**CSU faculty union rejects new contract**

LOS ANGELES (AP) California State University faculty members have rejected a tentative contract agreement, primarily over concerns that a merit-pay plan would short-change most professors, the faculty union president said Sunday.

"We are 11.4 percent behind in salary compensation with other institutions across the nation and we felt very strongly that before we moved into a merit pay package that rewarded just a few, we ought to do something that recognized the contributions of the masses," said Terry Vahey, president of the California Faculty Association, which represents 20,000 faculty members in the 22-campus system.

More than 4,000 votes were cast at campuses throughout last week, with 52 percent voting against the contract, according to the faculty association.

Officials representing the university system and the faculty union negotiated for nearly a year but had been at an impasse since July. The three-year deal announced in late January was based on a report by a neutral fact-finding panel.

"It's unfortunate that a relatively small percentage of faculty can vote down pay raises and benefits for 20,000 people," Cal State Chancellor Charles B. Reed said in a news release.

The agreement included a 3 percent pay raise retroactive to Oct. 1 and a 4 percent hike in 1999-2000 if CSU received its requested budget from the Legislature.

"Basically, our notion is that if you do adopt an ill-conceived merit pay program and not pay attention to the concerns of the majority, you will have faculty going to other institutions."—— Charles B. Reed, CSU Chancellor

**Wrestlers rock Rec Center**
By Chris Hoffman
Mustang Daily

Even before the action in the ring began, the packed audience of 230 was electric with anticipation as the Impact Wrestling Federation came to the Cal Poly Rec Center Saturday night.

Former World Wrestling Federation champion The Iron Sheik was one of the biggest draws at the event as he took on Donik the Clown.

The Sheik posed for pictures and signed autographs prior to the event. "We want the Camel Club, Iron!" a group of spectators yelled out, referring to the Sheik's finishing maneuver.

"The wrestlers said it was one of their greatest shows for crowd involvement," said Eric Held, treasurer of the Alpha Kappa Psi fraternity.

Alpha Kappa Psi organized the event as a fund raiser. "It was just incredible, absolutely incredible. We were happy with the turnout. It was a great weekend."

Before his match, The Sheik boasted of his strength and spun weights above his head, challenging audience members to do the same. He offered $500 to anyone who could lift the weights.

---

**ITS: Open e-mail accounts pose security threat**
By Steve Noone
Mustang Daily

Students using Cal Poly's OpenMail e-mail system on the World Wide Web may be giving the next person who uses the computer full access to their accounts.

Users who access their OpenMail accounts over the web may be leaving their mail a single click away from prying eyes if they neglect to click the "Exit" button on the web client, according to Terry Vohay, an analyst programmer for Cal Poly Information Technology Services.

"If you're using OpenMail on the web and if you don't exit, someone will be able to look back and see everything you've ever done," she said. "Other people could easily view your mail or use your account."

Vohay recently became aware that users were often simply closing the browser window or following links off to another webpage and neglecting to log-out of the system.

"It's like if you were to use banking on the web — you'd better make sure you log out or the next person who comes along could get in and transfer money around," she said. "OpenMail is an application just like that — the system doesn't know you've left unless you tell it you're done."

Steve Wallace, a Landscape Architecture junior, was unaware users were required to exit the system.

"I never knew about logging off — usually I'd just close the browser," he said. "It's not clearly stated where to log out or how to do it. Probably most people don't know they have to do that."

If students access the web client with the Netscape Navigator web-browser and quit the program when they're done, Vohay said users can leave them­ selves open to breaches by forgetting to click the "exit" button.

---

**OpenMail security**

OpenMail users can leave themselves open to security breaches by forgetting to click the "exit" button.
**Off-Campus Living**

never looked so good!

Fully furnished suites. Private and shared rooms available. Meal plan options of 7, 14 or unlimited meals per week.

Stenner Glen Student Housing is designed for Cal Poly students. Your friends are all around you, it's close to campus, and you don't have to take time out of your busy schedule to plan and prepare meals. For you added convenience, enjoy all day dining in Stenner Glen's creekside cafeteria. Lease for the academic year only. Room and board prices, including all major utilities, get stuck with a rent increase if a roommate leaves.

