Traffic engulfs first day of fall quarter

A hectic, first-day-of-school traffic jam on Highland Drive caused many students to be late to their first class of the day. Unfortunately, this traffic jam will not be uncommon throughout the fall quarter due to the parking structure construction.

Details revealed at open Krebs hearing

By Nanette Pietroforte
MUSTANG DAILY

Witnesses discussed lurid details about the slayings of local college students Rachel Newhouse and Andra Crawford at the Sept. 16 preliminary hearing for defendant Rex Krebs.

George Stervenz, the pathologist who performed the autopsy on Crawford, said she had been "hog-tied" and blindfolded to set the position of her body before she was killed. Ropes were attached to her wrist, ankles and neck while a flex tie was wrapped around each wrist, he testified, according to the Tribune.

Newhouse was also killed by asphyxia, Stervenz said, although there were no outward signs of strangulation.

Stervenz could not determine if the women had been sexually assaulted, although both bodies showed signs of trauma.

Newhouse was reported missing Nov. 13, 1999 and Crawford was reported missing on March 12, 1999. Krebs pleaded not guilty to the public, despite a motion by Krebs' attorneys to keep the proceedings closed.

Due to the constraining parking situation, some students have found alternate ways of transportation. Construction management senior Gregory Scarell chose to walk to bear the frustration of trying to find an open spot.

"I live close to school, so there's no point in fighting for parking during peak hours, and you get the exercise out of it," he said.

This is the second year Scarell has chosen to not buy a permit.

"I used to drive, but I'd have to park way out of the dairy unit," he said. "Now I sometimes ride my bike, and I get to school faster than people who drive and leave at the same time I do."

While walking or biking seems optimal for those near campus, others see no other choice but to buy a permit.

"I have to get a permit, because I live far enough away," said a student.

Cal Poly students begin fall quarter homeless

By Nanette Pietroforte
MUSTANG DAILY STAFF WRITER

Despite a search that began in June, two Cal Poly students were surprised to find the lack of available housing in San Luis Obispo.

History senior Alison Dalan and philosophy senior Jeff Deere recently signed a lease just days before school started, ending their three-month housing search. However, the two will remain without a place to call home for another three weeks until their lease begins.

In the meantime, Dalan is sleeping on a mattress on the floor of a friend's house and her belongings are stored in the garage.

"I'm fortunate to have good friends who are willing to help me out," Dalan said.

Tipping was one of the biggest issues for the students as they looked for housing off of the UI board.

Until the completion of the new, three-level parking structure in January 2000, parking on campus will be a little harder. With the structure's construction taking up 200 fewer spaces than removed, Cal Poly will face the most difficult parking situation in years.

"I think fall quarter is going to be as impacted as we have seen in the last four years," said Cindy Campbell, program administrator for Public Safety Services. "Especially on Grand Avenue, you're going to see significant impacts of parking for the rest of the quarter."

However, Campbell said, the lack of spaces is simply the price to pay for the $5.8 million, 311,150 square-foot structure.

"What we're thrilled about is once the construction is done, we'll have an additional 936 spaces," she said.

Due to the constraining parking situation, some students have found alternate ways of transportation. Construction management senior Gregory Scarell chose to walk to bear the frustration of trying to find an open spot.

"I live close to school, so there's no point in fighting for parking during peak hours, and you get the exercise out of it," he said.

This is the second year Scarell has chosen to not buy a permit.

"I used to drive, but I'd have to park way out of the dairy unit," he said. "Now I sometimes ride my bike, and I get to school faster than people who drive and leave at the same time I do."

continued from page 1

away that I can't ride my bike," said Charlene Rosales, fitness programs coordinator for the Rec Center and a former Cal Poly student. "I usually have to drive around in circles for about 20 minutes. You can find a space if you get there early, but you have to get here so far ahead of when you even need to."

However, driving is exactly what Commuter Services urges students to stop doing.

"We are encouraging people to carpool, vanpool, take the bus - anything but driving alone," Campbell said. "Make that choice. If you've never tried it before, now is absolutely the time. People will find it more convenient once they get to campus. Buses drop off all along Perimeter Road, and certainly, the price is right."

Campbell doesn't know if the number of commuters will be affected by the fewer spaces.

"We really won't know until about the second week of class, when everybody sorts of lands," she said. "When they settle into their schedules, they figure out where they're supposed to be. During the first week, people seem to make a choice to receive citations and park in the wrong place, just to get where they want to be. That doesn't give us a good picture of what's real."

Although the numbers aren't yet in for this quarter, last fall quarter 1.68 permits existed for every one parking space. This oversell is comparable to the other California State Universities and other universities in general.

Finding a parking space doesn't affect just students. Many faculty members are also concerned by the fewer spaces.

