Marrow drive draws minority student donors

By Victoria Walsh
MUSTANG DAILY STAFF WRITER

More than 50 minority students donated blood for Lambda Phi Epsilon's bone marrow typing drive on Saturday.

President Eric Garcia said he was pleased with the student turnout.

"For it being a one-day event, I was impressed by how many students came," Garcia said.

Trace Ednacot, a graduate student studying public health at San Jose State University, coordinated the drive with the Asian fraternity. The fraternity worked with the Asian American Honor Program, its national philanthropy.

Registering bone marrow takes about five minutes, Ednacot said. First, a person fills out a form that includes the results from the bone marrow test. That information is put into a national registry where the type is then matched with someone needing a transplant.

"A person with leukemia in Florida can be matched with someone in California," Ednacot said.

Bone marrow is hardwork, meaning only people of the same ethnicity can be matched properly.

"We're trying to diversify the national registry by being here," Ednacot said. "Of the 3 million Caucasians in the registry, there are only 122,000 minorities. But that's better than 10 years ago when there was only 122,000 minorities registered. A Chinese-American has about a 7 percent chance to find a match.

Political science freshman Benji Yes donated his blood to help save a life.

"I was curious about the process and realized that just by getting my blood typed, I could save a life," Yes said.

Laboratory assistant Lynda Burroughs has volunteered at the fraternity's bone marrow drive for two years.

"The Asian community needs more awareness of its needs," Burroughs said. "A lot of people don't see MARROW, page 2

Stay between the lines

By Monica McHugh
MUSTANG DAILY STAFF WRITER

Curiosity was blooming at the fourth annual spring plant sale at the Mission Plaza with the driftwood and driftwood sculptures all around. Despite the Friday and Saturday rain, there were reports of heavy foot traffic.

"People, who were stocking up from all over the county attended Saturday's event to see the efforts of the environmental and educational program," said Tom Ettroth, arboretum director and environmental studies professor.

Visitors were invited to take a 45-minute tour of Cal Poly's 5-acre Leaning Pine Arboretum, a large garden that displays plants from all over the world. The tour explained the various sections of the arboretum, including those dedicated to Australian, Mediterranean, South African and Californian plants.

Students use the facility to study plant identification, and designers use it for research ideas.

"We wanted to introduce our visitors to the arboretum so they could see what we have and to get some planting ideas to take home with them," Ettroth said.

Ettroth said he expected about 80 percent of the visitors to have never been to the arboretum and probably didn't even know it existed.

The tour also highlighted plants for sale. Hardy flowering perennials, California and Mediterranean natives, succulents, herbs, landscape shrubs and ornamental grasses were sold in 4-inch pots for $2 each. Most of the plants are produced by the award-winning Associated Landscape Contractors of America student team and are maintained by paid student employees.

"Giving tours of the arboretum and having a plant sale gave community members a good chance to come see what students are doing," landscape architecture junior Jenell Lehmann said.

The most popular plant for sale, Ettroth said, was Verbena Lilacina called Verbena Lilacina De La Mina. "It's a red-hot seller," Ettroth said. "People like it because it flows..." see PLANT, page 2

Debate team best in West

By Victoria Walsh
MUSTANG DAILY STAFF WRITER

The Cal Poly debate team ended its season as the No. 1-ranked team in the western region, marking its second championship in four years. The team's success was good for a top-25 finish in national standings.

Among 170 universities, Cal Poly was ranked No. 24, its highest ranking since 1986.

The team brought home 14 team awards and 22 individual speaking awards, including five tournament championships and four division-top-speaker awards.

Debate team coach Terry Winebrenner attributed the team's successes to the differences in coaching between Cal Poly and other universities.

"The coaches there are more concerned about learning from debating than winning," Winebrenner said. "It's a very low-pressure environment. Given the right amount of time and effort, anyone can be successful."

The 13-tournament season lasts from September through March, which includes traveling to matches about every other weekend.

"It's hard to balance school and the team, but the coaches and members make it so easy to participate in," team member Andrea Derrick said. "It was such an awesome experience; I learned so much already and it's only been one year."

The team of 21 students meets about two times a week to research and practice debating its one topic for the entire season.

"The topics have to be complex enough so that every team can debate it for about six months," Winebrenner said. "This year's topic was 'economic sanctions put on rogue states,' to give a concise version of it."

Because the team is an Instructionally Related Activity and is connected to the curriculum, the university takes care of all costs.

