Or buds have answers

CM to get new building, dept. head

By Carly Haselhuhn  
MUSTANG DAILY STAFF WRITER

The Cal Poly Construction Management Department is under construction, but instead of orange cones and stalled traffic, a new department head will tighten the department's plans for a new building on campus, at least half of which will belong to the CM department.

Allan Hauck is a familiar name to many faculty on campus, though unknown to most students. The recently appointed department head wears a doctorate in construction management and 30 years experience in the field. Most of Hauck's time will be spent fund-raising and planning for the new building site, which will go in place of the old "air conditioning" building. Since the preliminary drawing phase of the project was approved with Proposition 47, the next year will be spent fund raising within the construction industry.

The design is expected to take

"Rebound is a problem you run into as the alcohol wears off," Rahmin said. "Basically it is like a withdrawal system from the alcohol. After falling asleep two or three hours later you rebound up and sleep is interrupted. You receive very poor sleep from that." Controlling this vicious cycle of parting and losing sleep can eventually start to affect learning skills and even brain cells. Drinking alcohol before bed-time can also cause sleep deprivation or lead to other serious sleep problems later on in life, according to the NIAAA Web-site.

Hispanic and members from all back­grounds," said Raymond Macarena, vice president of community service. Macareno is also the chair of the committee Partnership in Raza (mean­ing:"all races") Involvement. Other committees cover such topics as fund-raising, banquet organization, net­work­ing with local businesses, volunteer­ing at local organizations, recruiting and professional development. Though business-oriented, HBSA is open to students from all majors.
"The club is growing," Macareno said. "We have a lot of potential." The HBBSA meets every Thursday from 11 a.m. to noon in the business building, room 205. For more informa­tion, go to hbsa0.tripxml.com.

CRIME ROUND-UP
Jan. 6: A B.B. shot through a window of the lobby area of the Performing Arts Center left a small hole in the glass.

Jan. 7: A $500 projector bulb was discovered miss­ing in room 219 of the English building. Police said the theft likely happened during winter break.

Jan. 8: A bomb threat note was found in a distribu­tion box in the computer science building. Campus police dismissed the threat as a prank because it was nonspecific.

Jan. 9: Three vandalism incidents involving paint occurred throughout campus: Rainbow-colored handprints were found in the Dexter building near the pottery lab stairs, green dots were spray painted to concrete window frames on the south side of the library, and green paint handprints were found lead­ing from building 53 to the sidewalk.

Jan. 10: San Luis Obispo Police officers arrested a 40-year-old man of San Luis Obispo for an outstanding warrant charging drug offenses. He was charged with being under the influence of a controlled substance and possessing methamphetamine for sale. Officers were drawn to a local motel room and observed activity suggestive of drug sales. During the investigation officers recovered more than an ounce of methamphetamine or Crystal Meth and numer­ous items of drug paraphernalia. The man was taken to SLO County Jail and bail was set at $10,000.

Jan. 11: The smell of marijuana gave campus police a reason to enter Sequoia Hall. A campus resident was arrested for giving false information to a police officer.

Jan. 12: Two students from Muir Hall and another from Tenaya Hall were issued citations for being minors in poss­ession of alcohol. Campus police found the students behind the water tower in the R-1 parking lot.

Jan. 13: Three students were sted for smoking marijuana at the water tower in the R-1 parking lot. Two of the stu­dents were residents from Lassen Hall and the other from Santa Lucia Hall.
California governor calls special session to speed Coastal Commission bill

SACRAMENTO — Gov. Gray Davis called a special legislative session Wednesday to enable lawmakers to push for a bill that would strengthen the Coastal Commission's legislative authority, a top nuclear inspector said.

"We'll see if that happens," Blix said. U.N. officials hope the scientists will be more candid without Iraqi liaison officers listening to the interviews.

Bush administration officials have in recent days broken their preference for Iraqi President Saddam Hussein to flee into exile, and have said they would consider offering an amnesty for war crimes committed by senior Iraqi officials.