**WRESTLERS**

continued from page 1

who could do half the number of spaghetti he could! When no one came close to winning the Sheik's contest, he addressed the audience: "Iron Sheik is the best. Now (you) know why I am Olympia champion and why I am WWF champion!"

The Sheik dominated his match with Doink, at one point choking Doink with an Ironman flag and eventually winning with his trademark camel clutch submission hold.

Doink, however, got a second chance in the other half of the double main event, the 15-ton overload top rope "Wild Rumble." Doink won the rumble by being the last man standing in the ring after eliminating Impact Wrestling Federation champion Cincinnati Red.

"The crowd was really responsive," Doink said after the match. "It was a nice clean crowd, no obstructions. You don't really have that too many times. It's a beautiful campus, a beautiful crowd."

"(My match) was real, real good. The Iron Sheik's tough. He has to be one of the strongest men in the sport. We all love him. He's a great opponent."

No bout yielded such a much interaction as the "s-war between universities," where Cal Poly business senior and Alphako Ppa president Hoss Hamidi wrestled Phenomenal Phil Linder from the University of California, Santa Barbara.

Chants of "Let's Go Poly!" and "S.B. sucks!" boomed through the Rec Center as the wrestlers attacked each other with folding chairs, fire extinguishers and curls during their no-disqualification match.

Hamidi won the match with a powerbomb, much to the crowd's delight.

The audience's excitement was high throughout other matches as well. Spectators cheered wildly at the team of Little Haystack and Gary "The Crusher" Key battled the identical twin Ballard Brothers.

The biggest cheer of the night occurred when Little Haystack climbed the turnbuckle and landed a moonsault on one of the Ballards, and "Crusher" clients were heard throughout the match. The Ballards won the match with a flying clothesline on Haystack.

"It was a good victory, a lot of action," said Shannon Ballard after the match. "The other guys were pretty good. We're nearing it up!"

In other matches, the Navaho Warrior defeated the Samoan Kid with a double-set handle on the top rope, the Cruiser embossed his opposition in a two-on-one handicap match, and Impact Wrestling Federation champion Cincinnati Red retained his title over Uncle Jess Hansen with the use of a steel chair.

**E-MAIL**

continued from page 1

then mail should be accessible even though their account technically would still be open.

"Navigator clears the history when you quit — so the next user can't click back into your account," she said. "(Microsoft Internet Explorer) is weird — it doesn't work as well. IE keeps a record of the history even after you quit — so it will show you the e-mail subjects of the last user if they didn't log out."

According to Vahey, LTS plans to roll out a redesigned web client next quarter, which will provide students with new features and a more user-friendly interface, but this update fails to address the current security issues. "The new web client has a couple of things that I think are pretty neat — lets you customize the menus and set up filtering rules," she said. "You can set signature files and automatic responses if you go on vacation."

"One of the nicest things is that you can set up multiple identities," she said. "We have a computer science student who is on a mailing list for Microsoft bugs — and he gets about 40 pieces of e-mail a day. With the new filtering rules he can direct them all into one folder."

The new interface appears to be more graphically appealing and less confusing than the current design, and according to Vahey it should be easier to learn and use. The update was provided by Hewlett-Packard, the company that developed the OpenMail software.

"It looks better then the old one — there's less buttons and new pop-up windows that tell you when you have mail," she said.

The OpenMail system, which became available to all students and faculty full quarter last year, currently has about 7,000 users on campus and is scheduled to fully replace the older UNIX-based system sometime next year.

"The goal is to get people off UNIX for mail," Vahey said. "OpenMail is more efficient and faster. It provides access from any computer connected to the web and gives students 20 megabytes of storage space as opposed to only 2 megabytes on the UNIX systems."

Wallace said he switchexJ over to OpenMail in a computer class last year, and is pleased with the system.

"It was nice being able to check my email from home over the summer," he said.

"But anything they can do to make it more easier for the user is always helpful."
Engineering students aid teens from around state

By Julie O'Shea

SANTA MARIA

For every high school student who has envisioned a career in engineering or the sciences, Cal Poly's MESA program is a step in the door.

