Pursuit ends with suicide in Mustang Village

By Janelle Foskett, Kirsten Osmi-
Meinhard and Adam Jarman
MUSTANG DAILY STAFF WRITER, MANAGING
EDITOR AND EDITOR IN CHIEF

After a vehicle pursuit from Santa
Maria to San Luis Obispo between
police and an armed robbery suspect,
the suspect shot and killed himself in
the parking lot of the Mustang Village
apartments Sunday evening, police
said.

Sergeant William Spears of the
Santa Maria Police Department said
police were initially called at approxi-
mately 5:27 p.m. to the scene of an
armed robbery in progress at the
Subway sandwich shop at 2330 South
Broadway in Santa Maria.

When police arrived, an individu-
al was getting into his truck at the back
center of the Subway, Spears said.

Police do not yet know the identity
of the suspect.

Police began pursuing the white
Ford Ranger Sport driven by the male
suspect. Spears said the suspect led
police through Santa Maria and eventu-
ally onto Highway 101 toward San
Luis Obispo at the Beteravia onramp,
where the California Highway Patrol
and San Luis Obispo Police
Department eventually joined the pur-
suit. A CHP helicopter was also
involved in the chase.

Spears said the suspect leaned out
the window of his truck numerous
times to shoot at the pursuing police
vehicles.

"During the pursuit, the suspect
fired several rounds at officers," Spears
said.

The police, however, did not fire in
return.

"None of our people were hurt (in
the pursuit)," Spears said.

Spears said the suspect's speed while
traveling north on Highway 101 was,
at times, in excess of 100 miles per
hour.

After exiting the freeway in San
Luis Obispo, the police vehicles fol-
lowed the suspect down California
Boulevard, said Lindsay Lundgren,
journalism junior, who witnessed the
drive from her apartment on Football
Boulevard.

"(The police) went on to campus
and like five seconds later they turned

ASl candidates vie
for top offices

By Janelle Foskett
MUSTANG DAILY STAFF WRITER

With campaigning drawing to an
end, this week's elections for posi-
tions in Associated Students Inc.
will determine who will comprise
Cal Poly's new crop of leaders.

The top two positions, ASI presi-
dent and chair of the Board of
Directors, are currently held by Sam
Ahovne and Melissa Varcak, respec-
tively. These positions will soon rest
in the hands of two new leaders.

Currently, three students - Corey
Reihl, Brent Van and Angie
Hacker - seek the ASI presidency
while one student, Chris Madsen,
hopes to secure his position as future
chairman of the Board of Directors.

Chris Madsen

Chris Madsen, an agribusiness
junior, is currently a member of the
Board of Directors as a representa-
tive for the College of Agriculture.
He is co-chair of the bylaws commit-
tee and student representative to the
Cal Poly Foundation Board. Madsen
is seeking the position of chair of the
Board of Directors.

Even though he is the only can-
didate for the position, Madsen said he
is campaigning heavily so people will
know he is serious about the job and
so he would be prepared if someone
launched a write-in campaign.

"I didn't want to just walk on," he
said. "I think I am a viable candidate
and (the students') best choice."

Madsen's campaign is being fund-
administered by his fraternity, Alpha
Gamma Roe, and his different
positions in his fraternity, Alpha
Zeta - an agriculture honor society -
and a member of the agribusiness
management club.

Madsen said he wants to help
train the Board of Directors to be a
more productive body and get the
process moving early.

"It is important for the group
to get to know each other quickly so
they can work together as a team," he
said.

Madsen's campaign is being fund-
administered by his fraternity and his
parents.

After graduation, Madsen said he
wants to attend law school and then
work in Sacramento for an agricul-
tural lobbying organization.

Angie Hacker

Angie Hacker, a psychology
junior, is currently a member of the
Board of Directors as a representa-
tive for the College of Liberal Arts.
She has been a member of the
Elections Committee, the Alcohol
see CANDIDATES, page 2

A temporary masterpiece

Melissa Kopecky works on her chalk drawing at the 10th annual Madonna Italian Street Painting Festival Sunday near Mission San Luis Obispo. The event started Saturday and ended Sunday evening.
Students from Asian and Pacific Island heritages gathered with members of the community in a celebra­tion of cultures Saturday at the Lantern Festival in the University Union. The seventh annual festival was put on by Chi Delta Theta and the Asian and Pacific Student Leadership Council.

