Woman hit by car at Mardi Gras

By Kirsten Orsini-Meinhard
MUSTANG DAILY MANAGING EDITOR

Just as Mardi Gras festivities were reaching a peak Tuesday night, a woman was hit by a car after the parade in downtown San Luis Obispo.

Police on the scene said the woman was alive when they transported her to the hospital in an ambulance.

The woman, whose name hasn’t been released yet, was crossing the street on the corner of Chestnut Street and Higuera Street at approximately 8:40 p.m. when an orange Eclipse with a Woodstock bumper sticker hit her, said Sarah Doub, journalism junior. Doub said she witnessed the entire accident as it happened.

Woodstock’s Pizza could not confirm whether or not the driver of the car was an on-duty employee.

Doub said a woman was driving the Eclipse with a man in the passenger seat. Neither of them have been identified yet either.

The woman who was hit fell on top of the Eclipse and then disappeared under it, Doub said. At this point, crowds of onlookers stormed the accident scene, apparently not realizing that a woman had just been hit, Doub said.

Students plan businesses in contest

By Adrena Benjamin

The College of Business has its hands full of competitions, and Campus2Business is there to help any participants.

Campus2Business, a facilitator service for students who need help with their business plans, will help participants design strong plans for the competition.

Founders Tim Cuttag, Santiago del Rio, Jim Kanyer and Brian Paper are all graduate business students who started Campus2Business to give participants access to partners and investors.

“Each business plan will be able to work with an MBA student,” del Rio said. “We will help them get a clear and concise business plan.”

There are currently two competitions in which students come up with design plans for businesses. The two businesses for the competition are the San Campus Incubator Program and the Ray Scherr Business Plan Competition.

The incubator program gives participants six months of free access to a San incubation facility on campus to develop e-business ideas. del Rio said phase one of planning for the incubator competition started last quarter with six business plans in the competition, and only three were chosen.

The three businesses that have been accepted in the San Campus Incubator Program are: My Net Administration, NoDeception.com and Career Athletes.

Career Athletes is outside the College of Business, while the other two are inside the college, del Rio said.

Campus2Business works with Sun Microsystems, Inc., which determines which business plans are accepted into the incubator program. The accepted plans are based upon recommendations from experts who review the students’ business plans, according to a press release by Campus2Business.

Sun recognized Cal Poly as one of the only eight leading business institutions to participate in the Incubator Program.

Santiago del Rio, business graduate student

“Students ... have a chance to learn and apply their knowledge by participating.”

Mardi Gras revelers sur-round one woman at Tuesday night’s parade and offer her beads.

Despite fears that rain might cause cancellation of the parade, the weather was fair and the party went on as planned.

San Luis Obispo’s Mardi Gras is one of the biggest celebrations in the city every year, and it has been hailed by some as the biggest Mardi Gras west of the Mississippi.

It’s time to start thinking about housing for next year, and although it’s a daunting task for many students to find a place to live, freshmen usually have a more difficult time. Since first-year students have no rental experience, they often have problems in trying to find a house.

The Cal Poly housing office will try to alleviate some of these problems and answer questions tonight with a housing workshop for dorm students. The workshop will run from 5 p.m. to 7 p.m., and will be held at 7 p.m. in Sierra Madre’s main lounge.

Jane Sergeant, office manager for student housing and life, said there is room for 2,789 students on campus, and only 250 students can return to on-campus housing. Students who want to stay on campus after their freshman year will live in the North Mountain Hill, and have to enter a lottery if they want a spot. Sergeant said the lottery is for March 1 through March 9, and results will be announced by March 23.

The remaining 2,333 students must find a place to live off campus. Sergeant said a variety of people would be present at the workshop.

Rob Pen, city of San Luis Obispo neighborhood service manager, will talk about how to find a safe place to live and how to be a good neighbor.

“I’ll give tips such as not inviting 400 of your closest friends to a party,” Sergeant said.

Tim Banducci, owner of California Sun Incubation Facility Management, will give tips on how to find housing. Sergeant said many students living in the dorms don’t even have experience renting, leasing, renting or even where to start looking for houses.

Banducci recommends dorm residents move into large apartment complexes. He reasons for this is that younger students have never lived on their own and don’t have any experience renting.

“A problem that we have is that younger students haven’t quite gotten the hang of putting out of them yet,” he said.

Banducci said his company tries to ease students into community living by recommending large complexes first.

