The money trail

When registration rolls around each quarter many students put the check in the mail without knowing where their money is going.

Associated Students Inc. and the University Union are among the many fees that add up in each student's tuition. If students don't examine the fine print, these fees may come as a surprise.

"I wasn't even aware that I was paying fees to ASI. What are they for?" said Morgan Sykes, a freshman architecture major.

Student fees support many campus programs

Cal Poly looks to expand use of ID cards

By Burt McNaughton
Mustang Daily

Cal Poly is looking to expand the use of ID cards on campus. Mustang Daily reporter Burt McNaughton explores the reasons behind this move and how it could benefit students.

Cal Poly looks to expand use of ID cards

That money covers the cost of a student's Campus Service Card or student identification card.

Every ID card has a student's picture along with a bar code and magnetic strip on the back along with a place for the current quarter's sticker.

Those portraits may soon be getting a facelift. The current system is not YIK compliant and Cal Poly wants to update the system this summer.

The proposed card system may include several advantages. An updated ID could expedite check in at the Health Center. Cal Poly could restrict access to residence halls by making students swipe their card through an ID reader to verify their entry. Labs could use ID readers to ensure safety, making sure only Cal Poly students are using the facilities. Public Safety wants to use ID cards to help gain access into parking structures, eventually phasing out parking permits.

"In physics labs there are so many students. I would like to see the students be able to swipe their campus ID," said Beth Herd, program manager of the Office of the Director of Housing.

Students have a choice of three meal plans: "The Freedom, The Flexibility and The Security." Each meal plan includes Plus dollars that are redeemable at any Campus Dining establishment. The Security meal plan includes 17 meals per week and 34 Plus dollars per quarter. The Flexibility includes 14 meals per week and 62 Plus dollars per quarter, and the Freedom includes 10 meals per week and 135 Plus dollars per quarter. This means that for each meal that is given up each quarter, by selecting the 14 or 10 meal plan, students are given only one plus dollar.

"They don't give us enough Plus dollars," said Perica. "But if I go for more Plus dollars, then I don't get enough meals." Meal plan prices are determined by a number of factors each year, including how many students choose to eat at the Dining Hall.

We price it at that--if you're on the 14 meal plan, you're going to eat 12 meals per week," Associate Director of Campus Dining Alan Cushman, said.

Campus Dining turns student dollars to meals

By Xavier Lanier
Mustang Daily

Food is big business on campus. Cal Poly students spent more than $11 million on meal plans and other food on campus last year.

Dorm residents are required to buy a meal plan that costs $2,596 for the academic year. Quarterly payments cost $890, or an additional $94. This was an 8 percent increase over last year. The year before there was a 4.9 percent price increase.

"This no way it's worth that much," said Grinda Perica, a soil science freshman, who lives in Yosemite Hall. "I'd rather have the cash. Instead of paying like $6 for a nasty breakfast, I could buy a box of cereal and milk that could last for a week."

Students have a choice of three meal plans: "The Freedom, The Flexibility and The Security." Each meal plan includes Plus dollars that are redeemable at any Campus Dining establishment. The Security meal plan includes 17 meals per week and 34 Plus dollars per quarter. The Flexibility includes 14 meals per week and 62 Plus dollars per quarter, and the Freedom includes 10 meals per week and 135 Plus dollars per quarter. This means that for each meal that is given up each quarter, by selecting the 14 or 10 meal plan, students are given only one plus dollar.

**Student fees fund ‘learn by doing’**

By Carla Flores

Cal Poly students pay $54 a quarter to fund “Instructionally-Related Activities,” yet many have no idea what this is or where the money goes.

IRA consists of programs on campus in which students are given an instructional component, such as a lecture, as well as the opportunity to work hands-on in their area of study.

According to Vicki Stever, associate vice president for administration, the IRA fee seems to follow Cal Poly’s famous “learn by doing” process.

“The fee was established many years ago to allow students who learned something in the classroom the opportunity to practice what they have learned outside of the classroom,” Stever said.

All IRA-funded programs at Cal Poly require proposals that will identify the instructional learning outcomes. Only programs that contain an instructional component are eligible to apply for the subsidies. After proposals are reviewed by the IRA Committee, funds are distributed to selected programs.

