Students, community take time out to sweep up

By Carolyn Ficara
MUSTANG DAILY STAFF WRITER

Like a cleaning tornado, Cal Poly and Gusta students, clients, staff and others from the community whirled through the EOC Homeless Shelter Saturday morning, washing floors and walls, raking leaves and painting. Saturday was National Make a Difference Day. Cal Poly volunteers from Beyond Shelter joined millions of people across the country who took time to contribute service to their communities. Beyond Shelter director Matt Cechini said, "I think it gives people hope, that they aren't the forgotten people of our society. We don't just work today; we do on-going projects like after school tutoring too."

"Smiling and laughing, children are testifying to volunteers that their efforts really do make a difference in another person's life," said Paul Younse, last year's director and still an active volunteer, believes the students' work at the shelter helps clients see beyond the sometimes overwhelming struggles to get back on their feet.

While planning this year's chores, Connie Almer suggested clients be asked if they wanted to help clean. Because those living at the shelter have to leave the building by 7:30 a.m. and cannot return until 5:30 p.m., they have not been able to help in the past.

"There are many reasons why people have found themselves at the shelter. A woman who lives at the shelter said she lost her home when she got sick last February and couldn't work. "This is what I do for a living," she said. "I'm working again, but rents are so high I can't afford a place.""

Getting a job while at the shelter is another serious problem they deal with. "When I apply for a job and tell them I live at the shelter, they start wondering if I'm a drug addict or an alcoholic or something," said two-week resident Kathleen Oonoff. "It isn't easy, and there are many times when you will get very low and very depressed, but you have to have faith things will get better because otherwise you have nothing," Lebra said.

According to Younse, there are currently 2,200-4,000 homeless people in San Luis Obispo County.

"It's an eye opening experience," Beyond Shelter co-director Matt Cechini said. "It makes you realize that they are real people."

During the panel, students were able to see that homelessness is a problem that can affect anyone. One man had a past filled with drugs and alcohol, while another fell into hard times after a back injury. "So often people see the homeless and immediately judge them," said Eila Hooshair. "But often times they are just people down on their luck looking for a second chance."

These men are trying to get back on their feet through programs at the shelter. They are working with Case Management, a program designed to help them find a job and housing.

Even though the men have been through so many hardships in their lives, they manage to keep a positive outlook that things will get better.

"It isn't easy, and there are many times when you will get very low and very depressed, but you have to have faith things will get better because otherwise you have nothing," Lebra said.

SLO homeless speak out on stereotypes

By Erin Crosby
MUSTANG DAILY STAFF WRITER

He may be the man walking down the street downtown, or the woman sitting in the back of the bus, or even the kids that play on the grass in the park. The homeless are everywhere, but they often go unnoticed.

Last Thursday night's homeless panel held in Tenaya Hall, sponsored by Beyond Shelter, helped to spread awareness to Cal Poly students.

"The purpose of the homeless panel is to reveal the truth about the realities of homelessness in San Luis Obispo to the students and to break the stereotypes that many people possess," Beyond Shelter co-director Paul Younse said. "When people hear the word "homeless" they think of panhandlers, drunkards and mentally ill wandering the streets and harassing members of the community. The reality is that many of the homeless are just like you and me."

According to Younse, there are currently 2,200-4,000 homeless people in San Luis Obispo County.

Thursday night's panel consisted of three homeless men who are currently staying at a homeless shelter in town. Ed Neeley, Eric Lehr and Kelley told their stories of how they ended up homeless and what they are doing to better their situations.

"It is an eye opening experience," Beyond Shelter co-director Matt Cechini said. "It makes you realize that they are real people."

During the panel, students were able to see that homelessness is a problem that can affect anyone. One man had a past filled with drugs and alcohol, while another fell into hard times after a back injury. "So often people see the homeless and immediately judge them," said Eila Hooshair. Construction industry breaks down barriers at forum

By Tracy Brant Colvin
MUSTANG DAILY STAFF WRITER

Last weekend's Construction Sciences Forum brought together aspects of the construction industry from landscape architects to firms that build aquaria. The forum consisted of seminars with guest speakers, product booth displays and a roundtable dinner discussion.

Architecture senior Craig Chinn said the aim of the forum was to bring together many facets of the construction industry and expose them to students and local construction professionals.

"What the forum is about is breaking down barriers," said Chinn.

Architecture senior and president of Multicultural Association of Environmental Designers Holman Vilche agreed with Chinn.

"There was a good dialogue between the different disciplines," Vilche said.

He added that if Cal Poly changes a year-round system, better ventilation will be needed for the summer.