The festival is devoted to spreading awareness of Asian cultures among community members and students. The clubs and cultural organizations that participated in the festival demonstrated their heritage through cooking, dancing, singing and performing traditional customs throughout the evening.

Gene Pena, a member of the Filipino Cultural Exchange, danced with the group in a traditional dance called the "Tinkling," the national dance of the Philippines, where dancers portray the "Tinkling" bird as it hops across the rice fields, avoiding traps set by farmers. The group danced a mod­ern dance as well.

Pena joined the group because he was interested in learning his tradi­tional dance and thinks that is the reason why many students join as well.

Many students and community members at the event came because their organization was involved or a gust of an organization. Others came to learn about their own culture.

"It has a different atmosphere," said Jose Aguilera, an architecture senior. "Different countries are re­presented from Asia, their food and their countries it's really nice." Aguilera said he thought it was very important for all minorities on campus to come together at this type of event so that they could enjoy one another's cultures and traditions. He also thought it was important to represent all countries and not segregate or the other.

The Lantern Festival was diverse in the cultures it represented. The Chinese Student Association performed a traditional lion dance and the Indian Student Association demonstrated in "Rangda" dance.

"ASL is supposed to be the voice of 17,000 students," said "I want to make sure all voices at Cal Poly are heard and recognized." Reihl said he wants to continue the positive things ASI does for the students, but he also has some of his own vision.

Heack said he would like to look into having an elected member of the board of directors. Reihl said communication is very important on college campuses.

Chris Madsen: Candidate for chair of the board.

Amanda Hacker: Candidate for chair of the board.

Corey Reihl: Candidate for president.

Brent Vann: Candidate for president.

Candidates for ASI president and chair of the Board of Directors

Reihl said he has participated in many different areas of the universi­ty for four years, and, if elected, he feels he would be a good representa­tive of the students. He has been involved with the Student Concerns Committee, which addresses how ASI can help resolve student issues. He is also a College of Business student, a member of the College Republicans and the College of Business. He has a member of his fraternity, Pi Kappa Alpha, and he was a resident adviser in the dorms.

After he graduates, Reihl said he wants to work for a large corporation to get experience in the field and then attend graduate school. He said, however, he would eventually love to be a teacher.

Reihl's campaign is being funded by donations from friends and fami­ly, his own money and endorsements from local businesses such as Hayward Lumber and San Luis Print and Copy.

Brent Vann

Brent Vann is a political science senior and president of the College Republicans. He said one reason he seeks the position of ASI president is because he believes there are very important on college campuses.

"My time at Cal Poly has had a lot of good things in it," he said. "I want to give something back to the school, and this is the best way I can do that." Vann's primary issue involves allowing the ASI president to hold a position on the San Luis Obispo City Council. For students who live here, they do not have the appropriate representation in the city, he said.

Vann wants to make the reserve room and computer lab in the library accessible to students at all hours. He said he would also like to con­centrate on recognizing the positive aspects of greek life on campus.

Lastly, he said students should not need a parking permit on campus past 5 p.m. This will encourage stu­dents to come to campus after hours.

Vann said he thinks of himself as a new leader with a new vision for Cal Poly.

"I want to promote ASI to the stu­dents so that ASI will become a tool, not an obstacle, for clubs and organiza­tions on campus," he said.

Although he has never held a position in ASI, Vann said his involvement with the College Republicans has given him the com­munication, common sense and experi­ence to run for ASI president. This association with the College Republicans has given him the opportunity to help with local, state and national elections, he said. He has also been the philosophy chair of his fraternity, Delta Chi.

"I have the time and dedication it will take to do this for the students," he said. "I want to bring representa­tion to every single student, club and organization.

Vann's campaign is being funded through his own money, friends and family, the College Republicans and endorsements from various local politicians, including County Supervisor Mike Ryan, Congressman Doug Ose and San Luis Obispo City Councilman Dave Romans.

After graduation, Vann said he wants to attend law school, seek an office in politics and one day run for the president of the United States.
Will Mustang Daily be endorsing ASI candidates?

