Local heroes teach kids fire safety

Louise Dolby

Local fire departments raised more than $9,000 for the Alisa Ann Ruch Burn Foundation during the 2004 San Luis Obispo County Burn Relay Thursday.

Beginning in San Miguel, 16 fire departments drove down the coast visiting 11 different elementary schools and teaching kids about fire safety.

Sponsored by KSBY, the relay is an annual event promoting Fire Prevention Week and raises money for burn survivors.

“The Burn Foundation started in 1971 after Alisa Ann Ruch’s tragic death,” Moro Bay Fire Captains Steve Knuckles said. “The foundation fills in the gaps that other burn centers have. It gives burn survivors a chance to interface with others like them and helps build self-esteem and self-worth, showing them that there is life after the accident.”

The foundation also supports a program called Champ Camp, a youth summit for burn survivors. Located on Wonder Valley, a ranch outside of Fresno, the camp gives kids a safe place where they feel comfortable and are not judged for their scars and handicaps due to fire incidents.

“Champ Camp is an experience that changes lives,” Knuckles said. “Since society does not allow burn victims to be themselves, Champ Camp gives kids a chance for an average life.”

Knuckles estimated about 25 percent of the camp volunteers are in

Poly’s online resources turning global

Melissa L. Dorcek

Students and faculty will be able to extend their resources to reach worldwide now that the California State University system joined a global alliance to create an online resource sharing system.

The Global Learning Objects Brokered Exchange alliance includes organizations from Australia, Canada, Europe, Japan and the United States. These countries are joining forces for “a shared vision of access to quality educational content,” a CSU press release said.

This content will include everything from information on arts and humanities to online scientific simulations.

Jerry Hanley, vice provost and chief information officer for Information Technology Services said that by involving universities from around the world, students will have access to information that emphasizes different aspects than what Americans might emphasize.

“Students get a different perspective. It’s equivalent to being an exchange student.” — JERRY HANLEY Information Technology Services vice provost

“Students get a different perspective. It’s equivalent to being an exchange student.” — JERRY HANLEY Information Technology Services vice provost

This compilation will be online, using federated search technologies that will search across multiple databases and libraries. The press release said that the system should be up and running within a year.

The ultimate goal of this operation is to make the process of finding information easier and faster, Hanley said.

CARS

continued from page 1

Cars

half hour endurance test and an acceleration test," said team leader
and mechanical engineering junior
Jason Schulberg.

Whoever has the most points from the

competition wins. The

formula placed third in the

acceleration event, 0.010 seconds

away from first place.

"Everyone works on the cars and
gets to drive them during the testing.
Whoever is the fastest driver during
testing gets to drive the cars in the

competition," said Schulberg.

The club will be designing and

finding sponsors to build their super

mileage car this year.

"Next year we plan to build, test,

and compete. Last year's winner

achieved over 1700 mpg, and so we set

our design goal for 2000 mpg," Jang

said. "Right now we've got a concept

and are working on publicizing the

project. We feel that we can generate a

lot of support from the campus and

community due to the recent rise in

fuel prices and concern for the envir-

onment."

Last year the club took their for-
mula car to the Los Angeles Auto

Show. They also got to tape a friend-

and watch races on television.

"The club gives its members real

world experiences," Schulberg said.

The last two years the club has had

between 80 and 100 members, which

placed them as the largest student sec-

tion in California for the past two

years, Jang said.

The club meets every other

Thursday during fall in 52-E27.

They also work on their cars every

Saturday at 9 a.m. in the machine shop

building four.

"There are many facets to running a

trace team," Jang said. "There is a lot

more than just engineering and long

hours. We do a lot of networking, out-

reach and community events too. Our

local community really supports us,

which allows us to learn more today

and create a better future."

Fire

bons from Cal Poly, the rest are CDF

interns and burn survivors. Being a

volunteer counselor is a 10-day com-

mitment in June.