“If we have two equally good apartments in front of us, and one person has off-campus experience and one doesn’t, I can tell you that the person with experience will win it,” he said.

Sergeant said a representative from the off-campus housing association will also talk about some of the larger apartment complexes near campus.

Mustang Village, Woodside, Valentine and Stonestreet Complexes that belong to the association.

“These complexes have criteria to follow. It’s only rent to students, they have to be a certain size and all must have on-site management,” Sergeant said.

Sergeant said she recommends that students plan businesses in contest
students go from the dorms to large, student-only complexes, then find houses in a couple of years. She said property managers really look for rental history, and large complexes provide that experience.

Randucci said that although it isn’t impossible for on-campus students to find a house, it is much harder. He said those who want to live in a house should be very persistent and organized. Most agencies will require a co-signer for people without rental experience.

Randucci said his company lists housing for next year starting May 1. He said many larger apartment complexes would release lists earlier than that.

Serjeant said the main reason for the workshops is to try to educate current students who live on campus on what to look for in regards to housing. “Students really need to try to get something in line before they leave for the summer,” she said. “Property management is nice because they can reserve a place to live next year without paying anything over the summer.”

ACCIDENT continued from page 1

“The crowd pushed in on her and the car and reap the license plate off,” Dobbs said. “They ran toward the car and ripped the license plate off.”

The wthw said that it was hit,” she said.

Anything described the scene as crazy and frightening, and said people were laughing and screaming at the same time.

“People couldn’t see that a person was hit,” she said.

Because of the chaos that surrounded the accident scene, Dobbs said that it took the police a few minutes to get there. It took the ambulance even longer, she said.

A nurse at Sierra Vista Regional Medical Center confirmed that the woman is a patient at the hospital. The nurse said tests were still being conducted Tuesday night and it was too early to assess the woman’s condition.

The police department wasn’t able to confirm the details of the accident Tuesday night because most of their officers were unavaliable.
Better choices in March

National Nutrition Month, a nutrition education and information campaign sponsored annually by the American Dietetic Association (ADA), kicks off Thursday and lasts the entire month of March. The campaign is designed to focus attention on the importance of making informed food choices and developing sound eating and physical activity habits.

Initiated in March 1973 as a weeklong event, National Nutrition Week became a month-long observance in 1985 to respond to growing public interest in nutrition.

The slogan for 2001, “Food and Fitness: Build a Healthy Lifestyle,” reinforces the importance of nutrition and physical activity as key components of a healthy lifestyle. The slogan focuses on the flexibility of nutrition recommendations and dietary guidelines for individuals, using primarily the Food Guide Pyramid as the framework for daily food choices. It also challenges Americans to take responsibility for their food, nutrition and physical activity habits.

Eating is one of life’s great pleasures. There are so many foods and ways to build a healthy lifestyle — there is ample room for choice. The Dietary Guidelines for Americans begin with the basics of the food pyramid to guide your choices so that you’ll get the vitamins, minerals and energy your body needs to function properly.

Aim for fitness by striving to attain a healthy weight and by being physically active every day. A healthy weight is key to a long, healthy life. Make physical activity a regular part of your routine. Try to incorporate 30 minutes or more of moderate physical activity most days of the week. According to the ADA, moderate physical activity is any activity requiring roughly as much energy as walking 2 miles in 30 minutes.

Build a healthy base by allowing the Food Guide Pyramid to guide your choices so that you’ll get the vitamins, minerals and energy from foods each day. Make grains, especially whole grains, fruits and vegetables, the foundation of your meals. This forms a base for good nutrition and health.

Choose sensibly. Choose a diet that is low in saturated fat and cholesterol, and moderate in fat intake. Choose beverages and foods that limit your intake of sugars. Try lowfat dairy products, cooked dried beans, peas, fish, lean meats and poultry. Read food labels to help identify foods lower in fat, saturated fat and cholesterol.

The 2000 Dietary Guidelines for Americans offers great ideas and reasonable guidelines to help you make the best possible choices. National Nutrition Month is celebrated every year in March, so this year learn to live the Dietary Guidelines to build your healthy lifestyle.

Shelby Wilson is a nutritional science senior and a peer health educator.
Gay couples deserve every right to marry

It's unnatural. It's immoral. God didn't intend for people to behave this way. The Bible says it's wrong.

