Cal Poly student dies during finals week

By Jaime Boroski
Daily Opinion Editor

The heart of Cal Poly senior Mike Koehn was without rhythm for the first time when fogmigours found his body on the porch of a Toro Street home early hours of the morning.

The fight for the right to sell alcohol at the Performing Arts Center is far from over.

The appeal of a Jan. 22 ruling that granted Cal Poly Foundation a license to sell beer and wine will postpone, possibly prevent, the sale of alcoholic beverages at the PAC.

The appellants—most of the same people whose original protest of the license resulted in last year's hearing—are appealing Administrative Law Judge Sonny Lo's decision on several legal points.

The law, according to Foundation Associate Executive Director Robert Griffin, is meant to protect permanent residents who could experience the effects of alcohol sales at a nearby facility.

Based on this, "we do not consider that students living in the dorms were residents," Griffin said.

Griffin said he did do a walk-through of the dorms immediately adjacent to the PAC.
UC admission figures concern Davis

Statistics released by officials at both UC Berkeley and UCLA indicate that the number of Latinos admitted into the universities declined by more than 56 percent and 33 percent, respectively.

The number of African Americans admitted dipped by more than 64 percent at UC Berkeley and 42 percent at UCLA.

"These admissions figures demonstrate the troubling impact Proposition 209 has, and will continue to have, on California's future," said Davis in a press release. "Clearly, Prop. 209's legacy will result in fewer African Americans and Latinos who will be educated to contribute to their communities in a meaningful way. Davis is a proponent of a proposal before the LIC Regents that calls for automatically admitting to the UC a fixed percentage of graduating seniors from California high schools.

Poly Reps selected

Fifteen new green-shirted Poly Reps have been selected to promote Cal Poly for the next school year.

Aside from walking backward while leading campus tours, Poly Reps also visit high school and community colleges to promote Cal Poly.

Poly Reps interact with alumni, help with university constituent groups and encourage support from potential donors.

The new Reps include seniors Rebecca Crews, Lori Good, Greg Kump, Nikole McCollum; juniors Katie Auker, Lizzie Lamoree and Leslie Moffitt; sophomores Samuel Ahern, Kristin Gerhard, Jenn Goldman, Natalie Jewell, Neel Murarka, Jennifer Tavella and Aaron-Marie Wicke; and freshman Travis Bryant.

Raffle benefits campus cats

The Cal Poly Cat Program is raffling away a basket filled with popcorn, candy, cookies, movie tickets, a brunch for two at Crystal Gardens at the Sheraton Hotel and a gift basket from Tom's Fur. The proceeds will go toward supplies and medical expenses.

Tickets are $1 and can be purchased from Griffin-Shaw at 756-5220, Joan Dezember at 756-2326 or Ellen Notermann at 756-1325. The drawing will be held May 1 at noon.

Capps authors first bill

U.S. Rep. Lois Capps wrote her first piece of legislation last Tuesday, designating San Luis Obispo county's Carrizo Plain a national conservation area. This bipartisan bill was introduced with Rep. Bill Thomas of Bakersfield.

The Carrizo Plain is the ninth national conservation area in the United States. The bill protects and conserves natural and cultural resources while allowing limited grazing to continue.

Capps also announced that she is co-sponsoring two health maintenance organizations and managed care reform bills aimed at bringing patients' rights back to the forefront of healthcare.

Kiss the orange fences goodbye

"No more orange fences. No more ripped up streets. No more jackhammers trying to compete with professors' lectures. Utilidor is over!"

Wednesday marked the end of the campus-wide utilities upgrade project, Utilidor, with a celebration in the University Union from 11 a.m. to 1 p.m.

Silly games and a free lunch provided by Utilidor's contractor, Swinerton and Walberg, were part of the festivities.

Beginning in August 1996, the 20-month Utilidor project tore up campus roads, limited parking and caused traffic headaches and a muddy mess for both pedestrians and drivers.

The campus-wide electrical system was upgraded, the district heating system was replaced and the water system was improved.

Estimates show that Utilidor should save 40 percent of the total cost per year for gas power and 15 percent for electricity.

The project's cost including design, management and electrical substation work totaled $28 million.

"The project has inconvenienced everyone, so we want to celebrate that it is over," said Deby Ryan, public information coordinator for the Utilidor project. "We want to leave the campus with a good feeling about the project. We have tried to keep the project humorous, so this celebration is keeping in tune with that theme. We thought April Fool's day was appropriate for the official end."