"Fall will be a disaster," math professor Harvey Greenwald said. "Cal Poly has always had a limited number of spaces, and if you don't arrive early, you won't find anything. I get here at 7:30 a.m., and I usually find a space fairly close. By 8, I have to park a little further out, and by 9, I'm driving up and down the parking lot."

However, like students, some faculty members find other modes of transportation.

"I live a block from campus, so I walk," political science professor Richard Kranzdorf said. "It's one of the great joys, and I walk quickly, so it only takes me 11 minutes to get from my house to campus. And thank God that for students and faculty, it's free to use mass transit for the buses for free would have been terrible," Greenwald said. "We also protect their parking during evening events. "Realistically, I think it's going to be easier for the residents, because we've taken great lengths to protect their ability to find a place to park," Campbell said. "We also protect their parking during evening events. "Even when we have declared the lot full, there are spaces we have maintained for them because that's their lot."

While Campbell admits finding parking this quarter will be harder than ever, she said Cal Poly's situation is comparable with other schools. "I think it's relative," Campbell said. "We have made a life choice to not live in a large, metropolitan area. And when you compare our university to others, our situation is really not out of line."

problem for Dulian and her roommates.

"We started looking later in the game than we should have," she said. "It was very difficult to find a two-bedroom that late in the summer." 

"At one point we applied for a place and they said they had 63 sets of applications," Dulian said. "That's 262 people who applied for that two-bedroom apartment."

Dulian came back to Cal Poly as a return student during the summer. She said finding a sublet for the summer was easy, but finding a place for the fall proved harder than expected.

Dulian and Dyer would be there return student during the summer.

"As things become more and more expensive, parents are buying rental houses," Malykont said. "That means a parent can buy a house for the four years their kid is here and sell it four years later for quite a profit."

"It's tough for students and their parents," King said. "At one point we applied for a two-bedroom that late in the summer." Dulian came back to Cal Poly as a return student during the summer. She said finding a sublet for the summer was easy, but finding a place for the fall proved harder than expected. Her luck changed when a friend decided to move. Dulian's friend, who had a good relationship with her landlord of four years, called the landlord to give her notice and said Dulian and Dyer would be there return student during the summer. She said finding a sublet for the summer was easy, but finding a place for the fall proved harder than expected.

"It's very difficult to find a two-bedroom apartment," Dulian said. "We actually be saving, and even making money." Dulian said that there is less on the rental market and we have less to rent. Cuesta student, Pepe Marin, and his parents are currently in the process of buying a home for Marin to live in while he attends Cuesta, and eventually Cal Poly. "It's a better deal," Marin said about his parents' investment. "We'll buy to students, whose rent will help his parents are currently in the process of buying a home for Marin to live in while he attends Cuesta, and eventually Cal Poly. Thrill seekers should follow all the rules

The recent rash of roller coaster and other ride-related accidents has led me to question California's collective common sense. Granted, injuries tend to happen whenever thrill rides and thrill-seekers are crammed into the same several acres, but you have to admit that the criteria of our Golden State have seen more than their fair share of theme-park tragedy in the past year. And it seems no park is immune. Paramount's Great America, Knott's Berry Farm, Six Flags, Marine World and even the Magic Kingdom have been host to numerous mechanical mishaps, injuries and fatalities since early 1999, when a death at Disneyland prompted a closer look at state safety regulations.

California has about 52 roller coasters — more collection and hoop-the-loop than any other state. This was also the reason California has more thrill ride deaths than any other state. In the past 25 years, more than 14 people have died in California amusement parks (compared to Florida's zero casualty rate).

The reason for the accident outbreak may very well be statistical: more opportunities for mid-ride mishaps, equal more thrill riders, equal more people in hospitals. I, however, believe the unnecessary tragedies are the result of Californians losing what little common sense they had to begin with. In no way do I intend to downplay the serious issue of safety or poke fun at the horrors many families have had to face. I would, however, like to point out that unlatching a harness, falling down a corkscrew or loop-the-loop is equal to any other state. This must also be the reason California is one of the only states that does not require safety inspections of permanent amusement parks. Many patrons and families of victims find fault with park self-regulated inspections. And legislation to mandate regulation has been less than successful in the past, but every accident pushes a bill closer to ratification. Mourners question the ethics of parks withholding stunning facts to preserve their image.

Wouldn't it be easier if everyone just played it safe?
Seniors shouldn’t drive

The old saying goes, “Practice makes perfect.” So why can’t old people drive if they’ve been doing it so long?

A few weeks ago, I was enjoying a relaxing round of golf at Morro Bay Golf Course with a couple friends and one older gentleman who joined our group of thre. The older man, “Jim,” was a friendly, coordinated and seemingly healthy man I guessed to be in his late 60s. Not only did Jim walk the entire 18 holes without break­ ing a sweat, he consis­ tently drove the ball down the middle of the fairway. No matter what club Jim hit, his ball hurled down the fairway 150 yards each time. I admitted that Jim was so consistent.