"It's such an inexpensive experience," Derrick said. "Other schools we met had to pay for everything - hotels and food - but all that stuff was completely covered by (Cal Poly)."

Debate teams don't have divisions based on school size or location. Every team meets with every other school in its region.

"We can debate against Pepperdine in one meet and then turn around and debate against a community college from Sacramento," Winebrenner said.

Students can compete in two divisions: the novice division for first-year competitors, and the open division for those who have debated for more than a year. see DEBATE, page 2
DEBATE
continued from page 1

“Debating is fun socially, and it’s also mentally challenging,” team member Kevin Moore said. “It was one of the most educational experiences I’ve had at Cal Poly.”

Since the Cal Poly team has achieved recognition, the coaches have the leverage to recruit students from other schools.

Team member Jim Zhang was one of the members recruited to Cal Poly.

“I knew some of the coaches, and they kept telling me about the team and basically recruited me here,” Zhang said.

To get involved with the debate team, check out its Web site at www.calpoly.edu/~spe/debate.

Business freshman Angie Wong winses as phlebotomist Lynda Burroughs takes a blood sample to test her bone marrow type.

Cal Poly groundkeeper maintains classes, finds peace

By Christine Powell
MUSTANG DAILY STAFF WRITER

Jodee Bennett is on campus all day, but she spends the bulk of her time out of the classrooms. Bennett is a 17-year employee of Cal Poly's landscape services. She is a groundkeeper, as well as an environmental horticulture science senior. She takes one class each quarter.

"I've got eight or nine more classes — which to some people is just a couple quarters, but for me is a couple years — at least," she said.

Bennett works a 40-hour week maintaining athletic fields and irrigation, picking up trash and keeping Cal Poly beautiful. She started in college while attending junior college in San Diego, and has been working at Cal Poly for 17 years.

She grew up in Burbank, but says that the pace of life in San Luis Obispo suits her better.

Bennett likes working on the same campus where she attends school. She considers Cal Poly faculty and students to be "people who are not only on the cutting-edge of technology, but who are also looking at the world to keep it beautiful.

A typical day for Bennett consists of arriving on campus at 7 a.m. and maintaining what needs to be done first. She attends one hour of class, then picks up trash and mows recreational fields. She works until 3 p.m., and spends a step aerobics class three times a week.

In her free time, Bennett cares for her dog and cat, maintains her own garden and hobbies. She is a member of ECOLEO, and worked with the SLO Stewards Program in 1995 and 1996, where she helped with tree planting and creek restoration.

In conjunction with ECOLEO, Bennett is in the process of becoming a natural history docent. This entails leading walks throughout city-owned areas such as Laguna Lake, Bishop's Peak and Reservoir Canyon.

"When I read in the paper that they offered this I said, "Oh that's what I want to do!"

"Due to serious budget cuts in the early '90s, the groundkeeping crew at Cal Poly has been working extra hard to keep up with the job.

"It's all really hard to work with less people," Bennett said. She spoke highly of her fellow employees.

"Our entire crew is really educated, about one-half to one-third have college degrees.

"When asked what she'll be doing in 3 to 5 years, Bennett's eyes lit up. She laughingly replied that she would continue with her work, "hopefully with a degree." She recently applied for the position of working lead.

"I love San Luis Obispo. I chose to make it my home years ago, and I haven't changed my mind. When I graduate, my ambition isn't to move on so much as to better my own knowledge."

The voice of the sea

Lounging on the sandy beaches and soaking in the sun's rays, we rarely contemplate the billions of organisms just under the surface of the waves.

Beneath the froth are living, breathing and dying organisms that we may never be aware of, yet they are incredibly aware of us. Earth is affectionately referred to as "the water planet" because it is the actions of the land dwellers that rule the fate of the sea.

In our society we have a misconception that we can blame the big, bad industries for the deplorable amount of pollution in our waters; however, it is the individuals, including you and I, who are the true culprits. Contrary to popular belief, most ocean pollution is caused by contaminated runoff from yards, parking lots and roads, not industries.

It is hard to imagine that the oil from your personal automobile or lawn mower may someday end up poisoning a young seal or orca. Statistics fall on deaf ears, and it is easy to see why. For the average college student, the ocean is a place of relaxation. But once we begin to understand the ramifications of our actions, we cannot perceive the same leisurely atmosphere.

Beneath foamy waves that crash and tumble reside 60 percent of our earth's species.