These are arguments that were used against interracial relationships less than 40 years ago, when it was illegal for a black person to marry a white person in many states. In fact, it wasn't until 1967 that the Supreme Court ruled that laws prohibiting interracial marriage were unconstitutional.

Surprisingly enough, history is repeating itself right before our eyes, as we hear these same arguments used to deny the fundamental right of marriage to gay and lesbian Americans. Why should this concern you? Recent research indicates that about 70 percent of the population is gay or lesbian. This means that you are almost certain to have a gay relative, friend or coworker at some point in your lifetime.

When we discuss confirming the fundamental human rights of consenting adults, the question for consideration isn't, "Why gay marriage?" The most appropriate question is, "Why not?" This question certainly has not been ignored in our society. In fact, most discussions of same-sex marriage revolve around the same four arguments against it.

First, that marriage is, and always has been, defined as a union of one man and one woman — therefore it should remain so. However, this argument is circular and logically invalid. In the 1800s, we could have said that African Americans have always been enslaved in America, and therefore should remain enslaved. Do we have a right to make arguments that women should not be allowed to vote because they haven't voted in the past?

A second argument against same-sex marriage is the idea that the sole purpose of marriage is procreation. Of course, this would lead to restriction of marriage well beyond sexual orientation. Under the procreation requirement, couples would not be allowed to marry if one or both were sterile. This provision would also prevent non-white women from entering into marriage. It is obvious that marriage serves functions that are more important, if not more important, than procreation.

Another argument against same-sex marriage is the idea that it could somehow be interpreted as the government showing approval for same-sex relationships. But our government allowsrients and seingers to get married. Does this in any way indicate that the government approves of rape and murder? Absolutely not. All it demonstrates is that it is neither in the right nor wrong to enter into marriage to make judgments for us as to whom to marry.

Finally, individual religious beliefs play a major part in one's definition of marriage. However, this is not a religious argument — it is a civil one. The notion of freedom of religion demands that the views of one religion cannot become law, as this would institutionalize a particular religion and force it upon us all. Denying same-sex couples the right to marry on this basis would also violate our rights as Americans to practice our own religion, as some faiths see no problem with same-sex relationships.

Today, we are presented with the rare opportunity to avoid repeating the mistakes of our past. At Ail Gore has said, "The time has come in America for all the circle of fairness and dignity to include our friends, neighbors, co-workers and relatives in the gay and lesbian community." I couldn't agree more.

Mike Sullivan is a computer science junior.

Opinion

Napster benefits musical artists

Napster is on its last leg. The digital music swapping service is fighting for its life, and it's only a matter of time before the courts put the beat thieves' favorite utility out of its misery.

On Friday, lawyers for the embattled nubber and the music industry will again face off in a San Francisco court, where the judge who originally ordered Napster to be that final jab to the kidneys.

Judge Marilyn Hall Patel handed down the injunction in July. Napster appealed, but an appeals court panel essentially upheld her ruling two weeks ago. In further maneuvering last Friday, Napster filed another appeal, asking that in lieu of an injunction, the court determine a rate and order Napster to pay to copyright holders for the right to trade their songs.

Napster went stumbling back to its corner last week and offered $1 billion over five years in hopes of keeping the music moguls want to reap the rewards. As the industry's most infamous beat jacker would say, "It's all about the Benjamins."

Napster founder Shawn Fanning brought his service to music lovers for free and has created the largest music community the world has ever seen. Now the music moguls want to reap the rewards. There are bigger things to worry about in this world than Napster.

Sure, there were 1 billion downloads last year, but music sales are higher than ever. So how is Napster hurting the industry again?

Correct me if I'm wrong, but I always thought the No. 1 priority of musicians was to be heard by the most number of people possible. Record companies have exploited musicians for too long. Artists who don't conform to traditional music standards, can't get their music on mainstream radio, or don't try to fit into the MTV culture, may never capture an audience — except through programs like Napster.

Not all artists perform pop policy framework. I know it seems impossible in this disgusting world of manufactured pop bands, but some musicians actually write their own music and rejoice at the opportunity Napster has presented to the music community.

The bottom line is that Napster is just another promotional tool that has given artists a chance to spread a message, which should be the primary goal of all artists.

I am not mistaken. Grateful Dead allowed their fans to freely tape and exchange their music for a quarter of a century, and it didn't hurt their financial or artistic success. If anything, it increased their popularity in the marketplace.

