Career Services Symposium, but since it is a new concept, some of the companies didn't want to attend both.

The open panel discussion gave students a chance to ask company representatives questions.

The main theme resulting from the discussion were that companies, regardless of the size, hire and recruit individuals who know what they want and can show the company what they have to offer. It was also recommended that good communication skills, both spoken and written, are essential.

Toby Bulduc of Enterprise Networking Systems Inc., stressed that having good grades isn't everything. He said if a student has pretty good grades but has worked on a higher GPA and can verbally describe them, he has a better chance than someone who has a higher GPA, but no project experience.

Business senior Benjamin Schen said the main reason he attended was because of the job fair. He said he thought the morning speakers gave great presentations and helped put the idea of an international career in perspective, but mainly wanted to see what companies were there and leave his resume. Schen said he would like to be recruited to work overseas. He said he fell in love with traveling after spending six months with a dedicated team of volunteers.

A dedicated team of volunteers in new making up the term "testing the waters." This year's symposium has been dubbed the SLO Creek Men's Monitors—has been brought to monitor the waters of San Luis Obispo to monitor the waters of San Luis Creek and its tributaries. The Land Conservancy wants the team to grow, and is looking for more volunteers from Cal Poly to monitor water quality at creek sites throughout the county.

"I believe the program is going to help the community because it makes it so the public can become aware of the Land Conservancy's work."

Cal Poly history professor Lynn M. Hudson will give a talk called "When 'Mammy' Becomes a Millionaire: Mary Ellen Pleasant in San Francisco." She will be speaking from 12:10 p.m. to 1 p.m. in the Staff Dining Room. Call the Women's Studies Program office at 756-1525 for more information.

TUESDAY

The Brown Bag Lunch Series presents Darryl Leon speaking about "How to Design a Useful Web Site for Science Undergraduates" today from noon to 1 p.m. in Staff Dining Room B. Lunch will be provided for those who RSVP to Janice Eagle. 756-3935.

Come to the Environmental Resource Fair from 7:00 p.m. to 8:30 p.m. at Sequoia and Tenaya Residence Halls. Local and campus environmental organizations will be there. Learn about environmental careers, internships, volunteer opportunities and senior project ideas. There will be a raffle and refreshments. For more information contact Ellen Polinsky at 756-5971 or Cindy Jelinc at 756-2615.

The Institute for the Family, a non-profit counseling center, will hold a workshop from 7 p.m. to 8:30 p.m. entitled "Creating more LOVE in your Life: Keys to happier relationships." It will be presented by Leslie C. Barton, MFCC at 150-B South 6th St. in Grover Beach. Call 489-1085 for more information.

This is something not to miss. Farai Chideya will speak on "America's Multi-Ethnic Future: An Emphasis on Women" at 6 p.m. in Chumash Auditorium. For more information call Pat Harris at 756-2600.

WEDNESDAY

El Corral Bookstore is planning an "An Afternoon with Cal Poly Authors" today from 4 p.m. to 6 p.m. This is a reception to honor faculty and staff writers. The public is invited to this free event. For more information call Margaret Gardner at El Corral at 756-5316.

FRIDAY

Oh my goodness, today is Friday the 13th! Make sure not to let any black cats cross your path or walk underneath any ladders.

Hey Daddy-O come on down to a big band swing dance put on by the Cal Poly Swing Club. There will be a free East Coast Swing workshop at 7 p.m. and a dance following at 8:30 p.m. It only costs $3 with a valid Cal Poly or student ID. card, and you must be 18 or over. It is sponsored by ASI Program Board and KCPR in Chumash tonight. Call 787-0132 for more info.

ASI Speaker's Forum will meet at the Women's Center in U.U. room 147 at 11:10 a.m. They will be discussing their new mission statement. For more information call Carlo at 547-1227.

SATURDAY

Happy Valentine's Day! Don't forget to call your mother and remind her she'll always be your No. 1 valentine! Smoochie, Smoochie!