Fire Prevention Week continues all

month with open houses at local fire

departments that give live fire

demonstrations, fire extinguisher

training and fire safety.

"We stress for students especially to

check their smoke detectors and

fire extinguishers that students face.

The number one cause of home

fires is smoking cigarettes, and the

second most common cause is falling

deeply asleep with candles burning," said

Richie Barrnett of the San Luis Obispo

City Fire Department. "We urge students

to be cautious."

Firefighter Ace Flano of CDF

emphasized having dry brush

removed from around houses since

injuries get thrown into the

brush can start a fire.

If you happen to catch on fire

fire, Prime Beach has some advice.

"It's the same stuff you heard when

you were kids: Stop, Drop, and Roll," said

Morgan Partridge of CDF Prime

Beach. "But get together on the

ground and cover your face."

information user friendly.

"Surprisingly, users are faced with overwhelming challenges of

learning about the (data) collections, interacting with the different

and interfaces, and finally finding the rele-

vant resources," Gerry Hanley, execu-

tive director of MERLOT, said in a

press release.

Global

Making resource retrieval easier

would be the key to GLOBES suc-
cess, Gerry Hanley said.

Students attending a CSU can use

this Web site as a hub for research on

both national and international issues.

MERLOT.org gives the idea of the

kind of information that will be

available to students and faculty.

The alliance will meet twice yearly

to make sure that outcome goals are

achieved on time. The next meeting
	
takes place in Japan in February 2005.

CAMPUS PROJECTS

California Boulevard Extension

As part of Phase 2 of the Engineering III project, California Boulevard is

being extended through campus to connect with Highland Drive. The

project provides connection to major parking lots and moves

circulation out of the campus core. Pedestrian walkways and bicycle paths on

the campus are being added and improved, the bike route will continue along

California Boulevard. Construction is expected to be complete before the end of

fall quarter.

Engineering IV

Phase 2 of the new Engineering complex will add 104,000

square feet of instructional space to the College of

Engineering and will stand on the site northwest of

Kennedy Library. Construction should begin in December, 2004 and be complete

in September, 2006.

Student Housing North

The Student Housing North project will be completed over a

five-year period, with phased delivery. The EIR and schematic

design have been approved and the first phase should be available for occupancy

in 2008. Brookwood Program Management has been chosen as the program

manager and the design-build team will be selected in March of 2005. Visit the

Student Housing North website for information about the project. Click on the

Student Housing North icon, http://www.facilities.calpoly.edu

Parking added on Mount Bishop Road

Seventy-five temporary parking spaces have been added this quarter along Mt.

Bishop Road (the road to Daisy Science). The temporary spaces were added to

provide additional parking while a new parking lot at the Old Poultry unit is

under construction. The new H-1 parking lot, on Mt. Bishop Road just past

Esopus, will provide approximately 360 new spaces and will include emergency

phones and lighting as well as bicycle lockers and racks. The new lot is scheduled

to be complete next spring.

Telecommunications Infrastructure Project (Telecomm)

Project Telecom is continuing throughout campus. The project is

upgrading telecommunications (voice, data and video) systems in all

state-owned buildings on campus. Purple and orange signs identify the

sites of the current construction activity. The project should be completed during

fall quarter. For further information, current building schedules, photos and other

information, visit the Telecom website: http://telecomm.calpoly.edu

Engineering III

Phase 1 of the 41,000 square foot Engineering III building at the northwest

corner of the campus is complete. Phase 2 is expected to begin construction by

late fall and will finish the interior work, exterior awnings, screens and

landscaping, and add a new jet propulsion lab building.

Campus Sustainability

For information about sustainability on campus, visit the Building for

Sustainability website at http://www.facilities.calpoly.edu click on the

Sustainability icon. The website was developed to promote

awareness of campus activities, projects, resources and activities that relate to

sustainability on campus.