Thanks to Napster, we can learn about and listen to music we otherwise wouldn't have the time of day to.

I support those artists by buying their albums and becoming a fan of their music, simply because the MP3 is an inferior music medium. And there is no better feeling than tearing open a brand new CD, even if it only costs a buck to make and almost $20 to purchase.

There's no denying it. Society has welcomed this new audio galaxy with open arms, and it won't be long before music goes completely digital, just like the cell phones we yap on and the cable we veg out on.

When it comes to music, I prefer to go digging in the crates for vinyl. I'm not losing any sleep over evolving technolo-

It's not Napster the record companies and paranoid pop stars are afraid of.

It's Napster the record companies and paranoid pop stars are afraid of. It's Napster's future.

Ash Wednesday marks the beginning of Lent, a major season of the Christian Catholic calendar. Lent is a time of renewal of our faith, a time of fasting and reconciliation, a time to reflect on the life, death, and resurrection of Jesus Christ, our savior.

We receive ashes on our forehead for two reasons. The cross is a central symbol of the Christian Catholic faith signifying the cross upon which Jesus died; we too carry that cross throughout our lives. The ashes remind us of the dust we will become before rising to eternal life with God.

Should student fees be adjusted to keep pace with inflation?

Read the following objective statement, financial analysis, pro statement, and con statement. You will have nine opportunities to attend a forum to voice your opinion or ask any questions. By attending any of the forums, you can voice your support or non-support of the proposal. Questions? Call the ASI Student Govt Office at 756-1291 or come by UU 202, M-F, 8am-5pm.

Objective Statement
The establishment of campus based mandatory fees have been based on the desire to provide programs and services not ordinarily funded through the General Fund allocation process. These fees were established without consideration for price inflation and the collateral effects on the services and programs being provided. The result is that fixed fees, without the benefit of a price indexed increase, gradually wore the quality and programs of services being provided. The Inflationary Fee Adjustment Proposal would provide a mechanism under which campus based mandatory fees could be a disturbed annually to compensate for the effects of inflationary price increases.

Price indices are used to measure the rate of inflation affecting the buyer. People are most familiar with the Consumer Price Index which measures the changes in prices paid by consumers for food, clothing, shelter, transportation, and other common goods and services. However, in 1975 the U.S. Department of Education began fundamental research to create the Higher Education Price Index (HEPI) to measure the effects of inflation on the current operations of colleges and universities, using a basket of goods and services relevant to higher education institutions. The Inflationary Fee Adjustment Proposal proposes use of HEPI in calculating the annual adjustment of campus mandatory fees.

Campus mandatory student registration fees are "fees that must be paid in order to apply to, enroll in, or attend the university." Campus mandatory fees include the Campus Academic Fee, Health Services Fee, Health Facility Fee, Instructionally Related Activities Fee (IRA) fee, Campus Service Card Fee, and the University Union Fee. The revenues from these fees provide funding for programs and services that benefit the student body at large.

Financial Analysis
The Inflationary Fee Adjustment Proposal seeks to neutralize the impact of inflation on the University's ability to provide quality programs and services to students. Inflation is the increase in prices for the same goods and services that occurs without the perceivable change in either quality or quantity of the items involved. The table below shows the inflation rate, as measured by the Higher Education Price Index, over the past nine years. It is evident from the chart that the buying power of these programs and services has decreased over the past ten years without the benefit of a mechanism for increasing revenues. Incomes to the campus mandatory fees would be based on a rolling average of the previous 3 years HEPI. The average would moderate any spikes in the index.

The table below shows the campus mandatory fees that students currently pay, and an estimate of the amount that students would pay under the proposal, effective Fall Quarter 2001. The increase/estimate is approximately $6 per quarter or $18 for the academic year. This proposal would be expected to total of approximately $2,050,000 based on 1999/00 enrollment and would be distributed proportionate to the fee.

This fee proposal does not require a one-time financial aid set aside as this is no longer a requirement of the CSU fee policy. However, an increase in these fees would be reflected in the packaging of financial aid so that students receiving financial aid would not be adversely impacted.

Pro Statement
Since California stopped additional funding to Cal Poly for its higher cost postbaccalaureate programs, the University has been forced to find cost-efficient and innovative ways of generating additional funds. Part of this effort included working with students to institute special fees, like those for the Health Center, for Instructionally Related Activities (IRA) and for increased faculty and innovative programming (Poly Plan). However, as costs have increased over the years, so have the costs of providing services and programs to Cal Poly students.

