Making a long-distance relationship work

By Laura Dietz
Mustang Daily Staff Writer

Autographs from Cal Poly basketball players, gift certificates to restaurants and a shot at a year's worth of free tuition are all up for grabs Saturday at Mott Madness.

The event is similar to Midnight Madness, a celebratory practice many colleges hold at 12:01 a.m. on the first day of a team's official practice. The event gets people excited about the upcoming season, said business senior Kari Duperron, one of the students coordinating the event as a senior project.

Mott Madness is designed to bring the basketball teams, students and the community together to kick off the basketball season, she said.

"We want to create awareness (about the team and the beginning of the season), build spirit and get students and the community together for a fun event," Duperron said.

Practices for the team have already begun, but the teams do not have their first games until Nov. 9 when they play an exhibition game, she said. Assistant athletic director Chris Baker, promotional representative for the Cal Poly athletics department, said Mott Madness is an opportunity for fans to get their first look at the men's and women's basketball teams for the upcoming season.

Duperron, who plays on the women's team, said it is a unique event for the teams as well as the fans in attendance.

"It's special because the two teams don't do many things together," she said. "Usually, we are away when (the men's team) is home."

The event begins with an autograph session at 7 p.m. in Mott Gym. The first 200 fans in the door receive a free Mott Madness T-shirt, Baker said. Students will also be given a ticket upon entry that could win them tuition for a year.

The games begin at 7:30 p.m. after the singing of the national anthem by one of the basketball

see MOTT, page 2
MOTT
continued from page 1

players. Next in the lineup of events is the sorority musical chairs game, with representatives from each sorority trying to make baskets and stay in the game, Duperron said. The basketball teams will be introduced by the coaches, practice some drills and the dance and stunt teams will perform, Baker said.

Following are several shooting competitions for fans to put their skills on the line and win a DVD player or gift certificates to Taco Bell or Carl’s Jr., Duperron said. In one of the competitions fans can test their skills by shooting three-pointers against some of the players.

There are also two events for children. The kids will race to see who can put on a basketball jersey the fastest and make it to the finish line. In the other activity, elementary school students in San Luis Obispo, Arroyo Grande and Arroyo Grande were asked to design an inbound play. The winner will be announced at Mott Madness, and if the selected student makes a shot from half-court, Baker said.

Duperron came up with the idea while working for the Cal Poly athletics department. "I play on the basketball team, and I wanted to do something to give back to Cal Poly because I got so much out of it," she said. Journalism senior Dena Horton and speech communication senior Jeff Wozniak are also working on the event as part of their senior project.

*Haunted House and Food Drive - Theta Chi is putting on a haunted house at 752 Palm St. from 5:30 to 8:30 p.m. tonight. It is for all ages, and the entry fee is two items of non-perishable Thanksgiving food.
*Cal Poly Choirs Performs - The Cal Poly Choirs will perform Nov. 2 in Harman Hall in the Christopher Cohan Center at 8 p.m.
*Travel and Vacation Fair - Nov. 2 at the Veteran's Hall from 11 a.m. to 3 p.m. there will be a presentation on traveling.
*March of Wellness - ASI Rec Center is offering a fitness program that provides alternative exercise opportunities. It is offered Monday through Wednesday from 5 to 6 p.m. Call 756-1366 for information.

Jefferson County sheriff's office by the families of three students wounded in the Columbine High School shooting.

Judge Lewis T. Babcock ruled in November that sheriff's officials had immunity to the suits brought by relatives of Richard Cantaldo, Sean Graves and Mark Taylor. He also found they had responded reasonably to the shootings.

The families alleged sheriff's office failed to investigate alleged threats and crimes by the Columbine gunman a year before the rampage and botched the response.

Babcock formally dismissed the suits on Friday. His order was made available Tuesday.

The judge allowed one Columbine lawsuit to proceed. The suit against the sheriff's office by the daughter of teacher Dave Sanders, who died, was settled in August for $1.5 million.

Powell sees path to Iraq - compromise with rest of U.N. Security Council

WASHINGTON - President Bush met with the U.N. chief weapons inspector Wednesday in a U.S. diplomat struggled to give the inspections team power to "carry out the will of the world community and disarm Saddam Hussein.