The celebration gave students two ways to win a free T-shirt reading "I survived Utilidor" on the front and "Life is a ditch ... get over it" on the back. This unofficial slogan was one of many that were created to develop a lighter attitude about the project. Other slogans included, "Been There, Dug That" and "You Can Run, But You Can't Drive."

The first way to get a shirt was to play three games related to Utilidor. One game had students try to toss small metal rings on top of a piece of orange fencing — an omnipresent reminder of Utilidor throughout campus since the project started.

Students throw hard hats over cones to win Utilidor T-shirts.

Make A's While the Sun Shines During Cal Poly's Summer Quarter 1998

This summer is the perfect time to sign up for those hard-to-get classes or finish the last few credits that will lead you into a bright future.

The benefits of a mellow summer quarter include:

- 10% more classes than planned last summer
- Less-crowded classrooms
- Ample parking close to your classes
- No lines in The Avenue and El Corral
- Long afternoons and golden evenings at nearby beaches, lakes, and golf courses for after-studies recreation.

Watch The Daily for more information on Summer Quarter '98 — and talk it over with your folks. Going to summer quarter makes a lot of sense.
Couch, partially filled glasses on a table and bottles which he tapped with pens as he sung Carlos Santana's "Oye Como Va." "Carlos Santana would have been proud," Davidman said.

Davidman wasn't the only one who shared in Koehn's world of music. Koehn and Sahari Tracey, a biochemistry senior, met in 1994 while working as resident advisers in their dorms. The two used to sit in Koehn's room, relax and listen to music. "For instruments. As Davidman explained, "Everyone he met. Tracey said that he appreciated different types of people and enjoyed engaging in deep philosophical conversations. "We do not do breath tests, because it's not necessary," Lichty said. "But in such cases, the ABC will decide if the person is displaying obvious symptoms." Lichty cited recent findings. "That would be a very standard case," she said. "I don't think he was too drunk." Lichty said. "That would be a very standard penalty for a violation of that code." Lichty said. "He was a generous individual with a love for fish." O'Daniels said. "He loved to fish." O'Daniels remembers William's untimely death came as a shock to his friends, and put a damper on today's reopening of McCarthy's, which had been closed for 15 days. "They will reopen, despite the grief felt by the entire staff," said Kathy Conners, Daniel Conners' wife. "I'm in shock. It just doesn't seem real yet," said Michael Clemmensen, a bartender at McCarthy's. Childhood friend and classmate Pat O'Daniels remembers William as a generous individual with a love for the outdoors. "He's a big outdoorsman who loves to fish," O'Daniels said. "He fished in the Rockies and at his home in Blackstone, Virginia." O'Daniels remembers William as a kind person who would always help others. "He was the kind of person who needed to share his feelings," Tracey said. "He helped me and my friends a lot. He would always be there for us." Tracey said. "He was a great guy." O'Daniels said. "We miss you."
Sexual harassment falls by the wayside

May meeting. The delay in negotiations means trustees will be unable to vote on the deal at the meeting and will have to wait at least another month.

"There are some differences in the new agreement," Ernst said. "But nothing has drastically changed. When we go public, I don't think people are going to say, 'What in the world is this?'" Ernst said the final documents will be available on every campus after April 13 for a 30-day public review. After that, 15 days will be reserved to consider comments submitted during the review period.

"I expect it to take much longer than 15 days to synthesize the information we get during the review," Ernst said. "It really depends on how much feedback we get.

Still, Ernst expects the plan to be approved by the end of the school academic year.

"The first phase of actual CETI will, which will be digging trenches and wiring, will probably start in the fall," Ernst said.

Brent Keetch, Cal Poly’s interim director of university relations, said the delays in CETI approval are a result of the plan’s magnitude.

"Nothing of this size has been tried before in terms of public higher education," Keetch said. "There are some really difficult issues to work out.

Keetch said Cal Poly will be very involved during CETI’s phases, which will be high performance. The standing technology committees will probably be the most involved with the review," Keetch said. "Those committees include faculty, staff and students.

I am sure President Warren Baker makes sure the Chancellor’s office knows exactly what concerns Cal Poly has.

Keetch said CETI will be a significant behind-the-scenes role on every CSU campus.

