The University Police Department arrested a student for stealing textbooks from El Corral bookstore. The alleged thief was transported to San Luis Obispo County Jail.

A bike worth about $150 was reported missing at 1:22 p.m. after being stolen from the racks in front of Kennedy Library.

May 5

UPD received a request for medical aid at 11:37 a.m. after a student passed out at the University Dining Complex. An ambulance transported the student to Sierra Vista Medical Center for examination.

May 6

UPD received a report at 5:11 p.m. regarding the theft of a black beach cruiser bicycle. The location of the incident and estimated value of the bike were not available.

May 7

At 11:16 a.m., UPD received notification of a theft-in-progress occurring on Highland Drive. Allegedly, a young woman in a brownish-gray Honda was stealing oranges from the tree of a private residence; however, she had left the scene before UPD arrived.

May 8

UPD made multiple arrests for alcohol-related violations in areas close to campus early Saturday. At 12:59 a.m., a Cal Poly student was taken into custody and transported to County Jail for being drunk in public. At 4:02 a.m. and again at 4:22 a.m., UPD arrested a male non-student for public intoxication — both were taken to County Jail.

At 5:36 p.m., UPD officers arrived at Santa Lucia Hall to find students drinking from a keg of beer in the hallway. No arrests were made; however, the case has been turned over to housing authorities for further investigation.

CHRISTINA JOSLIN

The Greek awards banquet was held at the Madonna Inn on May 13. The banquet recognized members of the Greek community who exceeded their duties. The ceremony also included a speech by Paul Brown, owner of Mother's Tavern and Cal Poly/Alpha Gamma Rho alumnus, about the importance of leadership and involvement.

“A fraternity and sorority isn’t just a house and some friends,” Brown said. “It’s a commitment.”

The first award was given to Maya Audling for Faculty/Staff of the Year. Audling served as a mentor to the women of Alpha Kappa Delta Phi and helped with their “Think Pink” campaign to raise money for Breast Cancer awareness.

THEY KNOW WHERE YOU LIVE! — The benefits of a database nation.

The new Xeikon digital press finishes printing 40,000 copies of Reason, a monthly libertarian magazine. Cal Poly’s graphic communication department will know they’re at the forefront of a new era in personalized publications.

“They demand when, you get your Newsweek or Time, it will be personalized for you,” said department head Harvey Levenson.

For the subscribers of Reason, the June issue’s cover will highlight, by satellite aerial photography, each subscriber’s neighborhood with their house circled and their name in bold followed by, “They Know Where You Live! — The benefits of a database nation.”

The cover will be printed in high-resolution color.

The inside front cover will contain personalized neighborhood statistics that include population, average median income and average age people per household. The back cover will warn subscribers about the number of times emin- dent domain was abused in their area. Another ad on the inside will show how local politicians voted on a measure concerning marijuana drug raids.

Imagine receiving a car ad through the mail designed to reflect a consumer’s taste in red cars. That was one of the examples put forth by Justin Garten, an analyst from Entremedia who was sent to Cal Poly to head the database portion of the project and oversee its printing.

“If you give them something they’re interested in, something that means something to them — pictures they prefer to see — events in their life are going to come into play,” Garten said.

“Having this available will change the baseline of what’s available.”

Cal Poly was approached with the experiment six months ago when Entremedia, a direct marketing firm, contacted Xeikon looking for a printer with the capability of handling the project. Levenson jumped at the chance to do something that’s never been done before.

"The main message of my speech was to enforce the fact that people need to become involved in their community," Brown said. "And these groups have done a good job of this."

Elise Beckley of Kappa Alpha Theta and Christopher Reynolds of Phi Kappa Psi were acknowledged as Presidents of the Year. Beckley coordinated three recruitment periods, implemented a new point system within her sorority and created an Officer of the Month to recognize hard work.

"A president can only be as great as her chapter," graphic communication junior Beckley said. "I couldn't have done any of this without the help of my sisters.

Reynolds implemented a new pledge program, raised more than $30,000 through alumni events to remodel the chapter house and established the Gold Coast Alumni Association.

