Wall cleared to display enterprise

By Diane Farnsworth
MUSTANG DAILY STAFF WRITER

Anthony Randazzo started his own line of surfboard and snowboard products. His entrepreneurial venture is on display in the University Union Craft Center. Randazzo got involved in Poly-Pac, an annual symposium that solicits speakers from packaging, plastics and recycling businesses. While networking with industry professionals, Randazzo was also spending time surfing, and he began to see a niche market.

"I was going through a surfboard every six months," he said. Randazzo said the boards would easily get scratched in the back of his truck, allowing them to fill with water and become heavy. "The boards needed some kind of protection. (The business) just kind of grew from there."

After four years of research, Randazzo started manufacturing protective covers for surfboards, wakeboards, bodyboards, snowboards and skateboards, a combination backpack/skateboard carrier.

"Now the Perfect Conditions product line is sold in sporting good stores from Oregon to Los Angeles. Typically, Westside Surf and Skate in Cambria and Skater Paradise in Santa Maria carry the line."

Wall cleared to display enterprise

Duke University history professor William Chafe spoke to a crowded audience of Cal Poly students and professors, some who were seated on the floor, Monday afternoon about the history of African American segregation.

In his lecture, Chafe read a compilation of stories he and numerous graduate students from across the nation researched. Chafe said most of the stories were published between the 1920s and 1940s.

Chafe's purpose of his lecture was to educate people to understand that many African Americans resisted segregation.

"It's important that people know African Americans made their own history. They were not only victims but also agents in struggling against segregation and oppression," Chafe explained.

In his speech, Chafe said the African American experience has been a constant struggle for dignity and community improvement.

"No matter how hard an African American worked, it wasn't good enough. Their children had to stay home and work instead of getting an education," Chafe read from one of the stories.

Chafe said the African American community helped with the struggle against segregation by helping to develop leadership that was not dependent on white resources or approval.

Chafe finished his lecture by explaining that African Americans used their energy and courage to rebel against white peoples' mistreatment of them.

Civil engineering freshman Kerry Flynn said she attended the lecture because she was interested in learning about segregation.

"I got a sense of the violence and cruelties African Americans had to deal with growing up," Flynn said.

Writer reflects on alcohol, HIV struggles

By Dena Horton
MUSTANG DAILY CONTRIBUTOR

River Huston describes herself as a "writer, comedien, poet, activist, performance educator, self-proclaimed goddess and girl with a big mouth." Huston had much to say about alcohol, sex, AIDS and other "touchy" subjects Monday night.

"People are scared to talk about alcohol," she said. "I'm here to talk about addiction because I got myself into addiction with drugs, and because I'm not talking about drugs, I'm talking about alcohol.

Huston turned her life around and is now helping others do the same.

"You try and control it, but you can't," she said.

"If a person in a group of people is drinking and he doesn't want to drink, I'm not going to shame him or make him feel bad," she said. "I don't want to be a dictator."

Huston's lecture began with a brief description of alcoholism. She compared it to alcoholism.

"You try and control it, but you can't," she said.

"I want to stop drinking and I want people to tell me not to drink. Instead, I want people to drink responsibly. I want people to show their appreciation in how to avoid hangovers and explained why many people binge drink."

"Be at ease with yourself," Huston said.

Republican state senator kicks off U.S. Senate race

SAN LEANDRO, Calif. (AP) — Republican state Sen. Ray Haynes formally announced his campaign Monday to unseat U.S. Sen. Dianne Feinstein, joining a field of candidates that have questioned his sanity for running in the populous San Francisco Bay Area.

Haynes, who represents Riverside and is the minority whip in the state Senate, said he would eliminate the Internal Revenue Service, support a “Star Wars” ballistic missile defense system and push China to improve its human rights record, among other things.

A married father of three daughters, Haynes was reelected last year to a four-year term, so he can retain his state Senate seat if he loses the bid for federal office.

Other candidates in the Republican Senate primary next March include multimillionaire State Sen. Ben Hummels, Supervisor Bill Horner and Orange County businessman J.P. Gough.

Donald Trump jumps on Reform bandwagon

WASHINGTON (AP) — Keeping his options open, New York real estate developer and television personality Donald Trump plans to file the necessary papers this week to be a Reform Party presidential candidate in California.

