**Don't drink and fly**

**Prop. 9 may mean lower utility rates**

By Mike Munson
Mustang Daily

Both sides of Proposition 9 claim lower electric rates for Californians. For San Luis Obispo County residents, the measure could mean much more than a change in their monthly electric bills.

Pacific Gas & Electric Co. president Gordon Smith stated that Diablo Canyon Power Plant would probably shut down if the proposition is passed. The potential closure of the nuclear plant has brought joy to some area residents and alarm to others.

Diablo Canyon became fully operational in 1985 after $5.8 billion in construction costs and years of anti-nuclear protests. To some residents the plant symbolizes jobs, clean energy and millions in tax dollars for the county. Others see a costly burden for California taxpayers and a nuclear danger.

Proposition 9, which calls for an immediate 20 percent rate reduction, would force PG&E to absorb the remaining construction costs of Diablo Canyon instead of adding surcharges to customer bills. After the 1996 electric utility deregulation, the utilities were allowed to issue $6 billion in bonds to prepare for competition by paying off construction costs on the state's two nuclear plants. The utilities
could not do so because of the rate freeze.

**Water polo fund-raiser gets, uh, personal**

Poly men hope their calendar sales will send them to Ohio for national championships

By Chris Hoffman
Mustang Daily

The Cal Poly men's water polo team — naked. In a calendar.

No swimsuits, no goggles, just the players and their, uh, equipment.

"The offensive part is being covered by a water polo ball," coach Sean Raymond explained. "It's in good taste. (But) the closer you look, you notice these guys don't have any Speedos on their hips. You can tell something's missing."

The calendar will be a single sheet featuring a black-and-white photo of the disrobed team, surrounded by the months of the year.

It is being sold to raise money for the team's trip to the National Club Water Polo Championships in Ohio this weekend.

"Obviously it's really expensive to fly to Ohio," said team member Dave Barby, a political science junior. "All the proceeds go to help fund our trip."

The calendar is scheduled to go on sale some time in mid-month.

**IN THE BUFF:** Members of the Cal Poly water polo team posed for a photo to grace their 1999 calendar, a fund-raiser they would like to continue in the future.

PROP 9
continued from page 1
County.
Roselle Becker is a member of Mothers for Peace, an anti-nuclear energy group, and The Utility Reform Network. She said Californians have been paying the highest rates for electricity in the country for over a decade.

"Right now we're paying about 40 percent of our bill to bail out bad investments in nuclear plants," Becker said.

Becker called the surcharges on electric bills corporate welfare. She said Proposition 9 makes the utilities, not the taxpayers, cover the cost of their own bad investments.

"Proposition 9 gives a 25 percent tax write-off and cuts the make ballot," Becker said.

There is nothing in the measure that orders the closure of Diablo Canyon or San Onofre.

Becker said the purpose of the bill was not to close the plants, but rather to make the utilities take responsibility for their investments.

She said the closure of Diablo Canyon would be an added benefit, but she thinks it may only be a threat by PG&E to rally voters worried about jobs against the proposition.

According to Richard Kranzdorf, a Cal Poly political science professor and political chairman of the local chapter of the Sierra Club, the issue has caused a split among California's environmental groups.

He said the Sierra Club endorses the measure. Groups such as the Environmental Defense Fund and the Natural Resources Defense Council are opposed to the proposition.

They say it would slow down the deregulation of the industry and threaten the development of clean alternative energy sources.

Dan Lockwood is a machinist at Diablo Canyon and chairman of the local International Brotherhood of Electrical Workers union.

He said the passage of Proposition 9 would be a double hit for county residents because state taxes and electric rates would rise and the closure of Diablo Canyon would cause unemployment.

Lockwood said the state will lose 3,000 union jobs if the propositions passes — 1,300 at Diablo Canyon.

The resulting unemployment would mean a major hit to the county's tax base.

He said the county also takes in millions a year in taxes from the plant.

A shut down and the resulting devaluation of the plant would mean a great loss of tax dollars to the county.

According to Lockwood, the state's two nuclear plants provide approximately 20 percent of its power needs.

Another 20 percent is purchased outside of California. He said the closure of the plants would force California to obtain 40 percent of its power from expensive out-of-state sources, causing rates to rise.

" Diablo can produce a megawatt of electricity for $26, compared to the cap of $50 per megawatt of out-of-state power," Lockwood said.