"My biggest job is to set goals for the people in my fraternity and help them to see why those goals need to be achieved," Reynolds said.

The Greek Man of the Year was awarded to Randall Seesler of Sigma Nu for his involvement both in and out of the Greek system. Seesler moves as the judicial chair on the Interfraternity Council Executive Board, coordinator for the Thoughtful Lifestyle Choices Team in the peer health department and has been a Week of Welcome leader for the last two years.

"I'm euphoric," psychology junior Seesler said. "I believe I deserved this award. I've done so much throughout the year."

Amy Golladay of Alpha Omicron Pi was named Greek Woman of the Year. She served as panhellenic delegate, helped coordinate this year's Greek Week festivities, is entertainment coordinator for the Annual Mariachi Gras Festival in Mission Plaza and is involved with many community projects.

"I really want to thank my sisters," recreation administration junior Golladay said. "I've learned so much from my sorority and the whole Greek system."

Fraternity of the Year was awarded to Delta Chi. The fraternity established a kickball tournament to benefit the Cure Autism Foundation, took fourth place in IFC sports, raised more than $10,000 for their housing corporation and developed a fund-raising plan to purchase a house.

"This is a great way to end a successful year," said Sergio Samulli, business junior and president of Delta Chi. "All the members have given so much support.

Alpha Phi was given the Sorority of the Year award for their increased philanthropic events and their efforts to add program activities concerning women's awareness, vitamin education and body image awareness.

The banquet was put on by scholarship chairs, Anna Voskes and Jonney Cakhar.

"The Greek system often gets something bad," psychology junior Voskes said. "This event is a way for us to show off the good."

were told to reduce incoming freshmen enrollment for 2004-05 by 10 percent.

About 7,600 UC-eligible students received letters telling them they could be admitted to the campus of their choice if they completed their first two years at a community college.

The CSM is sending similar letters offering guaranteed transfer options to at least 3,800 students.

Many students who received guaranteed transfer option letters were disappointed that their years of working to qualify for a university won't get them into one this fall.

"When I got my UC letter, I was crying," said Lonelia Colque, 17, who has a 3.5 grade-point average at North Hollywood High School. "I was really mad. I worked so hard all four years of high school, and there are other people who didn't do anything and barely graduated, and they're going to community college.

"I feel as though all my hard work was for nothing." Colque had hoped to attend UCLA, UC Santa Barbara or UC Davis, but now plans to attend Pasadena City College.

"There is no way for us to give them priority," said Joy McCalvin, vice president for student services at Pierce College.

"Students who do sign up for community college classes may also find that it takes more than two years to finish their lower division course work so they can transfer.

Wanna put the "news" in newspaper?

So you wanna apply?
HERE'S HOW:
1.) Pick up an application at the Daily office.
2.) Write a proposal for the section you want.
3.) Get together your resume and cops five clips.
4.) Turn everything into the Daily by:
TUESDAY
MAY 18
by 5 p.m.

QUESTIONs? Contact Emily at 756-1798

SACRAMENTO — California’s high-speed rail project seems to be stuck on a siding, held up by a shortage of money to complete an environmental review and by disagreement over when to ask voters to approve nearly $10 billion in bonds to begin construction.

There’s also considerable debate over whether the speedy trains should run. The California project’s problems come as Florida Gov. Jeb Bush tries to sidetrack a voter-mandated high-speed state’s biggest conservation deals in decades.

Acres of wilderness — and provide $100 million for environmental programs — in what’s being hailed as one of the state’s biggest conservation deals in decades.

But under an agreement reached with the California Public Utilities Commission, nearly 1,000 parcels of land, mostly in the Sierra Nevada and Cascade mountains, will be preserved permanently as wildlife habitat, open space and public recreation areas.

The story, written by reporter Seymour Hersh, said Rumsfeld decided to expand the program last year, broadening a Pentagon operation from the hunt for al Qaeda in Afghanistan to interrogation of prisoners at Muqdish prison in Baghdad. Seven soldiers are facing military charges related to the abuse and humiliation of prisoners captured by the now-infamous photographs at the prison. Some of the soldiers and their lawyers have said military intelligence officials told military police assigned as guards to abuse the prisoners to make interrogations easier.