If we were to peer beneath the frothy surface, we would be confronted by another world. Right here on our California coast, reefs teem with color and life, starfish hover over the rolling sands and purple urchins waltz silently across the coral.

How can we fight ignorance of our actions? Educating ourselves to the dangers we pose in our everyday lives is the first step. T.S. Elliot said, "the sea has many voices." Will you listen?

Thanks, MTV, for my identity as a woman

I have often wondered what makes two individuals come together to share life's experiences as a couple. There seems to be certain people who are always dating some new Mr. or Miss Wonderful, and others who seem to be perpetually looking. I happen to be of the latter group because I am really picky, or perhaps I am intimidating or don't flirt enough. My favorite theory about my desirability is that I am the type of person that men don't usually want to date, but I have qualities that would make a good girlfriend.

Then my eyes were opened to the reality of the situation. I was watching MTV — the media that is the voice of our generation, right? I noticed that the women depicted on this channel had certain qualities. For example, I observed that most of the women featured in MTV were quite thin with large breasts and sultry legs, usually wearing bathing suits or other articles of clothing that did not require a good deal of fabric. It was interesting to note that even the female artists had these qualities and were clothed in a similar manner. One would think that their talents and success would make them desirable and attractive, but it seemed that even they too tended to have a figure as stated above and to display it in rather modest fashion.

It seems that my theories had been completely off-base. I thought to be attractive, a woman must be loving, generous, understanding — qualities that in general define a likable person — that I would make a desirable companion. But, I was wrong. It seems that all I need is a tight body and some outfits that require less than an eight of a yard of fabric (especially if it's shiny or take leather), and I will have the male population at my disposal.

Since observing the proper role of our society's women on MTV, I have recognized that I need to make some drastic changes in my lifestyle if I am ever going to function properly as a female in this country. So I will drop out of school to devote my time to the gym and the tanning salon. I will change my name to Mariah, after my new idol, and I will begin looking for some rich young entertainment industry guy (I also learned on MTV that excessive wealth is desirable). Perhaps some young man will find me attractive and let me be used and abased by him for a few months. Maybe we will even get married; perhaps, I'll even get pregnant. Then, through the miracle of childbirth, my hips and bottom will spread, and he'll dicker for me some other young college dropout.

Oh, what a glorious life it will be! I just hope that young girls reach this conclusion before they reach the ripe old age of 21 like me. Hopefully, somewhere in their teens, these young American girls can realize that they have a potential as an American woman.

Editorial

Should faculty and campus officials comment on important issues? opinion@mustangdaily.calpoly.edu

A man convicted for openly masturbating in a men's restroom at El Chorro Regional Park should not hold a position of importance at Cal Poly. Carl Brown, 55, is awaiting a legal decision on his April 14 arrest at El Chorro. If the recently appointed acting director of the University Center for Teacher Education is convicted, Brown must resign and save the university further embarrassment.

Since Brown's arrest, several faculty members have been waiting for Mustang Daily to write the story. Faculty members don't want a man convicted of indecent exposure and lewd behavior in public representing them. That's understandable.

When UCTE representatives and Provost and Vice President of Academic Affairs Paul Zingg refuse comment on this important incident that directly affects them, that is disgraceful.

The following is a list of the people who should have, but refused to, comment or provide information in the story that Mustang Daily ran Friday: Zingg's office, UCTE, the district attorney's office and the San Luis Obispo County Superior Court.

Both the Superior Court and the district attorney's office don't have any record of charges filed. This is odd for a case more than two weeks-old, except in San Luis Obispo, where continuance and discontinuation run rampant in our county offices (but that's another editorial).

The real problem is with Zingg and UCTE representatives.

Take a stand. If UCTE faculty members don't want to work with others who are arrested for masturbating in a public bathroom, they should say something. They don't think Brown is the type of person who would do that, say that.

Stop cowardly hiding behind "no comment." Rather than conforming to how others tell you to behave, be your own person. You have an opinion on an important event that directly affects you, yet you say nothing.

Does Zingg condone teachers masturbating in public? Does his office have a policy on teachers who are arrested? No comment. However the Brown case is resolved, UCTE and Zingg have no right to comment. You had your chance to express your dismay and did nothing.

In a campus environment, students are constantly looking for leaders and people who stand up for what they believe. If they are looking to Zingg and UCTE representatives, they should look elsewhere. We are.