Trump says he plans to decide whether to seek the nomination next year. His strategists, Roger Stone, and Sam Nunn, are the dead-line to file for ballot access in California.

“Everything is about keeping his option open to run. You don’t want to decide in January to run, having missed the deadline to file to run in the largest state,” Stone said. “I think this increases the likelihood of him running.”

Former Actors Guild president to run for California Assembly

PASADENA, Calif. (AP) — Actor and former actor’s union President Barry Gordon, former president of the Screen Actors Guild, announced his candidacy for the state’s 44th District Assembly seat.

Gordon will run in a district that includes parts of Pasadena, Glendale and other suburban areas northwest of Los Angeles. The seat is currently held by Assemblyman Jack Scott, D-Pasadena, who is running for the state Senate in 2002.

Gordon was president of the Screen Actors Guild from 1988 to 1995. He was a regular on the television series “Archie Bunker’s Place” and “Fish” and is in an upcoming episode of “NYPD Blue.”

He was a candidate for Congress in a similar district in 1998, and received 47 percent of the vote against incumbent Republican Rep. James Rogan, although his campaign was outspent by Rogan more than 3 to 1.

“I am the proven votegetter in this race — I have an ongoing dialogue with the voters of our district. They know I that I share their values,” Gordon said Monday.

Other Democrats seeking the 44th District Assembly seat are La Canada Flintridge Mayor Carol Liu and attorney Diana Peterson-More. The only announced Republican candidate is Susan Carpenter-McMillan, an anti-abortion activist and spokeswoman for Paula Jones, who accused President Clinton of sexual harassment.

City Council moves forward with downtown transit center

Proposed center may cover two blocks bordering Santa Rosa Street

City Council moves forward with downtown transit center

What they did for us is narrow the focus...The consultant can now go out and solicit both comment and information from the property owners.

Tim Bochum
deputy public works director

The downtown transit center is one step closer to finding a new home.

Three buildings once considered for replacement by the proposed center are now "off the table," the city council decided Tuesday.

Bank of America, the old French Hospital building and legal offices — along Santa Rosa and Toro streets — will not be considered as sites for the center.

The proposed center covers the two-block area bordered by Santa Rosa, Monterey, Toro and Marsh Streets. The city hopes the center, which may house a parking structure, would help eliminate current bus congestion on Toro Street. The site was chosen from other locations to avoid traffic on other downtown streets.

Tim Bochum, deputy public works director, said he was pleased with the meeting's outcome.

"What they did for us is narrow the focus that the consultant is going to be looking at," Bochum said. "The consultant can now go out and solicit both comment and information from the property owners."

Businesses in that block still up for consideration include Morgan Stanley Dean Witter, San Luis Downtown Shell, Santa Maria Tire and Spring Toyota. In addition, the block of land between Bank of America and French Hospital could also be used for construction.

The owners for Shell and Dean Witter attended the meeting and expressed concern that they weren't notified of the situation. Neither wish to sell their businesses.

The council also advised further study of the contamination at Spring Toyota if the city purchased the land, it would cost approximately $1 million to clean up the site.

The consultant will also study how to use the top level of the parking structure. Possible ideas include commercial use, a civic center, restaurants or a senior citizen center.

Faculty fears students have technology edge

(U-WIRE) OMAHA, Neb. — While many students are becoming more Internet-savvy, professors are finding it more difficult to stay a step ahead of the class. A national survey for the University of California at Los Angeles suggested that two out of three professors are under stress trying to keep up with technology. Of the 34,000 faculty members who were surveyed, only 35 percent use the Internet to conduct research, and 38 percent use technology to create class presentations.

Dr. Jay Lanthurst, associate professor of Finance at Creighton University, and every year she is afraid students might get ahead of her with their computer experience, but luckily she has managed to keep up with technology. Of her students, she said, “They are interested in seeing more technology-literate professors, they need to make their concerns heard.”

“I thought they could let their demands be heard by the university,” Lanthurst said. “He has no computer in his office, no voice-mail and uses a typewriter for copying.”

In the College of Business Administration faculty, only seven members out of 36 are on the same level with students or close to that level, Gasper said.

Five years ago, not everybody had the responsibility to learn technology unless it related to work, but now technology relates to everyone’s work, Gasper said.

Professors often concentrate more on their subject matter rather than learning the ever-changing technology, she said.