There's nothing like having a massage while contributing to a good cause. So come to "Massage Days" today and tomorrow put on by the Central Coast Steinier Education Association. Treat yourself to a full body massage for only $20 at the San Luis Hollister Medical Center, 2103 Broad St. Call 208-5823 for more information.

ANNOUNCEMENTS

Wildflower Triathlon is accepting applications for Team Leaders in the Long Course Bike/Ram and the Mountain Bike Course. Team Leaders will be selected by the first Wildflower Leader meeting to be held by student race directors, Eric Lin and Shannon Walsh, on Feb. 17. For more information or to apply call Colleen at 782-9382.

ASI Election packets for president, chairman of the board and board of directors are available between Feb. 13 and 27 at Student Life and Activities, U.U. 217. For more information see Bob Walters or call Diane, election chair, at 489-2846.

aware of what an important resource water is," said environmental engineering graduate student and volunteer Art Fernandez.

The Land Conservancy is a private, local, non-profit group which preserves open space on environmentally sensitive land. There are 300 members in the group but only two full-time staff people.

The SLO Creek Monitors are just one branch of the Land Conservancy. The water quality monitoring project is a part of the watershed enhancement program started by Land Conservancy staff member Brian Stark last May after he was granted $20,000 from the Switzer Foundation.

The Strong Foundation for Environmental Values mustang equipment, but "most of the day-to-day costs are paid by Land Conservancy members supporting the program," Stark said.

Stark would like to monitor more creek sites, but needs more volunteers to do so. The time commitment to volunteer is two to three hours once a month. Volunteers are trained to perform monitoring steps which include field observation and testing surface flow rates, water temperature, turbidity and extent of algae cover.

Stream flow, or the amount of water and how fast it's moving, is also measured. Testing for stream flow can be dangerous, especially during storms when the water is moving fast, according to Stark. A new system, which uses floats to measure the flow, "will help make sure people are not endangering their lives while doing the test," Stark said.

Volunteers also use chemistry sets to test levels of dissolved oxygen, pH and nitrate. Oxygen content affects how much life can live in the stream, while nitrates are an organic pollutant from fertilizer and the byproducts of animal waste.

"Our goal is to collect accurate water quality data to support local water quality improvement, fisheries restoration and community education programs. We hope to use the monitoring to help identify problem areas and take steps to improve the water," said Stark.

Stark said that as a result of monitoring, he has noticed that the water is much cleaner at the first site at Steenr Creek than it is downstream where tributaries join up with San Luis Obispo Creek.

The Conservancy's program is not part of any regulation agency. The information gathered is submitted free to the public.

Stark said that they will need to collect data for a number of years before they'll know what the levels of pollutants in the water really are.

"The goal is to collect background information," he said. This data enables regulatory agencies with more sophisticated technology to have the necessary background information, allowing them to conduct their own tests.

"We are unlikely to catch any acute pollution problems," Stark said. Recent Cal Poly environmental engineering grad

OPINION

Some spice ain’t so nice

By Andi Joseph

I have a real beef with the music industry. I love great music, but what is it with record labels signing money-hungry no-talents who have nothing to do with the music business apart from a British accent and some horribly spicy songs that leave you with heartburn?

I’ll be the first to stand up and publicly admit that I cannot stand the Spice Girls. As a girl my parents taught me to be tough, to do it the all-natural-bare-back way. I run the risk and effectively ask for a problem. But hey, if you want to just put yourself out of everyone else’s misery. I’d rather have my tax dollars liquidating incompetent gray matter than trying to clean up after the messes they create.

If you can’t even be bothered to put out a condom, but that is no excuse at all. People know what happens when they hit the sauce and it could be ready for these things. Perhaps just leave the penis at home if you don’t want that to happen to you.

Speaking of entertainment, about how their new movie, “Spice World.” OK, so I haven’t seen it, nor do I plan on seeing it anytime in the near future, but why a movie? The soundtrack to the movie, according to a Spice Girl fan I know, is close to a duplicate of their “Spice” album. Claims are also being made that coming soon will be a Spicy Clothes line, Spice Cosmetics and Spice Dolls. Can anyone say “money-hungry”?

