Authorities release name of robber

By Karin Driesen
MUSTANG DAILY NEWS EDITOR

The man who led police on a high-speed chase and shot himself in Mustang Village Sunday has been identified as John Osolnick, said Lt. Ken George of the Santa Maria Police Department.

Osolnick, 23, was from Las Vegas. Police do not know what brought him to Santa Maria.

"So far we don't know of any relatives here," George said. "We have no idea why he was here, besides robbing our businesses."

Osolnick stole $100 from a Subway sandwich store in Santa Maria Sunday afternoon. He then fled from police north on Highway 101 in his white Ford Ranger Sport. It speeds of up to 100 miles per hour. Several shots were fired at police from a .44-caliber gun.

Osolnick turned on California Boulevard in San Luis Obispo toward Cal Poly while police were still chasing him. He eventually crashed through a fence into the Mustang Village apartment complex, found himself trapped in a dead-end parking lot and shot himself in his vehicle.

A serious threat

Alexander Vassar, a history sophomore, has started a parody campaign to encourage students to vote in the Associated Students Inc. election. Unless more than 50 percent of students vote this year, Vassar intends to claim victory and declare himself dictator. He claims that the 10 to 15 percent voter turnout in recent years is disappointing. Elections are today and Thursday from 8 a.m. to 4 p.m.

Design attracts $6 million donation

By Raul Vasquez
MUSTANG DAILY STAFF WRITER

A Cal Poly student's design for a new engineering building has garnered a $6 million gift from a private donor.

Mili Senanayake, architecture senior, submitted a design concept for the new senior projects building, which is expected to be constructed in 2004, said Dan McGee, director of development for the College of Engineering.

Officials in the College of Engineering had the idea for a senior projects building, and they thought that it would be a good idea to have students come up with design concepts. The concepts were to be used as a marketing tool in order to attract donors to sponsor the project. The concepts were used to show what the building might look like when completed, McGee said.

Senanayake answered a "sketch artist wanted" advertisement in the Career Center, and the month-long project went underway. Senanayake was instructed to produce sketches.

Tests free on National Anxiety Day

By Lyndsay Lundgren
MUSTANG DAILY STAFF WRITER

As she formulates the thoughts in her head, her heart begins to race and her face turns red. The thought of raising her hand in class can sometimes make Amy Wanner anxious.

"I don't want to say something and sound dumb," said the political science senior. "It makes me edit myself."

While Wanner doesn't think she has an anxiety problem, some college students do not know if their anxious feelings are normal or not, said Torv Nersasian, counselor at the Health Center.

As part of today's National Anxiety Disorders Screening Day, the Health Center will provide a free and confidential screening for anxiety disorders.

"Our goal is to get students who are concerned or worried about anxiety problems to get help," Nersasian said. "We can identify if the problems are serious and link them with resources."
Tournament raises money for heart care

By Aaron Lambert

A charity basketball tournament put on by Alpha Phi society last week raised an estimated $3,500 for the Alpha Phi foundation. The money will be donated to the local chapter of the American Heart Association.

"It went really well," said Kelly Crafton, liberal studies senior. "We had a lot of people who were helping support our cause." This was the second year of the Alpha Phi basketball tournament. In previous years a chili cook-off was used to raise donations.

Senior Alpha Epsilon beat Lambda Chi in the championship game Thursday evening.

This year's tournament, which took place at the Rec Center, doubled as a fund-raising campaign as well as a senior project for the two student organizers. Junior Alcia Symon and senior Megan Lomas, both speech communications majors, used the opportunity to plan the event and turned it into a senior project.

"We are both interested in event planning," Symon said. "It kind of ties into our major - you've got to go out and communicate with people." The event kicked off Monday with a pizza party and ended with a lip sync competition that was referred to by Symon as "a flop." The fraternities started to lose interest in the lip sync competition and people didn't show up explained Symon.