Occasionally in years past the Mustang Daily staff has presented their picks for ASI elections in the form of an unsigned editorial. Let me remind you that unsigned editorials are the voice of Mustang Daily, although they may not reflect the view of each individual staff member.

During times of national and local elections, newspapers around the country use their unsigned editorials to present the official stance of the paper. This opinion is generally developed by an editorial board with consideration of each and every member of the newspaper staff.

As the staff of Mustang Daily, we discussed offering our opinions regarding the candidates for ASI positions. After some thought, we have opted not to issue any endorsements this year.

First, we feel it is inappropriate to use Mustang Daily as a forum to present our personal views.

Given the small scale of ASI elections, what we print could greatly influence the outcomes. Therefore, we feel it is more appropriate that the Mustang Daily staff offer objective information and leave the opinions to those writing in. After all, the opinion page is a sounding board for the readers.

Additionally, the staff of Mustang Daily is just as ideologically diverse as campus. With respect to that, it would not be fair to offer an opinion that the staff cannot agree on.

With that, Mustang Daily will not be issuing endorsements and the staff encourages each reader to make his or her own decision and vote May 2 and 3.

Have a question about campus? Ask Adam. E-mail him at ajaram@calpoly.edu.

Americans are satisfied with Bush, new study finds

LOS ANGELES (AP) — Nearly three out of five Americans approve of the way George W. Bush is handling the job while 33 percent disapproved, according to a new Los Angeles Times Poll.

Fifty-seven percent of those polled approved of the way Bush was handling the job while 33 percent disapproved, according to the poll published Sunday.

Bush's job-approval rating for the first 100 days in office was similar to those of Bill Clinton in 1993 and Bush's father, George H.W. Bush, in 1989.

The president's approval rating varied between regions. More than 60 percent of those surveyed in the West and Midwest believed Bush was handling the job well, but fewer than half of the people polled in the East agreed.

Fifty-four percent of Californians approved of Bush's performance.

Bush also got strong marks on his handling of the economy, with 52 percent approval and 32 percent disapproval ratings. But Americans split over Bush's handling of the nation's environmental policies, with 41 percent of those surveyed approving and 38 percent disapproving — a virtual wash because of the poll's margin of error. Twenty-one percent didn't know whether they approved or disapproved.

- Forty-one percent also felt that Bush was doing too little to protect the environment; 36 percent said he was doing the right amount, and only 1 percent felt the administration was doing too much.

More than half of those polled said they believed the president cares more about the needs of business than he does about the environment. Only 13 percent felt he cares more about the environment.

A total of 34 percent approved of drilling for oil in the Arctic National Wildlife Refuge in Alaska, which was a major Bush campaign issue. Fifty-five percent disapproved and 11 percent didn't have an opinion.

The environment placed only fourth when Americans were asked to state the most important problems facing the nation. Thirteen percent listed the environment as their top concern. The economy topped the list, followed by crime and then education. Morals and family values were fifth.

Telephone polls of 813 people nationwide and an additional 512 California residents were conducted from April 21 through Thursday. The nationwide poll had a margin of error of plus or minus 3.5 percentage points, with four points in the California survey.

Relationships can closely resemble doing the dishes

This quarter, I’m graduating. Graduating has a way of making one feel as though one doesn’t have a problem — things just fall into place. One thing I’ve learned is that living on your own is great except for one thing: dishes. In my apartment, no one likes doing dishes. By the end of the day, the sink is filled.

Well, 1 have found that which makes each relationship also unique.

One thing that is so frustrat­ing about a pile of dishes is that you have to wash them in the kitchen more difficult. You have to move a pot to get a drink of water, find a not-too-dirty pan to cook with, or just give up and order a pizza. I’ve found that when I’m hungry and I am having an argument, it’s hard to do the other things I need to do. Work is a chore, I can’t concentrate when I’m hungry, and hanging out with my other friends is less fun. Unsolved problems have a way of affecting other parts of your life.