Building Permits Required for all Campus Projects

Facility Services would like campus departments to be aware that all construction

projects — large or small must go through the campus building permit process. A

building permit is required for all departments, offices and student projects

whether or not they are using their own resources. For a building permit

application and more detailed information on the process, go to the Facilities

Planning web site and click on Building Permits.

http://www.facilities.calpoly.edu

FACILITIES WEBSITE: http://www.facilities.calpoly.edu
STATE NEWS

SACRAMENTO — A controversial measure that would provide $3 billion in state bond money to pay for human embryonic stem cell research holds a narrow margin of support among voters, according to a new Field Poll.

Proposition 71, designed to get around the Bush administration's funding bans on such research, would authorize the state to sell bonds to provide annual payments of about $300 million to scientists and companies doing stem cell research.

The poll found that 46 percent of likely voters support the idea with 39 percent opposed and 15 percent undecided. • • •

The people of this war-ravaged land already have had their say. They voted in presidential polls, while ballot-box votes in Tuesday's elections will create an independent commission to look at opposition charges of fraud in this nation's first presidential poll.

To find out how a tour bus that was under way in Callao in northeastern Arkansas—about 10:30 a.m. from the Callao Baptist Church to the Macon County Fair—ended more than 200 miles away in Callao in northeast Missouri's Macon County, police said, a reconstruction of the accident is under way to answer some remote areas on mules, U.N. officials said. They would not start for three to four days. Final

Los Angeles — Gas prices have climbed nearly eight cents a gallon in the past two weeks because of record-high crude oil prices, an industry analyst said Sunday.

From Sept. 24 through Friday, the combined national average for all grades of gas rose to $2.02 a gallon, said Trilby Lundberg, who publishes the semi-annual survey of 7,000 gas stations across the country.

San Francisco — Two young grizzly bears arrived at the San Francisco Zoo on Sunday, just weeks after they were nearly put to death by wildlife officials in Montana. Despite being the state animal, no grizzlies have lived in the wild in California since 1922.

— Associated Press

INTERNATIONAL NEWS

KABUL, Afghanistan — Afghan election officials Sunday said to create an independent commission to probe opposition charges of fraud in this nation's first presidential poll.

While ballots were stuffed with the aspirations of the people of the war-ravaged land started to stack up in counting centers, international officials met privately in an effort to end a boycott of likely voters support the idea with 39 percent opposed and 15 percent undecided.

International officials met privately in an effort to end a boycott of the election outcome, two backed off, saying they wanted a commission to rule on whether the voting was fair and indicating they would accept its decision.

Fifteen passengers remained hospitalized in Little Rock and Memphis, Tenn., many in critical condition with injuries that included collapsed lungs, broken hips and head wounds they suffered when the bus wandered off Interstate 55 in northeastern Arkansas.

A reconstruction of the accident was under way, and officials planned to create computer models of the crash.

— Associated Press

PORTLAND, Ore. — The Bush administration's war on drugs stretches deep into Asia and Latin America, yet one of its most crucial campaigns — in the eyes of drug czar John Walters — is being waged in the very state that proposed $3 billion in state bond money to pay for human embryonic stem cell research.

In each state, activists seeking ease for three to four days. Final

THIS WEEK

756-1112
The Cal Poly Health Center offers the morning after pill. In the past, students who came on campus had been offered the emergency contraception pill in some form for about 25 years. Now they have Plan B, the newest update in morning after pill options. That would be immoral. That might encourage teen sex. But then, doctors in town don’t offer emergency contraception at all, is just hindering a student’s ability to take control of our own lives. It’s our future, not someone else’s.

Plan B can be taken up to 72 hours after unprotected sex, and can be received discreetly after a consultation with a nurse at the Health Center. Plan B can be taken if a woman’s chances of pregnancy by up to 89 percent. That’s the good news. The bad news is that Plan B is only available by prescription, which is something. Brauner said she doesn’t agree with. Plus, Brauninger said a lot of doctors in town don’t offer emergency contraception.