The meeting with chief U.N. weapons inspector Hans Blix and Mohamed ElBaradei of the International Atomic Energy Agency came as Secretary of State Colin Powell signaled a willingness to strike a compromise to get U.N. Security Council approval of a tough resolution on Iraq.

Powell said Tuesday "there may be a way" to bridge remaining differences between France, Russia and China on the draft proposed by the United States and Britain.

However, he said the resolution must warn Iraq of consequences if it refuses to agree to destroy its weapons.

"Otherwise," Powell said at a news conference, "Iraq will try to deceive and distract" the U.N. weapons inspectors who would go back to Iraq after four years to search for chemical and biological weapons and a nuclear weapons program.

Amid the tense diplomatic struggle, Bush welcomed Blix to the White House and thanked him for his service and stressed the importance of his mission, said White House Press Secretary Ari Fleischer.

International Briefs

Three-man crew lifts off for eight-day mission to international space station

BAIKONUR, Kazakhstan - Russia launched a rocket carrying two cosmonauts and a Belgian astronaut Wednesday to the international space station for an eight-day mission.

The Soyuz TMA spacecraft separated after an Oct. 15 accident at the Plesetsk cosmodrome in Russia, where an unmanned Soyuz-U rocket blew up within seconds of liftoff.

Space officials said this week that a foreign object was found in the rocket's fuel line, and the investigation was continuing.

But Russian space officials gave the space station mission the final go-ahead Tuesday, saying both the crew and their equipment were prepared for their mission.

Fighting fans cause stadium railing to collapse, dozens hurt

SAO PAULO, Brazil - Soccer fans fighting with police caused a stadium railing to collapse, sending dozens of people hurtling to the ground and injuring at least 30, officials said.

The accident began when fans scuffled and threw rocks at police before Monday night's game between Guarani and Ponte Preta in Campinas, about 55 miles from Sao Paulo.

In the melee, police trapped fans fighting with police, causing a stadium railing to collapse, sending dozens of people hurtling to the ground and injuring at least 30, officials said.

The accident brought the total to 119 killed, all but two from the gas.

A judge ordered the aide, Akmad Zakiyev, who was in Copenhagen attending a World Chechen Congress, jailed until Nov. 12 pending an investigation.

Two more Moscow hostages die from unidentified gas, death toll reaches at least 119

MOSCOW - Two more hostages freed from a Moscow theater died from the effects of a gas pumped in during their rescue, health officials said, as politicians praised the Kremlin's handling of the crisis despite the heavy death toll.

With the new deaths overnight in hospitals, there were contradictory reports over the total number of hostages killed during the stand-off.

Danish police said they detained a top aide to Chechen rebel President Aslan Maskhadov, after Russia sought his extradition, saying the rebel envoy was suspected of involvement in the hostage-taking as well as other terrorist attacks.

A judge ordered the aide, Akmad Zakiyev, who was in Copenhagen attending a World Chechen Congress, jailed until Nov. 12 pending an investigation.

Briefs compiled from The Associated Press by Mustang Daily news editor Andrea Coberly.
Professor recognized for work in construction field

By William Reitz

Cal Poly construction management professor Barbara Jackson was introduced to design-build in 1972 and instantly asked, "Why would you do it any other way?"

Her benchmark study that examined the state of design-build education at American universities recently won her a second Distinguished Design-Build Leadership Award from the Design-Build Institute of America.

The award was presented at the DBIA's 2001 conference in Boston. "This award is significant in that she was nominated by her peers," said Richard Zweifel, interim dean of the College of Architecture and Environmental Design. "Her original work in capturing the national perspective with regard to design-build education is indicative of her extraordinary success in bringing professional practice reality to her classroom instruction."

Design-build is a method of construction where the architect and builders work together as a team, from the project's conception to its completion. Previously, a design-build process was the norm, a process where there is a middleman between designer and construction.

Historically, architects and contractors have looked upon each other more as adversaries than as collaborators, with each readily remarking about the other's deficiencies, Jackson said.

"Unfortunately, this adversarial relationship appears to get initiated at the university—long before students enter the work force," Jackson said. "That's something we can change and influence in a positive way if we have a mind to, and if we can, then Cal Poly students will be better served. They will be in a better position to lead our industry."

Jackson's study revealed that the design-build method is progressing dramatically and independently. Research has shown that design-build, when compared with traditional design-build, is faster and less expensive, according to the DBIA Web site.