The $200 that was paid by all 17 teams was put into the Rec Center. The $200 that was paid by all 17 teams was put into the Rec Center.

NEWS

ANXIETY continued from page 1

significant enough to need treatment.

National Anxiety Disorders Screening Day is a nationwide event sponsored by more than 15 national mental health organizations. Frequently, students are unaware of available help, she said. Disorders such as depression and anxiety are very treatable, Nersasian said.

"We hope students will take advantage of the counseling center," she said. The Health Center has provided anxiety screening for about five years. Screening is open to all Cal Poly students, employees and their family members. It consists of a self-test questionnaire and an optional meeting with a counselor to interpret the answers. After a counselor has reviewed the questionnaire and identified the disorder, appropriate treatment will be recommended.

"The screening gives us an opportunity to get information out there, said Robert Negraint, project coordinator for the Health Center. "This is a good time for the screening as we are well into spring quarter and midterms."

The testing will help students identify any problems. Sometimes anxiety disorders are associated with extreme behavior, but they can range from very mild to debilitating, Nersasian said.

"Where we draw the line depends on the level of functioning," Nersasian said.

Symptoms for generalized anxiety disorder include excessive worrying, sleeplessness and changes in eating habits. Other disorders include panic attacks, phobias and anxiety from trauma.

"We see these problems all the time," Nersasian said. In past years response has been good, Negraint said. People feel more open to talk about anxiety than some other disorders. Nersasian said.

"There are some social stigma about anxiety disorders but people feel more comfortable discussing them," she said. "There is a misconception that students don't go to the Health Center." For students who don't feel comfortable visiting on-campus counselors, the Health Center does provide referrals outside campus for students with insurance.

Counselors from the Health Center will have a booth in the University Union Plaza from 10 a.m. to 2 p.m. Private counselors will be available in RU rooms 218 and 219. All services are free and confidential.

BUILDING continued from page 1

and renderings for the new building. The first part of the project involved researching the building footprint, which is the amount of space covered by the building, in the Master Plan in order to gain the context for the design. He also gained experience in learning how buildings on campus get funded. He then did a hand sketch of the design and a computer rendering of the model. Although McGee was only looking for a hand sketch at first, Senarmo said he sent Forte, a computer rendering software application, to come up with a 3D model of the design. The advantage of the software is that the user can build and then manipulate the model.

"It was quite an experience for me," Senarmo said.

Overall, two students submitted designs to the College of Engineering. Although Senarmo's concept was chosen, the final design has not been set in stone.

The private donor, whose name will not be released until the agreement is finalized, said he liked the design because of its professional quality and use of computer graphics.

Senarmo said he will be happy if one of his designs is actually built.

"If the project gets funding, then that will be very satisfying for me," he said.

She has been exposed to it many times, but nothing compared to the time when she was in eighth grade. Jonnie McBry, a San Luis Obispo resident, has had numerous cases of serious poison oak. One of the first times she caught it was tumbling down one of the rolling green hills behind Diablo Canyon when she was young with her 12-year-old uncle.

"It started to itch right away and I knew I was in trouble," she said. "I just had to come down to the health center."

In the process, McBry said she got more than she bargained for. She remembered that she spent the next three weeks in bed. The white bed sheets wrapped around her were supposed to ease the itch, keep her from scratching and absorb the liquid that oozed from the sores that were all over her body. But they never really helped alleviate her discomfort.

"We tried everything to treat it," she said. "Getting in the shower and washing off the plant oils. Getting rid of the affected clothes or jumping in the ocean at Avila Beach."

Saltwater was supposed to help relieve the itching, McBry said. Though for the most part, people with poison oak were made to suffer in silence.

"Back then, they just didn't have anything that worked," McBry said. "Poison oak is like having a nightmare. The itch is horrible. You have it inside and out but can never scratch it."

McBry is not alone in her plight. Dr. Burt Cochran, head of medical services at the Health Center, said he sees poison oak as a very common condition.