There were a lot of students who believed that the condom breaks in the back room at that crazy Friday night kegger have to had like friends to get to the Health Center first thing Monday morning, and hope it’s not too late. Sure, they can buy beer (if they’re 21) and cigarettes at Rite Aid, but they sure can’t prevent an unwanted pregnancy by stopping the drug store. That would be immoral. That might encourage teen sex. Then, really, weren’t they going to have sex anyway?

In May, the FDA rejected a motion to offer the morning after pill over the counter, ignoring the advice of their own scientific advisors, who voted 23-4 in favor of making the pill available over the counter in a safe way to prevent thousands of abortions, according to CBS News.The article cites political pressure from conservative groups who argued making the morning after pill available over the counter would encourage teen sex as a likely reason the FDA ignored their own advisors.

However, the morning after pill does not increase sexual activity among teenagers. Less than 5 percent of college students nationwide who receive a prescription for Plan B return again, according to an article published in the Chronicle at Duke University.

Cal Poly has the right idea by offering the morning after pill on campus, but with so little publicity on the matter, who knew it was there, anyway? And since the health center is not open on weekends, students are left biting their nails until the school week starts again.

That’s assuming they’re cleared for a prescription. Whatever that means. What doctor would actually turn away a student who wanted the pill, because of moral disagreement with their choice to have sex in the first place? Too late now. This is reality, and students are going to have sex if they want to. Making students get a prescription, or not offering emergency contraception at all, is just hindering a student’s ability to take action after a mistake is made.
Lindsay Lohan's boobs cannot sing

For what would have been John Lennon's 64th birthday, Videos Only is releasing "When I'm 64," a collection on Lennon's artwork, in New York.

As someone who was raised in a family that appreciated the Beatles and John Lennon's legacy, I was thrilled to hear that an exhibit was going to be put on in my name, his art was a huge part of his personality, musically and politically.

The artists who choose new media with which to create today, though not quite as legendary as Lennon, are following a very popular path. Often the quest is a tragic failure because it's hard to be cool with the gaiks and the jocks.

Included in this immense list of recent "crossovers" is, of course, J-Lo. Lindsay Lohan, Mariah Carey (debatable) and yes, believe it or not, Bob Gunsey.

Don't know who Bob Gunsey is? Neither did I until my roommate informed me that he was a "Backer" for ABC's infamous reality show and now he has an album called "3 sides," released on Wind-up records.

Surprisingly, his music is not bad. Taking advantage of the wonders of the Internet, I sampled each song and found his voice to be strong and poignant. However, I'm cheating by using him as an example because he wasn't technically an actor—just a sucker.

Sadly, I cannot continue to have positive comments as I move to Lindsay Lohan. Upon I saw her new video, "Rumors" on MTV, I simply decided she either has great genetics or a gmat plastic surgeon.

But my second observation was about her music. I didn't know if she wrote her own music because no one seems to care about that anymore, so it was nowhere to be found online. Her voice was so quiet and effects-ridden that I couldn't even tell what it really sounded like.

But her voice was soft and she didn't seem to be making music an excuse to sing with her clothes off. However, I'm not trying to put down artists who decide to change paths. On the contrary, I think it's probably really fun. But although it would be great to say that all of the actors-turned-singers (or vice versa) have an inherent love of music and have always wanted to do it, I fear many of them are doing it as a way to, 1) put more money in their pockets, and 2) expose more people to their music.

Another shocking crossover is Minnie Driver. She recently released an album called "Everything I've got in my pocket." If you think the way I do about album titles, you'll have already established that her lyrics are patently bad.

But my second observation was about her music. I didn't know if she wrote her own music because no one seems to care about that anymore, so it was nowhere to be found online. Her voice was so quiet and effects-ridden that I couldn't even tell what it really sounded like.