CETI will provide a lot of technology products and price breaks. But students and staff will always have the option not to purchase CETI products. This won’t be another Pepsi deal."

—Brent Keetch

Another game asked students to make at least five words out of the word Utilidor. Some comical answers included turd, lard, dilutor, dirt and idiot.

In the last game, players tried to throw hard hats onto orange pylons. The students who tried to complete all three games received a free T-shirt.

Another way to win a free T-shirt was to participate in the non-traditional run/walk at 12:15 p.m. Students were asked to follow a golf cart decorated with caution stripes driven by Rex Wolf, campus architect who was the campus manager for the project. The run/walk started from the UU and continued up Perimeter Road all around campus where the vault, the new offices would be put in place.

"We are having this event to celebrate that it is over," Wolf said. This is really geared for the students.

Overall, students are pleased to hear that Utilidor is over and the campus is back to normal. "I am relieved, maybe things will be nicer around here," said Jared Bush, agriculture senior. "There will be less hold-ups and less problems with my e-mail account.

In an innovative new class, art history will be deconstructed and reexamined from a point of view which emphasizes the role of women artists and feminist issues.

Art X316 was designed to broaden students' perspectives by focusing on often overlooked material involving women from Renaissance to contemporary periods.

The class is the brainchild of art and design professor Jean Wetzel. Two years ago, when Wetzel was interviewing for her position at Cal Poly, she was approached by several students and faculty members regarding the need for such a class.

"This class has given me the opportunity to delve into something I'm interested in and I felt as qualified as anyone to teach it," Wetzel said.

Originally from the Midwest, Wetzel taught at the University of Puget Sound in Tacoma, Wash, for seven years before joining Cal Poly's art and design department. She specializes in Asian Art.

"I'm interested in the whole diversity idea," Wetzel said.

Women as Subjects and Objects in Art History is not a traditional art history course. With 40 percent of their grade based on leading lectures and class participation, students are not only encouraged to participate in the general lecture but also to develop their own through student-led discussions.

Ecology and systematic biology senior Angela Sandoval enjoys this aspect of Wetzel's teaching style.

"She's good at spurring discussions, and she makes good use of slides," Sandoval comments. "She uses slides not just to show you the work, but to tell you why it's important."

"Students had different agendas for taking a course about women artists," Sandoval explained. "I'm interested in art in general but also in specifics of feminist theory as it applies to art.

Speech communication senior Gabriel Jones wondered about the lives of women artists asking "What were they thought of back then?"

Art and design senior Amanda Swanson was interested in the women whose influences are not recognized in art history.

"A lot of times it seems a woman was present in an artist's life who was an artist herself and she was never recognized as one," Swanson said.

Wetzel was delighted at the turnout for the first session on Tuesday.

"Almost a quarter of the class was male. This is something you don't normally see in these types of classes," she said.

Wetzel considers the Cal Poly campus much more diverse than the relatively small liberal arts environment of the University of Puget Sound.

"For one thing, there were only about 2000 students enrolled there," said Wetzel. "There's greater economic, age

MUSTANG DAILY'S GUIDE TO ENTERTAINMENT AND THE ARTS

Sofonisba Anguissola, (1532-1625); One of the artists who will be studied in Art X316. Born into a northern Italian family, Anguissola had the benefit of being educated along with her brothers because her father believed all of his children should be educated equally. A sketch of her work was sent to Michelangelo who liked it so much he kept it and eventually gave it to a friend as a gift.

Rethinking Art

Art X316: Women as Subjects and Objects in Art History
Watercolors to wood

By Janie Zaffellette
Art Weekly Writer

Woodsmellers, pastels, acrylics and wood are just some of the mediums used to create the pieces now on display in the University Union Art Galerie.

The convergence of various media into one show is a reflection of the different types of art Cal Poly students are interested in creating.

The show called "A Jury of Your Peers," is a revival of a student competition from the past. Following the tradition of the previous shows, this exhibit is open to all Cal Poly students.

"A Jury of Your Peers" is exactly that. Winners were determined by student judges—whose majors range from art to architecture to finance—and one art alumna. Since the Galerie received more than 40 pieces of art, the judges had their work cut out for them.

The diversity of the pieces received was a little "like comparing apples to oranges," said Jeannine La Barbera, Galerie Curator. "We (the Galerie) did the best to give a fair number of awards."