The use of design-build has grown from 5 percent of U.S. construction in 1985 to 33 percent in 1999, and is projected to surpass 50 percent construction in 2005, according to the Web site.

"It signifies that the design-build method is the trend of the future," Jackson said. "More than 88 four-year construction management programs exist at universities, and Cal Poly is one of only four that teaches a 'stand-alone' design-build course, exclusively based on design-build project delivery and management."

Jackson said Cal Poly is unique because it is the only university that houses the five disciplines of construction—management, architecture, architectural engineering, landscape architecture and city and regional planning—all in the same college.

"Because of this unique setup, we have a unique opportunity to provide an extraordinary educational experience not possible in other universities," Jackson said. "That's why I am excited about our new integrated project delivery minor that will be available to all students in the CAED and other design discipline majors, such as civil engineering, in fall 2003."

Although there are about four or five master's programs in design-build, Cal Poly will have the only undergraduate curriculum in design-build in the country.

As the creator of the design-build minor, Jackson said she is passionate advocate of the method.

"Who I wake up being in the morning is a design-builder...I love good design and I have a tremendous appreciation for what it takes to build complex structures," she said.

Jackson said she strongly encourages her students toward involvement in the Cal Poly DBIA student chapter, which she advises. In addition, Jackson said that 200 companies come to recruit Cal Poly students each year, but sometimes there are that many recruiters within each quarter. About 50 percent of students attend interviews to explore career options and gain insight into the field of construction.

When you consider working with Shell, you must have been thinking about the future — your future. And that's the kind of thinking we like. Or maybe you were pondering your dreams for challenge, responsibility and the chance to make a difference. Whatever you're after, a career with Shell can help make it happen. We offer outstanding national and international career prospects and professional security. If you're ready to meet the complex challenges of the energy and petrochemical industry, Shell may be the place for you.

Give some serious thought to the possibility of an exciting, challenging and rewarding career. Think Shell. We're interested in hearing from students in the following disciplines:

Petroleum Engineering Chemical Engineering Mechanical Engineering Electrical Engineering

Thinking about a better future? www.shell.com/careers

Shell Companies in the U.S. are equal opportunity employers. The affirmative expression "Shell" is used in this ad to refer to the Shell Companies in the U.S., which are separate and distinct entities.

Web site credited for success in BU sex sting

By Rochelle Hentges

THE PITT NEWS (UNIVERSITY OF PITTSBURGH)

(U-WIRE) PITTSBURGH - Researchers at University of Pittsburgh have created the first human embryonic stem cell line, something very few universities can claim.

In August 2001, President Bush said only 78 already existing embryonic stem cell lines would be approved for research funding. Gerald Schatten, head of the Pittsburgh Development Center, researchers have the ability to create any amount of the cell line which is part of the Male-Women's Research Institute at Pitt, said.

Only 78 cell lines are allowed for research because of the controversy surrounding human embryonic stem cells, Navara said. Some consider an embryo a human life, and cannot be morally destroyed. The acceptance of human embryonic stem cell research depends on an individual's definition of what a human embryo is. Bush's proclamation was a compromise that allowed researchers to only use cell lines that had previously existed because in-vitro fertilization, Navara said.

In-vitro fertilization involves fertilizing eggs outside of a woman's body. If more embryos begin to develop that are not needed, the extra embryos are removed and are donated for research if the donor consents. According to St. Hilaire, the majority of the cell lines that have been created to date have not been RU 486 women.

"Normally, it's people who are not affiliated with the university," St. Hilaire said. "Only a few people have been arrested that are affiliated." According to St. Hilaire, 10 reasons that individuals might frequent the CAS building is that it is a "public bathroom, a place where students feel a close proximity to the T." St. Hilaire said. "People just get off the T and corresponding.

Several members of the site recorded upon police presence in the CAS building. "Cops are investigating and patting the third floor of BU Arts and Sciences Building. That was to be expected, after all, I've seen a lot of security who are not of college age, just hanging around the urinals and toilets on that floor for hours on end," a March 2002 message read. "They stupidly acted like leeches or maybe they felt obvious in their intentions for homo sexual activity."

"The person would open the stall door and stare, if someone was looking at the stall next to them they'd use hand signals," St. Hilaire said. "They were basically trying, 'If you want it, I'm here.' Really no tactics were used in the undergraduate work, just common sense. We'd observe a person go into the bathroom and stay for a long time."