But what makes their band so unique in comparison to the thousands of other struggling and succeeding music artists? Take for example, the now-defunct New Kids on the Block? Remember them way back when? They were the so-called cutest, hottest male quintet around, with everyone jumping on the bandwagon...except for me. Now we’ve got the Spice Girls, the female version, and though they’re milking their status for everything they can get, I predict a similar outcome within the next few years. With the feminine high-pitched vocals of the former NKOTB, who’s to say they’re not even the same band, disguised as a different gender and under a different name?

But the Spice Girls are not alone. They have also taken home a few unserved awards. I was shocked and horrified while watching the American Music Awards when the Spice Girls took home awards that should have gone to other bands. A couple of times when they were up against the kick-ass band Matchbox 20, I cringed when the announcer said, “And the award goes to the Spice Girls.”

Now that has got to be set up a pay-off, a conspiracy, whatever you want to call it. That is just about equivalent to a movie such as, say, “Debbie Does Dallas” beating out “Titanic” at the Academy Awards. Jealous? Oh sure, I am little, and in no way am I afraid to admit it. I’d love to have zero talent and still make the big bucks. But fortunately, some of us still choose to pursue a career in not only something that we can succeed in, but something that we’re actually good at. We’re at Cal Poly forking over big money to reach that light at the end of the never-ending education tunnel, while the Spice Girls are raking in big money. My Asanakais won’t, “Isn’t that insulting?”

The Spice Girls are the newest craze. Buy them, get them while they’re hot and show your support for the Spice Girls’ pure and utter lack of taste. Blah, blah, blah, blah, blah...Girl Power Sure, whatever.

Andi Joseph is a Daily Staff Writer and journalism senior.

It’s too easy to forget ‘Him’

Many of you may have read the article entitled “Being Afghan” in Thursday’s (Feb. 5) Mustang Daily. I would like to take the opportunity to address some of the issues and facts presented in the article by Rob Whelan.

It seems that a cross section of the Cal Poly student body and faculty has single-handedly come to the conclusion that there is no God, or that the possibility of His existence should at most be held with high degrees of skepticism. As a born-again Christian, my question is why would people work so hard to deny the existence of God? Is it because of the heinous crimes that horrible people like “Bible Jim” the U.U. evangelist?

Perhaps it really is obvious by any rational person’s reasoning that He couldn’t possibly exist? Or is it because looking at one’s own life in light of a higher sovereign authority is difficult and forces us to think in terms outside of ourselves. Put more simply, if God exists, oh shoot, now what do I do about the way I live my life?

Finding the answer to this question, I believe, is singularly the most important thing a person can do from their birth until death. Now unfortunately, many people speak an answer. Some yell on street corners (Bible Jim). Some knock on doors. Some pass out tracts. Some just talk as friends. In a room full of all this noise I would like to amplify the voice of the most credible and incredible man who walked the face of the earth.

He never backed down. He never gave up. He never was outsmarted or outwitted and He never lost. He was killed but to the dismay of those who killed Him, He got up out of the grave and walked the face of the earth again - an immortal, second coming, up into heaven. He has done everything He said He would do except coming back ONE more time. He never backed down. He never gave up. He never was outsmarted or outwitted and He never lost. He was killed but to the
cannot recruit members on campus or participate in Rush Week. An investigation prior to the
hearing concluded that Delta Tau provided alcoholic beverages at its annual pre-
Thanksgiving party. Several guests slept at the fraternity house because they were too
 drunk to go home.
An intoxicated student passed out in a position that severely restricted blood circulation in his arm. When he awoke 14
hours later, he complained of numbness and swelling in his arm. He was taken to the hospital,
and doctors nearly had to amputate his arm. He eventually recovered, but his four-day hospital stay cost about $20,000.
Young said he expected Delta Tau to be suspended for the incident, but he was surprised by the suspension’s severity.
“Compared to past decisions against fraternities that violated the alcohol policy, ours seems pretty harsh,” Young
said. The decision is final, and the suspension takes effect immediately.
“We’ve never had to face this before,” Young said. “We’re still trying to figure out how we’re going to operate (during the sus-
pension).” -By Ryan Becker

CAREER from page 1

Youth KTO up in Israel and fun. I think companies are looking for flexible, culturally sensitive people who work hard and care enough about the company to work hard," he said.