If students are interested in seeing more technology-literate professors, they need to make their concerns heard, the said. “If only they could let their demands be heard by the university, a change will be done,” Gasper said.

University, said every year she is frustrated with their computer experience and classes, “We have entered a high technology-free environment.”

He has no computer in his office, no voice-mail and uses a typewriter to write.

“My mind is free without technology,” Hortman said. “I don’t feel like a prisoner to it.”

Hortman said he does not feel threatened by students knowing technology because he does not need it.

“My students come to my office for help, and I’m always available for them; they don’t need to e-mail or leave messages for me.”

Technology makes the world faster. UL makes it safer.

UL is the most respected and accepted product safety and reliability organization across the globe. That’s why our highly-qualified engineers, chemists, fire protection specialists and administrative personnel use the latest scientific and technological tools to establish and publish safety guidelines and specifications. Unlike any other laboratory, we won’t stop if something should fail — and whether it fails safely. Due to our ever-expanding global influence, we’re in need of more dedicated, tal­ented and conscientious professionals to fill the following roles:

Product Safety Engineers

* Evaluate and test a wide range of products including information technology equipment, medical/healthcare equipment, power supplies and audio/video products
* Ensure product safety through domestic and international regulatory compliance requirements
* Client interface, application submittals, cost analysis, creation of technical reports and participation in constructive reviews
* Requires a BS in Electrical/Mechanical/Chemical Engineering or Industrial Technology, excellent communication skills and occasional international and domestic travel

We offer a competitive salary, a comprehensive benefits package and an excellent working environment to begin your career.

We will be recruiting on campus!

Monday, October 25th

See your career center for more details.

If unable to see us on campus, please send your resume to: Underwriters Laboratories, Tonia Luce/HR Dept., 1655 South Blvd. Santa Clara, CA 95050, or fax to: (408) 556-6042. Email: tonia.luce@ul.com. TDD (408) 985-7015. We are an equal opportunity employer.

UL makes it simpler. i-drive simplifies file transport

Have you ever walked into a computer lab with your laptop, put it in the drive and crossed your fingers — only to be greeted with an alert message: “This disk could not be read.”

What a nightmare! That file you spent all your time working on the night before couldn’t be opened, and your assignment is due today. Time to spam out and go postal on the lab tech, right?

Not so. There’s a solution to your file transport problem. If you think about it, its time has come.

I mean, we’ve been using the Internet since, like, 1994, and only a privileged elite actually have the time and knowledge how to use FTP to access their files. Even that is a tedious process, requiring careful handling of file types and file extensions (as in “Did I remember to type .txt at the end of the file name?”). This is why the creators of i-drive are going to be millionaires before you can say “dot com.”

They’ve capitalized on the Internet storage craze and made it easy, accessible even. Now, these technophobes who are still walking around aimlessly looking for a darn floppy drive (the Mac has nearly deserted them) have an alternative that allows them to transfer files over the Internet via a simple web page with a password and a user interface.

Located at www.idrive.com, the site is the best thing since the Category 5 ethernet cable. Sign up for a username, and you’re good to go. The whole process can take me more than five minutes.

I wanted to run it through its paces, so I cruised around my hard drive looking for a challenge.

i-drive took complex file types in stride, automatically identifying files without any user input. It was easy.

Space is the main limitation at i-drive since the site gives basic users just 25 megabytes of storage. For 10 times the storage space, check out www.mydas.com. It operates on the same premise but is a bit more private and only works with MSFs.

i-drive’s creators have a grand vision of their product — which is free, by the way — in which users and their friends share access to files across the Internet, improving productivity and increasing file-sharing independent of geography. This should sound familiar since that’s the way a common network operates. The main difference is that i-drive built an advanced user interface, which is not only secure but also simple to navigate.

In its partnership with MSFs.com, i-drive coined a new word and positioned itself at the crux of an Internet revolution. A feature called i-drive coined “i-drive” and positioned itself at the cusp of an Internet revolution. A feature called i-drive coined a new word and positioned itself at the crux of an Internet revolution.

Now users can access their files, even that is a tedious process, requiring careful handling of file types and file extensions (as in “Did I remember to type .txt at the end of the file name?”). This is why the creators of i-drive are going to be millionaires before you can say “dot com.”