Strong quake shakes central Mexico; 24 people killed

GUADALAJARA, Mexico — A powerful earthquake ripped through western and central Mexico, killing at least 24 people and injuring at least 175, as dozens of houses and buildings collapsed and church bells were knocked from their steeples.

The death toll continued to rise Wednesday as yellow-suited emergency crews were shown on television digging through wreckage and pulling out victims on stretchers.

In Mexico's second largest city, Guadalajara, 100 miles to the north, dozens of homes partially collapsed, and at least 20 people were injured by falling bricks and beams.

Mexico's national seismological service put the quake's magnitude at 7.6, but the U.S. Geological Survey calculated it at 7.8 at a depth of 20.5 miles. A magnitude 7 quake is capable of causing widespread, heavy damage.

"Because of the size of the earthquake and its shallow depth, USGS is expecting a significant death toll," said U.S. Geological Survey spokesman Butch Kinemath.

Adan de la Paz of the Mexican Red Cross said 21 people had died in Colima state. In neighboring Jalisco state, two people were killed — an 85-year-old woman who was crushed by a wall as she fled her home and a 1-year-old girl who died in the same town, Zapotlan.

The Mexican government declared a state of emergency in Colima, where officials were slow working to restore electricity and telephone service.

Saoudi report arrest of suspect in ambush of two Americans in Kuwait

DUBAI, United Arab Emirates — Saudi Arabi officials confirmed Wednesday they arrested a Kuwaiti suspected of killing one American and critically wounding another in an ambush in Kuwait, the official Saudi Press Agency reported.

The agency quoted an unidentified Saudi Interior Ministry official as saying the Kuwaiti, who was not named, was arrested early Wednesday "sneaking into Saudi Arabia from Kuwait."

"The initial investigation revealed that he was the assailant who fired on the American citizens on Tuesday," the report said.

A Kuwaiti government spokesman said he would not comment on the report until later Thursday.

The two Americans, both civilian contractors working for the U.S. military, were ambushed Tuesday near Camp Doha, about 10 miles west of Kuwait City. Police said a gunman hiding behind a hedge shot 1 mile from the base opened fire with a Kalashnikov on the Americans' vehicle while it was at a stoplight.

One of them, David Caraway, was a stable condition Wednesday at al-Rai hospital in Kuwait City. His co-worker Michael Rene Pouliot, 46, was killed in the attack.

The shooting was the first against U.S. civilians in Kuwait and the third on Americans since October in the oil-rich emirate, where pro-American sentiment is usually strong and where thousands of U.S. troops are assembling for a possible war on Iraq.

Increasing age, decreasing love interests

Today is my birthday. My 53rd. A mark the start of my 22nd on Earth and I've grown increasingly uneasy about my birthdays. When I was young, the cakes were spraying and butter was the best thing that could happen to parties fully elaborate. But now I find myself ruminating on Angel with Cool Whip topping. I asked for a boring and necessary gifts, like cash or even electric toothbrushes. Extravagant, they have a birthday? I reject them all. But, every time they have a birthday?

Parents should do their own editing — stand in front of the TV (my mom did it) or talk to your children about the questionable material they hear or see; don't let CleanFlicks "editors" do your dirty work.

Let's lay a goal to strive for — maintaining high moral values through movies. Though it's been said and done and again amid the heated censorship debate, parents and educators really should be the ones responsible for maintaining moral values in children and themselves. We shouldn't look toward any source of media for that kind of learning, especially considering the slanted opinions transmitted via the media every day.

Parents should do their own editing — stand in front of the TV (my mom did it) or talk to your children about the questionable material they hear or see; don't let CleanFlicks "editors" do your dirty work.

At $26.95 to $56.95 a pop, is that such a hard thing to avoid doing? But at least CleanFlicks and its proponents are building their own moralistic movie community, rather than trying to censor all movies to the levels of love such necessary objectionable elements.

Carly Haselhuhn is a journalism junior and Mustang Daily staff writer.

