Halloween parties: not in Isla Vista

By Megan Shearn
MUSTANG DAILY STAFF WRITER

The University of California, Santa Barbara says the Halloween party in Isla Vista is over. Out-of-town students could face serious consequences if they plan to visit Isla Vista during the parties.

Isla Vista, the college community of Santa Barbara, is notorious for parties, especially on Halloween. The "No-Tolerance Policy," put in place in 1999, will be in effect again this year.

The Santa Barbara Sheriff's Office will send violators directly to jail, without collecting $25.

"We've found that it's been a historical pattern that the out-of-towners are the ones that get in trouble," said Carolyn Butler, who works in UCSB's Office of Student Life.

She said there are two reasons why this crackdown is needed. Number one, she said, is that it's not OK to come and party in a town that is not yours. Number two, it's for safety.

"People fall off the cliff because they don't know the area real well," she said. "Everything is left messy and there is an increase in sexual assault."

Since the 1980s, Isla Vista has gained the reputation of a town that threw a great Halloween party. Thousands of people would crowd into the small town for a glimpse or even to participate in the party fun. But Butler said the reputation has diminished.

"We don't live up to that anymore," she said. "It's meant to be a local event."

The normal number of police officers will patrol the area from Saturday, Oct. 28 through Thursday. Not a day will go without.

Officers will arrest those who violate the law without giving warnings.

"It could result in a citation all the way up to an arrest," she said. "The deputies will have a lack of flexibility."

There will be strict fines if a person is convicted. For example, a public intoxication penalty is up to six months in county jail or a fine of up to $1,000. Under age 21, there is an automatic license suspension as well.

The courts notice an ordinance will be enforced. The ordinance prohibits any live or pre-recorded amplified music, that can be heard down the street.

Those who are arrested can be legally held for 48 hours without being processed, and juveniles can be held for 12 hours before being released, according to a flyer that the office of Student Life at UCSB is distributing.

Parking lots will be closed and parking citations will be issued. Fines start at $25. Vehicles with tires will be towed at the owner's expense.

Butler warned that the country is not going to be lenient Halloween weekend. "Come another weekend," she said.
DEBATE
continued from page 1

more housing for students.
"The students would not have to
infiltrate the neighborhoods," Romero
said. "They can live more of their own
affordable housing and nurture job oppor-
tunities available to keep college gradu-
ates in the community.

Settle said he wants to develop a
research park. With this, he said that
young business owners would be able to
take advantage of the resources avail-
able within the corporate sector as well
as the public sector in the community.

The issue of campus safety brought
about the subject of busi. Settle said
he wants the city and the university
to cooperate to subsidize the free bus-
ning of students throughout the campus
and on campus. He said that busi
would continue to remain free and be paid for by
foundations and interest from in-

Bush, Cheney aren't brightest stars in the sky

You know what word I hate? Flip-flop. Bush and Cheney support a local Al Gore the flip-flopping. Let's get realistic. Al Gore, like any human being, changes over time. Whether you want to call it growing, evolving, or social Darwinism, people change. Attitudes, beliefs and values all evolve over time. God help you if you are the same man or woman 10 years from now. Right-wing pundits and the motley collection heads (both liberal and conservative) of Washington love to catch someone in a slip up. Over a decade ago, Gore had a slightly more conservative position on abortion. Was he anti-choice then? No. Is he anti-choice now? No. His position has only changed over time, but he has been, and always will be, pro-choice. 

Eddie Drake

Eddie Drake is a political science senior.

The Backpack Advantage: In a panic stop, it helps you over your handlebars and then provides padding to prevent injury.

School vouchers create choices

Where I went to high school, 99 percent of graduates went immediately on to college. Many went to Harvard, Stanford and UCLA. At the time, I thought my high school was normal. My educational test scores at my high school were second among public high schools in California. I wish every child could have the educational opportunities I had, and I believe school vouchers could help to achieve this.

California's school voucher initiative, Proposition 38, would offer parents in California a $4,000 voucher to send their children to the school they think is best. The people who would benefit the most from this initiative are the underprivileged. Many parents who live in low-income neighborhoods are stacked sending their children to substandard public schools. They have no choice—the system traps them.

Their children are put at even more of a disadvantage when they have to compete with children who went to good schools when it comes time to apply for college or jobs. This simply is not right. How can we have equality when the quality of a child's education depends on his or her zip code?