Editorials are the voice of Mustang Daily.

Letter to the editor

Canceling class after five weeks is unacceptable

Editor, walking frantically toward the science hall, my mind nervously summarizes all the materials engineering facts I was able to cram in during the past few days. But exhaust fills my nose and butterflies circle my stomach as I mentally prepare myself for the midterms ahead. However, nothing could have prepared me for what I found upon entering my class this morning.

Two unfamiliar professors were passing out the midterms, prompting me to question the person next to me as to their presence. I learned that this class had just been canceled, and we were being allowed to either drop the class with no penalty or crash the 2 a.m. class on Monday. Cancelling five weeks into the quarter, this would make anyone restless, but the real problem here is that this is the second time this quarter I have had to deal with a canceled MATE 210, materials engineering, class.

I was not exactly a little angry when they first canceled the class (along with another of the four total sections), but I was able to crash another section without too much difficulty. Now, halfway through the quarter, I must deal with this again. Call me irrational, but this isn't acceptable.

I understand this happening on occasion, but after dealing with two cancelled sections earlier and attending class every day for five weeks, I should not be faced with this again. I would like a rational explanation as to why this has happened, and not just "unforeseen circumstances." This is a lame excuse; if it had used it halfway through the quarter and not shown up to class, I would have left with either an F or an incomplete. I would like to hold our administration and the materials department responsible for their actions because I have always been taught to do. Therefore, administration, materials and the professors who hang us all out to dry, you have earned an F in my grade book.

Suzannah Weiflen is a general engineering freshman.
'Frequency' promises touching story, delivers sci-fi drama

By Kara Knutson
MUSTANG DAILY STAFF WRITER

"Primal Fear" and "Fallen" director Gregory Hoblit makes his third directorial appearance with his new science fiction thriller "Frequency." The film promises much, but fails to deliver. What starts as an original and touching story about a son and dead father communicating with each other through time and space quickly turns into a formulaic and predictable film.

In the opening scenes we meet Frank Sullivan (Dennis Quaid), a risk-taking firefighter, and his family, wife Julia and 6-year-old son, John.

Then Hoblit cuts to present day. John Sullivan (Jim Caviezel) is a 16-year-old cop in Queens, NY. His dad died when he was six and all of his life John has longed to talk with him again. On the night before the thirtieth anniversary of his death, John pulls out his dad’s old ham radio and begins to play with it. He finds himself talking to his dead father, who is on the same radio in the same house, just three decades earlier.

We think the film will be about John and Frank’s chance to build the relationship they never had and to express each other’s love for the other, but Hoblit takes it in an entirely different direction. Unfortunately, the new direction is not a unique one.

The film addresses the trite subject of changing the course of history. Sullivan prevents his father from dying, and in the process, sets in motion the murder of his mother. It’s intended to be a story about a father and son and their unique chance to communicate between time and space. Instead, it is about a father and son who try to beat fate and correct the history they altered.

Unfortunately, the new direction is not a unique one.

To its credit, the film used some interesting special effects. However, the acting and the special effects are not enough to save this film. Hoblit succumbs to the formulistic, happy-ever-after Hollywood ending. It doesn’t fit with the rest of the film, and the viewers are left disappointed.

Hoblit would have done better keeping the focus on the relationship between the father and son.
FOOTBALL

continued from page 8

got hurt," said junior defensive lineman Billy Beltz. "We probably could have gone a lot longer."

Other than Washington's injury, the rest of the game went smoothly. The scrimmage lasted for three quarters and ended with a Gold victory, 21-12.

There were several standout in the game. Redshirt freshman Chris Canales had an excellent game, catching four passes for 84 yards and a touchdown. Fellow receiver Adam Herzing also played well, making four receptions for 50 yards.

Joe Martinez, a sophomore taking over for Orozco at middle linebacker, showed good strength and leadership. "I think Joe's going to do a great job taking over for Baldy," Beltz said.

Baldy knows he will have to fill Orozco's shoes both on and off the field. "I know that's a big task," Martinez said. "But I'm just doing my best to be a good leader." 

STERLING

continued from page 8

Bonds, Kent, Snow, Armando "future star" Rios, Ramon "occasional starter" Martinez, and Doug Mirahelli. Joe Martine:, a sophomore taking over for Orozco, showed good strength and leadership. "I think everyone's kind of looking toward Seth to lead the offense," Beltz said. "Defensively, Steve Prejean and Vic Greco are the seniors who lead the team."