**Cal Poly students should realize that no matter how paranoid the media makes you feel, what the government is actually doing is far worse than you can possibly imagine.** American foreign policy shows that since 1945, the United States has attempted to overthrow more than 35 foreign governments and to suppress more than 20 popular revolutions being waged against repressive regimes.
Non-profit campus program provides homes, care for cats

By Lesley Reo

An elderly white cat named Grandma perches on the front window sill. Jessie, a black cat with bright eyes and unusual fangs, reclines in a corner alongside Sophie, the resident kitty princess. Young brothers Jimmy and Buffett play with each other as well as their fellow feline inhabitants. All of these cats, plus eight others, live in the campus cat shelter, established and supported by the Cal Poly Cat Program.

The CPCP is a volunteer/non-profit organization that strives to sustain a healthy and manageable campus cat population, aid adoption efforts for found and rescued animals and provide information on proper animal care for students and other interested parties. Additionally, the group maintains the unique campus cat shelter, which simulates a home environment for the animals, as well as 12 feeding stations located throughout the campus.

The program currently has about 400 cats in the past 10 years, said Edie Griffin-Shaw, CPCP executive director and volunteer coordinator. "The program has definitely been a success," she added. "The CPCP has reduced the campus cat population to about 40."

"We've adopted out more than 400 cats in the past 10 years," said Griffin-Shaw. Facilities work coordinator Jane Simonson adopted a cat from the CPCP about three weeks ago as a New Year's present for herself and her husband. Her new pet, Jack, a black and white cat with a docked tail, has joined her other two cats at home.

"I met so many wonderful cats at the shelter and I couldn't get them out of my mind," Simonson said. "There are some really great cat personalities there."

On top of maintaining healthy cats and providing loving homes for them, CPCP also offers students, faculty and staff an opportunity to "learn-by-doing."

"Students have not only helped create the CPCP, but they also continue to support it," said Edie Griffin-Shaw at 756-5220.

"They probably could have helped us more, but they did. The student received a 'B' in the class."

Reconsidering grades is only one of the issues that the Ombuds program frequently deals with, said DeCosta. "We then brought the grievance before the professor and asked that the professor give reconsideration as to why he gave the grade that he did. The student received a 'B' in the class."

General engineering sophomore Matt Hannah recently dealt with a conflict while attempting to switch majors. "I asked the dean of my college if it would be alright to start taking classes in the major I was trying to switch into and he said that he would make sure it was OK," Hannah said. "A few weeks later he received a letter informing him that he was on academic probation for not taking classes in his major."

"It would have been helpful to know about the Ombuds program during that time," Hannah said. "They probably could have helped me make a smooth transition and save a lot of time instead of having to try and take care of the misunderstanding myself."

The Ombuds program does get keep record of names, affiliations, grievances brought forth to ensure the confidentiality. "DeCosta emphasized the importance of coming in as quickly as possible with a problem."

"Grades, records and paper work get lost," DeCosta said. "The sooner that the student, faculty or staff member comes in, the more likely it will be that the problem can still be resolved."

The Ombuds program provides assistance with informal conflict resolution, it does not provide legal advice, psychological counseling, make decisions on issues or represent campus members in any formal hearings or procedures.

The Ombuds office in the Cal Poly Health Center, building 27, room 113 or call 756-6770.

**Activists convene in D.C. to protest war**

By Andrew Kaplan

MICHIGAN DAILY (U. MICHIGAN)

(UM-DIARE) Washington, D.C. — In the wake of escalating talks of preemptive military strikes, an estimated 200,000 activists, including dozens of University of Michigan students, gathered at the Capitol Saturday to protest a future war in Iraq.

The university's International advocacy coalition Act Now to Stop War & End Racism orchestrated the March on Washington, which began with a collection of speakers in front of the Capitol and ended with a march to the Navy Yard — a military harbor for warships — in the afternoon.

While thousands marched to the Navy Yard, protests occurred in 30 other countries, including England, Japan and Brazil. In San Francisco, another 200,000 protesters marched against the war.