It's easy to think like a conservative

Lately, I've been getting a lot of heat for being who I am and for who I think the world is. I thought some of you could use a little wake-up call about Conservatism — you may be touring for the wrong side by being a Democrat.

Now to start with, everyone has a life changing story that causes them to think one way or the other. Mine is simple and straightforward. I come from a Communist country (Hungary) and I cherish the freedoms here — more than 90 percent of America-born citizens in my eyes. I also recall the lines between the "space" democrats involve themselves in are nothing short of baby steps toward a Socialist country.

Okay back on track. To be conservative is easy. As the Chairman of the College Republicans, these views are mine, not the club. I believe that my money I earn and save for should be for the most part, mine, not the government. Granted that some taxes are necessary, but limited to just that — necessary programs and expenditures.

I believe marriage and a normal household is between a man and a woman. Call me old fashioned, but I think the parts fit right into place, if you get my drift. I know I can't control that, nor do I wish too, but it's just natural in my eyes.

I believe that the people have every right to own arms. If you disagree, that's great, but don't you dare try to take my gun away. (through governmental law) leaving me to fend for myself and my family with sticks and stones takes a little too Howard.)

I believe that this country, in today's day and age of a hostile world, needs a strong, firm military to protect us. Now this doesn't mean peace keeping or being the world's police. No, I'm not preaching isolationism but, I'm saying that our current involvement in global affairs is WAY too much and should be cut back. We can only foot so many of these little countries by getting involved in their disputes before something goes sour.

I believe in the American Dream, that every man, woman, child, Black, white, red or green deserves a fair shake and, in my opinion, has the possibility to make the most of themselves without government holding the silver spoon.

I believe in the environment to spared and obvious, yet unknown statement, I love to fish, hunt, camp, rock climb and backpack. With government buying up all the public land for "protection," I believe it takes away our freedoms to use our land as we feel fit.

Given those are: one good things to preserve nature, but those have grown exponentially to inhab its our land. The "Big Brother" effect.

Many of you are probably thinking "Brick Mary" by now and are saying, "off with his head," but take this article as a whole, not piece by piece, and I look forward to your words.

Tamas Simon a mechanical engineering junior looking to change to pol sci and is Chairman of the College Republicans.
Finer points of faith Editor,
I must commend Jeremiah Keper and Noah Stokes for their speech response to my first editorial. In light of what they said, I offer a sincere apology to those who think I preach salvation by works alone. It is faith and works together in union that pleases God.
First off, I would like to address these two gentlemen.
Jeremiah, you are very firm in your beliefs, and I commend you for that. However, you are still incorrect. Noah, your cynical approach to faith justifies as in this case? Abraham and Noah, your darkness into light with another and do good works to please the Father of all of us if we have to do it because we are saved. Jesus would have commanded us to love one another and do good works to please the Father all of us have to do it. Accept Him.
I can bring Jeremiah and Noah's darkness into light with the very book they try to defeat me with. Paul says to work out our salvation in fear and trembling (Phil 2:12-13). If faith sufficed, why would there be fear and trembling? Because we do not know if we are saved!
God decides, so try to act according to His Son's desires.
Andere Mead is an engineering sophomore.

Apology to Mead Editor,
I just read the article that I wrote in response to Andrew Mead's ("Don't confuse faith, works," Oct. 25) I wish I had written that I wrote that I wanted to take these few sentences to formally apologize to Andrew Mead and the other representatives of the Church of Christ, that verse holds no water in response to Andrew Mead's artic...
**Huston**

**continued from page 1**

Huston advised, "Don’t drink because you’re lonely.”

At 14, Huston and a friend decided to “party” with some tequila.

After going to an apartment with a group of older men they had just met, both girls became extremely intoxicated. Huston requested medicine for her headache but received a downs instead.

After passing out, she was gang raped and beaten while her friend ran away and walked 12 miles home.

Huston was thrown, naked, from the group’s truck and left in the snow to die. She was found there after a dog stood over her and barked for hours.

In 1985, she decided to quit drinking for a combination of reasons. Not only had she been diagnosed with HIV, but she was also suffering from Hepatitis, and she knew drinking wasn’t going to help.

Huston said no one can make another person change — she made a personal change because she was ready. "It was my 25th birthday, and I had hit bottom," Huston said. "Something just clicked inside me.