Part of what makes America so great is choice, but the bureaucrats in the education system are taking the choices away from parents. These bureaucrats and the California Teachers Association feel threatened, since the voucher system forces competition.

Whether or not you are in favor of Proposition 38, I am sure you would agree that something needs to be done about our school system. California ranks at the bottom of the nation in reading and math, and over 30 percent of its ninth graders never graduate from high school. Clearly the current methods are not working.

The voucher idea has been around for a while, but the education system remains from like a deer in headlights. If the association would be innovative, and think of ways to improve itself, the voucher system wouldn't be needed. For example, mandatory open enrollment in California would put us one step closer to giving parents choices.

In 1993, a similar voucher initiative (Proposition 174) failed because the California Teachers Association said it all needed was more money and that vouchers weren't the solution. Since then, the state's level of spending per pupil has risen almost 60 percent.

The association said that the money would help narrow the educational performance gap between minorities and white students. Clearly this has not occurred, since schools with mostly minority students still have much lower test scores and performance.

In the limited voucher experiments that have occurred so far in the United States, the low-income students benefited most. Opponents of Proposition 38 say that vouchers will destroy public schools. But public schools near the experimental voucher schools have been forced to compete for students, and as a result have improved instruction, offering more individual improvement and expanding their services.

In every voucher experiment, parents have reported satisfaction with the results. They have finally been granted the power to get their children out of schools that are not providing education.

Now the California Teachers Association and democrats are spending millions to defeat Proposition 38. Then they will continue to blame education problems on lack of funding and just continue their destructive monopoly, while the educational gap between the poor and the rich keeps growing.

Mistakes aren't the time we took the power out of the hands of the incompetent unions and granted it to the people. If we can pass Proposition 38, we can finally give low-income parents what they deserve: choices.

By Jayson Rowley
MUSTANG DAILY STAFF WRITER

Kite flying, kayaking, collectibles, carnival rides and, of course, clam chowder were some of the main attractions at this year's Pismo Beach Clam Festival.

The sun was out all weekend as locals and tourists enjoyed the fresh ocean breeze, a little outdoor music and shopping in what is usually the Pismo pier parking lot. The parking lot was fenced off and a fee of $3 was required to enter the vending area. Vendors come from all over to take part in the Clam Festival.

The vending area offered quite a diverse selection of items. Food, trinkets, pottery, stained glass, tapestries, water fountains, artwork and clothing of all types were within reach.

"The food is really good," said Cuesta freshman Sara Kramer. "It’s a good way to bring the community together."

Right next to the vending area in the dirt parking lot was the carnival. Kids of all ages waited in line to ride the typical carnival rides and scream their heads off. The carnival was complete with all the trimmings with clowns, jugglers, balloonists and face painting for kids.

One of the most anticipated events of the weekend was the Clam Chowder Cook-Off. This event featured the original recipes from restaurant chefs from all over the area. The reason the cook-off attracts so many people is that the public gets to taste each clam chowder and decide who has the best recipe. The winner this year was the clam chowder from Rosa's Ristorante Italiano created by Rick Scott. As a matter of fact, Scott's recipe won three awards at the competition — Best in Pismo, People's Choice and Best Presentation.

"It’s nice to win," Scott said. "It’s good to see traditional clam chowder pushed to a new level."

There was action in the water as well, as kayakers tested their skills against the powerful Pismo Beach waves. Many of the competitors had a little trouble paddling out past the surf, but the contest was fun to watch. Just down the beach on the north side of the pier was the kite-flying exhibition and contest. People gathered around to watch kites soar into the air. The ocean breeze provided perfect kite-flying conditions.

Perhaps the funniest part of the weekend was the clam dig. About 50 people children and adults, dug and rummaged through the sand in search of buried clams. They used their hands and feet to dig, and were covered in sand by the time the contest was over.

The Clam Festival is a perfect place for families to enjoy a day at the beach, or for friends to catch up over a steaming bowl of chowder. There was something for everyone to enjoy, and the perfect weather was enough to make the visitors never want to leave.

"It’s been pretty busy," said Kevin Davis, a recreation administration junior. "It brings a lot of excitement and life into Pismo."
East-West Music Fest to raise funds for land

By Kara Knutson

The process to purchasing the land started two years ago when Friends of the Ranch Land decided to buy the East-West Ranch from the current owners, Hong Kong Developers.