Protesters expressed several different motives for their opposition to a war, but many agreed that a war would cripple the U.S. economy and kill thousands of innocent civilians — American and Iraqis.

"Civil liberties are slowly getting repressed," said Anti-War Coalition member Fariel Ibrahim. "It's vastly becoming un-American."

Ibrahim joined several hundred students in a separate march from John Marshall Park earlier that morning, along with university students from the Anti-War Action! and performing arts group, Watchdog.

"We have chosen to come here to let our opposition to the war be known to leaders in D.C. and to the general population," said Yochi Zakai, a sophomore in the School of Natural Resources and AWA organizer.

"This is not just a couple of radicals, but a mainstream movement of thousands of people," he added, as group members assisted him in inflating a large missile that read "False Security" on one side and "This Is Not The Answer" on the other.

Before marching southeast down Pennsylvania Avenue, protesters assembled with signs to hear popular speakers declare motions for peace.

"Let's choose minds over missiles and negotiation over confrontation," said the Rev. Jesse Jackson in his speech on the Mall. "We must stop mindless foreign policy and give peace a chance."

U.S. Rep. John Conyers, D-Mich., said billions of dollars would be squandered on a war that could otherwise be used to shore up the economy.

"Risking all this makes no sense when there is no imminent threat," he said. "It was Dr. King who spoke out against the Vietnamese war, and like the Vietnamese war, Iraq would be a major error."

In addition to marching at the rally, student protesters collaborated at The George Washington University to set long-term goals for resisting war.
Segregation on rise in American schools, Harvard study finds

By Douglas G. Mulliken

CAMBRIDGE, Mass. — As minority populations in America's public schools continue to climb, schools across the country are becoming increasingly segregated, according to a report released Thursday by Harvard University's Civil Rights Project.

According to the report, released to coincide with the Martin Luther King Jr. holidays, 44 percent of high schools have almost entirely black student populations, and only 14 percent of white students attend schools with significant minority numbers.

The authors point to this "segregation" as a grave threat to the nation's school system at a time when 40 percent of all public school students are minorities. In highly multicultural areas, such as the South and the West, that percentage increases to nearly half of all students.

"Public school enrollment in the year 2000 was more non-white than it has ever been, and black students are more segregated than they have been in the past 30 years," said Erica Frankenberg, one of the study's authors.

The study found that desegregation reached its peak in the late 1980s and has since rapidly retreated. Currently, one-sixth of the country's black students are educated in schools that are almost completely non-white. In the Northeast and Midwest, the proportion rose to one-fourth of all black students. These schools, which the report calls "separate schools," often suffer from poverty, limited resources and a variety of social and health problems.

"What students need to realize is that they are living through a period like the end of the Reconstruction when rights of minorities in the country are being interpreted away by our courts," Harvard professor of education and social policy Gary A. Orfield wrote in an e-mail, "and in which the country is moving toward greater inequality and more reinforcement of social and economic privilege." Orfield and the report's other authors blame the problem chiefly on three Supreme Court decisions of the early '90s that lowered the standards for what is necessary to be considered a desegregated school. Since that time, lower courts have found that school districts throughout the nation have met the new standard.

When desegregation laws were passed in the 1960s, school districts were forced to separate children from one part of the district to another to maintain a satisfactory level of integration in each school. The high court rulings in the early '90s mean that schools no longer need to bus children.

Although busing met with fierce opposition in some cities, Frankenberg said that on the whole these policies worked and gained public support.

A Mustang Daily reporter explores the mis-spelled food phenomenon.

Is malicious deception, or just good marketing?

STORY BY
STEVE HILL

PHOTO BY
KAORI TAKEKO SHI
Hey, there's no 'Z' in cheese. Strolling the aisles of your local grocery can be confusing without the aid of spellcheck.