Programs that receive funding from IRA include: the agricultural judging team, the logging team, the National Ag Marketing Association, the rodeo, the bike team, Orchestra, the Mustang fund, and intercollegiate athletics.

Every student pays the $54 fee is giving $43 to intercollegiate athletics and $11 to the IRA fund.

According to Kimi Ikeda, academic resource planning officer, students voted to pay the $43 fee to allow the university to participate at the NCAA Division I level.

“Paying the fee doesn’t really bother me, but since so much of our money is going to athletics, I think they should encourage more students to attend sporting events,” said Melissa Miller, a business junior.

The IRA fund provides intercollegiate athletics with over half a million dollars per quarter.

According to Phil Webb, associate athletic director for business, the only thing the IRA fund does not support is scholarships.

“The IRA fund goes toward operating expenses of varsity sports and direct purchases of supplies, services, uniforms, and travel,” Webb said.

“For a Division I university, I don’t believe that our athletic program is at the same level as other Division I schools, as far as funding and facilities. Without the money from IRA, our program would suffer,” said Vic Greco, a junior on the football team.

In order for the fee to increase, “a student group would need to submit a proposal to the president, which would then be reviewed by the fee advisory committee, and then a recommendation to the president would be made in order for him to make the final decision,” Ikeda said.
Avoid Nyquil and the Health Center

Unlike you walk around in a plastic bag, you're going to get sick this quarter. And if you walk around in a plastic bag, we're going to suffocate, so I suggest the former. The season has come again. If you're not sick then you probably know someone who is.

Two things to avoid this time around. Nyquil and the Health Center. Avoid you like the plague - the Black Plague. I just found out that an acquaintance of mine contacted the Polio Vaccine after Christmas break. He survived the Black Death. I don't really know how - maybe it has something to do with not living in rat-infested 15th-century Europe. He also did not go to Cal Poly's Health Center.

Going to the Health Center is not as great as it sounds. You'll be told it has something to do with not living in rats-invested them. While many of these things are enough to put anyone into a state of instability, he was just plain nuts.

He had been sick the two weeks beforehand, and finally decided to try some Nyquil - not knowing before he tipped the little bottle back that he was tipping the very scales of sanity in his world.

Nyquil will help you get your Z's - you'll be strapped to your bed in the nearest mental institution.

Anyway, he had some sort of evisceration-free kind of reaction and before he knew it, he was in the health center doing blood work and filling out forms galore. From what I gather, the nurse practitioner who treated this guy suggested the county mental hospital. I imagine the conversation went like this:

Nurse Practitioner: How are you feeling today?
Nyquil Drinker: Like-shitty-de-de.
Nurse Practitioner: Has anything unusual happened lately?
Nyquil Drinker: I saw a really good episode of Scooby Doo the other day.
Nurse Practitioner: Have you been hearing voices?
Nyquil Drinker: Burst out laughing at the ridiculousness of this question.
Nurse Practitioner: Take him to the padded room and throw away the key.

Ridiculous! So in the season upon us, pharmaceutical companies everywhere are thinking their lucky stars for your sunny nose and unstable bowels. They need you to be sick - to do they need you to be insane?

As for the Health Center, they're great for drugs. Raise your hand (if you can) if you've filled your prescription for Vicain till I'll knock that out flat - you too as a matter of fact.

As for the diagnosis, you'll get another second opinion and I don't mean from your new cell mate at the county mental ward.

Nate Pontious is a journalism junior.

Letter

Let me first state that this letter categorically qualifies as nothing other than pure bitching and moaning. And although it may have some derivative comments about participants, no names or physical descriptions are given so you are guilty by your own admission if you feel at all scorned (which is my true intention).

Please let me state that I love the Office of Academic Records and have had nothing but pleasant experiences with them in the past. (so please don't erase me from the computer if this gets published.)

So with the requisite disclaimers aside, my story goes as follows. I have discovered yet another way Cal Poly's mean Poly has discovered to squeeze the other day.

I requested (appealing to my sense of personal) 23 units. No big deal. Just had to get the signature of my department head on the little yellow form so graciously provided by the Office of Academic Records. All was hunky-dory in my happy little world because with minimal exertion my request was granted in a swift and judicious process. As I turned in this form yesterday at 4 p.m. I had a two hour window (between 5 and 7) to attempt to capture a class that I had previously submitted an add form for (which requires the signature of the the student and instructor ... note that's 3 signatures so far to take one class).