"Most of the summer school classes are in the morning, but if Cal Poly goes year-round, we'll have more classes in mid-day," Naretto said.

"The forum is worthwhile for students because they get exposed to different things," said Vilche. Vilche also said that attendees are representative of the industries that he will be dealing with after graduation.

Chinn concurred with Vilche, saying that a group of a hundred students continued to ask questions of one speaker even after she had finished her talk.

Chinn was impressed with the response by the professionals in the construction field.

"We had more interest from speakers than we had time for," said Chinn.

Opportunities are available for exceptional students with the following majors:

- Aeronautical Engineering
- Mechanical Engineering
- Electrical Engineering
- Chemical Engineering
- Chemical Engineering
- Civil Engineering and Construction Management
- Computer Engineering
- Computer Science
- Electrical Engineering
- Finance/Accounting
- Human Resources
- Industrial and Labor Relations
- Physics
- Management
- Marketing/Communications
- Math
- Mechanical Engineering

Chinn was impressed with the response by the professionals in the construction field.

"We had more interest from speakers than we had time for," said Chinn.

Computer engineering junior Mike Davis said the computer science building and the agriculture building need to be re-done.

"They are absolute dumps," Davis said.

Chairmen of the agribusiness department Ken Scott disagreed.

"It's a good old building," Scott said.

"It's a fairly comfortable building, and it's highly used." Scott said state funding for renovations is rare.

"The state updates their prisons before they update their classrooms," he said. "I think professors and students alike would like to have updated facilities."

Continued from page 1

with student housing, it would help the housing for everyone.

Program manager Almer said, "Something needs to be done. This place gets crazy at dinner time when 100 to 150 people come to eat. We only have beds for 49 people." She said families are sent to overflow locations. She said some are allowed to sleep in their vehicles in the parking lot, but the rest just have to find a place to sleep outside. During the day, people can go to Prince's Road center to do laundry, shower, have lunch and use phones, she said.

Having meals seven days a week for that many people is a big job.

Meals during the week are prepared in a kitchen in Shell Beach, then taken to the shelter. On weekends, different churches and service organizations bring the dinner to the shelter.
Going up.

Sticky with the system that works for Poly

A nyone interested in spending 18 weeks in a dreadfully boring class with an equally dull professor please step forward. As someone interested in expanding their knowledge base by taking more classes with a variety of professors in one academic year to prepare to fight with us for the cause.

Anyone interested in expanding their knowledge base by taking more classes with a variety of professors in one academic year to prepare to fight with us for the cause.

Important people in the California State University system are stirring the semester pot, with the intent of unifying all CSUs under a similar calendar. It seems Chancellor Charles Reed is willing to sacrifice a broad, polytechnic education for the sake of system unity. Although system unity may ease administrative tasks, it has few educational benefits, which should be Reed’s primary concern as CSU chancellor.

The message Cal Poly needs to send to Reed: "It's not broken, don't fix it." Right now, Cal Poly students are getting argued the best education in the state, and Reed wants to interfere with that.

The quarter calendar needs to stay intact for several reasons beyond just familiarity. Under the quarter system, senior citizens, students with part-time jobs, students with more than 30 credits, and part-time students have the opportunity to study more topics, which should be Reed’s primary concern as CSU chancellor.

One quarter per year, causing frustration and pride.

Don and currently, there are a variety of classes donated. Currently, there are a variety of classes.

Consequently, the switch to semesters would limit students to only a handful of classes per year, which in turn limits educational breadth. In a school that prides itself on an expansive curriculum, students allow for deeper reflection and digestion. Therefore, if students find quarter system a detriment from their liberal arts major, they should try another school.

Perhaps one with a more reputable liberal arts ranking, like UCLA — oh, wait — they’re on the quarter system too. How about UCSB? North, quarters.

Instead of detracting from our top-notch engineering program to better a lackluster liberal arts college, our university should consider other options. My suggestion? Kill two birds with one stone by joining the UC system, thus exiting Chancellor Reed’s sphere of influence.

Then all we need is enough administrative talent to bring the quality of our liberal arts programs up, as well as developing an engineering research graduate/doctorate program on par with our undergraduate programs. UC (and other PhD schools) are notorious for being distant towards the needs of their undergraduates, forcing professors to publish instead of teach. But if you can so easily rip out the quarter system in favor of semantics, why can’t you become the best engineering school in the country, and on a public school budget? All it takes is administrators with vision that reaches beyond their own zone.

Ethan Pratt is a mechanical engineering junior.