"Friends of the Ranch Land is a local organization whose main interest is keeping open space," Shea said. "Before the ALC (American Land Conservancy) came in to help us buy this property, Friends of the Ranch Land was trying to figure out what to do."

The American Land Conservancy is a San Francisco-based non-profit organization whose main interest is the preservation of land and water in the United States. They joined Cambria in the spring of 1998 to help save the ranch.

In September 1999, the ALC put down a $500,000 nonrefundable payment toward the purchase of the ranch. The total cost of the land is actually $11.1 million. The ALC has been lobbying for money for the past year. Through government grants, trust funds and a number of county, state and federal monies, $9 million has been allocated toward the purchase of the ranch.

"We still need $9 million, provided the community of Cambria can raise this money," Shea said.

Sponsored by Friends of the Ranch Land, tickets to the music fest cost $15 per person and children 13 and under are free when accompanied by an adult. Tickets are sold at Boo Boo Records, the Cambria Chamber of Commerce, Natural Renaissance in Cambria, Cooloola Bookstore in Morro Bay, Cal Poly Mustangs ticket office and at the door the night of the concert.
Costume stores such as Second Time Around and Costume Capers provide a variety of masks and ensembles for the costume hunter.

For example, the most popular female costume is a French maid. But I have noticed that the more unique a costume is, the more they like it. There have also been a lot of couples coming in and dressing as one theme, such as a priest and a school girl.

Business seniors Mike Lederman and Matt Opperman and Mike Peterson, a social science senior, are dressing up as the Grinch.

"I was going through my friend's costume bin and found these real Girl Scout uniforms," Lederman said. "I thought it would definitely be a funny costume idea." They are wearing small girl's printed Girl Scout Houses. Teep 1231 given sashes with real patches, green knee-high socks and their own khaki shorts.

"We might add condoms and some different patches to the sashes to make the costumes a little more interesting," Opperman said.

Peterson added that they plan on wearing the costumes downtown to Market Bar and then to Halloween night for the two best one drink special.

Kendra Brenitz, a speech commu­nications major sopho­more, will be going to Costume Around in downtown San Diego for Halloween and getting together with her high school friends.

"My friend's dad is throwing a huge Halloween party," she said. "It's a tradition. My girlfriend and I are dressing up as cops, and our gay friends are dressing up as criminals.

Alex Lewis, an animal science sophomore, is probably just going to celebrate Halloween this weekend. She plans on dressing up for events at Tortilla Flats on Thursday and Saturday.

"I am going to be Belle from 'Beauty and the Beast' because I love that movie," Lewis said. "I have the costume on hold over at Second Time Around.

Tim Chuda, a crop science senior, wants to be Drew Barrymore from 'Charlie's Angels.' He said he is trying to convince his friends to be Lucy Liu and Cameron Diaz.

Kate Lindberg, a food science and nutrition junior, probably won't be going out on Halloween night. For parties this weekend, I am going to dress up as a flapper," she said. "I own the costume in high school, and I am wearing it again since it is so much trouble to rent one."

Lori Ellis, a food science and nutrition sophomore, and Erica Chiarelli, a business sophomore, aren't sure of their plans for Halloween, but they already have their costume.

"We are going to be lollipops because they were cheap to rent at Costume Capers," Chiarelli said.

Liberal studies junior Melissa McFerron is dressing up for Halloween parties this weekend and on Tuesday.

"I bought a full zebra costume, because I am an animal!" McFerron exclaimed.

For information on costume rentals, contact Costume Capers at 544-2173 or Second Time Around at 543-0977.
SLO Film Festival re-releases restored classics

By Ryan Huff
MUSTANG DAILY CONTRIBUTOR

They were almost lost forever, just faded memories of the silver screen. Five movies from the 1950s and 1960s that bear the likes of film legends Alfred Hitchcock, Stanley Kubrick, Audrey Hepburn and Kirk Douglas — epic just left to rot and collect dust.

But then along came film preservationists. James Katz and Robert Harris, who after two years and $70,000 of work brought life back to these classic films. Their restoration work on "Rear Window," "My Fair Lady," "Vertigo," "Spartacus" and "Lawrence of Arabia" serves as the highlight of the Eighth Annual San Luis Obispo International Film Festival.