The Inflationary Fee Adjustment Proposal (IFAP) is an innovative approach to combating the effects of inflation on these fee-supported programs. Instead of demanding drastic increases in student fees, the proposal provides for reasonable movement that is tied to a national measure of inflation in higher education (recently 3.5%, or around 80 per quarter each year). By approving this fee indexing proposal the students will be taking a big step to maintain the operations of the Health Center and to preserve the same magnitude of classes, instructors, and instructionally related activities that these fees currently support.

While academics will always be the primary focus, it is these programs and activities that provide the finishing touches to the people we become. The friends we meet, the relationships we build and the fun we have complete the college experience, as well as justify much of the pride we have in Cal Poly. Whether directly or indirectly affected by any number of the benefits in question, each and every student must appreciate the amazing and well-rounded atmosphere on the Cal Poly campus. It is these entities outside the classroom that truly unite our university.

Let's face it. if we want Cal Poly to continue to be the best university in the CSU system, it is going to cost a little more. The Inflationary Fee Adjustment Proposal helps secure current levels of programming without drastic increases. It helps to maintain the excellent education for which Cal Poly is famous. Let's keep Cal Poly as the most prestigious CSU campus. Let's not shrink the level of programs that we, as students, have previously supported. Support the University's proposal to continue Poly's high excellence in education and say yes to the future of Cal Poly.

Con Statement
If you support tying our fees to a price index, as being proposed, you risk endorsing a philosophy of constant fee increases. If you calculated the additional expense on a five-year basis for Fall 2000-Spring 2005 at Cal Poly at the current level (3%) of the Higher Education Price Index (HEPI), you would incur as a result of the indexed fees the following:

Instead of an additional $149.00 for your education vs. not having an inflationary rider. That 3% easily became a 12.5% fee increase. It will continue to grow from there.

In this case, instead of an additional $150,000, you would incur a $15,000,000 increase in the total cost of education for the students at Cal Poly.

Automatic mechanisms that operate with no caps are dangerous to students' pocketbook. There are other solutions to this problem and it is the University's duty to explore all options for funding and preserving quality before reaching for students' pocketbooks.

As recently as last year, any fee increase was passed, a full 1/3 of that newly collected fee was immediately sent to financial aid to subsidize the increased costs for students with the highest financial need. Today, this rule has been rolled back and now students on full or partial financial loans will have to bear the full burden of the fee increase. The University makes absolutely no accommodations in its inflationary compensation proposal for such students.

We still need to consider something else; have all resources for funding this proposal been considered? Have fundraising programs that bring in millions of dollars per year to Cal Poly been considered for exemption to these "risk areas"? Instead of soliciting donors for a contribution to the Performing Arts Center, we could solicit donations for UU upgrades or more Polycard services or more free copies in Computer Labs. Is this so unreasonable? What about user fees for the additional services the University is offering/proposing once it has this new money supply? There are many solutions to the dilemma that I agree, the University is facing. However, it seems more and more apparent that not all possible solutions to the problem have been explored. I urge you to inform the University, that despite you supporting the programs you do not support fee indexing.

  6 pm in Bldg. 33-288
- Thursday, March 8
  11 am in Bldg. 52-227

Remember, you must attend one of the sessions for your voice to be heard! This is your opportunity... your voice...USE IT!
Sicknesses were difficult in high school. Jenkins said her mother never missed a game and was always supportive. "My mother is the hardest working person I know," Jenkins said. "She was always there for me, and she never let me give up."

Jenkins credits her mother in having the courage to get her out of "Warms" and into a good high school. She said her mother told her about colleges while other people Jenkins' age admired rap music stars.

Jenkins said her involvement in church helped her get through the tough times. She said the church taught her how to overcome the trials and tribulations of life and how to develop her perseverance and work ethic. "My mother always told me that God would never give you more than you can handle," she said. "Everything happens for a reason just to make life better."

Despite the adversity she has faced, Jenkins' positive attitude is reflected in her play. "I can't think you'll find a person on the planet with as big a heart as Odessa,'" Mimmagh said. "To say she is a coach's dream would be inadequate, because she gives her best at all times."

