Voters’ priority is a stable Iraq

Will Lester

WASHINGTON — As President Bush mulled what to do after winning re-election, voters say his first priority should be resolving the situation in Iraq, where the fighting is growing more intense.

They also want Bush to cut the deficit, which ballooned under his watch, rather than pushing for more tax cuts, according to an Associated Press poll taken right after the election.

The voters’ concerns stood in contrast to the priorities Bush cited after he defeated Democrat John Kerry. Bush pledged to aggressively pursue measures of counterterrorism in Social Security, tax laws and medical malpractice awards. Terrorism was a chief concern both for Bush and many voters in the poll.

“I earned capital in the campaign, political capital, and now I intend to spend it,” Bush said a day after becoming the first president in 68 years to win re-election and gain seats in both the House and Senate.

Some 27 percent of respondents named Iraq as the top priority for the president’s second term, ahead of issues such as terrorism, the economy and health care. Only 2 percent named taxes as a priority. By more than a 2-1 margin, voters said they preferred that the president balance the budget rather than reduce taxes further.

After a campaign dominated by discussion of Iraq and terrorism, national security issues are at the top of voters’ concerns along with the economy. Voters were asked to pick from a list of issues in the AP poll that included Iraq, terrorism, the economy, unemployment, health care, education and taxes.

Many voters on Election Day indicated they were also concerned about "moral values," a broader concern than specific issues such as health care and education.

Republicans ranked terrorism first on the list, followed by Iraq and the economy as priorities for Bush. Democrats were most likely to name Iraq, followed by the economy and health care, while independents picked Iraq and terrorism, according to the poll conducted for the AP by Ipsos-Public Affairs.

"He has to go 500 percent in Iraq," said R. U. E. Shoemaker, an independent and a retiree from Chula Vista. "That’s why I voted for the president."

Seven in 10 voters, including a majority of Democrats, would prefer that U.S. troops stay in Iraq until the country is stable, instead of having them leave immediately.

U.S. troops are preparing for assaults on insurgent strongholds used to see Iraq, page 2

In the Cal Poly beekeeping class, students get hands-on experience on how to maintain beehives.

Students said that while the right equipment the bees they deal with in the class are harmless

Jamie Brady

The Cal Poly beekeeping class is beginning to make quite a buzz around campus.

"I had seen the class before and decided to try it," biology senior Kimberly Guilliam said. "It seemed like something different and fun. The bees are actually very gentle and so I worked with them immediately."

Most of the students in the class were very surprised to find how mild the bees actually were, having had prior hesitations to handling them.

"The bees really don’t bother you, as long as you have a net, a smoker and a hive tool," electrical engineering freshman Michael Stallman said. "Some people actually wore shorts around the bees and didn’t even get see Beekeeping, page 2

Fun bee facts

- Honeybees tap 2 million flowers to make one pound of honey.
- A hive of bees flies over 55,000 miles to produce one pound of honey.
- The average worker honeybee makes 1/12 teaspoon of honey in her lifetime.
- Honeybees fly 15 miles per hour.
- It would take about one ounce (or two table spoons) of honey to fuel a bee’s flight around the world.
- The United States per capita consumption of honey is 1.31 pounds.
- A honeybee visit 50 to 100 flowers during one collection trip.

Working adults to get degrees at Cal Poly

Louise Dobby

"Working adults will be given the chance to graduate from Cal Poly through the Adult Degree Program beginning next year," launched by Cal Poly Continuing Education and University Outreach, the new program will offer a bachelor’s degree in interdisciplinary studies for adults at least six years out of high school.

ADP gives working adults an opportunity to take night classes with their peers and graduate from Cal Poly in three years, if they have already earned their associate degree and completed all general education requirements at a community college. According to the Adult Degree Program Web site, “the degree offers a challenging and intellectually stimulating curriculum in a format structured for adults balancing careers, family responsibilities and civic obligations.”

Students can apply through Continuing Education and will be accepted by rolling admissions through June for Fall 2005 quarter. Approximately 35 students will be admitted only in the fall and will take every class together through graduation.

"The ADP offers adults the opportunity to complete their undergraduate degree at one of the West’s top-ranked universities, using a structure see Adult, page 2

In haven for those mounting increased attacks against coalition forces.

"There has got to be some kind of resolution in Iraq," said Erwin Thompson, a Republican and a community college teacher from Moberly, Mo. "We can't fold our tent without accomplishing our goals."

When the choice is between balancing the budget and spending more on education, health care and economic development, voters were divided. Slightly more wanted the additional economic spending, 55 percent, than choosing balancing the budget, 44 percent. During his second term, Bush is likely to have an opening on the Supreme Court. Chief Justice William Rehnquist is seriously ill with cancer.

The program will not affect current student fees since adult students will pay separate, unsubsidized university fees, making it slightly more expensive than full-time students. Adult students need 180 total units to graduate but will have already taken 90 of those at a community college.

Free information sessions about the program are available for potential students to ask questions and meet other prospective students. These sessions will be offered Nov. 15, Dec. 9, Jan. 12, March 9, and April 4.