Ironically, after the round was over and we said our good-byes to Jim, he backed into a row of bushes narrowly missing a parked car, then proceeded to drive up and over a curb trying to leave the parking lot. All I could think was, “How does he drive his golf ball straighter than his car?”

I’ve experienced this sort of thing a thousand times. Why is it that old people and driving just don’t mix? What is it that makes them so different than on-ramps? Why don’t the elderly realize that stopping on the on­ ramp doesn’t get them on the freeway? Why don’t the fast lane is another problem area for the elderly. It seems as though they all have a Highway Patrol mentality with a hint of Italian in them. They cruise the fast lane at about 35 mph, don’t let others pass and shake their fists if you get close to them. Don’t get me wrong, I’m part Italian. But don’t shake your fists at me if you’re the one in the wrong.

In the 1999 California Driver Handbook it clearly states, “If you are in the left (or fast) lane, move to the right when another driver is close behind you or wishes to drive faster. Statutes gener­ ally require motorists to give way to the right in favor of overtaking motorists so as to allow them fee passage on the left.”

When ordinary citizens (especially old people) prevent passing, it leads to anger, road­rage, etc. But more impor­ tantly, it’s not fair to endanger everyone surrounding the situation.

According to American Jurisprudence, Automobile Insurance: Automobiles and Highway Traffic, dri­ vers under the age of 16 are not permit­ ted to drive because they “…do not possess the requisite care and judgment to operate motor vehicles on the public highways without endangering the life and limb of others.” And over- medicat­ ed 80-year-olds do!

Like the government says, I’ve always considered driving a privilege. With a relatively easy set rules to fol­ low, driving is a simple task. When I’m old enough, I might decide to take that privilege from myself.

One day I hope to be 80 years old and nearly even over-medicated. When I need to go somewhere, I’ll take a bus; get a ride or walk if I can. But I don’t plan on risking the lives around me just to make my life easier.

Aaron Culp is a journalism senior and was a Summer Mustang staff writer.

Letters to the editor

Check your DMV book Editor,

I am much older than Jim, who Culp said was a terrible driver. I have not even had a fender bender during my many driving years, yet I am forced to take written, eye and road driving tests every two years. Younger folks receive their license by mail, and who is to say that they are competent or know the rules of the road? I certainly agree that many older folks should not be allowed to drive, but then, how about those incompetent who take the test every four or five years?

Most drivers today feel they must get ahead of everyone, so they speed excessively, cut in, cut­ gate and run stop signs and lights. At the same time, indicating to the next generation — their chil­ dren — that it’s OK as long as you don’t get caught. It’s not OK! Guess what the 2000s will be like on the streets and highways? Aaron, that’s risking the lives of this and another generation.

You may also note that you have no right to enter the freeway unless there is a vacant lane. How many know and adhere to that rule? You have no right to force drivers that are on the freeway to take evasive action to avoid you. See your DMV handbook.

I have had two cars demolished that were properly parked at curb­ side in front of my house. One driver was a 20­year-old woman, and the other a 21­year-old man. Speed and driver incompetence were the culprits.

We can conclude that many, young and old both need driving supervision, so be sure to point your finger in the right direction and obey the rules of the road as enumerated in the DMV hand­ book.

C.B. “Mac” McCullar has been a San Luis Obispo resident for 48 years.

Age isn’t the issue Editor,

Let me correct this: There is a certain percentage of drivers of all ages who should “pull over.” No matter what age, there is a percent­ age of people who are just plain bad, inattentive drivers. But the one with the white hair is the one that everyone, including myself, remembers most vividly. The slow car that won’t move out of the fast lane is apt to be most any age and more often male.

Maybe a slightly larger percent­ age of seniors need to “pull over” because of health problems, poor eyesight and the fact that they have become so bad that even their children are trying to get them to stop. For many live in areas where they feel they have to drive in order to get themselves or someone else a doctor. Sometimes we must show some compassion and patience and pray they get there and back without injuring themselves or someone else.

Once again, the white-haired driver is not the only one who can’t get up to highway speeds along an on­ ramp. Look again — it is the face of all ages, and yes, very aggra­ vating!

My husband teaches AARP 55 Alive Safe driving classes, and when taught by a good (volun­ teer) instructor, it is a wonderful class. I believe it should be taught to all high school seniors and again to all college students, again and again! By the way, “people too slow on the on­ ramps” is one of the biggest gripes of the seniors also. I am a fast, confident and bold (but not too bold) driver. And yes, I have become an even better dri­ ver with age because I have learned patience. I understand there really is a very good reason for speed limits because speed does kill. I have sadly seen a very dear friend hit and killed by a 22­mph car, not driven by a senior. That does tend to make you a little more cautious on downtown streets. More often than not, when I have been annoys with a slow driver, I have looked down at my speedometer only to find out that he is already going the speed limit or even somewhat over, and I am the one “out of line.” However, he is in the fast lane, and I want around he should jolly well get out of my way! Phyllis Kaltenbach is a Pacific Grove resident.