As the automatic door welcomed me into my neighborhood grocery store, the fluorescent lights overhead shone down upon my shopping list, creating a brilliant halo that now blanketed this near-holy ledger. Scrawled upon this sacred paper were the missions that were to be accomplished on this daunting excursion:
- Cereal
- Pasta
- Snack foods
- Maxim

Ah, yes, only the essentials.

Up and down the aisles I cruised with my trusty steed (aka shopping cart), whose front right wheel had a mind of its own. As I collected the various treasures of my quest, I began to notice an odd, disconcerting trend. And it all began with a friendly toast.

Froot Loops. Cheer Whiz: Nilla Wafers. What seems to be the common thread here?

All of the main "ingredients" of these delicacies (fruit, cheese, vanilla) are spelled wrong. I was surrounded by misspelled products!

My head was spinning. As a journalism major, I couldn't handle the typo (OK, I really didn't care that much - that's what the editors are for), but I soon began to think on a deeper, more socially-conscious level.

What could be the ramifications of these misspellings? Could the general consumer be misled about the nutritional content - or lack thereof - that they were receiving because of these Oversight?

Distraught, I consulted Dorothy, the cashier who guided me through this trek.

"That's all part about advertising," Dorothy, a 13-year veteran checker, said confidently. "It's called subliminal messaging. It's whatever the eye catches, and that's what makes it sell. That's why the big companies, they actually pay for (eye level) spots on the shelves.

Dorothy didn't really answer my question, but she gave me the start I needed to unlock the mystery behind these products. Next, I needed to examine the ingredients of these foods to find out if there was any real food in them.

And by real, I mean anything that doesn't begin with "momo" or is preceded by the word "hydrogenated."

The first food I examined was Froot Loops. Corn, wheat, partially hydrogenated vegetable oil. The only mention of fruit here are the "natural orange, lemon, cherry, raspberries, blueberry, lime and other natural flavors."

No mention of actual fruit.

Something tells me that when these so-called "natural" flavors are followed by colors that have numbers next to them (red number 40, blue number 2), this stuff isn't going to show up on the shelves of New Frontiers.

Next victim, food: Nilla Wafers. To Nabisco's credit, the company does not try to fool the consumer by listing "natural" flavors in the ingredients section. In fact, there is no mention of actual vanilla except for in a recipe on the side of the box that calls for a half teaspoon of the flavoring.

But the wafers do contain plenty of wonderful "Nilla.

Cheer Whiz and Cheer-It (no "s") crackers both mention "cheese cultures" on their boxes. I am going to claim ignorance on this one - are cheese cultures grown in a lab? - but I will give credit to Cheer-It for listing "dried milk cheese" as contributing to this delectable snack. Finally, the first hint at real food!

So is this phonetic emphasis in place to aid the grammatically-challenged, or is it the result of an evil conspiracy, spearheaded by the major food corporations, to push more product?

In an effort to get the answers, I contacted marketing representatives for Kellogg's, the maker of Froot Loops, who were unavailable to comment. However, a customer service representative did say that "That's just the way that we choose...to spell it."

Norm Bonin Phd., a Col Poly marketing professor, was able to shed some light on the companies' points of view.

"In advertising, they (large corporations) have to be very careful about deceptive advertising," he said. "But in this particular case, like Froot Loops, I don't think the common or average person would be misled to believe that there's actual fruit in there."

Norm also pointed out how difficult it is for a consumer to prove deceptive advertising, since it entails proving that the consumer was misled to the point of making a decision that would be to his or her detriment.

Dr. Lisa Nicholson, an assistant professor in the Food Sciences Department, acknowledged the fact that not only are there misconceptions about the content of misspelled foods, but also about products whose names are advertised correctly.

"You certainly see (misconceptions) a lot, with moms giving their kids fruit punch and thinking there's fruit in it," said Nicholson, who specializes in consumer education. "It's actually red dye 4."

Nicholson also pointed out another misspelled product, Cremora, that is used as a coffee creamer. While the product is not even spelled with the word "cream," Nicholson noted that the cunning spelling can trick buyers.

"Consumers think they're adding a milk proximate and that they're getting some of their calcium for the
FROOT continued from page 10
day," she said.