The diversity also made it difficult to separate the pieces into categories. The judges had to critique art that ranged from two-dimensional pieces such as photographs, self-portraits and abstract paintings to three-dimensional pieces like a pop-corn-filled bass guitar, ceramic pottery and sushi tray sets. Participants were charged a two dollar entry fee per piece with a five piece maximum. Cash prizes derived from the entry fees were awarded in both the two-dimensional and three-dimensional categories—$75 for first place, $50 for second and $25 for honorable mention. Graphic arts and communication junior Matt Thomas won first prize in the two-dimensional category. His piece, "Doomsday Martians," is made of vibrant acrylics and framed with a gold-colored frame.

The second place piece is a self-portrait by art senior Long Nguyen. Nguyen used pastels to make a portrait of himself in his village in Vietnam.

Art sophomore Brian Kong received the honorable mention for his "Pause Cafe," a small, colorful piece rendered through a printmaking process.

First prize in the three-dimensional category was awarded to biochemistry sophomore Curtis Attebery for his three-dimensional piece "Martians," is made of vibrant colored frame. The second place piece is a self-portrait by senior Long Nguyen. Nguyen used pastels to make a portrait of himself in his village in Vietnam.

The second place piece is a self-portrait by senior Long Nguyen. Nguyen used pastels to make a portrait of himself in his village in Vietnam.

Attebery's untitled creation captures the quality of work that is being done now. "A Jury of Your Peers" runs March 31 through April 30. A reception for the artists will be held April 18 during Cal Poly's Open House from 12 to 3 p.m.

The Galerie is open Tuesdays, Thursdays and Fridays from 10 a.m. to 4 p.m., on Wednesdays from 10 a.m. to 7 p.m., and on Saturdays and Sundays from 12 p.m. to 4 p.m.
Get Lei'd at the Vets Hall

By Andy Castagnola
Daily Staff Writer

Up-and-coming ska band My Superhero will bring its upbeat sound to the San Luis Obispo Veterans Hall Friday for the Delta Chi fraternity’s Del Tiki concert.

A portion of the ticket sales will benefit child abuse prevention and the Parents’ Support Center on Prado Road.

Teen Heroes, Broken Pretzel and Cal Poly student-band Hotwheelz will join My Superhero for the four-hour show starting at 8 p.m. Tickets are $6 at the door or $5 pre-sold in the UU Plaza, Buo Buo Records or Liquid CD.

Orange County-based My Superhero has played together for about five years, said concert promoter Billy Quan.

Production’s Southern California president.

The seven-member band will also release its first CD this summer on the Universal label. Quan describes their sound as highly aggressive, with Reel Big Fish and Green Day sounds.

Local student band Hotwheelz completes the lineup.

San Diego band Broken Pretzel will mesh ska with rock and pop, according to bassist and Cal Poly graphic communications student Ryan Wong. After playing together for more than a year, the group has planned a summer tour through 15 states.

The album’s latest release, “12 Bar Blues,” also features music by his former band the Bosstones.

“12 Bar Blues” is Weiland’s first full-length album after taking a break from STP last year due to cope with a heroin addiction. Now clean and solo, Weiland returns to the music scene on a completely different and exotic level.

Described by label Atlantic Records as an album that is “art-kitsch 70’s-philina on the smoothest-pep-industrial trip,” “12 Bar Blues” is Weiland’s way of showing fans that he is still the man he was used to be.

The April issue of Spin magazine describes “12 Bar Blues” as Weiland’s “declaration of his own talent” after playing with STP for five years and adds that it’s “a creepy mix of lounge tunes, melodramatic pop cabaret and nihilistic, self-nurturing lyrics.”

Accompanying Weiland on this solo trip is bassist Martyn LeNoble and guitarist Peter Bstefano (Bono for Pyrex). Grammy nominated jazz pianist Brad Mehldau and co-founder/manager, songwriter, record producer and singer Peter Bstefano (Bono for Pyrex) are also largely involved in the making of the album.

Several songs on the album are also largely involved in the making of the album. Several songs on the album are also largely involved in the making of the album.

Several songs on the album are also largely involved in the making of the album.

Several songs on the album are also largely involved in the making of the album.

Several songs on the album are also largely involved in the making of the album.

The album’s title track, “Rock ‘n’ Roll Suicide” and in the song’s second stanza: “I never felt the weight of all the pain I’ve given with my name / I’m a witness of the cross.”