A pile of dishes is intimidating. — When a pile of dishes is sitting in the kitchen, my roommates and I will stare at it for a few minutes in disbelief that we need to tackle the pile, but no one wants to. It’s too big and seems like too much work. I’ll say to myself: “I’m not going to start on this if they’re not!” The same is true in a friendship. The issue between you and another person can seem like a huge problem that will be too hard to solve, and so you don’t even want to bring it up. You wish that you had dealt with the original problem, but now problems have been piled up and you don’t know where to start.

Andrew Paulsen is a history senior.

The smell of free hamburgers and the sea of people wearing suspiciously bright-colored T-shirts reminded us that it is, once again, time for the Associated Students Inc. elections. The ASI elections are held this year, and they are taking place May 2 and May 3.

The Associated Students Inc. elections are held this year, and they are taking place May 2 and May 3. All the signs, shirts and advertisements popping up around campus herald the fact that it takes big money to run for ASI office. While there are no spending limits outside of paid advertising that are imposed on the president and chair of the Board of Directors candidates, it is important to realize that big money campaigns aren’t always effective.

The 2001-2002 ASI election packet was distributed all over every building on campus. The Board of Directors candidates is $350. Total expenses for the Board of Directors shall not exceed $75, with no more than $25 of the $75 for paid media. Fellow candidates can report a candidate who overpends and cause them to become disqualified, so campaign spending is not a matter to be taken lightly. This makes it all the more important for presidente and chair of the board hopefuls to analyze strategies for an efficient campaign.

To the majority of student voters, an efficient campaign means more than having a great mission and other promotional materials. Voters who want to make a truly informed decision need only to take a detour to the nearest computer lab and research which candidate they think would do the best job.

Conscientious students will not be swayed by offers of free food if they disagree with a candidate’s mission or platform. This became quite evident last Wednesday when College Republican chairman and ASI presidential candidate Brett Vann learned that some of his campaign posters had been defaced to read “bigot” and “vote ignorance.”

Letters to the editor

Think democracy, not a dictator, for ASI's president

I would like to address all of the students and staff at Cal Poly and announce that I have decided to enter the Associated Students Inc. election as a write-in for the president position. It is no longer necessary.

According to a 1997 study in The New England Journal of Medicine, motorists are four times more likely to crash when using a cell phone. The Center for Urban Transportation Research at the University of South Florida reported in 1999 that existing studies show the chances of having an accident while talking on a cell phone increase from 34 percent to more than 102 percent.

Studies showing the increased danger of driving while talking on a cell phone have urged people to respond by pushing for cell phone restrictions. As of Oct. 19, 2000, article from USA Today reported that two counties, Suffolk County, N.Y., and Camden, N.J., passed laws that ban motorists using handheld cell phones while driving. The laws fine $150 for $150 for a first offense and $250 for a second offense.

The article also reported that there are more than 105 million cell phone users in the United States and that motorists are considering laws prohibiting the usage. A small Cleveland suburb banned the use of hand-held phones Sept. 1, 1999, after a 2-year-old was killed in a car that year earlier by a driver whose phone call distracted him by his cell phone and ran a stop sign. In this case, it took an accident to make people look at the problem at hand.

The key to this problem lies in fixing something before it breaks. There have been multiple deadly accidents that could have been avoided if drivers had taken the proper precautions. There is no need for another innocent loss of life because people take this problem for granted. My campaign is making quicker because debate will not have to waste their time in the race for a president when you can spend no time and get a dictator.

It will be a slow extinction from the voting booth to the sidelines, and by the time you realize that your vote doesn't matter, your vote will pay more attention to the road than dialing a number.

Germany, Japan, Brazil, Australia, the United Kingdom, Chile, Italy, Portugal, and Spain have already placed significant restrictions on drivers who use cell phones. The United States is slow to follow this trend. Detaching ourselves from our cell phones may be one of the hardest things we have to do, but the fact is, we have to do it.

Cell phones should not be banned permanently, but hands-free attachments should be mandatory if drivers use a cell phone.

Morris, a resident of Las Vegas, Nevada, is currently facing three felony charges of reckless driving and two felony counts of involuntary manslaughter. She faces 20 years in prison if convicted. Her incarceration will represent another life lost because of a cell phone and a busy schedule.

Dena Horton is a journalism sophomore and Mustang Daily staff writer.
Mexican environmentalists show sophistication in their methods

Tijuana, Mexico (AP) — Mexican environmentalists along the U.S. border have come a long way since the days when handmade signs were the biggest guns in their arsenal.