Lockwood said if Proposition 9 passes, the utilities will be forced to default on their $6 billion bond sale.

The taxpayers will be forced to absorb the cost and the action will hurt California's bond rating.

Lockwood said Proposition 9 is a misguided attempt at solving problems that will eventually be fixed by the 1996 deregulation of the industry law.

Californians may or may not see a change on their electric bills after Tuesday's vote, depending on which side voters choose to believe.

Resume

Objective: To secure a professional position by utilizing my college education and training.

Skills:

• Excellent PC savvy
• Proficient in Excel
• Strong oral and written communication skills
• Strong organizational abilities
• Excellent negotiation skills
• Product Knowledge
• Excellent customer service
• Good at multi-tasking
• Work well alone and as part of a team
• Have a good sense of humor

References available upon request.

You made it look professional on paper. Now put your skills into action with a challenging opportunity at Target. You're looking for a way to brighten your post-graduation prospects. We're looking for hard-working students who are interested in learning the ins and outs of retail.

Our Fall Semester Internships give Juniors and Seniors with excellent interpersonal skills a chance to gain valuable work experience. You'll train with Team Leaders and Executives for three months, building your leadership skills and beefing up your resume. If we're impressed with your work, you'll be a prime candidate for a post-collegiate level position come graduation.

We also have exciting Executive Team Leader opportunities available for success-driven fall semester grad. You'll create memorable, great service or human resources while learning to thrive in our competitive industry. In preparation, you'll receive 8 weeks of Business College and 4 weeks of position-based training.

Everyone knows Target is one of the nation's largest upscale discounters. But what you may not know is that we offer great salaries, a relaxed work environment and opportunities to advance. But Team Leader opportunities pay $30,000 and after half-bills, including medical dental life insurance and a 401k plan. We also offer extended health care benefits and other company perks. Starting in November 2nd, be sure to speak with the Target Representative or to schedule an interview for Tuesday, November 2nd. For more information on these exceptional career opportunities, contact the Cal Poly Sac Internship Development Center ID.

Target
THE STATE’S COST WOULD BE ABOUT $600 MILLION ANNUALLY FOR 25 YEARS TO REDUCE CLASS SIZES AND UPGRADE CLASSROOMS.

Proposition 1
Proposition 1 is an amendment to Chapter XIII-A of the constitution, added by Proposition 13 in 1978, which allowed property taxes to be calculated on the basis of the property’s current market value.

Proposition 2
Proposition 2 clarifies and limits what the legislature is authorized to do. The proposition is written to keep revenues from transportation taxes and fees within the State Transportation Fund by providing specific criteria for transportation loans.

Proposition 3
This proposition would change the law for national political party presidential nominating conventions. Currently, voters may choose whatever delegate they wish, regardless of whether the voter’s political party affiliation matches that of the delegate they choose. The law would require that voters select the delegate that has the same affiliation as the voter, with minor costs to state and county governments.

Proposition 4
This measure would restrict the use of specialized traps on fur-bearing mammals. Proposition 4 defines and categorizes traps to prohibit sale of furs obtained by use of illegal traps. It establishes fines and penalties for using these traps.

Proposition 5
This proposition would require California to enter into an agreement with Indian tribes permitting gambling on tribal land. Tribal casinos would be allowed to have slot machines and banked card games. The actual fiscal impact is not known, but depending on how much gambling grows, there could be revenue increases.

Proposition 6
Proposition 6 makes it a crime to possess, transfer, receive or hold a horse with the intention of killing it for human consumption. It would also be a crime to sell horsemeat in California for human consumption. It is currently legal in California for people to eat, sell and serve horsemeat. California horses cannot be sent out of state to be slaughtered for human consumption. It would still be legal for Californians to eat horsemeat imported from other states.

Proposition 7
The initiative offers $218 million in tax credits to encourage reduction of air pollution emissions by upgrading vehicles. Millions of dollars in annual state revenue will be lost through 2010, as tax credits will be awarded.

Proposition 8
This initiative aims to permanently reduce class sizes for districts that establish parent-teacher councils to review and create curricula. It creates a state Chief Inspector of Public Schools, requires testing teachers before they can instruct certain subjects and calls for higher penalties for possession of drugs.

Proposition 9
This proposition creates up to $60 million in new state programs and will cost local school districts potentially millions of dollars annually.

Proposition 10
For information on Proposition 9, see story on page 1.

Proposition 11
This initiative will require parents to enter into sales-tax revenue-sharing agreements.