"Jenkins' personality oft the conn. stands out. Her quick wit, her maturity, and her ability to work with everyone, and that the doubts of others didn't hold Jenkins down. "She will do anything she puts her mind to," she said. "Anyone who crosses her path in life is blessed."

"You can't knock it 'til you try it," he said. "Once you see flying through an 100-plus miles an hour and hitting you, you'll change your mind."

The team will play in its first meet March 1 at UCLA, where it will take on UC Irvine and UC San Diego in addition to the host school. The team hopes to play at least three or four tournaments this season.

Points guard Odessa Jenkins is a leader on and off the court.

By Janelle Foskett
MUSTANG DAILY STAFF WRITER

Waking up every day at 5:30 a.m. became second nature to Odessa Jenkins. She would catch the local bus, then the metro rail and then another bus — all to get to a school an hour away from home.

Jenkins grew up in Watts, a neighborhood in Los Angeles. She went through this lengthy transportation process every morning to attend Bellflower High School, where she left her academic and athletic abilities flourish.

Her efforts paid off. Jenkins, a sociology major, is now considered one of the top women’s basketball players in the Big West Conference.

Jenkins is the starting point guard for the Cal Poly women’s basketball team, and she was recently named Big West Player of the Week.

Cal Poly women’s basketball coach Faith Mimnaugh said the Big West Conference was adamant about giving the honor to Jenkins after her defensive impact in the Mustangs’ defeat of UC Santa Barbara earlier this season.

“She got in their heads,” Mimnaugh said. “She had them looking over their shoulders wondering where she was.”

Jenkins agrees that defense is one of her strongest assets.

“Defense is my bread and butter,” she said. “It’s so cool to have people so afraid to bring up the ball.”

When she was young, Jenkins got involved in basketball by following her older brother Shawn around the court. She said she started to love the game when she realized it was something she could be the best at.

“I played with the boys, and I could hold my own against them,” she said.

She said playing basketball always opened opportunities for her, and it eventually helped her get a better education by bringing her to Cal Poly.

“Jenkins has not only been a great player for a great coach, but he’s also been a great student,” Mimnaugh said. “She’s not only been a great student, but she’s also been a great leader.”

Jenkins also says she averages 8.2 points per game, which is second behind forward Caroline Rowles. Jenkins also averages four rebounds a game and has 50 steals on the season, leading the Mustangs.

Junior Odessa Jenkins averages 8.2 points per game, which is second behind forward Caroline Rowles. The Mustangs also average four rebounds a game and have 50 steals on the season, leading the Mustangs.

The quickest sport at Cal Poly is also one of its least noticed.

Cal Poly’s badminton team, who sports a lot of new members, prepares for their first home games against UCLA, UC Irvine and UC Santa Barbara. The team has already played one match against UCSC in November, which it won 5-4.

Mark Spykerman, a business senior and captain of the team, said he thinks this year’s squad has a great chance to succeed.

“We expect to compete favorably against the big guys,” he said. “I think we can take the league or at least finish in the top few spots.”

Spykerman said the team has steadily improved in each of its four years as a member, a fact he attributes to increased involvement from Asian-American players.

“In general, the sport of badminton is dominated by Asian players,” he said. “But the Asian population is growing here at Poly, we have more talent coming in.”

Team member An Nguyen, a nursing electrical engineering sophomore, said he thinks the new talent combined with better leadership, will mean a big improvement over last year’s squad.

Last year’s team was unable to play any intramural matches due to various difficulties.

“This year’s team is a lot more organized,” he said. “We actually have a full squad of 20-plus players.”

Because it is a club sport, the badminton team relies on individual student participation and requires that each member pay dues of $20 a year to play on the team.

The team is co-ed, with women’s and men’s singles and doubles, and an additional mixed doubles competition.

“The great thing about badminton is that anyone can play it,” Nguyen said.

Badminton, which Spykerman said is the fastest of the racquet sports, can be likened to a mix between tennis and volleyball.

Instead of a ball, a birdie — with a string attached — is used. A struck birdie can reach speeds of up to 150 miles per hour.

“Sassidi said NBC is committed to showing the XFL in prime-time for the rest of its two-year contract. He said he wasn’t aware of any affiliate complaints about the low ratings, or any talk that NBC could dump the XFL on another network with which it has a business relationship, like CNBC or Fox TV.

In his 60-second advert to build an audience on Saturday night, particularly NBC, if the XFL were a comedy or drama on NBC’s schedule, it would be long gone.