Editorial

How do you feel — should Poly go to semesters or stay with the quarter system?

opinion@mustangdaily.calpoly.edu

Get off your soapbox editor

Why has Cal Poly seemed like a page out of 1960s Alabama instead of 1960s California? (My apologies to any of you from the fine state of Alabama.) I’ve tried my best to keep quiet the past few weeks as issue after issue of the Mustang Daily has been filled with censored ranting and raving. However, the Oct 20 conglomeration of crap compiled by Tans Simon (“It’s easy to think like a conservative”) deserves commenting upon. My complaints are not based on political views, but more a matter of stupidity. Quite frankly, that column’s headline should read, “It’s easy to think like a conservative ... and even easier to think like an idiot.”

Let’s just start with his views on socially acceptable families. “Call me old-fashioned, but I think parts fit into the right place” is very clever and subtle way of saying “BEING GAY IS WRONG.” But later, he redeems himself by saying that “every man, woman, child ... deserves a fair shake.” It’s like saying, “Yes, Mr. Johnson, we’ll hate you even though you’re a morally despicable queer.” Mr. Simon is certainly an authority on fairness and acceptance. As comedian George Carlin likes to say, “Go f— yourself.”

Next, this self-proclaimed lover of nature objects to the federal government purchasing land in order to preserve it for generations to come — “...I believe it takes away from our freedom to use the land as we feel fit.” You’re right, private sector is the way to go. In fact, I think the U.S. government should contract International Paper to manage the Redwood Forests.

Why does columnist after columnist treat that little slice of the editorial page as a dumping spot to preach from? You’re not a profligate thinker of your time — you’re a goddamn embarrassment to Cal Poly AND your Critical Thinking professor! I read the Mustang Daily for entertainment and Cal Poly news, not to become a “better person” one morning at a time. I don’t need some half-assed telling me that Jesus is going to send my liberal ass to hell every other day. If I wanted to read about God every morning, I’d go to church, not Cal Poly!

Dustin “going to hell with a Gore 2000 bumper sticker” Okada is an aeronautical engineering junior.

Quarters are best for Poly editor

I’ll let someone else argue for the merits of the quarter system (I’m sure they will), so let’s just assume that it’s superior for now. I hope that nobody is too quick to forget the antics of the same Chancellor Reed who is now proposing a unilateral semester system for the entire CSU. All by himself, his incompetent administrative abilities and desperate, ignorant comments towards our teachers caused a strike on campus just last year. And the postpone­ment of the Poly Tech for bake, which was supposed to slip through unnoticed by an atheistic student body with freshly revoked voting privileges on the matter, no doubt enraged President Baker and his cronies, Chancellor Reed. Is it any surprise that Reed is now attempting to screw with our system?

Cal Poly is the No. 4 ranked undergrad­uate engineering program in the country. That’s a real ranking, but with comparisons only to institutions without PMS. Like it or not, we are an engineering school, and part of the support for that comes from the quarter system. I understand the argument from a liberal-arts standpoint that semesters allow for deeper reflection and digestion. Therefore, if students find their quarter system a detriment from their liberal arts major, they should try another school.

Perhaps one with a more reputable liberal arts ranking, like UCLA — oh, wait — they’re on the quarter system too. How about UCSB? North, quarters.

Instead of detracting from our top-notch engineering program to better a lackluster liberal arts college, our university should consider other options. My suggestion? Kill two birds with one stone by joining the UC system, thus exiting Chancellor Reed’s sphere of influence.

Then all we need is enough administrative talent to bring the quality of our liberal arts programs up, as well as developing an engineering research graduate/doctorate program on par with our undergraduate programs. UC (and other PhD schools) are notorious for being distant towards the needs of their undergraduates, forcing professors to publish instead of teach. But if you can so easily rip out the quarter system in favor of semantics, why can’t you become the best engineering school in the country, and on a public school budget? All it takes is administrators with vision that reaches beyond their own zone.

"I made an old man cry today.

"I made an old man cry today."
Week teaches environmental smarts

By Cynthia Neff

Students can explore transportation options, endangered species and air-freshening plants during Environmental Awareness Week starting today at Cal Poly.

The second annual event includes exhibits and contests to help students appreciate their environment.

Allyson Nakasone, an EcitSlo employee, said the purpose of the week is to show students how they can become environmentally conscious. EcitSlo is organizing the student staff who will oversee the week's exhibits, contests, talks and plantings.

Daryl Winitore, publicity director for Cal Poly's Wildlife Club, said his club is planning to feature threatened animal species in San Luis Obispo County, from kangaroo rats to condors.

"There are opportunities to learn about ecology no matter what major you are," Winitore said. "You can always make a difference."