Well needless to say upon calling capture between my allotted window the omnipotent voice told me in her warm, kind tone, "The section you requested is full! No other sections are available! Beat it!" Well she didn't really say beat it but she may as well have. So I figure no problem since it's the next day, literally hours removed from the "deadline." I'll just roll down on the good ole O.A.R. and tell them of this little mishap and everything will be straightened out. Wrong!

What I encountered was far from helpful advice or even an explanation. The person who "helped" me was the farthest thing from helpful I've ever seen, I had noticed that of the two people servicing students her line was moving in a more expedient fashion than her contemporaries. I thought this would be to my advantage because my "problem" was of such a minor nature. Ya right! Like the previous four students the "helped." I too was sent away with forms requiring multiple signatures and without any sort of adequate explanation; other than "that's just how we do it."

I rationally pointed out the letter "Late Enrollment Adjustment Appeal" (of which there were a stack sitting next to her work station) required ONLY and ALL the signatures that I had already obtained. A confident sound, "Ummmmmmmmmm" was her response. On top of all this was the $20 fee to process the form. Are you serious?? 20 bucks to process a form that I have to spend (actually re-adopt) my own time obtaining the signatures for, a form that takes all 2 minutes to process. Now I know why there is always some sort of construction going on at Cal Poly, fees from "Late Enrollment Adjustment" forms.

It just seems a little ridiculous/resolute/redundant/recordde to waste the time of those who previously were gracious enough to sign the original forms and have to fork over 20 bucks for the process. But I guess that's "just how we do it."

OPINION

A better world through beatings

Editor:

Corporal punishment has been in the news quite a bit lately. The relaxing of a parent's discipline of his or her child through spanking is in grave jeopardy in many homes. After finding that I don't like a child's misbehavior, I may find that I have to discipline the child, and if the behavior is not corrected, it will only continue. This is completely unfair. I move we amend the laws to exempt cases where said individual is undeniably wrong.

First, if this plan is to work, and I know it could, we need to establish rules which will inhibit abuse of the system. Undoubtedly, we will need to limit the forms in which beatings can be dealt out. Though a natural candidate for inclusion is the classic hand, which has objectively become known in various contexts as "Fistic Slap," there is a better form of beating still. A Universal Bludgeoning Kit could be offered to the public, at low cost, purely for disciplinary purposes. The wooden spoon and ruler, favored weapons of both mothers and Catholic nuns respectively, would make good prototypes.

In this country, I find that to be a very un-American idea. It's just common sense to not to let the Fed Fingers flailing a deserving individual for his infractions. I say we propose a Federal Whipping Agency created by the Department of Justice. A Universal Bludgeoning Kit could be offered to the public, at low cost, purely for disciplinary purposes.

I'd recommend a whole new type of opinion section entitled "Law needs better enforcement." Wed., Jan. 27

Desperately seeking Barbie

I have a proposal. I'd like to rally supporters at this school to start up a national "Barbie Beauty Pageant." What do you think? One that would forever change the meaning of the word "beauty"; one that would reach the sidelines who can only watch the splendor from their TV sets. What do you think? One that would forever change the meaning of the word "beauty"; one that would reach the sidelines who can only watch the splendor from their TV sets.

Unfortunately, an explanation must be given to the intended recipient of the "beauty" pageant. I would propose a system by which only women who weigh 125 pounds and don't qualify as either mini or maxi, I propose a new pageant, a pageant that shall be called... Ms. Medium (somewhere Ms. Mean just doesn't sound right). What about that? If we're reaching out to the non-barbies, the world will as well as the whole way and include "em all. It's not that I'm sulking for anything. On behalf of all women who weigh 125 pounds and don't qualify as either mini or maxi, I propose a new pageant, a pageant that shall be called... Ms. Medium (somewhere Ms. Mean just doesn't sound right). What about that? If we're reaching out to the non-barbies, the world will as well as the whole way and include "em all.

Where to go for books

Entering week three, I still do not have my Physics 112 book entitled Fundamentals of Physics. Homework is due twice a week, and my teacher does not accept late work. This poses a bit of a problem.