In the soulful “Diviner,” Weiland begins to describe a girl with a fairly active libido, but turns the song around to describe how he used to be a “drinker, he’s a boaster & junkie, he ain’t shit / Some of them get famous / But most of them get killed.”

With electric-throbbing and intermittent distortion in “Cool Kids,” he searches for an identity: “Who wants off of this nice life / I’ve everything I am / It’s everything I should / I want / I want everything.”

The song “You’re Sun; to Run Out of Good Tape” is about Berger’s life.

“I write in this column.

For that very reason, I cannot

be held responsible for anything I write in this column.

No.”

When you’re driving through industrial, central California, you’re sure to run out of good tape and big Gulf. - Berger’s Law No. 1.

I was asked why there are so many roads and cities in California that are named after industrial products and military equipment.

This is the laborious drive to Las Vegas, through California’s agricultural heartlands, pass the industrial backbone and you will inevitably reach the armpit of America, the California desert. There you will find towns and highway exits, peppered throughout the desert, with very suspicious names like “Missile Launch Blvd” and “Ezysw.”

Weinstein, Weavering, Calif. (named for the non-metallic element used in alloys and nuclear reactors in的本质 areas). It is the city home to borax, a white, water-soluble powder and a crystal used in borax, Na2B4O7-10H2O, used as a flux, a cleansing agent and in glass-making and tanning.

Boron is also a proud member of the city’s historical heritage, with such landmarks as the San Bernardino County Courthouse.

The year 2000 has witnessed a remarkable upswing in the city’s growth and development, as evidenced by the construction of a new county courthouse, the expansion of the local airport, and the development of new residential and commercial areas.

Boron has also experienced a significant increase in tourism, with a number of new and existing attractions attracting visitors from all over the world.

The city is home to borax, a white, water-soluble powder used as a flux, a cleansing agent and in glass-making and tanning.

Boron is also a proud member of the city’s historical heritage, with such landmarks as the San Bernardino County Courthouse, the city’s main tourist attraction. Borax, which is used in many household products, is also found in the area.

With electric-throbbing and intermittent distortion in “Cool Kids,” he searches for an identity: “Who wants off of this nice life / I’ve everything I am / It’s everything I should / I want / I want everything.”

When you’re driving through industrial, central California, you’re sure to run out of good tape and big Gulf. - Berger’s Law No. 1.

I was asked why there are so many roads and cities in California that are named after industrial products and military equipment.

This is the laborious drive to Las Vegas, through California’s agricultural heartlands, pass the industrial backbone and you will inevitably reach the armpit of America, the California desert. There you will find towns and highway exits, peppered throughout the desert, with very suspicious names like “Missile Launch Blvd” and “Ezysw.”

Weinstein, Weavering, Calif. (named for the non-metallic element used in alloys and nuclear reactors in本质areas). It is the city home to borax, a white, water-soluble powder and a crystal used in borax, Na2B4O7-10H2O, used as a flux, a cleansing agent and in glass-making and tanning.

Boron is also a proud member of the city’s historical heritage, with such landmarks as the San Bernardino County Courthouse.

The year 2000 has witnessed a remarkable upswing in the city’s growth and development, as evidenced by the construction of a new county courthouse, the expansion of the local airport, and the development of new residential and commercial areas.

Boron has also experienced a significant increase in tourism, with a number of new and existing attractions attracting visitors from all over the world.

The city is home to borax, a white, water-soluble powder used as a flux, a cleansing agent and in glass-making and tanning.

Boron is also a proud member of the city’s historical heritage, with such landmarks as the San Bernardino County Courthouse, the city’s main tourist attraction. Borax, which is used in many household products, is also found in the area.

With electric-throbbing and intermittent distortion in “Cool Kids,” he searches for an identity: “Who wants off of this nice life / I’ve everything I am / It’s everything I should / I want / I want everything.”

The song “You’re Sun; to Run Out of Good Tape” is about Berger’s life.

“I write in this column.

For that very reason, I cannot

be held responsible for anything I write in this column.

No.”

When you’re driving through industrial, central California, you’re sure to run out of good tape and big Gulf. - Berger’s Law No. 1.
Cal Poly Chords will perform works by two local composers, along with music from Janesings Brahms, at their Home Concert this Saturday at 8 p.m. in the Performing Arts Center’s Cohen Center. Performing the evening’s program are PolyPhonies, the University Singers and the Vocal Jazz Ensemble, all conducted by music professor Thomas Davies. Tickets cost $5 to $10 and are available at the PAC’s ticket office.