"It is a skin rash or 'contact dermatitis' that develops as a result of initial contact with an oily substance which is found in the plant," he said.

The exact number of students who have been treated for poison oak was unavailable. Cochran said.

"It is a plant that grows profusely in this country and on campus," he said.

"I have had poison oak so many times it's ridiculous," he said. "I have wear more protective clothing ... and be aware that, even in the winter when you can't see the leaves, poison oak is always there."

By Jennifer Dwyer

MUSTANG DAILY STAFF WRITER

"We see a flurry of cases in the spring and summer," Cochran said.

One such case is Toby Lloyd.

Lloyd, 20, is a mechanical engineering student who has had poison oak at least eight times since coming to school. He is a mountain climber who frequently hikes Bishop Peak.

"I have had poison oak so many times it's ridiculous," he said. "I have lost count."

To the readers: For every photo there is a reason

Over the past two days, we have received quite a few comments regarding the photograph that ran on the front of Monday's paper. The photograph showed the body of a man sitting in a truck just after committing suicide in the parking lot of Mustang Village. The photo ran with a story detailing a car chase that occurred after the male suspect allegedly robbed a Subway store in Santa Maria and, eventually, the Mustang Village parking lot.

As a Mustang Daily was informed of the chase early Sunday evening, reporters, editors and a photographer headed to the scene to try to gather as much information as possible. When we arrived, there were at least 100 students from Mustang Village and Sternen apartments gathered around or leaving the crime scene. Many of these students, some who we interviewed, had witnessed the entire incident, including the suicide.

By running this photo, it was our intention to show readers exactly what the students had already witnessed. Obviously, the photograph cannot depict exactly what students saw, but offered a close representation. The crux of the story is that the incident came to a conclusion at Mustang Village, a housing complex for Cal Poly students. As editors, we felt that an important story of note came out, and the photograph could do that far better than any words could.

More than that, as a newspaper, it is our primary function to convey the news to our readers. This includes describing in detail what has happened because the reader was not there to witness it. Sometimes the best way to portray what has happened is with a photograph along with a story.

Some readers have complained that the photo was in poor taste because it showed a dead body. Our intention was not to disrespect the dead man or his family, but instead to show the reader what occurred. When choosing photos, we pick the ones that are the most descriptive in order to clearly inform the reader of the incident.

We would never run anything just to make an impact or be sensational. This photo is not, and never will be, our intent as a newspaper.

However, we do appreciate readers writing us with their concerns and we welcome any feedback concerning anything in Mustang Daily.

We don't believe in censoring news no matter how graphic it may be. It is our priority to provide all the news to the reader, even though the content of a story may be more offensive to some readers than others. We wouldn't be doing our job if we left out any aspect of a news story.

Unfortunately, this news story was not one that came to a happy conclusion.

Vacationing cosmonaut takes up space

Children have always dreamt of traveling into outer-space. Ask children what they want to be when they grow up and most likely they’ll say an astronaut.

American millionaire Dennis Tito had those exact aspirations for the last 40 years — once-space exploration became reality. On Saturday, Tito's wishes came true when he became the first-ever “space tourist.”

Fulfilling his dreams did not come without a hefty price tag, though. Tito, 60, paid the Russian space program $27 million for his journey to the stars. The price of admission onto the Spacecraft included a windows-seat view of Earth, tour of the International Space Station (ISS) and probably a large, refreshing glass of Tang.

Tito's ticket to ride did not come without strong opposition from NASA. Officials “complained that the Russians had unfoundedly forced a rocket on them” while the ISS remains under construction, according to The Washington Post online. Eventually NASA approved Tito's expensive endeavor only after he agreed to pay for anything he might break.

"If I break it, I have to buy it... if I break the whole station, I guess I'm going to have to buy the whole station," Tito joked in a pre-flight interview with CNN.com. Tito, an investor and former rocket engineer from Santa Monica, Calif., went through extensive training for his weeklong stint in space. He was subjected to a similar process Russian cosmonauts go through including centrifuge and vestibular training, where he was spun on a chair, and quality time in a pressure chamber, Tito said in the interview.