FUND-RAISER
continued from page 1

time this week, with a price under $10. The team is not sure where it will sell the calendars, but are hoping to put a booth in the University Union or sell them in El Corral Bookstore.

"A lot of it is going to be used for the egg donation center," said team captain Matt Launder, a biology senior.

Raymond said that doing a naked photo is "something the team has been doing around for quite a while," and the team was enthusiastic about the calendar idea.

"We thought it was a cool idea. We were having a good time with it," said Launder.

"Everyone was willing and thought it was a funny idea," said Barry. "You have a little more confidence when there is 25 other guys around." The team first thought of producing a nude photo in the 1997-98 school year with the intent of putting it in the Rec Center display case as a way to promote the team. The idea was inspired by Time Magazine, which ran several photos of naked Olympic athletes in 1996, including the U.S. water polo team.

Dearest Friends,

In just a few days you will select a mayor and two city council members in an important election.

San Luis Obispo is a community of responsible individuals. I know this to be true. My candidacy is founded on reason, experience and a fundamental belief in personal responsibility. We need not fear each other. Instead, let us work to preserve our heritage, respond to today’s realities and plan for the future. Together we can guarantee that San Luis Obispo remains that special place.

I would be most grateful for your vote, and look forward to working for you as a member of the San Luis Obispo City Council.

Sincerely,

Marc Brazil
Separate things

Recently a young man was shot to a fence and beaten to death in Wyoming. Even more recently than that, a man was shot in the kitchen by a sniper in the quiet suburbs of Buffalo. The box was homosexual by the name of Matthew Shepard and the doctor was a well known abuser. I believe, for the sake of his profession. What, besides being brutally and unjustifiably killed, would be the motive for Dr. Lott to commit suicide? They both have the qualities, in their death, of being perfectly blameless for their deaths. Lott was not suicidal, and Matthew Shepard was not in any way a candidate for a horrific incident in Wyoming as a political tool, and what better time than a few weeks before an election?

Next, we have the doctor who was killed in his kitchen by a sniper. The doctor was an obstetrician who performed abortions of all types, including partial birth abortions. His death was a tragedy, and is something no one who believes in a democratic society would condemn.

Yet, the militant pro-choice groups have made it very clear that doctors performing abortions would be culpable for this horrific death. Gloria Delil of the pro-life movement called on the pro-life movement to cease all speech calling abortion murder, and also declared that the two men who conspired to commit the doctor’s death by not providing protection, as in body guards for the abortionists. It should be known that not only Operation Rescue, a pro-life organization, but all of the others have condemned the actions of the sniper and made sure to dissociate themselves from any members in their movement that might perpetrate this type of crime. In fact, Operation Rescue has made clear that protection of all life is the foundation of their organization and the taking of human life in any form, whether it be fetus or grown man, is deplorable to the very core of our nation.

By the same token, conservatives, including Lott, Jerry Falwell, Pat Robertson etc., may stand strongly opposed to homosexuality. They, as well as members in their parties and congregations, may believe homosexuality is sin, but these leaders and the mainstream forces that Arne Heche and her Hollywood liberals blame, have never ever endorsed the taking of human life to deal with homosexuality.

So here is the rub: Heche and Delil want you, gentle reader, to continue standing up for a principle, one believes in and endorsing murder and calling something wrong because of one’s principles are no different things, either the liberals haven’t made that distinction or they don’t want to.

Aron Deferrari is a political science sophomore.

Rodeo enriches agricultural education

We are writing this in response to Adria Werbalowsky's Oct. 27 article "Proposed rodeo site stirs controversy." Coming from successful agricultural operations and being rodeo participants, we understand the dilemma of needing a facility and utilizing agricultural land.

Now that we are homeless, rodeo participants with no place to practice or board our livestock feel an urgent need for a facility. This fall we arrived to find no place to practice and bring ourselves up to the competitive level with the rest of the National Intercollegiate Rodeo Association. The NIRA is a national organization consisting of 325 member schools and 3,700 members spread across the United States. These members are more than all division I-A and I-AA football players in the nation.

The proposed site of the new facility, which is located below the student experimental farm, is not different in classification from the site of Collet Arena. The new sports complex is currently under construction on approximately 24 acres, parts of which are on prime agricultural land. This non-agriculture related facility is being built on land that could be used for production and learning, as it was in the past. This is what should alarm all of those in the College of Agriculture. The building of a rodeo facility is an agriculture-related way of life, participated in by a majority of agricultural students.