BETTER Berger from page A3

state-of-the-art Sony laser sound with digitally enhanced scenes of Reynold’s mustache. Who needs America’s favorite greaser musician when you can have our favorite local comedy. Oddly enough this concept of re: re-releasing, redoing, re-mastering, re-enhancing, etc. has been on my mind before. But I’m touched enough to re-address the meaning of “re,” and its role in contemporary American history. Do you realize how deep we are in the age of re-issuing, when a man doesn’t need to be cloned or frozen in cryogenics to emerge as a star 20 years after he’s dead. A song doesn’t need to be re-recorded to be remembered. Hollywood is like the fountain of youth for all the old timers who can’t handle losing their fame. Whoever said John Travolta wouldn’t be back in his sturdy youthful body, overlooked the “re” factor. I say Travolta’s career should have ended when Vinnie Barbarino passed the GED and learned to read “Dianetics” by L. Ron Hubbard, but then I am a strong advocate of abolishing “re” altogether. Maybe someday Mustang Daily will re-release Berger’s. Mind. Unfortunately, I can’t guarantee it will be funny then either.

and ethnic oriented diversity here.”

The class enrollment was a bit of a challenge for Wetzel who was hoping for a smaller group. She hated turning away people who were trying to “crash” the class. “We hate being the bad guys but resources aren’t always there to offer more sections,” said Wetzel.

“I’m one of only two art historians in this department and there is a lot of demand for us.” This is partly why it was difficult to teach art and design senior Trevor Gerhard. “I needed the class, because I was full, but I feel the subject isn’t touched enough to re-address the meaning of “re,” and its role in contemporary American history. Do you realize how deep we are in the age of re-issuing, when a man doesn’t need to be cloned or frozen in cryogenics to emerge as a star 20 years after he’s dead. "While the court will certainly agree that plaintiff's allegations describe offensive conduct, the court... has found that the governor's alleged conduct does not constitute sexual assault," she ruled.

Her 39-page ruling abruptly halted a sensational lawsuit that had haunted the White House for more than three years and threatened to place his sexual conduct with a variety of women before the nation in a historic trial.

Clinton, wrapping up a six nation tour of Africa, was so stunned by the verdict that he asked if it was an April Fools' joke. The president is "pleased that he has received the vindication he has long awaited." press secretary Mike McCurry said.

"It is a shame that unless the ruling is reversed on appeal, there will now never be a determination of who was telling the truth and who was lying," her law firm said in a statement.

"I'm shocked," said Susan Carpenter McMillan, Jones' spokeswoman. "I'd be less than honest if I didn't tell you I was completely blown away by this decision."

While the White House cheered the decision, Clinton's legal woes are far from over. Whitewater prosecutor Kenneth Starr is pressing his criminal investigation into whether Clinton lied about having sexual relations with White House intern Monica Lewinsky and encouraged her to cover it up.

"Judge Wright's ruling today has no effect on our authority and we will continue working to complete the investigation as expeditiously as possible," Starr said in a statement just hours after the ruling.

The White House brushed off the lingering issues. "This has been a fact of life and no doubt other things will remain a fact of life for him," McCurry said. He said Clinton had shown "extraordinary discipline" in not being distracted. Whatever went on in the Excelsior Hotel in Little Rock "was brief and isolated; did not result in any physical harm... did not result in distress so severe that no reasonable person could be expected to endure it," the judge wrote.

"Although the governor's alleged conduct, if true, may certainly be characterized as boorish and offensive, even a most charitable reading of the record in this case fails to reveal a basis for a claim of criminal sexual assault," she added.

The political jeopardy for Clinton if the trial had gone forward was evident in the last few weeks, when both sides in the lawsuit waged a sensational war of words in court filings that included details of alleged relationships between Clinton and a half-dozen women. Throughout, however, the president's approval ratings remained at record highs.

Jones' lawyers introduced secondhand allegations — denied by the supposed victim — of an alleged sexual assault by Clinton two decades ago. They prompted a former Miss America to acknowledge she had consensual sex with Clinton in 1983. And they led former White House worker Kathleen Willey to appear on national television with allegations of an unwanted sexual advance by Clinton near the Oval Office.