During the job fair, students were able to speak one-on-one with the representatives about internships, careers and asked questions about starting salaries, preparing for a job and what it takes to be hired by that company.

Douglas Mackinnon, who works in the Peace Corps office on campus, said students who have a desire to help people, should look into the Peace Corps. He said it is a great opportunity to travel and learn about different cultures, an aspect that other companies just don’t provide.

“You really get to understand the people,” he said. “You become more like that person than an American while you are there. You do change.”

He said the big advantage of joining the Peace Corps is that right out of college you can go overseas and gain experience at a high level, whereas with other businesses, you have to work in that field first.

The Peace Corps office, located in building 52, room C-29, has been on campus for 25 years. Mackinnon, who began recruiting there a year ago, said that this year, 22 people—students and non-students—have applied. He said this is more than double from last year.

Samantha Borg, social sciences and Spanish senior, said she came to the symposium because she was interested in the Peace Corps and finding out about internships where she could use her teaching and Spanish skills.

IRAQ from page 1

Port aircraft in the air, however, should a military strike be launched.

President Clinton has not yet made such a determination, Cohen said. “We are seeking a diplomatic solution if it can be found,” he said.

Meanwhile, Clinton called Prime Minister Jean Chrétien of Canada and Prime Minister Wim Kok of the Netherlands on Sunday about the prospect of support for either a diplomatic or other solution to the crisis with Iraq. U.S. officials suggested Chrétien would publicly indicate soon “an interest in supporting or participating in a military action should it come to that.”

Clinton, in earlier calls over the weekend, consulted with the leaders of Saudi Arabia and Australia.

Cohen met for 20 minutes with Saudi Arabia’s King Fahd and reported afterward to his aides that it was a positive meeting.

The defense secretary then was treated to dinner by the defense minister, Prince Sultan, and they have to have further meetings late into the night, as is the Saudi custom.

Meanwhile, Pentagon spokesman Kenneth Bacon confirmed that the aircraft carrier USS Nimitz has now left the Persian Gulf that leaves two aircraft carriers in the region, the USS Independence and the USS George Washington.

Cohen was accompanied by Zinni and two senior lawmakers — Sens. John Warner, Va., and Carl Levin, D-Mich.

A strong hint of the Saudi position came just hours before Cohen arrived in the desert kingdom when Sultan was quoted in the Saudi paper Arab News as saying: “We are against striking Iraq as a people and as a nation.”

The U.S. women's skaters beat China 5-0 to win their first Olympic gold medal, outshooting their over­matched opponents 31-10. Veteran forward Cammi Granato, the team captain, opened the scoring with a power play goal and knocked in a rebound for the last U.S. goal. The first session of the pairs fig­ure skating ended with two-time Olympic medalist Artur Dmitriev of Russia and his new partner, Olga Danilova, in the lead. A pair of American teams stood fourth and sixth. The Americans won none of the nine medals awarded Sunday, when Russian cross-country skier Oksana Kachakova captured the game's first gold medal.

Cal Poly came in first in the 400 freestyle relay at 3:39.24. Mustang Jamie Stonebarger claimed the first 50 freestyle and second in the 100 freestyle. Martha Hall hit the wall first in the 1000- yard freestyle at 10:50.42. She also finished second to Jackson in the 500 freestyle.

U.C. Irvine was led by senior Gwen Yoshizumi who had top times in the 100 and 200 freestyle events. Her time of 2:11:21 in the 200 freestyle was a seasonal best. "It was a strong performance overall by the team today and it was a good tune-up for the Big West Championships in two weeks," said coach Rich Firman. "It was a great dual meet win for us over a very good team." Pac-10 leaders Monday, February 9, 1998 7
Mustangs fall to Big West giant

Daily Staff Report

One year ago today Cal Poly would be basking in the glory of an upset buzzer win over the University of Pacific. They had nabbed a victory over a team who would go on to the NCAA tournament.