Jewish students observe holiday without having to miss class

By Melissa McFarland

For some students on campus, observing the Jewish holiday meant missing class. For Jewish students, the extra day meant observing the traditional religious holiday, Yom Kippur. The landmark vote by Cal Poly's Academic Senate to accommodate the holiday, when it voted to postpone the first day of fall quarter classes.

"Peace, since this is something that happens only about three times in 52 years, it's not really a significant change in the quarter," Academic Senate chair Mark Hood said. "Also, it makes the quarter exactly 10 weeks.

Many Jewish students were relieved they wouldn't be accidentally absent from a class due to missing the first day.

"All my life, school always started around Rosh Hashanah, and I always had to miss class," electrical engineering sophomore David Werner said. "Every year I'd have to explain why I wasn't at school. And in college, it really matters if you miss the first day of class. So for the first time, I'm not the odd man out."

Yom Kippur, "Day of Atonement," gives Jews an opportunity to repent for the sins of the past year. The religious holiday comes 10 days after the celebration of the Jewish New Year, or Rosh Hashanah. "We do it every day when we're supposed to ask God for forgiveness for our sins," said math professor Stuart Goldenberg, the advisor to Cal Poly's Jewish club Hillel. "As a Jew, I think we should forgive each other."

"But the rabbi was so into what he was doing, he didn't stop. It ended up being a heart attack," Silverman said. "People thought the man was having a heart attack, but the rabbi was so into what he was doing, he didn't stop. It ended up being a heart attack, but that, to me, proved the holiness of the day."

"I was concentrating on God so much, and that opened my eyes a little bit," Silverman said. "I'm Yom Kippur. The religious holiday comes 10 days after the celebration of the Jewish New Year, or Rosh Hashanah. "It's the holiest of all holidays for Jews, and I get caught up in the moment," he said. "It's very special. It makes me feel just a little bit better."

Campus club provides overseas travel and work to business majors

By Kimberly D. Kralick
MUSTANG DAILY STAFF WRITER

Cal Poly students can now travel the world while gaining experience for their future jobs, all thanks to a new club on campus.

AIESEC, a French acronym that stands for International Association of Students in Economics and Business Management, is making dreams come true for some Cal Poly students wanting to work abroad.

AIESEC is an international exchange program for student interns. The Cal Poly chapter has been operating for approximately a year and a half.

“Our goal is to promote student leadership and global understanding,” said AIESEC president Alicia Stammer.

“We recruit for students to lead the organization here and we recruit for students to go away,” Stammer said.

AIESEC held its first big recruitment drive in January for student interns and selected 16 students to go abroad.

International Management graduate Tony Rogondino is currently in Cologne, Germany on an AIESEC internship.

“The experience so far has been amazing,” Rogondino said.

“I found out about AIESEC through flyers and my international management courses. I discovered AIESEC is well known internationally and has a great reputation for organizing international exchanges.”

Rogondino has met people from all over the world while working for Theron Business Consulting.

“I would definitely recommend AIESEC for anyone that would like to work abroad. Without AIESEC, my experience here would have been much more difficult.”

To become involved in the club, all that students have to do is attend an information session. AIESEC is planning information sessions beginning fall quarter on both student leadership on campus and student internships abroad.

However, attending the information sessions is only the first step.

“If someone wanted to get involved in the leadership portion of it, there will be applications available in the fall. There is no particular requirement for the lead-

The late 1990s has seen the Beatles experience defined by a series of album reissues and rediscovered "lost" singles, a la "Real Love." The latest in this resurrected legacy is the re-release on video of the band's 1968 animated film "Yellow Submarine."

The new digitally restored version now includes stereo surround sound and a cleaner, brighter print. Also new is the previously cut animation sequence featuring the song "Hey Bulldog."

Yet for many, the entire film will be a new experience. The original 1968 version of the film was nearly impossible to find in video stores.

"It had a brief history, and then ... nothing," Insomniac Video co-owner Bob Whiteford said of the film's short-lived shelf life, "It was out for like five minutes."

When the Beatles split up, their label, Apple Records, divided the spoils. "It was really chaotic. The film division really suffered," Whiteford said.

Another of the casualties from this period is the 1970 film "Let It Be," a documentary on the album which broke up the band.

Up until the re-release, Insomniac Video carried a British transfer of "Yellow Submarine." The version was poor quality, but they were lucky to have it, Whiteford said.

Too many chases and not enough laughs in 'Streak'

By Steven Geringer and Whitney Phaneuf

Martin Lawrence's new film, "Blue Streak," is another casualty of the Town Tamer action/comedy movie genre. Lawrence portrays a felon and a police officer, so it shouldn't be that hard of a stretch for him. In recent years, the "Martin" star has been treated on numerous occasions, including putting a gun at driver's on a due Los Angeles freeway. Too bad when Lawrence was booked and jailed, that this film, or any idea of it, wasn't thrown in the cell with him.