The team as a whole played well together, and leaders of both the offense and defense said they felt a definite chemistry forming between the players.

The Giants need consistency. Their pitching has not been as good as expected. Baker can start the Mustangs heading into the scrimmage, said he loved being able to have the quarterbacks a chance to hone their passing game without fear of being sacked.

Butford, a transfer student from Idaho State, said he loved being able to pass the ball so much. He completed 15 of 24 passes for 219 yards, including two touchdown passes.

"That's my job, to give it to the other guys," Butford said. "I'd rather throw (the football) than anything, then I get to let the other guys run."

While both Cooper and Butford are both capable of taking over the reins at starting quarterback, Butford is the early favorite to take on team leadership.

BASEBALL

continued from page 8

got to keep throwing for strikes."

The Mustangs were driving Riverside pitching hard all weekend, especially in Sunday's first game. They scored seven runs on five hits in the bottom of the fifth inning. The Mustangs sent 13 men to the plate in the inning. Kyle Allbright drove in two runs with a single, and Kevin Tillman and Jason Barringer picked up RBIs in the bottom of the game.

"I was just seeing the ball really well, getting ahead in the count and getting good pitches to hit," Barringer said. "The pitcher was pitching inside, so on my second at bat I moved off the plate and got a pitch inside and turned on it."

Cal Poly completed the three-game sweep with another dominant pitching performance. Jared Blasdell won his fourth game for the Mustangs, and Cal Poly cruised to an 8-0 win.

Barringer's strong hitting continued in the final game of the series, hitting his fifth home run of the season. Steve Wood also homered for the Mustangs.

"We got to keep going. We still have a shot (at an NCAA bid). This is definitely getting us going into Sacramento (this weekend) and trying to sweep them."

Jason Barringer outfielder

"We got to keep going. We still have a shot (at an NCAA bid)."

Barringer said. "This is definitely getting us going into Sacramento (this weekend) and trying to sweep them."

SACRAMENTO avoids sweep

SACRAMENTO (AP) — Shaquille O'Neal lost his shooting touch. Kobe Bryant was slowed by foul trouble. And, suddenly, the mighty Los Angeles Lakers were not invincible.

Chris Webber had 29 points and the Sacramento bench finally came alive, sparking an 18-4 run in the fourth quarter as the Kings defeated the Lakers 99-91 Sunday to stifle alive in the playoffs.

The Lakers won the first two games by comfortable margins in Los Angeles. Game 4 in the best-of-five series is Tuesday night at Sacramento.

O'Neal had 21 points and 17 rebounds, but went 9-22 from the field and 5-14-14 from the foul line.

Bryant, who picked up his fourth foul early in the third period, had 16 of his 33 points in the fourth quarter.

Pudding, Stojakovic had 19 points and Tony Delk added 11 as the Kings' self-proclaimed "Bench M.D.s" which had little success in the first two games of the series, outscored the Lakers' reserves 34-11.

Dell played most of the fourth quarter instead of Jason Williams, who scored 10 points but made several poor passes early in the game.

The Kings still face a daunting task as they try to upset the best team in the NBA this season. Only 12 teams have rallied to win a series after trailing 2-0, and none since the Houston Rockets in 1995.

The scenario is familiar for the Lakers. In each of the previous three seasons, Los Angeles has won the first two games of its first-round series, then lost Game 3 and wrapped up the series in four games.

Sacramento opened the fourth quarter with a 7-1 run, taking its first lead of the game on a 3-pointer by Stojakovic with 9:43 remaining after Dell twice kept the possession alive with offensive rebounds.

O'Neal's dunk and two baskets by Bryant gave Los Angeles a 78-73 lead in the first half. The Kings replied with a 14-0 run that included another 3-pointer by Stojakovic, a windmill dunk by Webber and Blake Dozier's block of a layup by O'Neal.

After Glen Rice scored for Los Angeles to end the run, Dell and Webber scored baskets to give Sacramento a 91-82 lead with 3:18 remaining.

Leading 51-46 at halftime, the Lakers used a 9-0 run - including a 360-degree spinning dunk by Bryant and Rice's jumper - to take a 64-54 lead early in the third period. The Kings pulled within a point late in the period, but trailed 71-66 going into the fourth quarter.

The Kings missed 11 of their first 13 shots and fell behind 15-7 midway through the first period. A three-point play by Rice gave the Lakers a 27-17 lead late in the first quarter.