The program promises fun times and encouragement for every teenager who dreams of going to college. MESA, which stands for Mathematics, Engineering, Science Achievement, was started 27 years ago by a Bay Area teacher to give educationally disadvantaged kids a chance to go to college, said Gale Day, program coordinator for the MESA agricultural initiative.

According to Day, about 30 Cal Poly students volunteered to be MESA facilitators this year. The program allows high school students who come from low income families to work one-on-one with university students. Such interaction has envisioned a career in engineering.

The tutoring provided by Cal Poly students are trained to work in groups and taken on projects from six to eight hours a week.

Cal Poly MESA students are assigned to a particular high school, and encourages kids to come to college. According to Pay, the two primary colleges involved in MESA are Engineering and Agriculture.

Mario is so committed to this program," Day said. "He's committed and he cares.

According to Pay, the two primary programs involved in MESA are Engineering and Agriculture. However, not all students from all majors are encouraged to participate in the program.

Cal Poly students are trained throughout the year on how to work with teenagers. Starting in September, they spend anywhere from six to eight hours a week traveling to the high schools preparing for MESA Day, Day said.

MESA Day, which will be held at University of California, Santa Cruz this year, is a day where different MESA programs from around the state come together to compete in math, science and now agriculture events. The preliminaries are very important because the finalists will go on to compete in Santa Cruz.

Cal Poly students will be helping about 450 junior and senior high school students complete in such events as the naked egg drop and straw tower building during this year's MESA Day Preliminaries. The preliminaries will be held at Cal Poly on March 6.

MESA is sponsored by the state and industry. "Industry is interested in finding the future engineers of the world," Day said.

For more information about the MESA program at Cal Poly contact Day at 466-4479.

Are You a Non-Business Major? Do You Want to Improve Your Marketability?

The Haas School of Business
at the University of California Berkeley
Intensive Summer BASE Program IS FOR YOU!
July 6 - August 13, 1999

Learn the fundamentals of:
• Accounting  • Marketing
• Finance  • Organizational Behavior
• Hands-on market & financial research
• Business related computer applications
• Effective communication & presentation skills
• Prepare for the corporate recruiting process

Arts, sciences, and Engineering students will benefit from this rigorous, six-week summer curriculum that will include lectures, case studies, company visits, guest speakers and student projects.

For more information, contact our website at:
http://haas.berkeley.edu/Undergrad/BASE.html
or via email at: BASE@haas.berkeley.edu

The following question has surfaced in Cal Poly Plan forums and discussions, as well as in letters to the editor of the Mustang Daily and editorials.

**Why doesn't the Foundation provide more funds for University needs?**

The Foundation's exclusive role is to support the University. Of the Foundation's total assets of $107 million, $80.1 million are in restricted accounts pledged by donors for specific University purposes, mainly to support instruction. The Foundation holds all but a small portion of the remaining $26.9 million for mandate-protected reserves (including reserves to replace depreciated capital assets), for loan guarantees primarily to finance University projects, and for other restricted purposes. In addition, the Foundation manages Campus Dining and El Corral. Part of the net revenue from those operations is used to support the University's fundraising efforts and $150,000 in athletic scholarships, per agreements between ASI and the University. No large pool of uncommitted funds exists. Use of restricted Foundation funds for purposes other than those for which they are designated would be unethical and illegal.

**Questions can be directed to the Cal Poly Plan email **

**continued from page 8**

"I'm real pleased with the direction we're headed," she said. "The team really wanted to have closer to a 500 year and even though it was a losing season statistically speaking, when you look at what we accomplished with the youth that we've got on the floor, it's really quite amazing. It's a true testament of the team's work ethic, and also of the upper classmen—what they've been able to give the team."

"I think Kristie Griffin best summarized it. She said 'I wish I had a few more years to play with this team, because they're going to be tremendous.'"

Mimnaugh said. Freshman forward Caroline Rowles is proud of the team she calls her family, regardless of Saturday afternoon's defeat.

"It would have been nice to have pulled off the win," she said, "but I'm not disappointed. We played very, very well tonight. We played hard and we played smart. This team is so amazing, we know each other so well, and we play so well together."

**WOMEN continuepage 8**

"But, today's a great way to end, even though we lost. We played together as a team, we played our hearts out." - Kristie Griffin

Senior Basketball Player

We are a family.