HE SAID: Going into this movie, I didn't expect much. I knew I would get the comical genius remarks that Lawrence always delivers, like "Damn!" What I didn't know is that I would be wasting all of my time watching these routines and backlister acting.

SHE SAID: From start to finish, the audience is fed those predictable action sequences, surrounded by a shiny plot. Lawrence plays Mike Logan, the brains behind a $17 million jewelry heist (already believable), and the film begins with a bang-up caper and a robbery chase. Taking a lesson from every "Die Hard" film ever made, Lawrence tries to escape the, uh, up an elevator shaft and between buildings hanging from a telephone wire.

HE SAID: Our supposedly smart hero manages to cut the wire with a rotating blade (that he just happened to carry with him) projecting him into a building under construction. Who knew Lawrence's character is the second coming of McGiver? Lawrence eventually crashes into one of the air conditioning ducts and tapes the jewel to the side of the vent to be picked up at a later date. The thief is finally apprehended by the police.

SHE SAID: We find Lawrence two years later, just leaving his comely prison cell to embark on life as a free man. Within five minutes, he's back to his criminal ways and stumbles upon the LAPD, while Lawrence shows off the outrageous humor that made him famous. Unfortunately, this five minutes of chuckles won't make up for the remaining hour and a half.

HE SAID: Lawrence steals the access key to enter the building and returns later as Mako, a transformer detective from West Corin. He is welcomed by the force as one of their own (as if the police didn't thorough research on their new employees). Within the first five minutes of employment, Lawrence quickly ushered to a burglary by his new partner, equally annoyance Lake Wilson. The only thing more annoying than the duo was Whitney Coughing beside me in the crowded theater.

SHE SAID: Look, sick people need to be entertained too. Besides, you should only be so lucky to sit next to me in a theater. Steve. As Lawrence playing himself, it's not often something like this comes to San Luis Obispo. Weber said, "I think even students who don't know a lot about guitar will have the opportunity to meet the guitarists and hear people from all over." Due to the festival's worldly nature, Grimes said the opportunity for such an event doesn't come around often. "I would urge not only members of the music program at Cal Poly, but any music student to attend, because what will be discussed there is very universal," he said. Also, it's important to understand what the composer had in mind." Grimes said every kind of guitar music should be presented. "There's just an incredible amount of first-rate performers," Grimes said. "The music is very eclectic, and there's a huge variety, from the 17th century to the 1990s." Due to the event's small venue, Russell said a good chance exists that festival-goers will have the opportunity to meet the guitar professionals. "I would say for the people who know about guitar to go not only to the concerts, but also to the master classes," Russell said.

First guitar festival brings top musicians

By Melissa McFarland

After weeks of planning, the first San Luis Obispo guitar festival will debut this weekend with world-famous performers and lectures taking part.

John Grimes, a La Jolla California's creator and director, said the inspiration for the festival at Cuesta College was a recent event.

"It was an idea I had and was thinking about since the 1970s, ever since I attended the Carmel guitar festival," Grimes said. "It was something I always thought would be an interesting thing to pursue. I've been calling top performers of the about its for six years now." The festival, occurring Sept. 24, 25 and 26, will showcase six performers, five lecturers and two master classes, all of which Grimes said would benefit guitar novices and experts.

Cal Poly junior Matt Lopez said he looked forward to the festival for months now.

"The cool thing about this is that unless you're a classical music buff or a guitar major, you're really not exposed to things like this," Lopez said. "I'm surprised they've brought in so many, and it shows people that there's more to guitar than Santana or radio songs.

"I mean, these people are doctors of music, complete virtuosos." One of these virtuos is Cal Poly's own music professor Craig Russell. As one of five speakers, Russell will lecture on how to write a guitar concerto, something with which he's very familiar. "(Russell) is a brilliant composer," Grimes said, and his "Concerto Romance" is a wonderful 20th century guitar piece that has received rave reviews abroad and at home," Grimes said. Russell, who has spoken at musicological conferences and conventions in North America, Mexico and Spain, praised the caliber of performers and lecturers at the festival.

"To have four of these folks (winners of the Guitar Foundation of America Competition) in the same town at the same time is like having an Olympic team here," he said. "And for the average person, what better way to see the best?" Because of this, architecture director Dan Weber said he plans to attend the festival.

Your guide to what's happening every weekend.