You can reduce the risk of medical bills with RightPlan PPO 40 from BC Life & Health Insurance Company. It's affordable single-coverage health insurance made painless.

- Affordable premium with no medical deductible
- 42,000 doctors and 440 hospitals
- 3 prescription plan options
- $40 co-pay for office visits

The Beekeeping class fulfills Cal Poly's requirements, giving students a hands on opportunity to learn about bees and their production.
STATE NEWS

SACRAMENTO — In his first official trade mission since taking office, Gov. Arnold Schwarzenegger will travel to Japan this week for a five-day trip to promote California business and encourage Japanese tourism in the state.

Schwarzenegger, who became widely popular in Japan during his career as a film star and action hero, will meet with business leaders and Prime Minister Junichiro Koizumi.

Japan is California's top foreign investor and second most important trading partner, after Mexico.

LOS ANGELES — About 1,000 protesters gathered in Hollywood on Saturday to rally against President Bush's re-election and U.S. military operations in Iraq, police said. Four people were arrested.

Demonstrators chanting anti-war slogans and waving signs marched to a military recruiting office at a busy intersection in police in riot gear looked on.

A scuffle broke out after authorities stopped the protesters and a military recruiting office. Demonstrators were arrested for allegedly throwing bottles and vandalizing cars and attempting to prevent officers from making an arrest.

REDWOOD CITY — After a scuffle broke out after authorities stopped the protesters and a military recruiting office. Demonstrators were arrested for allegedly throwing bottles and vandalizing cars and attempting to prevent officers from making an arrest.

WASHINGTON — Reflecting on how he delivered Bush calls the architect of "gift that kept on giving.''

The average penalty for a company doing business with Iran, Iraq, North Korea, Sudan or Libya dropped nearly threefold, from more than $50,000 in the five years before the 2001 attacks to about $18,700 afterward, according to a computer-assisted analysis of federal records.

WASHINGTON — Insisting he has no litmus test, the President Bush's judicial nominees, even if the prospective judges oppose abortion rights. The White House expressed confidence in choices would get a fair hearing.

Sen. Arlen Specter, a moderate from Pennsylvania who backs abortion rights, said he has supported judicial nominees in the past who do not agree with the Supreme Court's 1973 Roe v. Wade decision that legalized abortion.

IN OTHER NEWS

OMAHA, Neb. — After ignoring six years of prodding from the city, a woman is going to jail for having a filthy house. A Douglas County judge Thursday sentenced Rosie Fellman to 45 days behind bars for littering, with breaks every 10 days to clean up her central Omaha home.

Trash and debris has been piled up to 5 feet deep in the house and garage, which are a health and fire hazard, the city's chief housing inspector Kevin Denker said. Last month, inspectors found more than 100 garbage cans in the driveway.

At the end of Fellman's sentence, the judge will decide if she has improved the home's condition. If not, she could be sentenced to another 45 days in jail.

The city has ordered the home demolished, but Fellman, who lives alone, is appealing the order.

BEIJING — A Beijing man has paid $215,000 for the ultimate in lucky cell phone numbers — 133-3333-3333.

The phone number was sold this week at an auction in the Chinese capital, newspapers reported Saturday.

Chinese tradition considers 8 the luckiest, all Chinese cell phone numbers begin with "13," making it impossible to make a number with all 8's.

A time of war, a time of peace

I think we can all agree that media outlets that claim to be about music have a very different focus. Music television is (really tasteless) reality television with a music video two times a day. Music magazines are essentially advertisements for cigarettes, clothes and iPods. But the one thing these corporations do focus on quite often is politics. MTV covers every election, and Rolling Stone sports politicians on the cover.

But why do completely different media frequently find themselves in the same place? Part of it could be that we all need to feel important because we don't have an excellent fodder, but perhaps it's because music and politics aren't so different after all.

Hundreds of years ago, music was composed and performed for political figures, usually royal families. Music and politics were both noble jobs, and musicians who performed for politicians could make a lot of money. Beethoven's Eroica symphony was originally named the "Bonaparte Symphony" as a tribute to Napoleon Bonaparte. After Napoleon made himself Emperor, Beethoven was furious. He renamed the symphony but left the inscription, "composed to celebrate the memory of a great man," leaving some historians confused.

Moratz's career was also fueled by politics. He was appointed court organist and Konzertmeister at the Salzburg court, where he was to compose dance music for court balls and other special occasions. Some of us wish we could do that today. I'm sure — though some of us (me) just can't see ourselves working for politicians and not smashing our instruments into their heads — but politics and music continue to have a strong partnership.

More recently, the war protest and civil rights movements have involved music heavily. To some people, the anti-Vietnam era is only the idea. But regardless, neither would be as strong if it weren't for the million people who do support them, and that just might spark hope that this music shaped and solidified some of the greatest steps toward change.

These movements were the basis of many political musicians, but it didn't stop there. Even in the 1990s, Rage Against the Machine forged a reputation with music that challenged the status quo in the United States and the world.

Doctoral students add culture to Poly

An effort to faithfully represent Campus Crusade
I must respond to Jeanette Osterlind's letter in the Nov. 3 edition of the Mustang Daily.