Today, they are just as likely to stage battles in the courtroom as on the picket lines.

"It's grown incredibly. We are beginning to mature as a movement. We are beginning to be a movement," said Laura Dorantes, a Tijuana activist who heads the 10-year-old Border Environmental Education Project.

A three-day conference on the U.S.-Mexico border environment that ended Saturday brought together about 400 people from 50 groups. Participants said the war against pollutants along the border is being shaped by powerful forces — the Internet, new Mexican rights-to-know laws and the North American Free Trade Agreement.

U.S. and Mexican environmental groups began to join forces amid fears that NAFTA, which took effect in 1994, would cause the border area to become a dumping ground for manufacturers using cheap Mexican labor.

"In some ways you can see NAFTA as a spark in the further development of the groups," said Dutia Livermore, director of the University of Arizona's Center for Latin American Studies and works on Mexican environmental issues.

In addition, a NAFTA provision allows citizens of the United States, Mexico and Canada to accuse any of the three governments of failing to enforce their own environmental laws.

The first use of that law was a joint complaint filed in 1998 by groups in Tijuana and San Diego. The complaint accused Mexico of failing to clean up a Tijuana lead smelting plant owned by its U.S.-based owners. The North American Commission for Environmental Cooperation agreed to review the case last year but has not completed its report.

NAFTA also created a separate border commission, with an advisory board and public hearings, to approve the state and local level, where public opinion will have more weight.

In Baja California, a broad statewide environmental law is being drafted. Voters in Tijuana passed a municipal measure last year viewed as one of Mexico's most progressive in protecting the public right to information.

"Above all, leaders say the spirit of cooperation, coupled with better organization and training, have made a difference in the way environmentalists pursue their cause."

"It's not just about going up and throwing trash in front of the municipal building," said Carla Garcia, an environmental attorney in Tijuana. "It's about learning about the law."

Employment Opportunities

C&D Aerospace will be on the Cal Poly campus Thursday May 3, 2001 (Springboard Job Fair).

Since 1972, C&D Aerospace has been serving major airline manufacturers around the world by providing exceptional interior components and systems for almost every commercial aircraft. What was founded has since become the world's largest supplier of interior components to the airplane manufacturers. C&D continues to grow and now encompasses a multitude of worldwide divisions and affiliates. C&D is a company with global capabilities, yet has the distinct temperament of a privately owned and very personable organization. An organization where names, faces and relationships still matter most and where they will remain paramount as we continue to grow. We have several F/DT direct positions in Santa Maria, California, Southern California and Marysville, Washington for the above positions. If you would like to work for a progressive company with excellent benefits, please stop by with your resume on the one-day we will be on site or send your resume to:

News
Capping off spring football

Mustang Daily

Another year to go? Then be a 91 offensive at Saturday's annual Green and Gold football scrimmage. Quarterback Seth Burford (left) completed eight of 16 passes for 114 yards and also rushed for 45 yards and one touchdown.

BASEBALL

Continued from page 8

happy with his team's performance at the plate, but knows sometimes a hot pitcher can shut down an offense.

"I was disappointed often," he said. "At the same time I have to compliment Miranda... he's the difference in the ball game. He definitely held us at bay."

Saturday, reliever Nathan Choate shut down the Hornet attack in the top of the ninth to earn his seventh save of the season as the Mustangs won 4-3. The save tied Cal Poly's all-time record for saves in a season. Tyler Fitch pitched seven innings of six-hit ball for his fifth win of the year.

Designated hitter Bryan Gant set the pace for the offense, going 3-for-4 with two RBI and a run scored. Tillman drove in two runs on the day as well.

The Mustangs get their first win in a series opener in the last six attempts with a 9-5 victory on Saturday.

Scott continued from page 8

that position. If his decision was affecting my recruiting, I would later make a decision weeks ago.

"He wants to be a good player and he likes it here."

Kevin Bromley

Men's basketball coach

The decision on what Scott will do next year will be based on simple reasons and be quickly forthcoming.

"I'm hoping to make a decision soon—probably in the next two weeks," Scott said.