St. Hilaire said students should not be concerned for their safety in these bathrooms. "The issue doesn't involve public safety. I'd describe this more as a public nuisance and annoyance," he said. "If I just wanted to take it to the extreme, it can be a sexual harassment."

property peaked in the spring of 2002, according to St. Hilaire, and undergraduate police were put on high alert at that time.

"We looked into it and made several arrests, put plainclothes officers in, and since then the activity has subsided," St. Hilaire said. "The police department regularly sends out plainclothes for alcohol control, that type of thing."

St. Hilaire said undercover officers encountered men who were obvious in their intentions for homosexual activity. "The person would open the stall door and stare, if someone was looking at the stall next to them they'd use hand signals," St. Hilaire said. "They were basically trying, 'If you want it, I'm here.' Really no tactics were used in the undergraduate work, just common sense. We'd observe a person go into the bathroom and stay for a long time."

St. Hilaire said students should not be concerned for their safety in these bathrooms. "The issue doesn't involve public safety. I'd describe this more as a public nuisance and annoyance," he said. "If I just wanted to take it to the extreme, it can be a sexual harassment."
Halloween parties.

"In recent years, Isla Vista has gone back to a more peaceful town during Halloween," McKinny said. "Increased law enforcement has made things less out of control." For some residents, the new ordinance and increased law enforcement is both a blessing and a curse. "I used to come to party in Isla Vista before I was a student here," said Ashley Reede, Global Studies junior at UCSB and Isla Vista resident. "This place used to be out of control," she said. "Now that I live here I worry about my stuff getting wrecked. The new ordinance regarding music will put a damper on things and I don't think that there will be as many people coming to party as there has been in the past."

Couples have to remember what they're in it for. "Long distance isn't it," Hamhley said. "It's an investment and hopefully you're going to make it. I believe that if you can get through a long-distance relationship, there is no way that you are ever going to take each other for granted."

Even if couples talk daily and visit relatively often, it doesn't mean it's going to work out, Ryujin said. "The biggest rule is always similarity," he said. "Once you go away and start changing, you are no longer similar. Anytime there is a change in lifestyles, there is a change in the person."

There is a lack of communication and understanding, he said. "It's easy to meet people who are more like you in your surroundings," Ryujin said. "If similarity is the key, you are going to want to be with someone else and because of that, other people become more attractive."

Mintz agreed that sometimes she wishes she were with someone who went to Cal Poly because it would be so much easier to see the person. "I miss going out to lunch or having a boyfriend walk me to class," she said.

On the other hand, there are some positive aspects to having a long-distance relationship, she said. "(My boyfriend) and I are both incredibly busy, so it's kind of nice to have time for other parts of our life during the week," she said.

Ryujin said that an important aspect to a long-distance relationship is waiting until both people have finished changing and are in their set places.
I was reminded of those days last weekend when my friend Kyle and I made a trip out to a pumpkin patch. When we were finished tramping through the hay looking for the perfect pumpkin, we made our way up to the counter to pay for our purchase. At the counter there were no adults around; I only took one pack of M&Ms from the level in front of the dark house with a sign that read, "Please only take one." Kyle picked around for a second and chose the little yellow box of Dots. From the looks of the small amount of candy left in the jack-o-lantern, I can imagine that things haven't changed all that much on the candy aisle since I was a kid. I can remember those three candies cluttering up the bottom of my bag sometime around the second week in November.

After passing through the candy aisle at the grocery store in the last few weeks, I began to notice that the same old candy is there, but it has taken on new shapes. The same ingredients are repackaging into different forms. In an attempt to monopolize the Halloween candy business, Reese's has come out with many variations to the traditional peanut butter cup. In an attempt to monopolize the Halloween candy business, Reese's has come out with many variations to the traditional peanut butter cup. The traditional Tootsie Roll, Tootsie Rolls are now crispy, peanut butter and mini M&Ms, which take quite similar to the original.

No. 1 Reese's
Continuing with the trend of repackaging the same ingredients, M&M's has a new line of melt-in-your-mouth treats. A long time ago milk chocolate and peanut, there are now M&M's, crispy peanut butter and mini M&Ms, which taste quite similar to the original.