But her voice was soft and she didn't seem to be making music an excuse to sing with her clothes off. However, I'm not trying to put down artists who decide to change paths. On the contrary, I think it's probably really fun. But although it would be great to say that all of the actors-turned-singers (or vice versa) have an inherent love of music and have always wanted to do it, I fear many of them are doing it as a way to, 1) put more money in their pockets, and 2) expose more people to their music.

But there is hope. Just as John Lennon created art in many forms that has lasted and will last for many years to come, there are artists out there who truly contribute to the art form. There are several, and they have a way of making us forget that they ever did anything else. We know them when we hear them.

Emily Logan is a music and journalism junior and a Mustang Daily columnist.

About you should own:
Beck - Odelay

Daniel Ely

Ask a fan of genre-bending Beck for one essential album you should own by this musical heavy-weight, and chances are that they will steer you towards Odelay.

This musical journey travels the broad landscape of music, from psychedelic 1960s-style lyrics to a techno-electronic mixing of sounds.

The music is generally upbeat and energetic, a prime example of Beck's tendency to give an entire album the same "feel." Odelay is not quite as relaxed as Sea Change, but is definitely more chill'd out than the disco-influenced Midnite Vultures.

Probably the most memorable songs on the album are "Devil's Haircut" and "Where It's At," both of which won Beck MTV video music awards for best male video.

For those unfamiliar, "Devil's Haircut" is classic Beck—lyrics that make even the most severe up with a toe-tapping rhythm thanks in large part to the combination of drums and guitar used to drive the song.

"Where It's At" contains more of the same rhythm, making music that is perfect to act along with, whether walking in step with it, or simply nodding your head, but with the addition of long, sustained keyboard notes to match the sharp pace of the song.

My own personal favorites on the album are the songs "Holocene" and "Hotwax," which make a lot of Beck's songs, though the lyrics don't appear to initially make sense, they contribute to a common theme for the album.

"Doo-wops" is a good example of this, where the seemingly random
tune can really isn't a bad song on it, I could listen to it all day, and though the songs contribute to a common theme, I never really get tired of hearing them because of the variety offered.

The only song on the album I find myself skipping over is "Minnas," a punk-influenced song that isn't bad, just unspectacular. However, calling this the worst song on the album is tantamount to singing out the smallest bar of gold in Fort Knox , it's still solid gold.

Download of the day:
Nada Surf
"Let Go"

This mellow New York rock group has more great songs and a weener-type sound you'll love. This underground band needs to be heard! Courtesy of food science sophomore Chase Millbourn

for themselves. Santa Barbara's goal was the must red cards, the most yellow cards of anybody that I've seen in a long time." Mustang defender Justin Woodward said that it was a tough game. "It's kind of hard to play 90 minutes no matter who you are, what team you are," Woodward said.

The Mustangs' four-game home stand continues Wednesday against LSC Irvine and Sunday against LSC Riverside, games that Gartner said will define the course of the season. The rematch with the Go Dutchmen will come Oct. 23 in Santa Barbara. It will be interesting to see how Saturday's loss is handled. "The result does not indicate the quality of the team; the results of both teams," Gartner said. "It shows the quality of Santa Barbara but is not indicative of what we have done and what we hope to continue to do."

COACHES' CORNER

This week’s spotlight on...

Cross country coach Mark Conover

Amanda Strachan

The Cal Poly men’s cross-country team started its season off with a series of wins backing up a preseason poll that unanimously voted the Mustangs the No. 1 team in the conference title.

In an interview with the Mustang Daily, coach Mark Conover shares some words of wisdom and reveals what he’s not just pushing for the win.

Q. — What do you enjoy most working with this year’s team?

A. — I really enjoy the focus, dedication and commitment and it’s paying off. For the men, we’re ranked one of the top teams in the country right now.

Q. — What do you see as the biggest obstacle for the team this year?

A. — I have two moments that came within a four-year period. I made the Olympic team in 1998 and then I beat cancer four years later. Running played a big part in teaching me goal-setting and self-esteem. If you have all that then you can be anything that comes your way, including cancer.