Week one: I went to El Com and they were all sold out. I was first told that the book would be in on Monday. Well, after checking in daily, I was told that the book would be in on Tuesday.

Week two: It's Monday, 1/11, and the books still are not in. I was told it would be due to a storm back east. So I went to Asia's (the off campus text book dealer), they had received a shipment of the Physics book but had sold out and were not expecting any more to come in. I check back at the book store and there is a sign where the books are supposed to be saying they will be in 1/21 due to publisher error. I wish the excuse would at least stay consistent.

Week three: I decide to look on the internet after a fellow student's recommendation to look on www.amazon.com where he bought his books for this quarter and saved $50. Amazon.com had "The Fundamentals of Physics" for list price. I decide to get the slightly more expensive extended version with hardcover for $119 (which covers shipping and handling for a 3 day delivery, and taxed). The El Com will have the 5 book paper back copies on Thursday for $142 plus tax. In this case I paid a little bit more for the convenience of 1 book rather than 5, but it's not as much of a hassle back of paper back. The Point: Amazon.com in general is faster, cheaper, there aren't any long lines or crowds, and they give gift wrap!!

Article on campus bikers and skaters was exaggerated

I'd recommend a whole new type of opinion section entitled "Law needs better enforcement." Wed., Jan. 27

It struck me as a purely crass exaggeration of an otherwise unaddressed problem. I don't skate, and rarely do I peddle my way through a sidewalk after a meal at the university cafeteria. It's a school with a lack of sidewalks. I almost laughed at Ms. Henrikson's self-justified perception of skaters: "It's not just that they're annoying, either - they are sensationally endangering the safety of pedestrians on campus ... trying to look cooler than they actually are." The cute description of her following the article doesn't put her so graciously above these "rude annoyances" in my mind.

Kevin Hastings is a mechanical engineering freshman.

BERKELEY SPEAKER

Bernard Baars, The Wright Institute in Berkeley, will talk on, "The Redecoration of Consciousness: Some Implications for Cognitive Science, Philosophy, and Ethics." The talk will be held at 4 p.m. today in Phillips Recital Hall, PAC. It is free and open to all.

Baars is an interdisciplinary researcher in cognitive neuroscience. He has written several books that have contributed to the recent developments in consciousness studies. He will explain why consciousness has recently become a hot issue in contemporary philosophy and cognitive science.

Baars' presentation is part of the Philosophy at Polk Speakers Series sponsored by Cal Poly's Philosophy Department.

POLY PLAN FEES

When the Cal Poly Plan steering committee proposed a $15 increase in academic fees on Jan. 15, the deans from each of the seven colleges were encouraged to hold open informational forums.

"Students should attend the forums to find out what's happening with their money," Vice Provost for Institutional Planning Linda Dalton said.

The forums will provide students with information about the Cal Poly Plan and the options within it.

"Students attending can provide advice and input on what they want from the money the plan requires," Dalton said. "To find out the students priorities.

The new increase calls for a $90 increase in academic fees per quarter next year and another $45 fee added the year after. The Cal Poly Plan already costs students $45 a quarter bringing the grand total two years from now to $180.

The Cal Poly Plan steering committee is set to meet today at 11 a.m. in the Administration building room 409.

AG AMBASSADORS

Cal Poly is hosting the fourth annual Agriculture Ambassador Conference, which began yesterday and runs through Saturday.

The conference mixes Cal Poly College of Agriculture students with students from more than 25 colleges from across the nation.

The emphasis for this year conference is "Recruiting for the Future of Agriculture," but the Agriculture Ambassadors are interested in students of all professions, not necessarily agriculturists only. The ambassadors promote higher education within their schools and through presentations at community colleges and high schools.

Keynote speakers for the event are: Cal Poly Associated Students Inc. President Dan Geis, Jim Pentico of the Dale Carnegie Program and Mark Linder from the Land, Food and People organization.

The ambassadors have scheduled workshops focusing on improving leadership and communication skills, as well as the understanding of high-tech agriculture.

More than 300 ambassadors are expected to attend from colleges stretching as far as Florida and Hawaii.

Food continued from page 2

"We have been seeing increased participation." According to Campus Dining, the first $350,000 of profit goes to University Services Advancement Division. They use this money for fund raising.