Linnaea's Cafe

Thursday: Lu Lu and the Cowtippers, female lead rock
Friday: Uncle Vietnam
Saturday: For Instance, hard rock
All shows: 8:30 p.m., Pass the hat: all ages

Rudolph's

Friday: Gary Mendez and the Blues Effects, blues
6 p.m., Free: all ages

Tortilla Flats

Thursday: 70s to 80s dance music, DJ
9:30 p.m., $1:21 & over. Friday and Saturday: All 80s, all night
9 p.m., $2:21 & over

The Graduate

Thursday: Country Night, DJ
9 p.m., $3:21 & over
Friday: KISS 97 FM Night
9 p.m., $4:21 & over
Saturday: Country Night and Top 40, DJ
9 p.m., $7:18 & over, $4:21 & over

Mother's Tavern

Thursday: 90s, DJ
$2:21 & over
Friday: West Coast Playboys, blues
$3:21 & over
Saturday: Gary Mendez and the Blues Effects, blues
$3:21 & over

The Library

Friday: Ultimate Fighting Championship
6 p.m., 21 & over

Sweet Springs Saloon (Los Osos)

Thursday: Title, alternative rock
9 p.m., Free: 21 & over
Friday: Dawk, alternative rock
9 p.m., $3:21 & over
Saturday: Dynamo Effect, alternative rock
9 p.m., $3:21 & over

Dubnar Brewing (Los Osos)

Friday: Alliance, punk
9 p.m., $1:21 & over

Unique San Francisco bands visit Mother's Sunday night

By Nanette Pietroforte

The Noe Venable Band and The Jenny Scheinman Quartet are joining forces to bring their unique styles of music from San Francisco to San Luis Obispo.

Scott Amendola, featured drummer for both groups, said the two bands, both feature original music written by the Noe Venable and Jenny Scheinman. Venable, a singer and songwriter, has a diverse and flexible music style, according to Amendola. Scheinman, a string and harmonica player, has a diverse and flexible music style, according to Amendola.

"It's basically jazz, in the sense that everyone is featured as an improviser," she said.

"Jenny's music can go a lot of different directions at any given moment," Amendola said. "Every night is different."

Scheinman said picking a specific category for her music isn't easy.

"It's hard to describe original music," she said.

During performances, Venable is performing in support of her second album, "No Cures Here." Amendola said, "Venable's strong point is songwriting and interpretation, while Scheinman's strength is improvisation.

"Her music is lyrically really interesting and pretty involved," he said. "It's quiet, subtle, with hard-to-map instrumental lines to really dance rock. It really spans the spectrum of dynamics."

Venable is performing in support of her second album, "No Cures Here." Amendola said, "Venable's strong point is songwriting and interpretation, while Scheinman's strength is improvisation.

"Jenny's music can go a lot of different directions at any given moment," Amendola said. "Every night is different."

Scheinman said picking a specific category for her music isn't easy.

"It's hard to describe original music," she said.

Hang on to your seat for some more explosive music and a treat for your ears.

SUBMARINE

continued from page 9

"It was the only way we could get him," he said.

Whiteford said he was happy to see the film make a comeback.

"It deserves a fine-rate pressing," he said.

"Yellow Submarine" chronicles the adventures of the four Liverpool lads as they journey to the heavenly Pepperland to butt heads with the invading forces of the evil Blue Meanies. Along the way they encounter a slew of psychedelic settings and characters.

One such wily creature is Jeremy, a pompous, purposeless dwarf the Beatles dub "Nowhere Man."

Stylistically, the film blends fantastic imaginings with Xeroxed typography and live action to create an Andy-Warhol-meets-Lewis-Carroll effect.

Thirty-two years later, the film's style is still incredibly recognizable and imitated. Chicago-based ska-punk band the Blue Meanies even stole their name from the former Beatles film.

"The reason I think it was so popular," Whiteford explained, "is because it came on the heels of their one commercial failure, "Magical Mystery Tour.""

"With "Magical Mystery Tour," according to Whiteford, the Beatles took complete control of the project, resulting in an inaccurate movie that alienated most audiences.

"Our participation was about zero," Whiteford said.

Though the Beatles' direct touch may not be seen in the film, their musical influence and memorable song characters will be a treat for fans young and old.

Architecture sophomore Morgan Sykes-Jaybush grew up watching "Yellow Submarine," singing along with the whimsical songs from a video his parents had purchased.

"I like 'When I'm Sixty Four' and when they're in the submarine," Sykes-Jaybush said.

He looks forward to seeing the restored version.

"When I was a kid, I liked it because it was a cartoon," Sykes-Jaybush said.

"Now I can enjoy the music and appreciate the animation."

Now fans can view the once rare film for the first time, he said.

"A lot of new, young Beatles fans have never seen it, even though they've heard all the music before," Sykes-Jaybush said.

"They can see what makes it a classic."
El Corral Bookstore Aims to Educate Students on the Risks of Buying Textbooks from Giant Online "Discounters"

"Don't Take the Bait," Cal Poly Students are Warned

San Luis Obispo 9-23-99 - As giant online booksellers continue to target college campuses with promises of huge textbook "discounts," local college stores nationwide are stepping forward to caution students on the perils of purchasing from online vendors.