"I scored perfectly on all my exams," he said. "I have the engineering background so I have an advantage over the average cosmo- naut.”

Tito is not a cosmonaut at all, but rather an over-the-hill, glory-seeking financier who got lucky in the stock market. Does this stunt rock of mid-life crisis? Tito said he always wanted to go to space since he was a teenager, according to The Washington Post online. Now that the multi-millionaires have bought his way on into a Russian rocket, what will be done next? This isn't the repeal Dalbrow that brought home a brand new Harley and got a tattoo tattooing.

Tito has set a precedent that he hopes others will follow — he said in a Los Angeles Times article that he “would like to show that this space tourism can be done.”

Anyone could dig deep enough into their pockets to do anything they desired, but launching into the outer limits of the galaxy is way out there. Tito, who is just an average businessman with a big bank account, has eaten away at the credibility of the space program and all those men and women who devoted their lives to becoming real astronauts.

The Russian space program has been in financial strife, and now that Tito has forked over $20 million, the fledgling cosmonauts can rebuild marketability in the race for space. If traveling into space were as easy as the swipe of a debit card, why wouldn't other people want to do the same as Tito? The Russians are smart to commercialize space tourism.

"There are a lot of rich people," said Russian mission control chief Vladimir Solovyov to The Washington Post online. "Why shouldn't they fly for their own pleasure?" They shouldn't because the risks are too high. Last February, a U.S. Navy submarine collided with a Japanese fishing boat after rapidly ascending to the surface. Twenty-six of the 35 aboard were rescued, according to CNN.com. Navy reports concluded that 16 civilians were onboard the submarine in the cramped forward section at the time of the incident — supposedly two of them had been key controls during the surfaced maneuver, according to CNN.com. Although the Navy insisted that both the civilians were closely supervised and that their presence had nothing to do with the accident, it is obvious that it is not a good idea to let amateurs play around with expensive and potentially dangerous equipment, especially when lives may be at risk.

Tito could be riding the lives of his Russian crewmembers, as well as his own life, by ever so casually checking into the ISS. NASA has every right to be nervous about having this stock market schmoe floating around up there and taking up all too much space. Jennifer Hansen is a journalism senior and Mustang Daily staff writer.

SPORTS

LACROSSE

continued from page 8

The team has greatly benefited from the Sports Complex as well, Loefller said. The field is specifically lined for lacrosse, which makes practice more realistic, she said.

"The difference is night and day between what we've had," Loefller said. "In the past the field was a quarter of the size it should have been."

This year's success helped set goals for next year, Badgley said.

"I want to continue to build a program," Badgley said. "We have strong recruits coming in next year."

Gaining junior status is the team's ultimate goal, she said. The team has scheduled games with big name teams on the East coast next year in hopes of proving their ability to gain junior status, Badgley said.

"We have Northern NCAA teams offering to write letters of recommendation," Loefller said. "They're pushing for us to become a junior team."

BADGER

continued from page 8

Jagr was held to one goal during a six-minute stretch of time Monday night in a 4-1 loss to the Sabres that cut its Eastern Conference playoff hopes. Jagr said he was happy with the way he played, but he still feels he has to play better.

"I got injured right after he made those saves," Jagr said. "And it's made every thing a lot worse." Jagr said. "I don't think he should say that, he should tell me, it would make it easier on the team. He decided to say it in public and I respect it... Maybe he misunderstands, but I want the same thing he does."

Jagr said he hasn't spoken to Lemieux about the remarks.

"He's our leader; he's the owner, and he said Jagr has to play better if he wants to make an impact. I want the team to be the strongest it has ever been and other teams base their standards on that," Jagr said.