The 2.8 acres of land allotted for the new arena is not prime agricultural land according to Cal Poly soil science professor Tom Rice. Furthermore, the Deputy Commissioner of Agriculture for San Luis Obispo County is in agreement with his assessment of the proposed site. This land is not capable of producing high profit, high yielding agriculture crops. In the past it has been used to produce a minimal amount of average quality forage. The building of the rodeo unit on this piece of land would not jeopardize students' "learn by doing" experience. Rodeo teaches students how to utilize and manage animals and facilities, just as any other agriculture unit.

Furthermore, Mr. Werbalowsky states that the area of the proposed rodeo facility: "Given any care, the soil is absolutely fine for most crops, demonstrated by the multitude of varieties now successfully growing at the adjacent Permaculture Unit and Organic Student Experimental Farm." We find that the student experimental farm is a cluttered mess of prime agriculture land that could be utilized in a more professional and beneficial manner. Being criticized for land use by someone who can't utilize the land they have is hypocrisy.

In addition to Mr. Werbalowsky's poor assessment of the land, he fails to realize that the proper channels were followed in preparation to build the new arena. There was a 30-day open public comment period, which began on Aug. 17 giving the "California taxpayers (the actual owners of the land)" a chance to come and voice their concerns. This period gave community members and students the opportunity to debate the issue. An option that rodeo was never given in its eviction from Collet Arena for this sports complex.

The new rodeo unit would in fact be a "darn good one that creates more opportunities for interdisciplinary learning and brings honor to Cal Poly." Cal Poly rodeo has produced many successful agriculture individuals that bring honor to Cal Poly — World Champion Steer Wrestler John W. Jones of Morro Bay, who now runs the most successful fruit and vegetable stand in California; Cotton Rosser, a member of the Pro Rodeo Hall of Fame and the current president of the Cal Poly Rodeo Club; Ken Griffin, who was the highlight of the nationally televised College National Finals short round last June, shown on ESPN.

The state of the art rodeo unit will continue to produce many more great individuals, succeeding in rodeo and in the agriculture industry, bringing honor to Cal Poly.

Tom and Susan E. Fendorf

Karl G. Iacomin, animal science senior, and Robert J. Vesoso, dairy science sophomore, are Cal Poly rodeo contestants.

TOMORROW elect Paul Dahan as Mayor!

• Elect a mayor with proven leadership.
• An engineer & educator who has trained Cal Poly students.
• Elect a mayor not big on rhetoric but big on actions.
• Elect a mayor with innovative ideas.
• Elect a mayor who will interact, listen and work closely with you.

DAHAN
MAJOR

Elect a mayor who will be accountable to you and will work hard to provide you with:
• Affordable student and faculty housing on campus.
• Good-paying local jobs that utilize the technology and skills taught at Cal Poly by providing incentives which will attract Hi-Tech and clean industries to locate in SLO.
• Excellent facilities and athletic fields.
• A green belt around our city to maintain our natural resources.

On November 3rd, elect Paul Dahan as mayor. A mayor of actions.

San Luis Obispo City Council

with or without a new lineup, the road doesn’t get any easier from here on out for the Mustangs as they travel to play conference nemesis and No. 1 ranked Long Beach State on Thursday and then No. 15 Pacific on Saturday.

The Broncos took advantage of an inconsistent Mustang team in the first game and jumped out to a 10-0 lead behind the play of last week’s Big West Conference Player of the Week, Birdi Moore. The 6-foot-2-inch junior plugged the middle against the Mustangs and led her team with three kills in the game. She finished with a team high 15 kills and led for second in digs with 14.

With the Broncos leading 13-2 in the first game, coach Schlack replaced starting senior setter Jill Butts with freshman Sarah Lowry. The move seemed to pay off as the Mustangs managed to string together four points, their longest consecutive point total of the match. But by this point the Mustangs were too far behind to mount any type of comeback.

The second and third games were competitive as the Mustangs passing game adjusted to the Broncos’ serves. After 13 adios by the teams, the Broncos surged ahead 9-6 in the second game. Cal Poly rallied and came within one point, 10-9. However, the critical play came with the score 13-9 and the Broncos had an ace and line by outside hitter Melissa Pierce was originally called as in by a line judge but was overturned by the head referee. Schlack argued, but the Broncos were awarded a point and went on to win the game.