All money after the first $350,000 of profit goes into the Campus Dining reserves.

Some people have complained about prices being too high for certain items.

"In an ideal world, I'd love to have lower prices on health and beauty aids and grocery items," said Campus Market Manager Mike Merrill.

Merrill said prices on some items are more expensive than in other stores because Campus Market buys them in such small quantities.

"We are always looking for ways to become more efficient," Cushman said.

SLIPPED AWAY: Ben Larson holds his head in agony after losing the lead in the final 21 seconds.

MUSTANGS
continued from page 8

to the hole and win the game," Parton said. "I had confidence that I would make the shots."

The entire Santa Barbara team is full of confidence, according to Gauchos head coach Bob Williams. "This team very much believes in itself," Williams said. "You have to give our guys a lot of credit for hanging in there."

Parton, who came off the bench, led his team in scoring with 17, followed by Big West Player of the Week B.J. Nutton, who had 16. Cal Poly had five players in double figures. They were led by Wescnak with 15, although he shot only 26 percent from the field.

The Mustangs were paced in the first half by Jabbar Washington, who scored 11 points off the bench. He added only two points in the second half. The Mustangs were hurt most in the rebounding department, losing the battle, 39-29.

"They out-rebounded us. We did a poor job of rebounding," Schneider said.

The loss dropped Cal Poly to 1-4 in Big West Conference play and in last place in the Western Division.

"If we had won, then we'd have momentum," Schneider said.

The loss dropped Cal Poly to 1-4 in Big West Conference play and in last place in the Western Division.

"If we had won, then we'd have momentum," Schneider said.

The schedule does get a bit easier though, with the Mustangs traveling to the Lone Star state Saturday to dramatic victory at Nevada.

The loss also eliminates any shot at tournament seed for another week. Though Madler wouldn't confirm it, Rodman is said to be waiting to see which teams strike out in the free agent market. The 37-year-old would then be a prized commodity for a number of contenders looking to add the final piece to their rosters.
UCSB slips by Mustangs, 78-75

By Adam Russo

Mustang Daily

The Cal Poly men’s basketball team saw a critical chance at gaining ground in the Big West Conference Western Division slip out of its hands Wednesday, losing to University of California, Santa Barbara 78-75 in Mott Gym.

The Mustangs (6-12, 1-4) trailed by one point with seven seconds remaining when guard Mike Wozniak threw an errant pass over Jeremiah Mayes’ head, waking Cal Poly’s fire.

“I saw Jeremiah, but the ball just rose on me,” Wozniak said. “I just lost control of it.”

Wozniak’s 10-second-half points brought the Mustangs back from a seven-point deficit midway through the second half and gave them a 72-72 lead with under three minutes to play. The Gauchos then held the Mustangs scoreless for the last 2:18, a 6-0 run that wrapped up the win for UCSB.

Sophomore Brandon Beeson said the game wasn’t decided by Wozniak’s errant pass.

“The game never comes down to just one play,” Beeson said. “Rebounding hurt us throughout the game. That hurts because we had that game.”

Cal Poly did have other chances to put Santa Barbara away, but the Mustangs came up empty. With 21 seconds remaining, and the Mustangs holding a one-point lead, senior point guard Ben Lioness stepped up to the free-throw line. He missed the front end of a one-and-one opportunity and Santa Barbara got the ball back.

“We had an opportunity to win, and that’s all you can ask for,” Cal Poly head coach Jeff Schneider said.

Santa Barbara’s sophomore guard Brandon Patron took advantage of Lioness’s miss by driving to the basket and drawing a foul from Jeremiah Mayes. Patron proceeded to knock down the two critical free throws giving Santa Barbara what turned out to be the game-winning points.

“I told myself to just get the ball, see MUSTANGS, page 7.

UP AND OVER: Sophomore Jabbar Washington takes it strong to the hoop.

NEW YORK (AP) — Running back Emmitt Smith of the Dallas Cowboys and linebacker Hardy Nickerson of the Tampa Bay Buccaneers were added as replacement players to the NFC squad for the Pro Bowl.

Smith replaces San Francisco 49ers running back Garrison Hearst, who broke his leg during the playoffs. Nickerson will go instead of Minnesota Vikings linebacker Ed McDaniel, who has a knee injury.