No. 2 Skittles
I love the sour Skittles this year in a new green package for Halloween. The new Skittles look and feel like a protein bar but don't let the name or taste fool you, it is not healthy. Reese's Sticks and, as if that is not enough, the pumpkin-shaped peanut butter cups.

No. 3 Tootsie Rolls
I love the sour Skittles this year in a new green package for Halloween. The new Skittles look and feel like a protein bar but don't let the name or taste fool you, it is not healthy. Reese's Sticks

No. 4 Three Musketeers
The saying used to be "All for one and one for all!" Now, looks of the new Musketeers' wrapper for Three Musketeers' Drinks the same candy ingredients into the Zlscentury with a more modern look.
Through the years, films stab, haunt and disemembowel to scare

By Jordan Schultz

1. CANDYMAN (1992)
• Doug: "Candyman" is both creepy and contains some shocking surprises. It's based on a short story by Clive Barker, probably the best horror writer working today, and it has a moving film score by famous minimalist composer Philip Glass. The film also treats some very interesting issues of gender and race.

2. SUSPIRIA (1977)
• My take: "Suspiria" is about an American dancer, Susy Bannoy, who travels to Europe to attend a prestigious ballet academy. Upon her arrival, a friend of hers has been brutally murdered. Susy and her new friend decide that the academy started to witness strange occurrences. They begin to uncover the director's dark past. Unfortunately, young women in the school seem to mysteriously "disappear" when they know too much.

3. TEXAS CHAINSAW MASSACRE (1974)
• My take: "Texas Chainsaw Massacre" begins as Sally, her invalid brother Franklin, and three other friends take a road trip to visit her great-grandmother in the rural Texas hill country. After a car accident, they are stranded in the woods and are attacked by Leatherface, a man of great stature who has special evil role. The movie's plot is unparallelled due to its assumed impossibility, is secret even to those closest to you, due to its assumed impossibility, is frightening. It is possible to see a man with a previously perfect life brought to his knees at the hands of alien beings. Although this scary movie is not a typical Halloween fright, in superb acting creates a fear of the unknown that could satisfy even the most bloodthirsty viewers. It is an example that shows that excessive violence and gore need not be present in the best slashers. For the most part, the movie effectively builds tension and good camouflage of the killer. It's my favorite of the six movies.

4. SCREAM (1996)
• My take: "Scream" focuses on Sidney, a teenage girl who is stalked by a knife-wielding masked man who proceeds to kill several of her classmates. The killing spree begins a year after the brutal rape and murder of Sidney's mother, which led her to believe that the same killer is still out there. Sidney is sexually frustrated by her boyfriend Billy because she is not interested in him any more and very desolate destination is supremely spooky. The appearance of Leatherface, wearing a mask of human flesh, is truly terrifying. He is a rather wholesome and good-looking man, and is very different from other menacing characters in horror films in terms of its pace (sometimes extremely slow) and atmosphere (supremely spooky set design).

My take: "Suspiria" is about an American dancer, Susy Bannoy, who travels to Europe to attend a prestigious ballet academy. Upon her arrival, a friend of hers has been brutally murdered. Susy and her new friend decide that the academy started to witness strange occurrences. They begin to uncover the director's dark past. Unfortunately, young women in the school seem to mysteriously "disappear" when they know too much.

I really thought this movie had the potential to be great. The music was exciting, especially the parts played by Dario Argento and his extremely talented and gore need not be present in the best slashers. For the most part, the movie effectively builds tension and is very different from other menacing characters in horror films in terms of its pace (sometimes extremely slow) and atmosphere (supremely spooky set design).

The music was exciting, especially the parts played by Dario Argento and his extremely talented and gore need not be present in the best slashers. For the most part, the movie effectively builds tension and is very different from other menacing characters in horror films in terms of its pace (sometimes extremely slow) and atmosphere (supremely spooky set design).

My take: "Suspiria" is about an American dancer, Susy Bannoy, who travels to Europe to attend a prestigious ballet academy. Upon her arrival, a friend of hers has been brutally murdered. Susy and her new friend decide that the academy started to witness strange occurrences. They begin to uncover the director's dark past. Unfortunately, young women in the school seem to mysteriously "disappear" when they know too much.