The Kings hit eight of their next 11 shots, responding with a 13-3 run and tying the game at 32-32 on a jumper by Stojakovic, but the Lakers answered with a 9-0 run.

A three-point play by O'Neal, following a turnover by Williams on an errant behind-the-back pass, made it 44-36. The Lakers led by O'Neal's 15 points and 12 rebounds, held a five-point halftime lead.
Mustangs snag weekend series from Riverside

By Matt Sterling
MUSTANG DAILY STAFF WRITER

The Cal Poly baseball team had been doing it with timely hitting. Now it's getting it done with strong pitching.

Behind dominant throwing performances, the Mustangs kept their chances for an NCAA bid alive with a sweep of UC Riverside this weekend at San Luis Obispo Stadium. Joe Smith pitched his third complete game of the season on Saturday, striking out 13 batters and scattering six hits and one run on route to a 3-1 Mustang win. The staff ace picked up his sixth win for Cal Poly, walking none and allowing only six baserunners.

Tyler Fitch pitched a gem in the first game of Sunday's doubleheader, no-hitting the Highlanders for six and one-third innings. He ended up allowing only two hits while striking out eight as he faced one batter over the minimum through the first five innings. Cal Poly gave Fitch great run support for the 8-4 win.

Fitch said the no-hitter was in his mind, but he was focusing on getting outs.

"I saw the no-hitter, but you just have to go out and do the same thing — throw hard," he said. "You've just got to focus on netting outs.

Mustangs shined in many of the positions left vacant by graduated stars Craig Young, sophomore, suffering a devastating knee injury that will sideline him for the extent of the damage to Washington's knee, and it is still possible he may heal in time for next season.Head coach Larry Welsh said.

It's really unfortunate that Dom's injury suffered Saturday afternoon may keep him on the bench in the fall. The extent of the damage to Washington's knee, and it is still possible he may heal in time for next season.

Young's replacement may need his own replacement after knee injury at the Green vs. Gold scrimmage.

By Katherine Hays
MUSTANG DAILY STAFF WRITER

Cal Poly's Green vs. Gold scrimmage proved to be bittersweet for the Mustangs. The young, up-and-coming Mustangs shined in many of the positions left vacant by graduated stars Craig Young (running back) and Oshadi Ootoso (linebacker). But Cal Poly may have lost a key replacement in its backfield.

Dominic Washington, a redshirt sophomore, suffered a devastating knee injury that will sideline him indefinitely. Washington spent most of last season in the shadow of Cal Poly's all-time leading scorer Young. This season was to be his opportunity to shine in the spotlight, but the injury suffered Saturday afternoon may well keep him on the bench in the fall.

Team doctors have yet to determine the extent of the damage to Washington's knee, and it is still possible he may heal in time for next season.

Head coach Larry Welsh is optimistic that Washington may be able to recover in time.

"Hopefully, it's not as bad as we think it might be," Welsh said. Washington's injury was felt by the whole team, and it changed the pace of the game, Welsh added.

"It's really unfortunate that Dom's injury suffered Saturday afternoon may keep him on the bench in the fall. The extent of the damage to Washington's knee, and it is still possible he may heal in time for next season."

Injury mars end of spring football

Young's replacement may need his own replacement after knee injury at the Green vs. Gold scrimmage.

By Matt Sterling
MUSTANG DAILY STAFF WRITER

The Cal Poly foot­ball team may have lost its replacement for Craig Young when running back Dominic Washington injured his knee at the Green vs. Gold scrimmage Saturday.

The Mustangs’ season was to be his opportunity to shine in the spotlight, but the injury suffered Saturday afternoon may well keep him on the bench in the fall.

Team doctors have yet to determine the extent of the damage to Washington's knee, and it is still possible he may heal in time for next season.

Head coach Larry Welsh is optimistic that Washington may be able to recover in time.

"Hopefully, it's not as bad as we think it might be," Welsh said. Washington's injury was felt by the whole team, and it changed the pace of the game, Welsh added.

"It's really unfortunate that Dom's injury suffered Saturday afternoon may keep him on the bench in the fall. The extent of the damage to Washington's knee, and it is still possible he may heal in time for next season."

Sports Trivia

Yesterday's Answer:
Chuck Knox was the first NFL head coach to win division titles with three different franchises.

No one submitted the correct answer.

Today's Question:
Who was the first boxer to defeat Muhammed Ali?