Huston’s goal wasn’t to scare the audience but to remind them that these kinds of events really do happen. People can avoid dangerous situations by not putting themselves in vulnerable positions.

Huston said her alcoholism was responsible for her contracting HIV — she has been HIV positive for 14 1/2 years. She has written a photo book called "A Positive Life," which documents women’s struggles with HIV. Huston also has appeared on a number of national television shows and speaks to groups around the world.

Huston’s visit is part of National Collegiate Alcohol Awareness Week. Associated Students Inc. and the Victim Intervention Program (VIP) have a series of events, including a comedy-education show about alcoholism at 11 a.m. Thursday in the University Union Plaza.

Cal Poly student Liz Hess works as a sales representative, and Nathan Dimore is developing a catalog as a senior project.

"Start a business has been a long haul, Randazzo said, but a lot of fun. After he graduates, he plans to expand Perfect Conditions to include accessories and clothing. Randazzo said he also likes the development stage of business. "I'd like to start other types of companies," he said. "I get excited about developing new products. My senior project was to develop a student seat cushion. Students would be able to carry them in their backpacks. They could sit on the product line can be seen in the Perfect Conditions which also sells wooden seats during long classes."

**IBM PCs pulled from shelves**

NEW YORK (AP) — IBM, whose name has been synonymous with personal computers for two decades, said today it will pull its money-losing line of PCs from U.S. stores and sell them exclusively over the Internet.

Aptiva PCs will disappear from shelves starting Jan. 1. IBM’s ThinkPad laptops, which are profitable, will continue to be available in stores.

IBM’s Personal Systems Group, which sells PCs to both consumers and businesses, lost about $150 million in the second quarter and nearly $1 billion last year.

By withdrawing its PCs from the shelves of 70 U.S. retail chains, IBM will save money on the fees stores typically charge to display and promote products.

"We want to revitalize this business to profitability," IBM spokesman Dan Guarino said. Moving out of stores "will save us a lot of money."

To raise awareness of the Aptiva brand and encourage people to visit its ShopIBM Web site, which is redesigning, IBM plans to launch a $20 million advertising campaign early next year that will include television and direct mail.

IBM’s stock was down 75 cents a share at $106.25 in trading on the New York Stock Exchange. It is expected to report its third-quarter financial results on Wednesday. IBM, the nation’s third-largest PC maker, is the latest technology company to be squeezed by price wars and a surge in component costs.

FROM THOUGHT TO FINISH."
College student lands Park Place

LAS VEGAS (AP) — Monopoly masters from across the country tucked up the real estate ladder Tuesday before a 26-year-old college student from Vermont wheeled and dealed his way to the national title.

When Matt Gissel of St. Albans, Vt., traded his red properties — Indiana, Illinois and Kentucky — for the four railroads plus the purple properties, he knew he might win.

“I recognized the value of those,” Gissel said shortly after forcing his three opponents into bankruptcy.

Wednesday, October 20, 1999

For the first time, television cameras captured the Monopoly struggle, and he knew the moment wouldn't be lost.

“I hung in, landed on hotels and didn't have enough money. It was fun.”

Chris Pichette
Monopoly contestant

Gissel, a junior at Worcester Polytechnic Institute in Worcester, Mass., summed up his win in a few words: “So, everyone went bankrupt.”

He won a trophy, the new millennium game and a trip to the World Monopoly Game Championship in Toronto next year. The winner of that competition gets $15,140 — the amount of money in a Monopoly game.

Chris finished fourth in the championship. Murray Rosenfeld, a 44-year-old charity executive from Maryland, finished third while Molly Mashin, a 26-year-old from Alaska, won second.

The popular board game is in 50 countries and has been translated into 26 languages, according to Hasbro.

Need supplies? El Corral has 10,000 things to help

Over the years, Dawson has seen some changes in the types of supplies her department sells. For instance, El Corral used to sell a lot of carbon paper, T-squares and drafting supplies, and they still sell some of those items but not as much as before.

"That's what's good about us," said Dawson. "We are changing with the times, but if you find it here before in our department, it'll still be here for you if you want it."

The exception to that rule has to do with blue books, which haven't been blue since the mid-60s.

"Four or five years ago an environmental instructor asked if we could please do that because it's easier to recycle. And then we're not using blue covers because it's better for the environment."