Standing at 6 feet 3 inches and 190 pounds, Badgley's family is in its first generation from Olanna, Africa. His African name "Koji Mema" is tattooed on his upper right arm. He says he gets all his strength from God and a Gre Nyme symbol meaning "With God" is tattooed on his upper left arm. Badgley said he also gets strength from his goddaughter A'Marria, Favor's almost-five-month-old baby girl.

Badgley said the main reason he is attending Cal Poly is the friendly people and the fast-tracking NBA program. He added that Cal Poly is a good university for a degree, particularly because of his choice was due to the fact that one of his three older brothers attended Cal Poly.

"I want to play on the Cal Poly track with a bang," Badgley said that he wants to keep reaching for them. I want to make an impact, I want the team to make an impact. I want the team to be the strongest it has ever been so other teams base their standards around us. I want to go out with people looking back saying 'Wow, that was a team'."

"You can take it as a compliment, or you can take it the other way that Mario's not happy with the way I was playing."

"Maybe I didn't play the way I should have played, or expected to play, but it wasn't that I wasn't working hard."

The Penguins initially described Jagr's injury as a charley horse, but NHL teams often don't disclose the exact nature of injuries to protect their players during the playoffs. Jagr said he is smiling at the sabre and "I'm just a happy-go-lucky guy."

Although Jagr didn't play, he said that he is happy with the way he played. Jagr said that he wants to play and make an impact. Badgley said that he wants to make an impact and he wants the team to be the strongest it has ever been.

When he isn’t spending time with his friends in Apr. 19 or caus­ ing in his 1997 mid-Toyota Eclipse named “Clipper Eclipse,” Andrew Badger is chasing his dream of becoming an Olympic athlete.

As the co-captain of the Cal Poly field and track team, this kinesi­ ology junior from Diamond Bar, Calif., is striving to compete in the triple jump at the 2004 Olympic Trials.

Cal Poly assistant coach Sheldon Blockburger said that Badger needs to jump about 53 feet, 6 inches in order to qualify for the trials, and he should be able to do that next year.

This season Badger has jumped 51 feet, 11 inches.

Blockburger also said that if things go Badger’s way, he will do well next year.

“If he trains hard this summer — like I told him he should do and he wants to do — then he should be able to be in the top eight in the nation next year and be All-America,” Blockburger said.

Badger is the reigning Big West Conference triple jump champion. His goals for this season are to re­ capture his triple jump title and take the long jump title for the first time.

“I want to have a solid mark in the triple jump and have a good sending for nationals,” he said.

“I’m slowly reaching new marks in the long jump … the national mark is not too far away for me, so we will see how that goes.”

Although Badger has long term goals, he said that he sets weekly goals with an open mind so there is room for improvement.

Currently, Badger does not qualify for NCAA Nationals, but is hoping to qualify at this weekend’s meet in Fresno.

One thing that may stand in the way of Badger’s dream of being an Olympian is his dislike for practicing.

“He likes to practice weights and running and running stairs, but he doesn’t like to actually jump in practice,” Blockburger said.

“So, that’s the big problem we have right now. The only time he gets good jumping sessions in is in meets right now, so the more meets he does, the better he will get.”

Badger said the reason he doesn’t like to practice is because it is hard on the leg muscles, but he knows he will only get better by practicing.

The track and field team competed in the CaliforniaNevada Championships in Irvine this past weekend.

Badger placed fourth in the long jump with his season’s personal best of 23 feet, 11 inches and placed second in the triple jump with a record of 51 feet, 5.5 inches. His personal best of 51 feet, 11 inches for the triple jump places him in the No. 3 slot for Cal Poly men’s track and field all-

### Lacrosse travels to Final Four

By Lyndsay Lundgren

Mustang Daily Staff Writer

It is their way with sticks that has the Cal Poly women’s lacrosse team on their way to the May 11 Final Four playoffs.

Last weekend they beat No. 1 Cal Poly women’s lacrosse team beat the UC Santa Barbara club team 15-3.