"I found out about AIESEC through flyers and my international management courses. I discovered AIESEC is well known internationally and has a great reputation for organizing international exchanges."

Tony Rogondino
international business graduate

Men's basketball loses a familiar face

By Joe Nolan

When the Cal Poly men's basketball team makes a run at the Big West title this year, they'll be doing it without Jabbar Washington.

The versatile junior swingman has left the Mustangs and transferred to Portland State University. The Mustangs will lose 12.6 points per game and 4.1 rebounds per game with Washington's departure.

The 6-foot-3-inch guard struggled to develop into a starter at one position. Last season, head coach Jeff Schneider started Washington at both guard positions when Ben Larson and Mike Wozniak struggled, and also at the small forward position.

"This definitely gives other guys an opportunity. But I want to mesh more as a team and take care of the ball. I'm not looking for just one guy stepping up," Jeff Schneider said.

Jabbar Washington

The Mustangs up-tempo style, as he led the team with 52 conference turnovers (15 more than Mike Wozniak who was second in that category).

Despite not handling the ball as well as he could have, Washington was still an important piece of the puzzle, a veteran who knew the system and provided 24.6 minutes per game of strong perimeter play. Schneider said he doesn't expect any one player to have to fill the void and hopes a strong returning nucleus will improve the Mustangs.

"This definitely gives other guys an opportunity," Schneider said. "But I want to mesh more as a team and take care of the ball. I'm not looking for just one guy stepping up."

Washington will join former Cal Poly assistant coach Brian Loyd who took over the head coaching position at Portland State. They will come to Cal Poly this year and play in Mott Gym against the Mustangs.

Father says Sanders may return to Detroit

DETOIT (AP) — The father of Barry Sanders says his son should return to the Detroit Lions long enough to break Walter Payton’s NFL rushing record.

He plans to make the pitch this weekend.

William Sanders also said Wednesday he understands the Lions’ reluctance to trade his son.

“If I were the Lions, I wouldn’t trade Barry Sanders,” he said from his home in Wichita, Kan.

The elder Sanders said his son is supposed to visit this weekend.

“He’s in for a father-son talk,” Sanders said.

“I’m going to advise him to go back to Detroit. No sin is as bad as you can’t go back.”

As far as the Lions are concerned, Sanders has retired — and that’s it.

While watching his team practice Wednesday at the Silverdome in Pontiac, Lions owner William Clay Ford Jr. said he had more pressing concerns than the Sanders situation.

“Nobody’s heard from him, so we don’t know what he really thinks,” Ford told radio station WWJ. “It’s just pure speculation. I’m going by what he said — his desire to not play is stronger than his desire to play. But he’s history as far as we’re concerned now.

The 31-year-old running back was 1,458 yards shy of breaking Payton’s career record when he retired July 28.

Since then, the Lions have demanded that he repay $5.6 million of the $11 million signing bonus he got when he signed a six-year, $36 million contract in 1997.

Sanders’ agent, David Ware and Lance Simmons, says their client must be traded or granted free agency before any money is returned.

The club said it will not give up its rights to Sanders.

Sanders will have to decide on his own whether to end his retirement, his father said.
VO LLEYBALL
continued from page 20
Mustangs compete in the Big West Conference, which is one of the
hardest in the nation, according to
Schi!ck. It will be much tougher
than anything the women have
encountered so far. Within the next
two weeks the team will play three of
the top ten teams in the nation.
"There are still a lot of
unknowns," Schlick said. "Our per-
formance this year will depend on
how fast we can grow in the remain-
ing two and a half months."

The team feels that as long as
they can continue their aggressive
style, they will be able to win all of
the matches they should and,
maybe, upset a few teams.

"We hope to make it to the
NCAA tournament, and if we keep
up the hard work, we will make it," Kristen O'Halloran said.

SANTA CLARA, Calif. (AP) -
All of the women on the San
Francisco 49ers aren't sure about
Jeremy Newberry protecting Steve Young's
blindsides.

Puzzled by Newberry's meltdown
Sunday in San Francisco's 28-21 win
over New Orleans, coach Steve
Marriott said Wednesday the tour-
ament was considering all its options at
right tackle.

"Anything's possible," Marriott said.
"We're trying to find the right
combination on the offensive line."

Physically imposing, quick on his
feet and a dominating blocker, the
Newberry emerged as the blindside
protector for Young's left-handed Young.

But in one of his first tests,
Newberry was beaten several
times Sunday by cornerback and defensive
end Troy Wilson. And the New
Orleans Saints, sensing the line's
vulnerability, mounted a ferocious pass
rush that knocked Young down 21
times, including five sacks.

The assault left Young drained and
groggy and Newberry shell-
stocked to the point where coaches
are thinking about replacing him,
though they haven't ruled out giv-
ing him another chance Monday
night against Arizona.