Upon further investigation of Cremora's contents, the ingredient "sodium caseinate (milk derived)" was found. When the asterisk was followed to find the fine print on the label, I was told that sodium caseinate is "not a significant source of lactose. But are these small, visually hidden disclaimers enough? Aren't the flashy, fancy labels what attract the consumers, not the fine print?

"There are all the labels that are out that if people take time to read them, they'll see what's really in there," said Alixa Piette, a licensed marriage and family therapist. "But... think marketing is probably pretty powerful."

Piette also said people take the idea that there may be a health benefit in the product - such as there being actual fruit in Froot Loops - and run with it so that they do not feel bad about eating something that may not be the most nutritious.

"I think it's kind of a rationalization that can be made for people to eat that stuff. "Well, it's got cheese in it," or we wouldn't be stuffing our faces - 'Well, it's got cheese in it,'" said liberal studies and marriage and family therapist. "But..." Marcini said. "I want it to be accessible to any person that will relate to the emotionality of the college community," Marcini said. "I want it to be something that everyone can relate to."

Students are allowed to submit two short stories totaling no more than 30 pages, and up to five poems totaling 300 lines. Marcini plans to submit a poem as well.

"The poetry I submit will be about war or failed relationships because that is what all of my poems are about," Marcini said.

Each student submitting his or her work must use a pseudonym written on a sealed envelope with the student's real name, address and phone number sealed inside.

The work submitted will not be returned. Contestants are advised to keep a copy.

Winners of the contest will be notified by mail and present their work at the annual awards reading, held at the end of the academic year. Cash prizes for both short story and poem writing are $100 for first place, $75 for second place and $50 for third. Money was donated by the Knobloch Company and the English Honors Society, Sigma Tau Delta.

All poems and short stories must be submitted to the English Department in building 47, room 121B, by 4 p.m. on Jan. 27.

For more information about the contest, visit the English Department's Web site at http://cla.calpoly.edu/engl.

English senior Amy Armstrong plans to enter her work in Poly's creative writing contest.

CSU Student Research Competition
May 2nd and 3rd, 2003
Open to all undergraduate and Graduate Students

Encourage your students to turn their senior projects or master's theses into research contest entries!

U.S. will push for U.N. sanctions on North Korea

Thursday, January 23, 2003

By Alessandra Risso

By Associated Press Writer

United Nations—A top U.S. official said Wednesday that he will push for the U.N. Security Council to consider sanctioning North Korea for its nuclear programs, even as a U.N. envoy said the North would consider sanctions "an act of war."

But Western diplomats on the Security Council said the issue likely will not come before them anytime soon since it still is being debated by the U.N. nuclear watchdog agency in Vienna, Austria.

The U.S. Undersecretary of State John Bolton, in South Korea to rally support, said officials there agreed to take the nuclear issue before the Security Council. He also said Britain, France and most likely Russia would support such a move, and China had not voiced any opposition.

"It's not a question of if it goes before the Security Council, it's only a matter of time," Bolton said. "We hope it will get there by the end of this week."

The International Atomic Energy Agency currently is debating whether to refer the matter to the council, an official said.

"If there isn't movement on the part of North Korea, ultimately this will have to go to the Security Council," an IAEA spokesman Mark Gwozdecky told The Associated Press. "I think by the end of the week we will certainly have a better lay of the land."

But a British delegate at the United Nations noted that the IAEA may postpone its Friday session.

Pyongyang insists its nuclear dispute is purely with Washington and does not involve other parties. It made that stance clear during recent talks with U.N. envoy Maurice Strong, a special adviser to Secretary-General Kofi Annan.

"They have even used the expression that they would regard action by the Security Council to impose sanctions or any similar punitive action as an act of war," Strong said after returning from Pyongyang and briefing Annan.

Asked if he would be reporting to the Security Council soon, Strong said, "I think by the report to the secretary-general... and he has not asked me to report to the Security Council."

The issue "is not on the Security Council agenda at this point."