On Saturday they beat No. 1 Cal Poly team UC Berkeley at Berkeley.

At the Final Four playoffs, the team will compete against NCAA-ranked teams UC Berkeley, UC Davis and Stanford as well as club teams from across California. As a collegiate sport club, the women’s lacrosse team will face their toughest competition there, said team captain Suzanne Loeffler.

“Being able to play them as a club team says a lot in itself,” Loeffler said.

This year, the women’s lacrosse team has beat all the teams in their division by at least 10 points, Loeffler said. Their toughest competition is UC Davis, which is NCAA Division I, she said.

The team attributes much of their success to their dedication to the sport.

“We are a lot more dedicated than other club sports,” said Lauren Krencht, biology sophomore.

“We practice two and a half hours a day, all year round in opposed to other clubs.”

Not only does their practice pay off, but their friendships do as well, said coach Brandon Badgley.

“They connect well as a team, on and off the field,” Badgley said. “This helps communication on the field. You feel comfortable with the team that communicates this well only once in a while.”

A solid defense also strengthens the team, he said.

“This year the defense allowed only 3.8 points per game. The team’s dedication has affected each player individually, he said.

“Everyone wants to become a better player,” Badgley said. “There is no one thing is to win the key game. Don’t think about yourself, you don’t think about your health. The number one thing is to win the hockey game. You’ll do anything to get ready for the game, you’ll do anything to help you play.”

That’s why Jagr said he wishes he could have the Puneese Mario Lemieux hadn’t publicly challenged him before the Buffalo series, saying Jagr had to play better and be more of a leader for the team.

Jagr should be back for Penguins

PITTSBURGH (AP) — Jaromir Jagr expects to play Game 4 against Buffalo on Wednesday after missing the Pittsburgh Penguins’ last two games because of a strained right shoulder.

Jagr skated for about an hour Tuesday and said he felt much better than he did Monday, when the five­ time NHL scoring champion was in so much pain he couldn’t shoot the puck.

“The doctors and trainers are going to have to do something before the game, give me some painkillers or numb it. But I want to play,” Jagr said of a potentially pivotal game in which Pittsburgh could go up 3-1.

However, Jagr is wary about numb­ ing the shoulder because he wouldn’t know if he was further damaging it.

“Do some might cause him to miss the rest of the playoffs, possibly ending any chance Pittsburgh has to win the Stanley Cup.”

“That’s the risk I have to take right now,” he said. “In this situation, you don’t think about yourself, you don’t think about your health. The number one thing is to win the hockey game. You’ll do anything to get ready for the game, you’ll do anything to help you play.”

That’s why Jagr said he wishes he could have the Puneese Mario Lemieux hadn’t publicly challenged him before the Buffalo series, saying Jagr had to play better and be more of a leader for the team.

**Sports Trivia**

**Yesterday's Answer:**

Martina Navratilova won 18 Grand Slam tennis titles.

No one submitted the correct answer.

**Today's Question:**

Who is the only pitcher to give up 50 home runs in a season?

Please submit your trivia answer to reader@calpoly.edu. Please include your name. The first correct answer received via e-mail will be printed in the next issue of the paper.

**Briefs**

**Sakic may not play in Game 4**

Unsakic, Colorado’s captain and top scorer, could miss Game 4 of the Avalanche’s playoff series against the Los Angeles Kings on Wednesday because of a sore right shoulder.

Sakic, the NHL’s leading scorer this season, sat out prac­ tice Tuesday. He was injured when he was checked into the boards early in the first period of Colorado’s 4-3 victory Monday night.

Colorado coach Bob Hartley said Sakic’s shoulder was feeling much better than it was Monday, when he was replaced in the second period of the game by right wing Joe Sakic.

Hartley said Sakic was expected to play Tuesday and said he felt much better.

**Sakic’s owner-tomate Mario Lemieux had­ n’t publicly challenged him before the Buffalo series, saying Jagr had to play better and be more of a leader for the team.**