Katz hopes generations young and old will see the restored films.

"It's the most satisfying thing about what we do — to make those movies available to generations that have never seen them before," Katz said. "Katz and Harris will be honored tonight with the King Vidor Memorial Award before an opening night gala showing of Hitchcock's 1954 classic "Rear Window.""

Georgana Davies, who in the film played "Miss Torso," alongside legends James Stewart and Grace Kelly, will be in attendance tonight at the Fremont Theatre. The other four films will play this weekend at the newly-renovated Signature Cinemas in Arroyo Grande.

The restoration team of Katz and Harris combined original movie negatives with new digital technology to create "restoration negatives" with improved audio and brighter colors. It's a lot harder to fix a film than it is to make one," said Katz, who has done both. "Rear Window" was restored to its original 35 mm negative state, while "My Fair Lady," "Vertigo," "Spartacus" and "Lawrence of Arabia" will be screened in their original 70 mm format.

"If you can analogue an Ansel Adams photograph it looks like just the cleanest thing you've ever seen," said Mary Harris, the festival's executive director. "These photographs are taken with a giant negative, instead of starting with a small negative and enlarging. With a 70 mm, you are able to capture so much more."

If you are more into destruction than restoration, a panel of pyros will talk about "Pyromania: A Look at Blowing Things Up in the Movies."

"We don't want people to feel if they're not a film major, they're not going to get anything out of it," said Mary Harris. "If you can't get into these classes, or you can't do restoration work, they can still be entertained by pyro." The panel will show clips of their work at the festival when you could watch them at home for cheaper.

"You're with 500–some other people in a theatre, you're flying in special lenses and sound equipment from Boston, you get to see it on a huge screen the way it was intended to be," Katz said. "You tell me if that's not the same as seeing it in your living room."

 Concert will welcome new piano

MUSTANG DAILY STAFF REPORT

An inaugural concert for the Performing Arts Center's newest addition will be held Oct. 30 at 8 p.m. A Steinway concert grand piano was donated by Martha Capuno, in memory of her husband, Dr. Alexander Capuno, former chairman of the Cal Poly music department.

Jon Kimura Parker, who regularly performs with the Mozart Festival will perform on the new Steinway, accompanied by additional musicians Paul Stremeyer, Michael Novak, Jennie Shumway, Jacob Kretzer and William Terrence Speller. Some of the works to be performed include a Mozart Piano Quartet in G minor, K478, Beethoven, Sonatas in F minor, Op. 57, and Dvorak. Three Slavonic Dances for Piano, from Op. 46.

Tickets are available at the PAC ticket office, with prices ranging from $15 to $35, or online at www.pacs.edu.
Stop acting like children

Editor,

Cal Poly has never been what I would call a diverse campus. But this is just childish. Cal Poly is plagued with homophobia, plain and simple. As much as people try to deny it, gay and lesbian students are treated like crap at Cal Poly every day. Perhaps this is clearest in the harassment GLBU constantly receives. GLBU (Gay, Lesbians, and Bisexuals United) is a small Cal Poly club.

We meet once a week; occasionally, we bring a guest speaker to Cal Poly or hold a social event — hardly the in-your-face, militant approach that you’d expect to inspire knee-jerk bigotry like we’ve seen recently. But somehow, Cal Poly students remain steadfastly homophobic, reacting violently to our smallest attempts to — get this! — have a club on campus. Last month, a straight Cal Poly student was attacked because he was perceived to be gay. Last year, our Homecoming banner was stolen from the University Union. Each week, every one of GLBU’s flyers is covered up or torn down within hours of our posting them. And just this weekend, someone decided to steal our sandwich board from Dexter Lawn. Tearing down flyers! Stealing sandwich boards! Are we at a university here? I have one thing to say: grow up.

And it’s not just the GLBU — real students feel the hatred behind homophobic views. You can imagine how I must have felt when I walked into my math class and saw “FAG” etched into a desk with a large arrow pointing to my desk. Homophobic actions are not a joking matter. Nor are they harmless, occasional incidents. They are actions motivated by hate, which affect real people. Can we stop the junior high antics, people? You’re in college now. Act like it.

Patrick Hoetereyer is an architecture sophomore.