Rowles said it will be hard for that family to let go of one of its members.

"All of us are really sad to see Kristie go," she said. "She's been an incredible teammate and an incredible leader and motivator. She's the team mom. It will be a very tough role to fill. Hopefully, we'll all be able to step up and fill the void. It will be a cumulative effort by the team."

Mimnaugh agreed that Griffin, the only departing senior this year, leaves a big hole to fill.

"How the loss really impacts us, is that she's such a competitor," Mimnaugh said. "She really gives the effort every single day at practice. She's tenacious on defense, and she's a wild scorer. We're going to have some people that are ready to step in and do this for us. But we have people moving in that direction.

Mimnaugh wasn't worried about ending the season with a loss.

"The kids played hard, I couldn't be more pleased with their effort today," she said. "They played smart. We have a lot to work with, we have tremendous talent."

Mimnaugh did see definite room for improvement however, evident in the game.

"Offensively, we need to add penetration ability," she said. "In the first half, Irvine's penetration was bothersome to us. We did a decent job on the boards, though. I was pleased with our concentration in that area."

The Anteaters shot 46 percent in the game and shot 75 percent from the free throw line. The Mustangs had trouble with outside shots, missing all of their 13-point shots in the first half and shooting 33 percent from the outside overall. They shot 43 percent for the game.

Cal Poly had trouble in the first half, falling behind the Anteaters 35-27 at halftime. In the second half, Rowles brought the Mustangs even, 55-55. With 6:47 left in the second half, they couldn't get the lead.

One problem for Cal Poly was UC Irvine's Megan Stanford, who led the Anteaters with 22 points in 40 minutes. Right behind her was Kristen Cappel, with 17 points and eight rebounds.

For Griffin, it hasn't quite sunk in yet that it's all over.

"How the loss really impacts us, is that she's such a competitor," Mimnaugh said. "But, today's a great way to end, even though we lost. We played together as a team, we played our hearts out."

**SPORTS**

Maggert a dramatic winner of Match Play

CARLSBAD, (AP) — Jeff Maggert will not forget he remem­bered as the player who could never close the deal. Call him the comeback kid of the Match Play Championship.

A hard-luck runner-up 13 times since 1993, Maggert showed the grit of a champion under the intense pressure of match play on Sunday, chipping in for birdie on the 10th hole to beat Andrea Mago and win the $1 million first price, the richest in tour history.

With such a dramatic finish, the absence of Tiger Woods, David Duval or any of the big names in golf was forgotten.

From the first cut of rough behind the par-3 11th, Maggert made the pars and put the ball on the green. After weathering the back of the cup and disappeared, and Maggert had the lead since the fourth hole, a fitting tribute to a player who had come from behind in his last two matches this week at La Costa Resort.

Maggert is now 7-1 in match play as a professional, and the $1 million is more than he has ever earned in any of his eight previous seasons on the PGA Tour.

Mauger, a four-time winner but not since 1994, earned $300,000 for the biggest check in his career.

Lowly Anteaters swallow tourney hopes

By Joe Nolan

Mustang Daily

It could have been worse. The Mustangs could have been plucked to win the Big West Western Division, and then the 6-10 first place finish would have been an awful lie.

Well, the Mustangs were picked first and came up really short of that goal.

This was also the first year the Mustangs were eligible for postsea­son play and were given numerous opportunities for a birth in the tournament.

The final chance came Saturday when the Mustangs simply had to defeat the UC Irvine Anteaters, whose lone win came against the Eastern Division's cellar-dweller, North Texas.

With the season on the line, the Mustangs shot 36 percent and were outsized 51-36 in the second half. The Anteaters had five players in double figures, led by Jerry Green with 18 points.

Chris Bjorklund led the Mustangs with 23 points. He also grabbed 10 rebounds for a double-double.

Had the Mustangs won, they would have advanced to Reno because Cal State Fullerton lost to UC Santa Barbara.

The teams going from the Western Division are UCSC, Pacific, Long Beach State and Cal State Fullerton.

The Eastern Division will send Boise State, Idaho, New Mexico State and Utah State.

The tournament begins Thursday. The winner will receive an automatic berth in the NCAA's.