"The game is going to unfold,"
Young said. "I'm going to learn some
thing new, and I'm going to move on to
the next week."

Newberry, a second-year pro
who has been beaten 12 times,
said he has shaken off the
mental block that he will be
restarting his career.

"It's going to unfold," he said.
"I've got a lot of pressure on me.
I've got to be the best. That's football. Nothing new there.

"It's going to unfold," he added.
"We've got new guys at different
positions, and injuries, so it's a little
bit herky-jerky right now but that's
OK. We'll hopefully play better football as we move forward."

Newberry, who certainly wasn't
the only one beaten Sunday, said he
then tried to switch up what he was
doing.

"It was like, 'OK, I need to get back quicker.'

Young said he's spent a few
times thinking about what he
needed to change, and had a
bright idea.

"That's football. Nothing new there.

"I had hoped that everything
would work out for Steve and I didn't
see anything that I wasn't used to.

"I feel good," he said. "I got a lit-
tle better time on Sunday, and we kept refining our

**Poly football upsets Montana State**

The Mustangs evened their record at 1-1 with a victory last Saturday.

By Aaron Emerson

**MUSTANG DAILY STAFF WRITER**

After a sluggish start to the season, the Cal Poly Mustang football team brought home its first victory in a huge upset Saturday night at Mustang Stadium.

The Mustangs proved they could defeat nationally ranked Division I-AA team by beating the No. 18 Montana State Bobcats 45-17 in front of 6,722 fans. The victory illustrated the desire to compete with a challenging schedule.

"We have a tough schedule, beginning with three ranked teams in row," head coach Larry Welsh said. "We need to build on this win, because it gets tougher from here."

The "hate" for the Mustangs begins Saturday in New York. There, they will face the sixth-ranked team in the country, the Hofstra Flying Dutchmen.

"Hofstra is a good team, no doubt," senior running back Craig Young said. "We will need to stick to coach's game plan and execute in order to beat them."

The Mustangs adhered to their game plan Saturday, more than doubling their opponent in rushing yards with 270, while committing only turnovers after the game was in hand.

Cal Poly used a balanced running attack throughout the game, as Young carried for 191 yards and two touchdowns, while quarterback Andy Jepson ran for 65 yards and two scores. Jepson also added 136 yards and a touchdown through the air.

"Our offensive line did a great job all night," Welsh said. "They made big holes for Craig to run through and gave Andy plenty of time to get his throws off."

A week after getting bounced by No. 17 Northern Arizona, 55-21, the Mustangs showed their resiliency by bouncing back.

"We had a tough game last week," Welsh said. "They took us out of our game plan, and we never fully recovered. I'm proud of the way these guys came out here and stayed aggressive."

The win was not a complete victory for the Mustangs, however. The Mustang secondary was depleted with injuries to both starting cornerbacks. Defensive captain Kiko Griffin injured his left knee in the first series Saturday. He is expected to miss four to six weeks. David Kellogg sprained his left ankle and is expected to return after the Hofstra game.

"We've definitely got some bumps and bruises right now," Welsh said. "We are the underdogs and will have our backs against the wall, but if we want to win bad enough, we'll have our chance."

Even with a late game rally, consisting of an interception and an onside-kick recovery leading to two touchdowns, the Bobcats couldn't stop the Cal Poly rushing game. The Mustangs hope the Flying Dutchmen face the same fate.

"If everybody steps up and we all come together, only good things will happen. I feel real good about the way this team is playing right now."

Craig Young
running back

---

**Volleyball spikes the competition**

By Erin Crosby

**MUSTANG DAILY STAFF WRITER**

The women's volleyball team's hard work is paying off with an 8-2 record that may help propel them into the top 25 rankings.

The Mustangs have had little trouble in three tournaments so far. The first of which was a first place finish at home, sweeping all three games. They placed second at the other two tournaments, only losing matches to Eastern Washington University and Colorado State University, which is ranked 16th in the nation.

"We lost, but it was a good experience because we saw the level we want to be playing at, and it is an attainable goal," Carly O'Halloran, a sophomore setter said.

This fast start is pushing the team toward their goal of breaking the top 25.

"We are not ranked yet, but we did just get votes for the first time, so hopefully we will make it soon," Kristen O'Halloran, a freshman outside hitter and twin sister to Carly, said.

So far, head coach Steve Schlick is very pleased with the players' performances. He feels he has a solid team — full of strong returning players and very promising newcomers.

"We have come such a long way in such a short time," Carly O'Halloran said. "This leaves us very hopeful for the rest of the season."

The women are very confident going into their first two league games in Mott Gym against University of California, Irvine on Friday and California State University, Fullerton on Saturday.

"Physically, these teams are probably better than us, but they should be pretty good matches," Schlick said. "It is good to start out the season with two possible wins."

Even with a strong start, the season will have its difficulties. The Mustangs finished seventh in the Mountain West Conference.