She said initially many people complained because "suddenly the covers weren't blue. Not, no one complains but many don't understand why they're called blue books."

For the most part, she plans according to what was sold the previous year. Sometimes her goal is to keep the shelves full with less priced supplies.

"I work very, very hard to keep the prices very low," she said. "Our prices are very competitive and we do price comparisons every quarter."

This week art portfolios are on sale. From core board will be on sale in the near future.

New fall arrivals daily!
Yankee’s Torre proving he does belong 

BOSTON (AP) — For months, Joe Torre didn’t think he cared enough to keep managing. Cancer will do that.

Then, last month in Toronto’s SkyDome, with the Yankees’ divisional lead dwindling, he learned something about himself.

“All of a sudden, my stomach started hurting and I realized the passion was there,” he said early Tuesday after losing, New York’s last Boston game and losing the World Series for the third time in his four seasons.

It was the latest display there was how easily or once joked, that when Kisehl just the hint of a

was manned not onto the infield just in a

first time in memory to win opposing

the latest display there was how easi­

by, that when Kisehl just

Two. Torre wins.

“Then your manager comes through like that, he inspires them,” Steinbrenner said early Tuesday. “He’s definitely been an inspiration.”

Players agree. Torre has a knack to see exactly the right thing, all the time.

“Joe Torre,” Deseret News (Salt Lake City, Utah) Lehi, Oct. 19, 1999

Torre loved to run. He used to run with the Yankees. \n
When his team needed a win, he ran. He ran for his team.

But since that night in Toronto, Torre has felt he belonged.

“In the postseason, it’s identical to last year, maybe even a little more so,” he said. “I’m all the way back as far as the emotion of what I’m doing. But it’s been a wild year.”

Even George Steinbrenner, who spent the 1970s and ’80s changing managers as often as some teams changed their starting rotations, praised Torre. Or, at least, it’s easy for The

It was probably more satisfying this year.

Dolphins send Abdul-Jabbar to Cleveland

CLEVELAND (AP) — For some help with their running game, the Cleveland Browns acquired running back Karim Abdul-Jabbar from the Miami Dolphins on Tuesday for a future draft pick.

Fullback Karim Jones, who stepped to 3-6 with a loss at Jacksonville last Sunday, traded their sixth-round pick in next year’s draft for Abdul-Jabbar.

If the Browns extend Jabbar’s contract before the last day of the NFL’s 1999 fiscal year — an undetermined date in February — the Dolphins would also acquire Cleveland’s fifth-round pick in the 2001 draft.

“We are excited to have Karim join us,” said Dwight Clark, Cleveland’s director of football operations. “He is a good, young back and will be given the opportunity to contribute.”

Abdul-Jabbar, 25, started three of Miami’s games this season, rushing for 99 yards and one touch­down in 29 attempts. He also had four recep­tions for 23 yards. But he was bencil­ed in favor of running backs C.J. Clinks on and Collins. Johnson and was inactive in the past three games.

“I am excited to join the Miami Browns and will work hard to contribute,” Abdul-Jabbar said.

Torre’s team will face off against the New York Yankees in the American League Championship Series, a best-of-five format.

With the win, the Yankees will advance to the World Series, where they will face the Arizona Diamondbacks.

Karim has done a great job for us in the past,” Dolphins coach Jimmy Johnson said. “However, with the emergence of our young running backs, playing with the Browns will be a good situation for him.”

Following a season-high 13-yard performance against the Jaguars, Cleveland’s rushing offense improved its ranking to 26th in the league. But the Browns’ inability to run the ball consistently has allowed defenses to play close to the line of scrimmage and put more pressure on quarterback Tim Couch.

Kyra has rallied for 323 yards on 55 carries and one touchdown since the bye week.

Clark and Browns president Carmen Policy personally handled the negotiations with Johnson and was able to finalize the trade before Tuesday’s deadline.

“Hey, this is a win for us,” Clark said. “I think they had a better shot at us. This year, I think we had a better shot at us.”