I really thought this movie had the potential to be great. The music was exciting, especially the parts played by Dario Argento and his extremely talented and gore need not be present in the best slashers. For the most part, the movie effectively builds tension and is very different from other menacing characters in horror films in terms of its pace (sometimes extremely slow) and atmosphere (supremely spooky set design).
Scary music in the evil eye of the beholder

By Stephen Harvey

Today is Halloween, and all minds are turning to things that scare people. Some folks are looking for creepy masks or freaky decorations, but one source of fright is often overlooked by many people. It is music, which can create an ambiance scariest than any rubber mask or fake spider.

Scary music is always playing in the background of a horror film, it sets the tone of the scene as much as lighting and set design. Films don't normally feature pop music right before someone dies.

The origin of scary music came into being in the 1960s and 1970s with bands like Black Sabbath and Alice Cooper.

The definition of scary music is somewhat muddled, but Black Sabbath is a good example of its entity form. The band was one of the originators of heavy metal and was influential in defining and developing the genre.

The group took the blues-rock sound of late 1960s in a new direction, giving birth to a musical style that continues to attract millions of fans decades later. The hardcore sound of late 1960s paved the way for pasty music in black rock life. The music consists of lyrics about killing virgins, drinking blood, performing animal sacrifices and similar acts. He said that he had even heard of a group called Emperor, whose lead singer killed someone, ate the person's brain and then committed suicide. "I thought that was pretty scary," Bahman said.

Bienenfeld said she thought black metal is pretty tame and fabricated.

"I think he's pretty intelligent if you listen to his lyrics," Bahman said.

Bahrenfeld said she thought black metal is pretty tame and fabricated. "It's pure noise," Bahman said.

It's kind of sexy," Bahman said.

Bahrenfeld said that after listening to music, Bahman said, is black metal. It's kind of sexy," Bahman said.

Video Review

Evil ETs in 'Bad Taste'

In one of the grossest movies of all time, it's the Kiwis vs. the "intergalactic wankers" in Peter Jackson's debut film about an alien fast food chain bent on harvesting the entire human race. When aliens invade a coastal New Zealand suburb in search of human flesh, the government dispatches a four-man task force to thwart the aliens' plan.

Within the first five minutes, we see an alien's brain being severed-complete with a close-up shot of gripping gray matter and gushing arteries. As if the repulsive images could go any higher, there's even a sequence in which a man drinks a punch bowl filled with vomit.

"Bad Taste" provides a great case study in make-up and special effects showcasing Jackson's talent for visual storytelling—a talent which ultimately earned him the credibility to direct the epic "Lord of the Rings" trilogy. A true storytelling-a talent which ultimately earned him the credibility to direct the epic "Lord of the Rings" trilogy. A true tale of how Jackson succeeded in making a good film from a low-budget movie."I don't really think there is anything scary about it," Bahman said. "I think he's pretty intelligent if you listen to his lyrics," Bahman said.
Letters to the editor

Yosemite doesn't have to sap funds

Editor,

As an avid reader of outdoor literature, I was greatly amused by Rebecca Howes' Tuesday article ("Hiking and camping on the cheap at Yosemite Valley.") I was greatly amused by it and am not looking for a girlfriend" speech. You suddenly need to prove that you are not a total wimp, that everything that, ironically, you look more desperate than you might have before! And if you're on the giving end of this speech, I get news for you Chief. You're only hurting yourself.

This brings me to the subject of saltiness. To be salty is to ruin game, either your's or someone else's. Think of it this way. Your game is like ice, cool and smooth. But, as we know from fifth grade science, salt melts ice. Examples? You're watching a movie with a girl, about to kiss and in walks your roommate to hand her back! The damage done is more than a brained ego or a mac and cheese tummy ache; we go from fiery and confident to defensive and insulted. You suddenly need to prove that you are not a super-cool, everything that, ironically, you look more desperate than you might have before! And if you're on the giving end of this speech, I get news for you Chief. You're only hurting yourself.

A New C-4 Class for Winter Quarter
HUMANITIES X335: FANTICISM
Tues and Thurs 2-4
Taught by Professor Paul Miklowitz

Since September 11, fanaticism has dramatically emerged as the principal threat to the security of the world's one remaining "superpower." What was previously an interesting but marginal phenomenon is suddenly the subject of headlines every day, no longer an exotic aberration Americans can afford to ignore.