Sheila Stepham, president of the Environmental Horticulture Club, said the club's emphasis will be plants that eliminate 90 percent of pollutants in the atmosphere, making a home's air quality more safe to breathe.

Jason Luke, president of the Human Powered Vehicle Club, will show students possibilities in human-powered transportation. The club has the fastest bicycle Cal Poly has ever produced, an aerodynamic model able to accelerate up to 54 mph. Luke hopes the exhibit will "start up students' creative juices" in order to find additional routes to campus. Luke added that his club is completely different from the Electric Vehicle Club.

Neeta Mantras, a member of the Electric Vehicle Club, said: "My club is going to feature a battery-powered '79 Mazda so students can learn about the car as well as what electric vehicles are trying to accomplish."

Munro said there are still problems with the distance an electric car can travel, adding that the Mazda is only able to drive 25 miles on one battery.

Royce Chow, another club member, said with the next 10 years electric cars will become more common.

Besides the exhibits, held on Dexter Lawn today and Tuesday and in the lower University Union plaza Wednesday and Thursday, there will be either a walk or planting held each afternoon.

Brian Stark, deputy director for the SLO Land Conservancy, will lead the Stearns Creek walk on Tuesday to teach students the history and current restoration process of the creek on campus. The creek's problems date back to the 1950s due to hydraulic factors by people upstream from Cal Poly.

"SLOC are just coming in to speed up the healing process." Stark said.

SLOC Conservancy's planting of 1,000 trees will also help restore the natural environment at Cal Poly. Stark said a local grower will supply 10 trees to create a native community of trees and bushes, which grow better when they're together.

Ed Johnson, energy and utilities manager at Cal Poly, will accompany Stark to Stearns Creek and help guide a Poly Canyon hike. Johnson pushes for an increased awareness in using utilities and natural resources more efficiently.

Cal Poly's residence halls are conducting their own events to reduce material waste on campus. In addition to a canned food drive fund-raiser, students have planned a day of garbage awareness to show what is thrown away on an average day and what can be recycled.

Justin Price, coordinator and student director for Fremont Hall, predicts that the majority of garbage will be recyclable.

Campus Dining is also going to participate in a food audit that will look at 152 discarded trees from the Lighthouse to determine food waste. According to the amount of waste, Campus Dining will plan menus. According to Campus Dining assistant director Mike Veith, past tests have indicated room for improvement, but he was not aware of what changes would take place to reduce food waste.

VOLLEYBALL

continued from page 8

trialed 2-1 in the second game when the team scored 14 unanswered points, winning 15-2. The team dominated the third game as well, finishing off the Aggies, 15-5. The team scored 14 unanswered points, and Jennifer Harris added 18 assists in a losing cause.

The victory was the team's sixth in a row and kept the Mustangs in the thick of the Big West title race.

Cal Poly is currently tied for third but only a game out of first place.

"Our progression as a team has been good so far this year," Schick said. "The more time we spend together, the more efficient we become." Cal Poly plays away next week at UC Santa Barbara on Thursday and Boise State on Saturday.

MUSTANGS LOSE 31-24

The Cal Poly football team hit the end of the road Saturday, losing their third consecutive road game to UC Davis and stretching their road-losing streak to 11 games.

UC Davis' sophomore quarterback, J.T. O'Sullivan threw for a career high 351 yards and two touchdowns as the Aggies beat Cal Poly 31-24 in front of 9,273 fans.

Mustang quarterback Andy Jepson threw for 189 yards on 14 for 29 passing, highlighted by an 80-yard scoring completion to Tery Henry in the first quarter. Cal Poly added a field goal to get within four points of UC Davis, but the Aggies would widen their lead to 24-10 by halftime.

Adam Hering rushed in for a 10-yard score for Cal Poly midway through the third quarter, but Aggiesusher Matt Brown answered two minutes later with a three-yard touchdown of his own. Hering added one more five-yard scam run late in the fourth quarter, but the Aggies held on to their seven-point lead for the remainder of the game.

Mustang running back Craig Young rushed for 140 yards on 25 carries, putting him 142 yards shy of breaking Cal Poly's record for career rushing yards. Young could break the record at Saturday's homecoming game against Portland State.

Women’s soccer makes history, NCAAs

The Cal Poly women’s soccer team made history Sunday afternoon, and they did it in dramatic fashion.

The Mustangs won the Big West title and an automatic berth into the NCAA Tournament with a 2-1 overtime victory over the University of Pacific.

Junior midfielder Katie Kassis scored the overtime goal giving the Mustangs the automatic NCAA Tournament bid they coveted.