Rams' Warner helps NFL
give back to community

ST. LOUIS (AP) — St. Louis
quarterback Kurt Warner caught
a big part of his day off Tuesday play­
ning with visually impaired children,
posing for pictures and signing toy
football and jerseys.
It's a cause very familiar to Warner,
who lost his younger brother, 10-year-old son
Zachary, is blind.
NFL players from all 31 teams spent
the day in a variety of commu­
nity service endeavors as part of the
NFL, and United Way Hometown
Huddle. Warner, along with 17 other
members of the Ravens served meals to the home­
less. Jacksonville Jaguars helped stu­
dents at a Boys & Girls club with their homework. Members of the
Cleveland Browns helped build a
playground for underprivileged kids.
Warner, the NFL's superstar of
1999, and several teammates spent
hours at Delta Gamma Center for
Visually impaired children. Warner
brought along his wife, Brenda, and
Zachary, who seemed to relish taking
part in a big brother-sister role with the
children — mostly one to three-year­
olds — who attend the center.
"He makes the world to me,"
Warner said of Zachary. "He's just a
true blessing in every sense of the word.

"Two years ago, I was a single
mom in this type of environment,"
Brenda said. "We were on food
stamps and having a hard time. Now, we
want to give back.
Warner brought along a Rams hel­
met and shoulder pads and walked
around a circle and gently placed
down the eldest. Who knew there
was a need to play and Zachary said,
"How do you like that? Just like
daddy does.
"I'm ready to play," Zachary said.
Next year's roster is undecided
because of his fourth concussion in
three years, and there is no telling
when or if he'll be cleared by doctors
to play again. Young was expected to
seek additional medical opinions in
this week and a decision could be made
by next week on his future with the club.
"With Steve's uncertain status,
we know we don't want to have two quar­
terbacks active for a prolonged period of time. That's really
taking a chance,"
McCormac said. "We've never
had a situation like this before.
We stepped it up, we changed our
tactics, we changed our strategies.
We've weathered it all with a
strong belief in God," Warner said.
"'He has won some snaps and lost
some snaps, and that's going to hap­
pen," McCormac said. "'He's a pro.'
"It was a cause very familiar
to Warner, McCormac said. The
possibilities include Greg Newsome, San Francisco's third cornerback at 6-1, and
Wolker, who returned an inter­
ccept in the Super Bowl and a
touchdown after being demoted
from the starting lineup the week be­
fore.
McCormac had started all five games at right cornerback and
it cer­tainly would have been a target again
when the 49ers play at Minnesota, which has wide receiver
in Randy Moss, Cin Carter and Juko
Rod who are 6-foo-ters or taller.
"We didn't make the change
due to Randy Moss going to line up against us, because
we felt we needed to make a decision on
him," McCormac said.

NCAA approves golf for next year

By Bryce Alderton
MUSTANG DAILY STAFF WRITER

The Cal Poly men's and women's golf teams are teeing it up for a second season with high aspirations as they look to build on last season's matches. Student director of men's golf Brian McCormac has worked almost two years to form a collegiate team. "It's amazing that the team formed so quickly, and it's great seeing all of the hard work finally pay off," McCormac said.

McCormac expects both teams to

"As word gets out that we are an NCAA team, more and more people will be interested in playing. People see the opportunity to play competitive college golf." Brian McCormac Student director men's golf

Business senior Kelly Gutilla practices his swing at Avila Beach. The golf team, including a women's team, will officially begin play next year.

Teams NCAA-ready after only two years

Both men's and women's teams included

By Bryce Alderton MUSTANG DAILY STAFF WRITER

It's official — Cal Poly's men's and women's golf teams are NCAA-approved for next year.

The athletic governing board voted Sept. 30 in favor of the teams competing at the NCAA level beginning with the 2000-2001 academic year.

Men's golf coach Bill Moss credits the work of Cal Poly alumni Robin Poizgait and Gene Guarino along with the vice president for university advancement Bill Boldt. "Without their help, we wouldn't have been able to show the support needed to satisfy both the athletic department and governing board, which eventually gave us the approval," Moss said.

The athletic department has certain criteria that must be met before the teams could be approved by the NCAA. To satisfy Title IX, there must be a women's team in addition to the men's team, and the teams could not draw funds from other existing teams.

"We have a fund-raising drive as part of a fall tournament to show the athletic department that money will be there for the teams," Moss said.

The teams currently compete through Cal Poly Recreational Sports, which provides financial as well as emotional support. "Rec Sports has helps us generate interest in the teams and allows us to compete since we