Both teams battled tightly in the third game. The Broncos led 10-9 but the Mustangs scored the remaining six points to win and stay in second place in the Big West Eastern Division (15-8, 5-4). The Broncos currently are on a four-match winning streak.

“Cal Poly” struggled “ball-control”

BETWEEN BLOCKERS: Mustangs’ Melanie Hathaway (left, in white) and Kari DeSoto (right) watch as the ball dips. They lost the match three games.

“The chemistry wasn’t working with the people that we were playing. It’s pretty frustrating. We couldn’t beat this team tonight,” Hathaway said. “I think we needed to show a lot more heart out there and put a little bit more of an effort. It’s up to each individual now, I think, to motivate themselves.”

Mustang outside hitter Melanie Hathaway is one of the players who moved from playing her customary left side position to the right side. She commented on why she thought Schlack made the lineup changes and what it will take for the team to break out of their losing streak.

PACKERS BEAT 49ERS, FREEMAN STEALS SHOW

GREEN BAY, Wis. (AP) — Antonio Freeman overshadowed the top scoring duo in NFL history and gave the Green Bay Packers’ one game closer to the league’s top teams.

The two connected for touchdown passes of 80 and 62 yards, as the blitz-happy Packers beat the 49ers 36-22 at Lambeau Field.

The Packers’ nine sacks of Steve Young were the team’s most since Oct. 24, 1995, against Dallas.

Freeman caught seven passes for a career-best 193 yards as the Packers and 49ers both went home 6-2, one game behind Minnesota (7-1) for the NFC’s best mark.

Young set two more NFL records: most TD runs by a quarterback and most TD tosses to one receiver — Jerry Rice.

After blowing a 16-0 lead, Green Bay regrouped in the second half by blitzing Young and returning to the quick-strike offense that sent them to the last two Super Bowls.

With the score tied at 22, Favre hit Freeman for a 62-yard TD toss with 11 minutes left in the game. Freeman beat Marquez Pope and Merton Hanks, the same two he burned on the first play from scrimmage for an 80-yard score.

Reggie White had three sacks, giving him 11 for the season, the 12th time he’s reached double digits. Five of Green Bay’s sacks came in the first six minutes of the fourth quarter.

Bucs spoil Vikings’ perfect season with 27-24 victory

TAMPA, Fla. (AP) — The Tampa Bay Buccaneers beat the Minnesota Vikings at their own game.

Moving the ball and scoring almost at will, the Bucs broke out of an offensive funk with a team-record 246 yards rushing Sunday and beat the NFC’s last unbeaten team 27-24 on Mike Alstott’s 6-yard touchdown run with 5:48 to go.

Alliot ran for a career-high 128 yards on 19 carries and Warrick Damm gained 115 on 18 attempts, giving Tampa Bay (4-4) a pair of 100-yard runners in a game for the first time in franchise history.

Randall Cunningham was outstanding in defeat for Minnesota (7-1), completing 25 of 25 passes for 291 yards and two touchdowns. But his only interception led to a second-half field goal, and the Vikings’ last three possessions didn’t produce points.

Trent Dilfer had perhaps the best performance of his five-year career for Tampa Bay. Although his passing numbers (11-for-22 for 183 yards — paled in comparison to Cunningham’s, he avoided costly mistakes and made play after play to keep drives alive.

Dann scored on a 1-yard run. Dilfer threw a 12-yard TD pass to Reidel Anthony and Michael Husted kicked a 29-yard field goal on Tampa Bay’s three first-half possessions. The TDs were the first scored by the Bucs offense in the opening half this season.

The Bucs controlled the ball for more than 18 minutes of the first half and scored on all three of their possessions.
HOOPS
continued from page 8
one does their role, finishing first in the conference is very attainable." Washington, too, has every confidence in himself. "I plan on doing a better job than I have in the past." Washington is a senior, but he has been able to show off their skills when they appear on ESPNU on Jan. 9. This appearance could help the Mustangs for Cal Poly as a Division I team.

The Mustangs have the added advantage of playing in a remodeled gym. The gym has undergone extensive changes and now resembles an arena rather than a high school gym.

Scheider said the new arena effect of the gym, along with a more distinct student section will play a role in the team's success this season. "I was a student I wanted to sit in the end zone. I think that's the section that has a chance to establish itself. It's right over the West coast as well," Scheider said. "Our crowd and the Mustangs theme that we have are going to really be able to establish ourselves in the student section where other teams, the Santa Barbara and the Long Beach States and UNLV are going to hate to play in Mott."