An Open Letter to Students Planning to Attend Law School from U.S. News & World Report

Dear Student:

DON'T YOU JUST HATE TO BE GRADED? Well, by their shrill protests about U.S. News & World Report law school rankings, so do most of the deans of the law schools you are considering. However, as a law school graduate with both a J.D. and a LL.M. degree, I can tell you that these same deans will subject you to rigorous grading. You will be required to endure lectures from tenured professors who have not changed their class notes since the Battle of Hastings. Then, after attending class for a full semester, you will be given one exam to determine your grade. One exam. One semester. One grade. One roll of the dice to measure your performance.

At U.S. News & World Report, we are far more equitable (to use a legal term). We have a multi-faceted, multi-dimensional, sophisticated ranking system developed and evolved over many years to give you guidance on what may be one of your largest financial investments and certainly one of the most important choices for your career in law and perhaps beyond. While our law school rankings should not be the only criteria in your choice of a law school, they should certainly be an important part of the analysis.

Get your copy of U.S. News & World Report's Best Graduate Schools guide on newsstands now. Or, to make it easier for you to see the book that 164 law school deans would prefer you not see (notwithstanding their commitment to the First Amendment), call 1-800-836-6397 (ask for extension 5035) and I will arrange for a copy of the book to be sent directly to you at $1 over cover price. This will also ensure that you have a copy of these important rankings because, as a result of publicity surrounding the deans' determination to have you ignore the rankings, they are a very hot item.

These law school rankings are a small part of our philosophy of News You Can Use® information we bring you in each issue of the magazine to help you manage your life.

Good luck in law school and good luck on making the right choice.

Kindest Regards.

Sincerely,

www.usnews.com
Buy a Power Macintosh G3
desktop or minitower.

The Power Macintosh G3 is the fastest personal computer we've ever built. Faster than Pentium II/300. With the brushtail PowerPC G3 processor at its heart, the Power Macintosh G3 connects quickly to the Internet, opens PC files with ease, increases personal creativity, and unlocks creativity—at a surprisingly affordable price.

Pick one of these—free.

When you purchase a Power Macintosh G3 desktop or minitower computer from March 16 through June 19, 1998, you can also choose one of these three powerful add-ons at no additional cost.

Call 1-800-277-5356 to learn more about Apple's student loan program.

The original application, notice of which hung in public view on the Performing Arts Center, sparked controversy and hearings about alcohol sales at PAC events.

"We're not suggesting prohibition," she said. "Let the people who want to drink drink before they go and when they get home. No one's saying they can't do that."
Spring is here at ASI Recreational Sports!

The law profession is hot again...

Not since the high-rolling days of the late 1980's have New York's corporate law firms wooed the top law school students so assiduously. The economy is surging, lawyers are doing very nicely, thank you.

---

The Wall Street Journal, July 1, 1997

O many firms are recruiting talent that competition recently has become downright brutal for top law school graduates and well-regarded mid-level associates...many of the lawyers recruited have about seven offers on the table.

The Cal Poly softball team mounts an attack on the field that most teams have been unable to beat.

Weather permitting this weekend, the Mustangs will host UC Santa Barbara, Loyola Marymount and Sacramento State at their softball field.

Tenth-year Head Coach Lisa Boyer is one win shy of win No. 300 in her coaching career. Boyer currently stands at 299-176-2 all time in her career and at Cal Poly.

Cal Poly picked up a big two-game sweep at No. 19 Cal Berkeley last Wednesday, winning 2-0 and 7-4, but dropped a 4-3 decision to San Jose State on Thursday.

Against the Bears in game one, Dezarie Knipfer picked up the win, allowing just four hits and striking out 11.

In game two, the Mustangs rode the bat of Kelly Sack who doubled once, tripled twice and homered to lead the way in the 7-4 victory that took 14 innings to complete.

In two games last week, senior centerfielder Sack went 5-for-9, including a 4-for-5 performance. Along with her double, two triples, and home run, Sack scored two runs and tallied four RBI against the Bears.

Sack now leads the Mustangs in batting (.344), runs (20) and triples (2), and triples (6).

Knipfer is posting great numbers so far this season. She holds an 11-4 record and a 0.46 ERA and seven shutouts. Even more amazing is the fact that she has struck out 177 batters this year and allowed only nine walks. In the past seven games, 36 innings, she has not allowed one walk.
Track from page 12

Cal Poly's strongest solid performances came from the pole vaulters. Both the men and women were victorious picking up 16 points for the Mustangs. Paula Sorrento and Bianca Maran were the only two competitors to clear 11-7 3/4. After battling for the top spot, Sorrento placed first and Maran second after neither could clear 12 1/2.