Saturday the Tigers trumped into Mott Gym and took away the Mustangs steam.

Adam Jacobsen scored 28 points and made six 3-pointers as the University of the Pacific escaped with an 85-79 win over Cal Poly before 3,276 fans. With the win Pacific improves to 15-8 overall and 8-2 in league while Cal Poly drops to 3-18 and 3-7.

Cal Poly trailed 60-40 with 12:21 left as the Tigers increased its nine-point halftime behind a pair of turnaround jumpers by Michael Olowokandi and a three-pointer from the left side by Aaron Wozniak.

The Mustangs would not give up as the three-point shot helped Cal Poly claw back into the game. A three-pointer by Rich Kinder and a 24-footer by Mike Wozniak cut the lead down to 11 with 7:06 left. A pair of free throws by Jacobsen pushed the lead back to double digits at 72-61, but a Chris Bjorklund turnaround jumper followed by a Jabbar Washington steal and lay in cut the lead down to five with 2:17 left.

The Tigers made it a five-point game on a three throw by Cory Andersen, but a Washington three-pointer with only 20 seconds left made it a two-point game at 79-81. That would be as close as it would get as Pacific would convert four free throws to pull out the win. Bjorklund scored a team-high 28 points and hit a career-high four three-pointers in the game as he held Pacific's Olowokandi under his 20-point average with only 17 points and nine rebounds.

Behind Wozniak's 31 points, the Mustangs won its second-straight and first in league at home with an 84-74 win over Long Beach State before 2,872 fans Thursday in Mott Gym. Wozniak, Cal Poly's leading scorer, helped Cal Poly to a strong start scoring 15 of his 31 points on five three-pointers in the first half alone.

Leading 16-16 with 9:50 left in the half, the Mustangs quickly stretched the lead to 15 at 37-22 behind Wozniak's three-point barrage and a deep three from the top of the key by guard Ben Larson.

A three-pointer and two jumpers by Long Beach State's David Egans cut the lead down to 39-29 at the half.

Wozniak equaled his career high by shooting 8-for-16 from the floor including six three-pointers. He was also a perfect 9-for-9 from the foul line. Ross Ketcham and Bjorklund added 13 points.

Cal Poly made 12-29 from the three-point field on the night and shot 45.2 percent from the floor. Long Beach State, winless in seven games this season made 47.5 percent from the field behind Egans' team-high 25 points and five three-pointers.

D'Ceon Bryant hit a baseline three-pointer to open the second half, but the 49ers would go cold as Cal Poly would post eight straight points to push the lead back to double-digits at 48-32. Long Beach State would attempt one more rally late in the game as Antone Lee narrowed the lead to one at 59-58 with 8:22 left.

That would be as close as they would get as Ketcham helped put the game away with three consecutive three-pointers late in the game.

Cal Poly will travel to Long Beach State Thursday to try and capture another league victory.

Mustangs end regular season with dual win

Daily Staff Report

The Cal Poly men's and women's swimming and diving teams captured their final dual meet victory of the regular season. The men's team crushed Big West Conference rival U.C. Irvine 165-133, while the women's team crushed the Anteaters 165-135.

Seniors Eric Wyles and Eric Collins led the Mustangs taking first in multiple races. Wyles finished in first place in the 100 breaststroke and 200 individual medley with times of 58.72 and 1:59.08 respectively. Wyles also came in second in the 200-meter

Tables turn on the Mustangs

Last year the Cal Poly wrestling team showed strength across the board. With years of experience in all, every weight class the Mustangs won last year's California Collegiate Tournament capturing four weight class titles.

This year the teams were turned as Cal Poly came in seventh. Cal Poly's Brian Bowles (177) was the single Mustang champion. Bowles had to defeat two wrestlers on his way to the Championship match. Bowles won major decision over Navajo from Point Loma 7-1 for the win.