But what is fanaticism? Is it entirely irrational, or does it have its own kind of "logic"? If the fanatic's agenda can be defended by means of "reason," how do we rescue reason from such infamy? Or should we even try? Is the "modern" faith in reason as the guarantor of liberty and justice for all...old hat?! What is the relation between rational "truth" and irrational conviction? Between reason and faith? And if faith can make legitimate claims on our credulity, what becomes of "truth"?

HUMANITIES X335 FANTICISM will address these and related questions from an interdisciplinary perspective. Building on the philosophical foundations upon which such questions must rest, we will also look at literature, drama, film, and even some bizarre unclassifiable texts in order to better understand the perversive appeal of the fanatic's passionate intensity when the best in contemporary Western culture seem to lack all conviction.

man, he set out to train hard and prove himself as a Mustang athlete.

"It's a pleasant surprise," he's been running really well. As he keeps learning about the sport, we can only see what happens.

Mark Conover
cross country coach

With a smile, he recalls his best race, which he ran last year as a freshman. When he entered the USA Junior Nationals, no one had ever heard of him, but he immediately made a name for himself with a second-place finish and a new personal best by 10 sec- onds.

He finished third overall at the Riverside Invitational with a time of 24:37.5 on the 8K course.

"Andy Coughlin fin- ished 10th overall at the Stanford Invitational with a time of 24:09 on the 8K course.

磁场

also had a top-20 finish, ending up in a tie for 16th place. He shot rounds of 73, 76 and 80 for a total of 229. Fellow Mustang Ryan Dwight fin- ished at 15-over 231, while Tyler Svanfeldt finished at 22-over par and Richard Griswold was 25-over par.

The men's golf team will conclude their fall season at the 49er Classic hosted by Long Beach State at the SCIJA course in Calimesa. The 49er Classic will begin on Thursday and conclude on Friday.

Women's Golf

CS Northridge wins

Cal Poly Invite

SAN LUIS OBISPO — The Cal Northridge women's golf team took home top honors at the Cal Poly Invitational Tuesday for the second straight year.

Northridge's Emma Walgren was the medalist with a final round of 74 and a two-round tournament total of 150 on the par 71, 5,947-yard Avila Beach Resort Golf Course. Host Cal Poly finished in third place (663), three shots back of second-place UC Riverside. Rebecca Norris was the top Mustang golfer, in sixth place (672). Cal Poly's Gina Drags, competing as an individual, finished tied for fourth (159). Drags was tied for first after Monday's play with a first-round 67.

Staci Division and Megan Ross finished in a tie for ninth (165) for the Mustangs after final rounds of 83 and 84.

Coughlin begins with a shakeout run to get his legs warmed up, followed by a bowl of Cheerios.

"When I'm running I make sure I know the leader in sight, and I think about how good I'll feel after I finish a race," he said.

Outside of training, racing and school, he finds time to hang out with friends and is involved with Campus Crusade for Christ and Athletes in Action.

"A race is a lot like life," Coughlin said. "It can be a lot of hard work, and hopefully it will pay off in the end."

Coughlin said that the men's cross country team is skilled and has what it takes to win the Big West.

"It's nice to finally get some recognition, because I have been working pretty hard," Coughlin said.

Andy Coughlin
cross country runner

Conference and do well at nationals. As for himself, he wants to finish in the top 50 at nationals. "It's nice to finally get some recognition, because I have been working pretty hard," Coughlin said. "It's letting people know that Cal Poly is one"

"He went home to Wyoming and put in a good summer of training, having the advantage of running in the moun- tains," Conover said.

Now a sophomore, Coughlin trains with the senior team members and enjoying the long runs past agricul- tural land, up Steenner Creek Road and through the trees and valley of San Luis Obispo.

The team's weekly preparation for race days also includes hill runs, flexibility routines, weights and Pilates.

The men's cross country team is skilled and has what it takes to win the Big West. Coughlin will be joining his team- mates at the Big West Championships in Riverside this Saturday.

Men's and Women's Basketball
Mott Madness set for Saturday night
CAL POLY SPORTS INFORMATION REPORT

The Cal Poly men's and women's basketball teams will kick off their 2002-03 season with the inaugural Mott Madness. The event will be held Saturday in Mott Gym. Doors will open at 7 p.m., with the event beginning at 7:30 p.m.

The Mustangs are designed to be a free, fun-filled night for students and the community. It is a chance to meet this year's Mustangs, including the coaches, in addition to participating in activities and watching the teams run through drills. Prizes include T-shirts, gift certificates and a new DVD player.