The Cal Poly men grabbed first and second place. The Mustangs actually finished in places one through four, but aren't allowed to have more than two athletes count in the overall score.

Cal Poly left the field behind after 16 feet. With teammates clapping in rhythm to his steps, Brad Pekott was the only Mustang to clear 17-0 1/2, but couldn't clear 18-0 3/4.

Logan Nichols and Joe Koeing finished in a tie for second and Kris McClintock finished fourth for the Mustangs.

Cal Poly also had success in the javelin. Chip Lishenthal won the event on his fourth throw of 214-10.

In the high jump, Mitch Parker finished first and Matt Hard third for Cal Poly. Both jumpers were unable to clear seven feet so the winner was decided by misses throughout the preliminary rounds.

The best performance for the men on the track was by Kamon Corwright. He finished first in the 200m with a time of 20.76 and second in the 100m.

Jean Phillips picked up second for the Mustangs in the 400m. Kenny Goodrich picked up fifth place points with a second place finish in the 5,000m.

Wrestle from page 12

With too many wrestlers for the opening round, each had to wrestle in a pignal, preliminary round. He lost an 10-3 decision to Bert Zimmerman of CSU Bakersfield. McGee also lost a 5-3 decision to Kari Roessler from Illinois.

All four went to wrestle in the consolation round. Wells beat two opponents and Prewell by fall, finishing one victory short of being named an All-American.

After breaking his hand in practice on Wednesday, French added two more wins to his total before falling out of the tournament.

In the first round, Wells major decision Du 10-4 range from Penn State, 15-5. And the two met again in the final round, with Wells major decision to again finish seventh in the nation.

En route to becoming an All-American, Wells won a 4-2 decision in preliminary round over No. 10 Matt Suter from Arizona State. Wells lost a 12-4 decision to No. 2 Trentor Flowers of the University of Oklahoma in a 7-1 decision over Sam Kline of West Virginia.
SPO R T S  

Wells wrestles way to All-American

Five Cal Poly wrestlers traveled to Cleveland, Ohio for the NCAA Wrestling Championships; after some hard fought battles only one came back an All-American.

Cal Poly junior David Wells was ranked 15th in the nation when he arrived at the national championship. He finished seventh and was named an All-American.

Cal Poly athletes are excelling in their sports and receiving national recognition.

When Cal Poly wrestler David Wells placed seventh in the national championship he stepped onto the podium an All-American and his smile was televised on ESPN all over the nation.

The Mustangs had a strong showing at the NCAA Division I wrestling championship in Cleveland, Ohio March 19-21.

Five Cal Poly wrestlers traveled to the nationals, Craig Weik (150), David Wells (154), Brian Bowles (177), Mike French (190), and Gan McGee (heavyweight).

The Mustangs were matched up with the top ranked wrestlers in the first round giving them a tough wall to surmount.

Weik lost his first match to Rodney Jones from Oklahoma in a 6-4 decision.

Bowles battled it out to sudden death, but lost a 7-5 decision to Mark Munoz from Oklahoma State.

S P O R T S

Mustangs perform well at Cal Poly Quad Meet

While most students were packing their cars and heading for spring break on Saturday March 21, the Cal Poly Track and Field team headed some of the top collegiate athletes in the nation.

USC, Brigham Young and Kent State all traveled to San Luis Obispo to kick off the U.S. Collegiate Track and Field Series.

The Mustangs raced for their track-side fans and for the camera. This meet was taped to be national- ly televised on Fox Sports.

Cal Poly came to the meet as underdogs but, after eight hours of trials, proved it could compete.

The women got going early with a win in the 5,000 meter race. Krissey Schrani, in her first race of the season, led teammate Hillary Carlson lead for most of the race before seeing first place on the sec-

ond to last lap. Schrani increased her lead over the pack and crossed the line first at 16:47.00. Carlson ended up in third place at 16:51.91.

Jennifer Spahr, who beat her opponent by only eight seconds, captured another distance victory for the Mustangs in the 3,000 meter race.

On the field, Suzie Shannon put in another strong performance for Cal Poly. She finished first in the shot put, second in the discus and third in the hammer throw.