The Nov. 6 exhibition game will be the season opener for Mott and the Mustangs.

NEW YORK (AP) — The NBA lockout entered its 26th month on Sunday, with both sides ready to resume bargaining on the week the regular season was supposed to begin.

League and union lawyers are to meet Monday in Los Angeles to negotiate for the players and owners to meet Wednesday.

Monday, November 2, 1998

The season minus Watende Favors who may come along.

Winter Quarter Class

HUMANITIES x490

The President's Seminar: Science, Society, and the University

Taught by Cal Poly President Warren Baker
Course Coordinators: Prof. Ron Brown, Physics, Prof. Nancy Clark, History

What are the primary goals and functions of a university?
What is its role in creating a diverse society?
What are the important developments in science education?
How do we teach the humanities as part of our polytechnic mission?
What responsibilities do students have in their education?
What would the ideal university look like in the next century?

If you will have senior status by Winter quarter and are interested in questions like these, you are invited to apply for admission to the seminar. Admission will be limited to 20 students.

Brief applications forms are available in the Humanities Office (47-23), in the College of Liberal Arts Dean's office (47-31), or from Ron Brown (52-E37) or Nancy Clark (47-25L), the course coordinators.

Please apply by Friday Nov. 13. We will let you know if you have been admitted into the seminar by Monday Nov. 23.

The President's Seminar is a 4 unit class which meets on Thursdays from 7:50-9:20 PM throughout the West coast as a very distinct student section will play a role in the team's success this season. "I was a student I wanted to sit in the end zone. I think that's the section that has a chance to establish itself. It's right over the West coast as well," Scheider said. "Our crowd and the Mustangs theme that we have are going to really be able to establish ourselves in the student section where other teams, the Santa Barbara and the Long Beach States and UNLV are going to hate to play in Mott."

The Nov. 6 exhibition game will be the season opener for Mott and the Mustangs.

NEW YORK (AP) — The NBA lockout entered its 26th month on Sunday, with both sides ready to resume bargaining on the week the regular season was supposed to begin.

**Basketball prepares for March**

By Trisha Thorn
Mustang Daily

The Cal Poly men’s basketball team intends to take full advantage of their first year of post season eligibility as a Division I team.

Cal Poly has been in the Big West conference for three years and Division I for five years. It is only this year that they are eligible to compete in the Big West tournament because the NCAA lifted a ban that required new Division I teams to wait eight years before being eligible.

According to head coach Jeff Schneider, the team wasn’t really good enough to compete in the past anyway.

“Our first couple of years we were good enough to win some games but not good enough to compete for the championships,” Schneider said. “There were just too many teams that had a lot more experience than us.”

This year, Cal Poly has nine players returning, eight of which were last season’s top scorers. The Mustangs are returning three Big West freshmen of the year to lead the team. They are point guard Ben Larson, who last year became the school’s all-time leader in steals with 124, Mike Wozniak, the second leading scorer in the conference last year and has hit 162 three-pointers in two seasons, and Chris Bjorkland.

“We have a strong nucleus returning. With the players we have returning, we’re a lot better prepared to challenge.”

— Jeff Schneider
head basketball coach

**Volleyball drops key game in renovated Mott Gym**

By Jose Garcia
Mustang Daily

Halloween night turned out to be nightmarish for the Cal Poly women’s volleyball team as they christened a renovated Mott Gymnasium with a loss.

Four-hundred and ninety fans cot to the first couple of the 58-year-old gym’s new interior on Saturday. However, the Boise State Broncos played the role of spoilers defeating the host team in three straight games, 15-6, 15-10, 15-10. It also extended the Mustang losing streak to three matches — the longest of the season.

The overall play of the Mustangs’ (16-7, 6-6) game spattered throughout the night as head coach Steve Schlick used a new lineup he first inserted during last Thursday’s loss to No. 7 UCSB.

“It may or may not be a wise thing for me to try to do this (lineup change) so late in the season,” Schlick said about his team which has five league matches remaining. “We had a certain lineup and we were pretty comfortable with it. So I may not have helped us, I don’t know yet, but it’s a decision I made and I’ll deal with it.”

He said he made the decision to reconfigure the left and right side of the lineup in order to achieve better ball control. Even though the new lineup has failed to win a game, Schlick doesn’t know if he will continue with it.