Great suggestions from columnist Editor,

I appreciate that you continue to run Eddie Drake’s column and commentary. His involvement with ASI gives him credibility and his keen awareness of student concerns shows his genuine caring attitude.

Drake expressed in his column his concerns regarding how money could be better spent at Cal Poly (Oct. 12). That was just one example of Cal Poly’s expenditures in areas that do not reflect student needs and student’s best interests. These are issues we would not be aware of had the column not come out. He also reflects the frustration that many of us feel when we try “to do the right thing” by voting our opinions when Cal Poly asks us to. (Examples the request for student input on the Mustang Logo, President Baker’s request to ASI last year for the extra million for the Sports Complex. ASI voted it down and President Baker took it from a “general fund” anyway, because he could — remember that extra million was on top of the several million student funds had already contributed.) Then those opinions, suggestions and requests for feedback are ignored. It is a very frustrating process.

Those of us who would like to take a stand are rowing upstream, and we give up. This explains attendance and participation in student government and student-run organizations. We do not have the energy or any other resources to put forth. We decide that we need to put the energy we do have towards our education and get the heck out.

If you can, Eddie, keep up the great work. Your column generated great work. Your column generated some valuable discussion on campus and maybe some newbies with energy in their reserves can take some of this on.

Christina Gurchinoff is a communication senior.

Dumping isn’t vital life experience

Editor,

In response to Jennifer Hansen’s commentary (“Students should wait to be wed,” Oct. 25) I’d like to say, “I’m sorry, Jennifer.” You wonder why your friend wanted to get married so quickly without having known a life without this love. You are saddened by the fact that she has never been dumped.

Again, I am sorry that you are so sour. Not everyone needs to be dumped. Sorry, but not everyone wants to be with you. Your friend has found the special person she is meant for and after four years has decided to commit herself legally. She has one year of school left and now she gets to spend it with a person who loves her and who will be there to listen when she needs to vent. I applaud your friend for getting married when she wanted to, when she felt it was right. Getting dumped is not an experience that helps you decide who to marry. I feel that it is an experience that makes you less trusting and more distant in the next relationship. It takes a long time to open up to another person for fear of being smushed while vulnerable. Anyone who has been dumped, or even the one who dumped them, knows that it is not an experience they are proud to say they went through. I have been down that road and it is not a fun time. I spent my time alone afterward. That time alone rebound relationship, found someone who is perfect for me. I can only wish that I would have found this woman first rather than going through the junior high antics. Your friend is lucky and you should congratulate her.

Matt Arnold is a biochemistry junior.

Save open space lands in our county

Editor,

I applaud your column (Oct. 12) expressing the concern that SOAR (Measure M) would require countywide elections for any building permit, room additions, or any other such ministerial entitlement. Getting a building permit, or any other such ministerial entitlement, does not require a zoning change. Measure M requires a vote only for zoning changes of land now used for Agriculture, Open Space, Rural Land or Residential Rural to urban uses. Getting a building permit, or any other such ministerial entitlement, does not require a zoning change. Measure M contains much of the same implementation language as Napa and Ventura counties, and they do not put granting building permits, etc. on the ballot. Why not? Such issues are not zoning changes. No zoning change? No need to go on the ballot.

Do not be taken in by the pro-growth lies and scare tactics. Do not let this county lose its agriculture and open space lands. Spread is forever. You can stop it now. Vote yes on Measure M.

Jan Howell Marx is a San Luis Obispo city council member.

Calling plans require a credit check, activation fee, an annual contract and a Digital multi-network phone. Two-way messaging-enabled Digital multi-network phone required to send messages. Not available for purchase in all areas. You can only send messages when using AT&T networks and then only in certain geographic areas. Maximum message length is 150 characters, which includes the e-mail address. Billing will automatically begin on March 1, 2001, based on the AT&T Text Messaging plan you choose. Subject to terms of wireless service agreement and calling plan brochures. Nokia mail in rebate: One rebate per purchase of a Nokia 6260 Digital multi-network phone and wireless service activation with AT&T. Must remain on service from AT&T for 30 days to be eligible. Nokia provides rebate in the form of an ATM Refill Card. See Nokia mail-in coupon for full terms and conditions. Void where prohibited. Nokia mail-in rebate expires 11/12/00.
like that," he said. McCutcheon added that Cal Poly would have to present a compelling argument to potential donors as to why the stadium needs repairs. In that argument, McCutcheon would emphasize tradition, and the positive impact it would have on the university to have an improved venue for football and soccer games. He added that a better, brighter stadium would represent the university in a more appropriate way.