According to the story, which hits newsstands Monday, the initial operation Rumsfeld authorized gave blanket approval to kill or capture and interrogate “high value” targets in the war on terrorism. The program stemmed from frustrating efforts to capture high-level terrorists in the weeks after the start of U.S. bombings in Afghanistan.

The California project’s problems come as Florida Gov. Jeb Bush tries to sidetrack a voter-mandated high-speed rail project in his state and rail advocates search for a reliable source of federal funding for high-speed and “intermediate-speed” trains in several areas of the country.

The 700-mile, $38 billion-plan California project seemed to be off and running in September 2002 when then-Gov. Gray Davis signed legislation putting a $9.95 billion bond measure on the November 2004 ballot.

When PG&E declared bankruptcy three years ago, many environmentalists warned the 99-year-old utility would be forced to sell off its watershed lands to private developers or energy companies.

Iraqi prisoners to obtain intelligence about the growing insurgency in Iraq. The New Yorker reported Saturday.

The Defense Department strongly denied the claims made in the report, which cited unverified current and former intelligence officials and was published on the magazine’s Web site. Pentagon spokesman Lawrence Di Rita issued a statement calling the claims “outrageous, conspiratorial and filled with error and anonymous conjecture.”

Iraqi security force in the rebellious Sunni strongholds in Fallujah, a former Saddam Hussein’s Web site. The Marines are in the thick of the battle for Fallujah and the 7,500 Jewish settlers from the coastal strip. The Israeli defense minister said implementing the plan would make the territory into a buffer zone.

TOPICA, Kan. — Linda Brown had no idea she was making history in the fall of 1950 when her father, the Rev. Oliver Brown, took her by the hand and marched her to an all-white school near her home.

Several other black parents in Topeka also tried to enroll their children in all-white schools that fall. Their requests were denied, laying the groundwork for a legal case that would overturn segregated education nationwide 50 years ago today.

Unfortunately, Kerry is only option

Commentary

It is a sad, sad day for liberals in American politics. apathy about our prospective new democratic leader has hit an all-time low. Web sites are popping up all over the Internet condemning George W. Bush and, for lack of a better word, supporting Sen. John Kerry. These sites aren't for lack of a better word, supporting as someone who sucks less than but rather offering him up to liber­

But with a weak economy, many soon-to-be-graduates are staying out of the job market and continuing their education by attending graduate school. While this may be the perfect way to let the large unemployment wave pass us by, it does seem a little silly to want to remain in school any longer. All our lives we've (at least most of us) complained about the ma­terial diligence we once knew. Long nights of studying are replaced with long nights downtown or at the beach enjoying a bonfire. Plain and simple, seniors boil down to this: We're ready to move on, and seniors know where to go or what to do.

For those who do not know, seniors (n.m.) does not mean "an inflation of the sense" as its name would imply. Instead, it is akin to the three-week onset of high school, getting ready to move on to a bigger pond and forget all about your boring old hometown.

In college, though, seniors is much more true. Remember that the three-week onset that we know in high school, college seniors have as a three-quarter onset. Personally, we checked out a year ago, and we're just kind of going through the motions toward the diploma. Any more and many classes are skipped and fewer assign­ments are completed so we can fully savor the carelessness of the time we once knew. Long nights of studying are replaced with long nights downtown or at the beach enjoying a bonfire. Plain and simple, seniors boil down to this: We're ready to move on, and seniors know where to go or what to do.

There are three primary options for all graduates: We can stay in San Luis Obispo, move back in with the parents or venture into brand new territories. No matter where we go, we're taking a huge risk — it's not like the job market is clamoring for us. Life without the school claws at you is definitely interesting and probably a lot more difficult. Once we're away from school, with the help of the aforementioned Web site, we'll be forced to see for the first time how much work has really gone into our boring old hometown.