Cal Poly held its own destiny, needing to win both games this past weekend to win the Big West title. The team beat Long Beach State on Friday 4-1, putting the Mustangs one win away from the championship.

Call Polv was led By middle hitter Kari Uesoto, who had a match-high 12 kills. Outside hitter Melanie Hathaway had .a match-high 27 assists.

Even though the Utah State Aggies are second in the Eastern Division, they could not keep up with the Mustangs. The Aggies were led by middle hitter Denise Molman’s 11 kills and setter Lori McKnight’s 24 assists.

Although we still have a long way to go to earn respect on a constant basis, we are showing good intensity and good focus,” Cal Poly head coach Steve Schlick said. “We just need to keep it up.”

The Mustangs kept up their six-game winning streak on Saturday with a 3-2 win over Eastern Division leader University of Nevada, Reno.

Cal Poly won the first game 15-4 and only

Women’s volleyball takes two more

By Erin Crosby

The No. 20 ranked Cal Poly women’s volleyball team upset the Big West Conference record to 9-2 with efficient wins over the top two teams in the Eastern Division last weekend.

“We are having a great season so far,” freshman outside hitter Kristen O’Halloran said. “We are making very good progress.”

The Mustangs first put an end to Utah State University’s seven-game winning streak with a 3-0 win on Friday. The 15-2, 15-3, 15-7 win brought Cal Poly to 13-4 overall and was their fifth straight victory.

Cal Poly was led by middle hitter Kari DeSoto, who had a match-high 12 kills and hit .382. Outside hitter Melanie Hathaway had a match-high six digs, while setter Carly O’Halloran added 27 assists.

Even though the Utah State Aggies are second in the Eastern Division, they could not keep up with the Mustangs. The Aggies were led by middle hitter Denise Molman’s 11 kills and setter Lori McKnight’s 24 assists.

“Although we still have a long way to go to earn respect on a constant basis, we are showing good intensity and good focus,” Cal Poly head coach Steve Schlick said. “We just need to keep it up.”

The Mustangs kept up their six-game winning streak on Saturday with a 3-2 win over Eastern Division leader University of Nevada, Reno.

Cal Poly won the first game 15-4 and only

Long Beach State 1
• 4 second half goals.

Cal Poly 3
Pacific 2
• Team wins Big West Conference title.

MUSTANG DAILY STAFF REPORT

Junior midfielder Katie Kassis scored the conference title winning goal.

Minnesota beats up helpless 49ers

MINNEAPOLIS (AP) — The backup trying to rescue Minnesota’s season and revive his own checked career took several huge steps in that direction Sunday.

Yet it was much Jeff George, but Levon Hound.

Subbing for injured starter Robert Smith, Hound raced 17 times for 155 yards and a touchdown in the Vikings’ 45-16 romp over the San Francisco 49ers, who lost their third straight game for the first time since 1982.

Both teams are 3-4, but while the 49ers look lost without their starting quarterback, their boss running back and their go-to receiver, the Vikings appear rejuvenated under Hound and George, who replaced Randall Cunningham.

It wasn’t all easy for Hound, whose first-half fumble was returned 71 yards for a score. George wasn’t infallible, either. But he inherited Minnesota’s moribund offense, which had squandered six weeks.

George threw an interception in the end zone and didn’t even try chasing down Danneil Walker on his TD teams with Hound’s fumble. But he was 15-28 for 250 yards and three touchdowns, including an 80-yarder to Matthew Hatchette as the Vikings returned to their record-breaking 1998 form.

George also hit On-Carter for a 2-yard scoring strike and Andrew Jordan from 7-yard out to go with Hound’s 1-yard touchdown romp and Moe Williams’ 9-yard scoring run. Minnesota surpassed 24 points for the first time this season after not scoring fewer than 24 last year.

John Randle’s first career interception — at the 49ers 15 with just three seconds left in half — set up Gary Anderson’s 33-yard field goal which gave the Vikings a 24-13 halftime lead. Randle snuffed out a screen by Jeff Garcia, who fell to 1-3 in place of Steve Young.

Walker scored a touchdown as a nickel back for the second straight week, scooping up Hound’s fumble and rumbling 71 yards for a 10-7 San Francisco lead in the second quarter.

But Walker was burned one play later when George sent a pass over his head and into Hatchette’s hands for an 80-yard touchdown, the second-longest of George’s 10-year career. That gave the Vikings a lead they would never relinquish.

Sports Trivia

Yesterday’s Answer:

Jerry Sloan was the Chicago Bull whose No. 4 was retired.

Congrats Jacob Christensen!

Today’s Question:

Which former Cleveland Indian was the first to hit home runs from both sides of the plate in the same inning?