"We need a usable, first class facility," he said. As soon as the study comes back from RBM Design, facilities planning can prioritize and schedule the needed repairs in relation to other projects on campus. Other non-state-funded repairs cannot be scheduled until money is raised to fund those projects.

McCutcheon said Cal Poly has been talking about possible upgrades to Mustang Stadium for years, but needs to know about the costs before putting more formal fundraising efforts together.

"We want to make a good place to watch games, a good venue for spectators," he said.

if the team is improving enough to overcome longtime rival UCSD.

"They tend to be our toughest competition," Vest said. "Skill-wise we are equal, but we're dealing with some nerves and intimidation. They've got age and experience on their side."

The team has been Club State champions for the past two years and would like to hold on to its title. Solomon doesn't think this year will be the team's best because they are a young team. However, the remains optimistic.

"I see a lot of potential in the upcoming years," she said.

come.

If a team is successful, then people will want to come watch it. In turn, they'll tell their friends that they're missing out on a good thing if they don't come out as well. Trust me, word-of-mouth spreads quick. Even if most of the people are only jumping on the bandwagon, it doesn't matter because eventually they'll get hooked on watching a winner. That's how a school builds a reputation as a winner.

Once that reputation is established, people are willing to watch that you'll win. Accordingly, TV coverage follows in that sequence. We all know that TV equals revenue. Revenue provides for the resources needed to perpetuate winning ways, such as a new stadium. I'm reminded of a quote from a man I can't stand, but whose words seem appropriate - "Just win baby."

Look at strong sports schools such as UCLA and Notre Dame. Even in their down years, the fans come out in droves because the teams have a history of winning.

So, I want to know what the readers think about being called lackluster fans. Is it unfair to compare Cal Poly to the UCLAs and Notre Dames of the world? Would you be more apt to attend games if more rewards were offered or isfielding a winner sufficient enough?

Field hockey faces tough competition

By Jolie Walz
MUSTANG DAILY STAFF WRITER

Take a pinch of Pepperdine University, mix in a little UCLA, add some USC8 and the recipe is clear for the Cal Poly women's indoor hockey season.

The team triumphed over UCLA Oct. 14 by a score of 2-1. They also beat Pepperdine and lost to USC8 earlier in the season. These three teams are the only teams the Mustangs face in league play.

In their fifth season as an intercollegiate club team, they will have a rematch against Pepperdine on Nov. 4 and USC8 on Nov. 5. These will be the team's first home games at Cal Poly, due to lack of field space. The games will be held at the newly opened Sports Complex.

"We're excited about playing in the Sports Complex," said team president Jill Vor.

Although they play Pepperdine, USC8 and USC8 more than once, they spice things up with games against the national teams from India and Mexico in the spring.

The win against UCLA was unexpected, said sophomore goalie Nitza Salomon.

"We had beat them before, but we almost had to forfeit the game because part of the team got lost trying to find the field," Salomon said. "We barely had time to get into our uniforms, let alone warm-up. It was mess.

Salomon said UCLA had a good possession, but in a breakaway play their goalie didn't position herself to stop the game-winning shot.

Although the team is young, their youth has been key in their previous wins. The team has 20 players, half of whom started or finished last season.

There has been success with this type of gimmick before. Last year, attendance was significantly increased at volleyball games when free t-shirts were given away. Just the possibility of getting their team's first win over a rival is enough to get fans to come.

At any rate, theasctime the season continues, the Mustangs hope to see fans at their games.

"At sweeper position, she's very good for us defensively," she said.

"In general, they're just good players who have the largest collection of balls in the world, so it's not surprising to see them," Salomon said.

The team's biggest test will be to see if they can get past the UCLA Bruins.

Like the Mustangs, UCLA has an experienced goalie.

"We're just as good as any team out there," Salomon said.

Sports Trivia

Yesterday's Answer:

Walter Alston was the first manager of the Los Angeles Dodgers.

Congrats Jeff Passama!

Today's Question:

What college did Jerry Rice attend and play football?

Please submit sports trivia answers to sports@mustangdaily.calpoly.edu. Your name will be included in the next issue of the paper.