'Troy' depicts epic battle, epic hunks, epic nudity
Rachel Musquiz

Most everything about "Troy" is of epic proportions: the budget of almost $200 million, the heroic battle scenes, the superior computer effects and Brad Pitt's muscular physique. The plot and characters may not be as grand, but they lay a strong enough foundation to make the near three-hour film worthwhile.

At first notice of the war between the Greeks and Trojans, all the players claim it will become epic history! With comments that this war and its heroes will never be forgotten, it was as if they knew Homer would write about it a few hundred years later.

The plot and characters may not be as familiar to most Americans as they are to the Greeks and Trojans, but, unlike "The Iliad," this is an epic tale of love and honor among people and not the deities.

The story unfolds with the power-hungry Greek king, Agamemnon (Brian Cox), building an empire with the help of the great warrior Achilles (Brad Pitt). Achilles is self-absorbed and does a place in written history as the greatest warrior. The lovesick prince of Troy, Paris (Orlando Bloom), sweeps away the Queen of Sparta, who is also the wife of Agamemnon's brother. When Helen (Diane Kruger) runs off to be reunited with her new lover, the Greeks decide the affair is enough to base a relationship on, knowing the conflict it will cause. While Helen is a beauty, she hardly has the brains that would make her a package deal. After a thousand ships cross the Aegean Sea to start a war with Troy, Helen still thinks the conflict could be solved if she just went back home with her husband.

Discrediting the temple of Apollo outside Troy, Achilles finds a previously virgin priestess to share his tent with after the long days of battle. Briseis is conveniently related to the Trojan royalty and is opposed to the war. She despises Achilles for all the deaths he has caused, but even she cannot resist Brad Pitt in a leather skirt. Like the lust-driven relationship between Helen and Paris, this too is called love.

Like other movies based on canonical stories, the majority of the audience knows the outcome. For those unfamiliar with the story, it is easy to pick up on the foreshadowing of the final scene. Within the first half hour, Achilles receives the prediction that if he goes to fight in Troy, he will die a legend. The final scene reiterates this by a dialogue of messages that parallel the defeat of Troy with the falling of Achilles.

This film is released at a time when war is an all-too-familiar topic in America. Many viewers may not be ready to see war scenes on the big screen while it is reality on the evening news.

The epic tale will go down as a Hollywood legend — either for its partial nudity scenes or the big budget battles.

"Troy" captivates energetic fight with nature
Ashley Wolf

Stories of men and women who overcome unbelievable physical and mental obstacles have continued to amaze society. But the story of Joe Simpson, British mountaineer, is one of the most dramatic and inspiring stories of human strength, determination and passion to live.

The documentary "Touching the Void" was released in January, but is leaving the Palm Theater in San Luis Obispo this Thursday.

Joe Simpson and Simon Yates set out to climb the west face of the Siula Grande in the Peruvian Andes in 1985. The remote and treacherous face had never been successfully climbed before. The two British men, 25-year-old Simpson and 21-year-old Yates, were able to climb the face in three days, but when they started their descent, disaster struck.

Simpson fell a short distance and broke his leg from the impact. His tibia and fibula shattered through his knee and ran into his femur. Yates and Simpson both knew that this massive injury would probably kill Simpson, and Yates would need to leave him to die in the cold.

But Yates decided not to leave Simpson behind and decided to attempt the descent together, with Yates knowing Simpson 300 feet at a time in a painful process that could have potentially killed them both. After descending for hours, Yates unknowingly lowered Simpson over an ice cliff with nothing but a crevasse below him. Since Simpson was not able to stabilize his weight for two hours, Yates assumed that Joe must have been dead and cut the rope, letting Simpson fall more than 150 feet into an ice crevasse.

Assuming that Simpson was dead, Yates was able to climb down the rest of the mountain dealing with the guilt that he cut the rope that held his friend. The amazing part of this story is that Simpson didn't die, and was determined not to die alone. He single-handedly found a way out of the crevasse, climbed over miles of glaciers and rocks back to the campsite where Yates and another British hiker found him.