Q. — What do you see as the biggest obstacle for the team this year?

A. — I don’t really look at it as any other team being an obstacle. I think the biggest obstacle for this season is the mental outlook of the people on the team. If they really want to make this commitment and achieve their goals, that’s what we’re going to do it for, but the mind can be a great obstacle.

Q. — What’s your biggest goal for the coach?

A. — Trying to teach people so that they can try to achieve to the highest level, which means trying to do well at the NCAA Division I level. And having these people learn through the process so they can apply it to their daily lives. You can learn a lot about yourself and how to live it from trying to be a successful cross country athlete in college.

Q. — If you’re really mad how do your runners know?

A. — I never get really mad. I just try to get pointers across and if there’s an area where I think a point needs to be made they can probably detect it in my voice.

Q. — If there’s one lesson you could instill in your runners what would it be?

A. — To persevere and continue to work hard, live life. If you’re going to make a commitment to something stick with it and don’t cheat yourself out of doing that thing go against allowing you to have that success. As a college student, when you are trying to be a top-level competitive athlete you really have to learn to budget your time.

MUSTANG CROSS-COUNTRY

Ivory saves the day defending final drive

Mustang cornerback Ivory Adams makes an interception on final drive as Cal Poly improves to 5-0, its best start since 1997

MUSTANG DAILY SPORTS REPORT

Southern Utah had the tie in hand.

This one was going to overtime. And then Mustang cornerback Ivory Adams made a tackle of his own kind of tackle.

In a touchdown-scoring move, Ivory stole the ball out of Thunderbird Jerome Eason’s hands in the endzone with 31 seconds left as Cal Poly hung on for a thrilling 24-17 victory over Southern Utah.

The interception kept the Mustangs undefeated moving to 5-0. Ivory returned his fourth interception of the year 23 yards and Cal Poly took a knee on the next play to run out the clock.

The Great West Conference game was played in front of a career crowd of 9,028 at Coliseum.

One of the pregnant concerns was how the Mustangs would handle Thunderbird quarterback Casey Rehber.

Rehber completed 28 of 39 passes for 351 yards and no touchdowns, but could not help the Thunderbirds score in the second half when Cal Poly’s defense again took over.

Southern Utah had a 247-144 advantage in total offense in the first half, but finished with 386 yards.

Cal Poly defense had only given up just 258 yards per game before Saturday. The Mustangs gained 248 total yards and trailed in first down as well, 24-12.

Coach Ellerson again kept the fans guessing about who would start at quarterback. This time it was Anthony Garnett getting the call, his first collegiate start.

Garnett completed nine of 23 passes for 149 yards and one touchdown.

Southern Utah overcame a 14-3 first-half deficit with two second-quarter touchdowns and a 17-14 halftime lead.

But Garnett ran for four yards on the touchdown with 3:54 remaining in the third quarter and Bumpoo Yoon added a career-long 40-yard field goal with 24 seconds left in the third period for Cal Poly.

The go-ahead touchdown was set up by a block of a Southern Utah punt. James Pryor blocked Jeremo Ward’s punt and Aaron Harmon recovered the ball and ran one yard to the Southern Utah 4-yard line.

One play later Garnett scored to give the Mustangs a 21-17 lead.

Wide receivers Jonsi Russell and Darrell Jones each finished with three catches.

Jeremy Konaris led Cal Poly with 41 yards on nine carries and Geno Randle added 33 yards on 11 trips.

Defensive leaders for the Mustangs were safety Kernity Chiconne with 12 tackles (seven solo) and linebacker Jordan Beck with eight (three solo). The Mustangs recorded four sacks, raising their season total to 21, and have 13 interceptions in five games.

Men’s soccer is quickly overrunning by Gauchos

Graham Womack

At first it looked do-able.

After grabbing an early 1-0 lead Saturday night, the Cal Poly men’s soccer team had the chance to get its first win in four weeks, record its first victory in Big West Conference play this season and win in first home game and knock off UC Santa Barbara.