"As you know, there are a lot of efforts now under way, to deal with and seek a solution to the nuclear crisis. And, therefore, I think it would be inappropriate and unhelpful of me to be discussing it," Strong said.

Tensions escalated in October when North Korea announced that it had produced two nuclear weapons already and suspended oil shipments to the North, and Pyongyang has told nonproliferation treaty efforts going on, a lot of diplomatic efforts now under way, to deal with and seek a solution to the nuclear crisis. And, therefore, I think it would be inappropriate and unhelpful of me to be discussing it," Strong said.

Tensions escalated in October when the United States said North Korea admitted having a secret nuclear program in violation of a 1994 agreement with the United States. The United States and its allies suspended oil shipments to the North, and Pyongyang responded by expelling U.N. inspectors monitoring a North Korean plutonium reactor to generate badly needed electricity.

Experts believe the North's main nuclear complex at Yongbyon could produce several nuclear weapons within months.

North Korea is believed to have produced two nuclear weapons already and experts believe it has the resources to make another four or five within a few years.

Although the North says it has no intention of using its nuclear weapons, the world's nuclear nonproliferation treaty...
War support wanes as report nears

WASHINGTON — President Bush's efforts at bringing allies around to the U.S. position on Iraq appeared to be unraveling Wednesday, putting the administration in a difficult position ahead of a key U.N. report and debate.

Weapons inspectors were coming up empty. France and Germany were balk ing at moving toward war. Turkey was resisting having U.S. ground troops on its soil. Opposition was growing in Britain while polls showed the American public didn't want to go to war in Iraq.

The administration was trying to lay the groundwork to make a strong case against Iraq when U.N. inspectors deliver their report Monday to the Security Council. U.S. officials had seen the Jan. 27 report as a possible war decision point, but they've drawn opposition from allies who want the inspectors given more time to do their work.

"An extra delay is necessary," French President Jacques Chirac asserted Wednesday. France has hinted it might use its Security Council veto to block an Iraq war resolution. Germany also called for a delay.

"It's time for us to hold the world to account and for Saddam to be held to account. ... We must not be fooled by the ways of the past."

In remarks Wednesday in St. Louis that appeared directed at both Iraqi leader Saddam Hussein and unconvinced allies, Bush declared, "'It's time for us to hold the world to account and for Saddam to be held to account. ... We must not be fooled by the ways of the past.'"

Expressing scorn, Bush suggested Saddam hoped to buy time for himself by giving "the so-called inspectors more runaround." A day earlier, Bush likened giving the U.N. inspectors more time to the "rerun of a bad movie."

But it is clear that international sentiment has shifted since last November's 15-0 Security Council vote calling for Saddam to disarm and sending in the arms inspectors. "No one wants to go to war over 12 artillery shells," said Brookings Institution military analyst Michael O'Hanlon, referring to empty chemical warheads discovered last week near Baghdad.

O'Hanlon said support for war has been eroded by the failure of inspectors to come up with a "smoking gun" and by Iraq's superficial show of compliance. Also, he suggested, "The world is getting cold feet."

The stars appeared to be lining up against any imminent war decision both abroad and at home — and at a bad time for Bush, who gives his State of the Union address Tuesday.

Anti-war demonstrations drew tens of thousands to Washington last weekend and recent polls suggested Bush has failed to convince most Americans there is justification for military action to topple Saddam.

More than half — 53 percent — responding to a poll by the Pew Research Center for the People & the Press said the president has not yet explained clearly what's at stake to justify war.

Meanwhile, prominent Democrats who earlier were restrained in criticizing Bush's foreign policy were becoming more outspoken.

"We lost to Colorado State en route in the season, ending the game early after leading 8-5," forward Scott Murphy said.

In the Winternationals game, Cal Poly beat Colorado State 4-3, and later defeated Northeastern through a high-scoring 11-4 match. After beating Western Michigan 4-3, Cal Poly advanced to the semifinals, where they played against the University of Michigan and won 3-2. This allowed them to proceed to the semifinals to face Central Florida State, resulting in a close game that ended in a loss of 3-2, attributed to the skating abilities and discipline of the opposing team.