Kevin Macdonald, the award-winning British director of the film, took Simpson and Yates back to Peru for the first time since the accident. Yates and Simpson climbed a part of the Siula Grande and reenacted the journey of Yates and Simpson with actor Brendan Mackey playing Simpson and NicholasAaron as Yates.

The filming crew had to work at high altitudes in excruciating cold. The crew slept with the cameras in their sleeping bags to keep the batteries from freezing. Macdonald's goal was to have the film feel as real as possible, and he was able to accomplish that with every minute. Other mountaineering films recreate crevasses with molded plastic in a studio, but Macdonald didn't want his film to be a cliché. He wanted the audience to understand and experience the environment that his characters survived, which made the film more realistic.

The audience leaves this film feeling inspired by the strength of Simpson and in shock of the beauty and hostility of the natural landscape. To catch one of the last performances, visit the Palm Theater, which will be showing "Touching the Void" Monday through Thursday at 9:15 p.m.
Women get more from degree

Recent study shows women who earn higher degrees receive more immediate economic benefits than men.

Alexis Orenstein

Daily Pennsylvanian (University of Pennsylvania)

PHILADELPHIA — American women who have earned an associate or bachelor's degree have received more immediate economic benefits than men, according to a recent study.

The study, conducted by Laura Perna, an assistant professor of educational policy and leadership at the University of Maryland, analyzed data from the National Educational Longitudinal Study, a survey that had been previously conducted by the U.S. Department of Education.

The NELS survey, which began in 1988, followed the educational and occupational progress of a sample of students until 2000.

Perna's study was designed to test the effects of higher education on economic and social benefits. In her report, Perna acknowledged the many difficulties that restrict attempts to quantitatively measure these benefits.

Therefore, only the students who were seniors in 1992 and who participated in the follow-up surveys in 1994 and 2000 were considered in Perna's study.

Perna found that women who had earned an associate or bachelor's degree by 2000 received incomes that were 8 and 24 percent higher, respectively, than those who completed high school only.

However, the men in the study did not receive a "statistically significant" wage benefit from earning either degree, Perna said.

Dana Barron, the executive director of the Alice Paul Center for Research on Women and Gender at the University of Pennsylvania, said other data from the census bureau exists which might produce different conclusions.

"Traditionally, men have gotten higher returns on investment in education than women, especially post-graduate," Barron wrote in an e-mail interview. "But in recent years, women have been getting more B.A.'s than men, and I believe have higher high school graduation rates."

"The study cited here was narrow for a number of reasons," she added.

Perna herself acknowledged the limitations of her findings; the NELS survey concluded in 2000, when participants were only 26 years old, only four years after the completion of a bachelor's degree.

The study, which was recently presented at the American Educational Research Association, is still "a work in progress," Perna said.

Some of the reaction to Perna has received has been negative. Critics, she said, focused too much on the lack of benefits for men.

Her findings focused on the fact that "payoff seemed to be greater" for women, Perna said, and "not that there is no benefit for men."
Mustangs finish solid at Big West

Both Cal Poly track and field teams finished near the top of the standings at the 2004 Big West Track and Field Championships. The men's team finished second, while the women finished third. Mustang athletes broke several records in the process.

On Friday, Mustangs Kaylene Wagner won the high jump with a conference and meet-record mark of 1-9-3/4. Stephanie Sampson from Long Beach State won the hammer throw with a toss of 193-5 to set a conference meet record.

Junior Ryan Mooncroft was named Big West Track Athlete of the Year for winning the 1,500-meter with a school-record time of 3:45:32. Earlier this year, he finished second at the Big West Cross Country Championships.

Traci Session set another school record with his win in the 400-meter hurdles in a time of 52.30. The 4x100 meter relay team of Paul Edwards, Travis Morse, Joe Pappalardo and Joe Okafor broke a school record, clocking in at 40.98.

Other Mustangs scoring points were Pappalardo, who took second in the 400-meter dash (47.70), Brandon Collins, who finished second behind Mooncroft in the 1,500-meter run (3:49.47), and Adam Sprein, who took third in the 110-meter hurdles (14.61).