Then, on their way to winning 5-0, the Gauchos began to show why they are undefeated, first in the Big West and the top-ranked team in the nation.

The Mustang lead was the first thing to disappear, just three minutes after its creation. The possibility for a win began to erode in the second half when UCSB went ahead.

By the time the Gauchos unleashed the lead 3-1 in the 79th minute — before they scored two more goals within the following 10 minutes — any remaining hope had vanished among the fatigued Mustangs.

“T’was a guy with a little bit less their guard down,” Mustang coach Wolfgang Gartner said. “They were a little too fast for us, they thought the game was over and it kind of is against that kind of team. There’s always the potential for come back, but not tonight.”

Cal Poly fell to 3-3-3 on the season, 0-2 in Big West play. Matthew Robison scored for the Mustangs, but Gauchos Jonathan Davis scored twice and teammates Drey McAdry, Tyler Rosenberg and Andrew Proctor also had goals, to give the Gauchos’ seventh straight win over Cal Poly since 2001.

The Mustangs have gone 0-3-2 and scored twice since Sept. 12. Meanwhile, the Gauchos improved to 10-0-1, 3-0 in conference and may earn a No. 1 ranking in a major poll for the fourth straight week.

If that happens, it will perhaps be an added boost to Santa Barbara performance that went exactly to plans to rely on a deep bench to tire out the Mustangs’ man-to-man defense and exploit Gartner’s injury-depleted roster.

“Honestly, the game plan was to run, run, run in the first half and then we knew that the second half would open up,” Gauchos coach Tim Vincennes said.

“Gartner concurred.

“They wore us down, that’s true. Because you always have deeper bench, you’re hurting sooner — and they were substituting more than we can afford to,” Garnett said.

The second-half deficit is the players weren’t able to manage throughout.

Four Mustangs and one Gauchos got involved in a goal during the second half. There were also multiple midfield confrontations between members of the opposing teams in the second half.

The number of fouls called — 36 wasn’t higher than usual. But Garnett wasn’t necessarily pleased.

“The referee let them be a little too aggressive tonight,” Garnett said. “I don’t know what the call was.”

(But) we almost seemed to be the aggressor when clearly we were not the team that’s dishing it out.”

The record, the statistics speak for itself.

For Mustangs, this loss is just the latest.

A different coach this week....

Volleyball still hurting after more two conference loses

MUSTANG DAILY SPORTS REPORT

Make it seven straight losses in Big West play for the the Cal Poly volleyball team.

The Mustangs continued to struggle dropping two games on the road.

The team lost to Utah State on Saturday in Logan, UT 30-19, 20-25, 26-30 and 26-22 and dropped another match to Idaho Thursday by games scores of 36-13, 30-24, 22-30.

In Saturday’s match, Utah State limited the Mustangs to a .103 hitting percentage in the first game while mustering a .138 percentage in the second in effort. The Mustangs improved to .225 in the second game but were edged by the Aggies.

Cal Poly hit .353 in the third game while holding Utah State to just .167 hitting percentage but the Aggies responded in the fourth game hitting .417 to Cal Poly’s .238.

Emily Doris and Kayla Mulder led the team with 11 kills each while Nicole Bertotti added 10 kills for the Mustangs. Kristin Jackson led the team with 15 digs.

Freshman Courtney Holman also had a solid match with eight kills and five service aces.

The Idaho Vindals defeated the Cal Poly volleyball team in three games on Thursday. The Mustangs hit .122 for the match while the Vandals hit .361 in the three games.

Cal Poly recorded 32 kills on 115 swings and committed 18 hitting errors. UI had 59 kills on 122 swings with 15 hitting errors.

Doris and Mulder led the Mustangs with eight kills each while Bertotti added seven kills in the loss. Kat Tikker led all hitters with 15 kills to lead the Vandals.

Freshman Jackson led Cal Poly with 14 digs with Doris adding seven.