Andre Nestle: Sophomore forward

By Rachelle Ackley
SCORING INFO. 11/01/02

A little over a year ago, a civil engineering freshman from Wyoming decided to try out for the Cal Poly men's cross country team. After six weeks of training with the team, he became a NCAA Division I athlete.

Now, he's the team's pace-setter. Andy Coughlin won the Big West Cross Country Male Athlete of the Week for two consecutive weeks earlier this season, and he hopes to guide the cross country team to a first place finish at the Big West Championships this weekend in Riverside.

"A race is a lot like life. It can be a lot of hard work, and hopefully it will pay off in the end." Andy Coughlin cross country runner

He received the first honor after his performance at the University of California at Riverside Invitational, in which he finished third overall with a time of 24:37.5 on the 8K course.

The next week, he led the Mustangs to a second place finish at the Stanford Invitational, finishing 10th overall with a time of 24:09 on the 8K course.

"There was a pleasant surprise, he's been running really well," cross country coach Mark Conover said. "As he keeps learning about the sport, we can only see what happens."

Coughlin remembers entering his first 5K race with his father and doing well for his age group. Although he continued to run through junior high, he stepped after his freshman year of high school because of an ankle injury. However, he returned to the team his senior year and placed second in the two-mile at the Wyoming State Track and Field Championships. As a redshirt freshman, Coughlin was named Athlete of the Week for two consecutive weeks this season.

Cal Poly Tennis

Men, women bow out of tournament

By Sports editor Jacob Jackson

CAL POLY SPORTS INFORMATION REPORT

Three Cal Poly men's tennis players made it to the third round of the consolation bracket yesterday at the ITA Regional Championships, held at Saint Mary's College in Moraga. Andy Coughlin won the Big West Cross Country Male Athlete of the Week for two consecutive weeks this season.

Junior Davey Jones won his first round match at the ITA Regional Championships before falling to Matt Martin of Stanford, the No. 1 seed, 6-1, 6-1, in the quarterfinals. Jones is the winnigest active coach among the Mustangs' 20 NCAA sports teams. Cal Poly has had only one losing season (2001) during his tenure.

TRIVIA

Cal Poly Tennis

Men, women bow out of tournament

By Sports editor Jacob Jackson

Three Cal Poly men's tennis players made it to the third round of the consolation bracket yesterday at the ITA Regional Championships, held at Saint Mary's College in Moraga.

Senior Greg Levy landed wins over Sac State's J.J. Whittington (6-3, 6-2) and Santa Clara's Frederico Lucens (6-1, 7-6, 6-3) before losing to Pacific's Maxine Martini (6-1, 5-7, 6-3). Levy lost to Jeff King of Cal, 7-6 (7-4), 7-5, 6-1

Junior Stacy Meronoff won his first match in straight sets before dropping to Jeff King of Cal, 7-6 (7-4), 7-5, 6-1. Junior Rick Tracy took a win off of USF's Axel Elvik with scores of 5-7, 7-6 (3), and 6-3.

Tracy then lost in the third round to Thomas Berti of Oregon, 6-2, 6-1, 6-2.

In second-round doubles action, Cal Poly's Mike Marquez and Stacy Meronoff were defeated 8-6 Tuesday by University of Washington's An Straub and Alex Vlaski. Marquez and Meronoff had reached the round of 16 by defeating Brett Birtner and Rady Luchter of Nevada-Reno in Monday's first round.

The Mustangs have completed their fall season and will start their spring season on Jan. 11 at Peppin University.

The Cal Poly women's tennis team also had several strong performances over the weekend. The Mustangs competed at the ITA Regional Championships in Palo Alto.

Three Cal Poly women's tennis players were still alive in the consolation bracket of singles competition at the Omni Hotel ITA Northeast Regional Championships at Stanford University, after Saturday's play. But they were eliminated Sunday at the Tadue Family Tennis Stadium.

Chelsi Thompson won her fourth-round match in the consolation bracket against Monica Giansy of Oregon 6-4, 6-1, then was ousted in the quarterfinal round by Idaho's Vida Serci 6-2, 6-0.

B Crimson and Kai Roman of Cal Poly were eliminated in the fourth round of the consolation bracket. Damm fell 6-4, 6-4, 6-1 to Santa Clara's Catherine