For the women, Alli Menaon Cronin won the 100-meter hurdles and broke the school record in a time of 13.68, while Leilren Martin also broke a school record in the 400-meter hurdles (58.12) and finished second in the 100-meter hurdles (13.89). Courtney Stafford won the triple jump with a mark of 40-11.00 and Jessica Eggleston took second with a mark of 40-07.75.

Other Cal Poly notables were Kelly Dahl, who finished third in the pole vault (11-09.75), and Anther Simmons, who took third in the 5,000-meter run (17:11.56).

The 4x100 meter relay team of Martin, Cima Stafford and Sparkle Anderson finished second and

SLO Core sees improvement

Devin Kingdon
May 17, 2004

The ultimate frisbee team has made great strides this season, evidenced by their improved finish at regionals in Santa Barbara two weekends ago. They finished fourth in that competition, their best finish in recent memory.

"We went into the tournament ranked fifth in our region," co-captain Darren Key said. "Our goal was to move up on the ranking to at least forth and to make strong showings against the teams above us, and we accomplished both of those past weekend."

SLO Core, as the team is known, plays against other schools with teams in the Ultimate Players Association. SLO Core is part of the Southwest region which stretches from San Luis Obispo to San Diego and as far east as Colorado.

"We were really happy about the way we played and the outcomes of the games," Key said. "This is the highest we've been ranked within the memory of any active player."

UC Santa Barbara came in first place, followed by Colorado and UC San Diego in third.

SLO Core came out strong on Saturday with wins over the Air Force 15-12 and Colorado State 15-12, but SLO Core's tournament ended with a 15-9 loss to Boulder. The team scored a clutch victory on Sunday morning over UCLA 15-12 and later made a solid showing against UCSD but ended up losing 13-10.

"We did a great job challenging the teams that are ranked above us," Key said. "We've never been invited to UCSD's President's Day Invitational and hopefully our performance will change that. I think we definitely got their attention. Last year we lost to Claremont and UCLA, but this year we handled them nicely."

Teammate Phil Hansen echoed this sentiment.

"I'm glad we played well and showed the other teams that we see Softball, page 7

Softball closes season in winning style against Ags

The Cal Poly softball team defeated Utah State 7-0 in its final Big West Conference series of the 2004 season. With the win, the Mustangs finished the year 22-28 overall and 10-11 in the conference, while the Aggies finished 10-41 and 6-15.

Kristi Albers started off the three-run fourth inning with a single up the middle. Jeans Gevas hit a home run to center field that scored Kelly Comstock, who entered the game to pinch run for Albers. Chelsea Green reached on an error by shortstop Quela Henderson and advanced to second off a sacrifice bunt by Jackie Gehrk-Jones. Lisa Modglin walked, advancing both Green and Gehrk-Jones. Green scored on a wild pitch by Utah State's Leslie Highley.

The Mustangs scored one run in the fifth inning. Amy Jo Nazareno started off the inning by bunting to reach first base. She stole second and advanced to third after Gevas was walked. Green reached on a fielder's choice, while Gevas advanced to third on an error by Kelly Leso at first base and Nazareno scored. Gevas scored after Chey Stoufer reached first on a fielder's choice.

Cal Poly scored the rest of their runs in the top of the seventh. Gevas started the inning with a single down the left-field line. Jen Graver entered the game to pinch run for Gevas and scored off an error by Haven Vance at second base, placing Green on third base. Green scored after Stoufer hit another single down the left-field line.

Freshman Emily Fivigne went the distance for the Mustangs, pitching her fourth shutout of the year, allowing only four hits and striking out five. Fivigne finished the season 12-14.

On Saturday, Cal Poly split a doubleheader. The Mustangs blew out the Aggies in the first game with a 19-4 win. Cal Poly had three home runs.

Fivigne earned the win for the Mustangs after allowing seven hits and four runs, while striking out one. The Aggies came back to defeat the Mustangs in the second game, 5-1. Utah State scored in every inning except the first.

For Nelson took the loss for the Mustangs, pitching four innings, allowing seven hits and five runs. Nelson fell to 0-5.