"I'm going to finish visiting other schools and look at the situation. I'll decide what looks best for me, to go somewhere else or to stay here."

If Scott transfers from Cal Poly, it will mark the ninth player to leave the program in two seasons. Last year, Jason King, John Hoffman, Mark Campbell and Brandon Hulst all left the Mustangs.

Friday, Kevin Correa pitched three innings of scoreless relief to earn the win, his fifth of the year.

The Mustangs led the offense clicking, racking 14 hits, including three by Gant, who also scored three runs. The Mustangs took the lead early, but a big inning in the fourth put the Hornets up 5-4.

Cal Poly came back with four runs in the sixth to put the game out of reach.

Price isn't letting the loss on Sunday worry him too much.

"I think it just shows how tough it is in this conference, anybody," he said. "Six State has struggled, but they came in today and played as well as they could today. That's how good our league is, every time you step on the field it's a battle."

The Mustangs next play host to Cal State Fullerton for a three-game series beginning Friday at 7 p.m.
Jamaal Scott has reached a crossroad in his basketball career. After requesting and being granted a release from the Cal Poly men's basketball team three weeks ago, Scott has been actively searching for a basketball program that fits his fancy.

Shortly after receiving the release, the Big West Freshman of the Year took a trip to visit the University of Utah. The Utes, who were the runner-up to the national powers Temple and the University of Massachusetts in the Atlantic 10 Conference next season, are one of the potential places he might transfer.

"It didn't work out for either of us," Scott said. "I wasn't excited about what they were looking for and they weren't the right fit for me."

Scott will make what most likely will be his last recruiting trip within the next two weeks to the University of Richmond. Richmond is a small private school in Virginia that went 22-7 last year and advanced to the second round of the NIT. After winning the Colonial Athletic Association conference last season, Richmond will join rational powers Temple and the University of Massachusetts in the Atlantic 10 Conference next season.

By granting his release, Cal Poly allowed Scott to play immediately for the school he potentially transfers to, rather than having him sit out a year without a release.

The choice of Kevin Bromley as head coach helps increase the likelihood Scott will return. When Athletic Director John McCutcheon was going through the selection process, Scott paid him a visit to give his opinion of Bromley.

"I like him," Scott said. "I think he's a great coach. Even if I leave, that doesn't change anything, he's still a great coach. He's working hard to bring some guys in to help the team improve."

While the Scott says plays itself out, Bromley must work to improve a team that had a dismal 9-19 record last season. Scott is impressed with what he's seen.

"There are some good guys," he said. "I see a lot of talent in the guys that I've played against at the gym. The team lost a lot scoring something like 55 percent of the time, so they need to get some good players."

For the time being, Bromley appears content to give space to explore his options. Meanwhile, Bromley is going about his business as usual; recruiting to fill the roster for next season, while making sure the returning players are taking part in off-season workouts.

"We're still looking," Bromley said. "We're probably going to recruit someone at that position anyway. We need some depth at guard."

JAMAAL SCOTT: Possibly transferring from Cal Poly.

Mustangs fall short of three-game sweep

Cal Poly takes two games from Sac State

By Ryan Ballard

It was a pitcher's worst nightmare Sunday afternoon at Baggett Stadium, as a strong swirling wind turned ordinary fly balls into home runs.

The Cal Poly baseball team (28-17, 6-5 Big West) lost the final game of a three-game series against Sacramento State, 6-2, when Carlos Morales hit a three-run home run in top of the seventh, breaking a 2-2 tie. With the wind, Morales' homer barely cleared the wall in left center.

The Mustangs (28-17, 6-5 Big West) lost the final game of a three-game series against Sacramento State, 6-2, when Carlos Morales hit a three-run home run in top of the seventh, breaking a 2-2 tie. With the wind, Morales' homer barely cleared the wall in left center.

Nathan Choate tied a Cal Poly record with his seventh save Saturday.

The Mustangs next face first-place Cal State Fullerton Friday.

Reliever Nathan Choate tied a Cal Poly record with his seventh save Saturday.

The Mustangs next face first-place Cal State Fullerton Friday.

Second baseman Kevin Tillman pulls down a fly ball during Saturday's victory. Tillman hit his second homerun of the season Sunday and finished with six RBI in the three-game series.