"We've been to this tournament for the past two years, but this year was special because we were able to place in the top three among some of the best teams in the nation," club president Ian Gould said.

Contributing to the team's success at Winternationals was the solid defensive efforts of defensemen Trevor Jacobs and Pat Moyer, consistent net protection, high-scoring 11-4 match. After beating Central Florida State, resulting in a close game that ended in a loss of 3-2, attributed to the skating abilities and discipline of the opposing team.

"This tournament is one of the best in the nation," Gould said. "He served as a backbone to the Cal Poly offense."

The Winternationals offered the Cal Poly A 'A' team the opportunity to preview the playing style of teams from states other than those included in the Western region. The style that Cal Poly and others in the Western region employ is nicknamed "run and gun," which entails skating quickly and aggressively and emphasizes scoring on the initial rush. Teams from the East Coast and Midwest use a more traditional and fundamental approach, skating slower and spreading their team out along the rink to allow for more passing. Cal Poly is likely to play many of the teams that participated in this exhibition when they travel to Philadelphia, Penn. in April to compete at nationals.

"This tournament is the one tournament during the regular season that most prepares us for the style of play from different teams around the nation," Gould said.

The difference in style causes a division in tactics among teams. Cal Poly was met with a lack of respect by some of their competitors due to their style of play, which increased their satisfaction in winning.

points, sinking nine of 23 from the field, and she also grabbed 13 rebounds. Kim Goldenleeve added 13 points and Breeya Rhodes had 10 points for the Mustangs.

Cal Poly made 46 percent of its shots from the floor (23 of 46) while holding Cal State Northridge to just 30 percent (19 of 64). The Mustangs clinched the win at the free-throw line down the stretch, sinking 19 of 24 charity shots for the game.

"It was a great team effort," Cal Poly head coach Faith Mimnaugh said. "Everyone contributed as they should.

"We had some matchup problems with them because of their perimeter shooting," Mimnaugh added. "But we made some clutch free throws to put the game away." Cal Poly won despite turning the ball over 25 times. The Mustangs had 21 and outrebounded the Mustangs 44-38. Hanhur Jordan and Lucy Tanneberg each had six boards for Cal Poly.

On Thursday, the Mustangs held Western Michigan 4-3, Cal Poly 35-37, and Cal Poly 44-22. This allowed Mustangs 44-38. Hanhur Jordan and Lucy Tanneberg each had six boards for Cal Poly.

Cal Poly Wrestling

Schenk provides boost in win

SAN LUIS OBISPO — With victories in seven of the 10 matches, the Cal Poly wrestling team defeated Cal State Bakersfield 23-13, in a dual meet at Mat Gym on Sunday. The win ended a five-meet losing streak for the Mustangs. The Mustangs are now 4-5 in dual meets, while the Roadrunners dropped to 2-4.

The Mustang lead got a boost in the fourth match of the meet, as David Schenk won the 197-pound match by major decision to give the Mustangs a 10-4 lead. The Mustangs would continue to build on the lead, as Joel Morena upset 17th-ranked Efrin Celabno in the 125-pound match, followed by a Nate Ybara major decision win in the 133-pound match over 18th-ranked Matt Sanchez.

On Saturday, a technical fall victory in the final match of the meet gave the Mustangs a 22-21 victory over Cal State Bakersfield Saturday.

Mustangs capture third in Vegas

By Leslie Reo

The Cal Poly Roller Hockey 'A' team finished third at the North American Roller Hockey Championship (NARCh) WinterNationals in Las Vegas, Nev. The invitational, held at the Crystal Palace from Jan. 16-22, allowed 16 teams from across the United States to compete in the tournament's College Division established by NARCh and the Collegiate Roller Hockey League (CRHL).

Cal Poly began the tournament by facing three teams Colorado State, Northernmost and Western Michigan.