As one of the advisers for Campus Crusade for Christ, I first want to apologize for the way she (or others) may have been treated by students who are involved with our organization. Her description of being "bomhardled' and "treated... for belonging to a group of people that killed our savior" grieves me. This does not represent the kind of encouragement, nor does it represent our beliefs.

We emphasize (as Jesus did) the need to love, serve and care for people. I realize that we do not do this perfectly, but this is our aim. We also do not believe that Jewish people are responsible for Jesus' death. Jesus went to the cross on his own volition to pay for the sins of all mankind. The truth is, because of my own pride, greed, lust and self interest, I am the one who is most responsible for Christ's death as anyone.

We have a large club and there will likely be students involved who do not fully understand who we are and what we believe. Because of this, I encourage any one who has a negative experience to please contact us directly and let us know about it. We would like to do what we can to faithfully represent the love and compassion of Jesus here at Cal Poly. You can contact us through our Web site at www.calorstude.com. Thanks.

Jamey Pappas
Campus Crusade for Christ co-advisor

Pointing out some contradictory statements
Matt Phillips, it's a shame that someone with such a great first name can be so stupid.

Everything you said was a contradiction in itself. You say that you can't get something from nothing, then you have this "being with immense power" just pop up out of nowhere and profit, makes the universe out of nothing.

Then you say we are not evolving any more. But we are, and evolution among humans isn't seen very much because we use our brains to adapt. If we could not wait a million years to grow more hair, we make a smarter. I know as an engineer you only have to look Bio 213, but maybe you should expand that base a little.

Next you say if there's no God, let's just fill the glass and light up a joint. The foundation of modernism does not rely on the existence of a God.

Just look at all the atrocities that have been carried out under the guise of a God. I'd recommend a few philosophy classes for that one. I can't spare the words.

Lastly, as you call into question the very definition of the "faith" you have. "believe" does not appear on logical proof" so by having your faith in a God, by definition you are the ideological one. 

PS. Thanks for helping vote my boy Bush into office, I knew I could count on people like you along with the Bible Belt to get the job done.

Matt Bonander
Industrial technology senor

More comments on inconsistent writing
I am hoping I simply missed the pointake in the joke that was in Matt Phillips letter to the editor. I simply missed how someone can use the laws of thermodynamics to DISPROVE the Big Bang theory. No. 1, the Big Bang, did not start or you claim - create something from nothing. It was a rapid expansion of a preexisting singularity. No. 2, the laws of thermodynamics could disprove the Big Bang theory so simply, it never should have become the accepted as the leading theory of creation. Do you think theoretical physicists skip theore? No. 3, unless you claim that God created the universe from some part of his being, which would make you a pantheist instead of a montheist, God did create something from nothing. As it says in the Bible, in the beginning there was only God.

So, don't even get started on your claim against how we are no longer evolving, if you need clarification on that you can wait for some other letters.

Brandon McMarge
Computer science senor

Thank you for supporting a step toward divinity
The dust has settled, mummies are over and papers have been turned in. Now it's time to say thank you.

Two weeks ago, more than 550 people showed up in Chumash Auditorium at Cal Poly to view "What Are You Gonna Do Today?" a film addressing issues of diversity at Cal Poly.

The film (an offshoot of senior project research) was followed by a panel discussion featuring several Cal Poly administrators, staff and Faculty.

This event was more than fun. It could have never happened for. Not only did people show up, but also they chose to stay and engage in dialogue. I would like to thank the event co-sponsors: Cal Poly social sciences department, Mustang Video, club, Multicultural Center and Student Life and Leadership.

Without the enthusiasm of others that helped promote this event, we would be one less step toward building a better future for Cal Poly. If you did not get a chance to see the film, it is available at both Innsam Video and the Game Station.

Thank you all to - now go out - and be the change!

Michael Hamilton
Senior senor

Arguing that he is, in fact, a 'bird-brained creationist'
In response to Mr. Phillips' insightful letter on Nov. 3, I would like to argue that he is a bird-brained creationist.

First of all, it is possible to create something from nothing, at least at cold fusion breakthroughs where scientists are able to create heat energy without consuming any reactants.

Second, please don't ignore recorded history, which itself proves the human race IS evolving. People are born smarter and stronger than only 2,000 years ago.

If your faith in creationism is still unshakable, I'd like to explain to you what a fossil is. Being that the timeline of the Bible is but a few, maybe several, thousand years, how is it possible that this book is millions of years old? I assure your you're not an adversary to science to disprove God, as one Christian has told me.

I am not writing to say #127; Faith. I think it gives people hope and a false sense of purpose which is necessary for some. Instead I write to say screw organized church. Your religious leaders spread hate around the world, such as Pat Robertson slamming Muslims and waging the war on the faith. It is not until such hate is abolished that society can move forward.

Please overcome the ignorance that says only Christian religions are correct and all heathens should be destroyed. If I'm not mistaken, isn't Jesus the epitome of understanding and forgiveness? If so, then do the world some good and follow Jesus' principles rather than the preachings of contemporary 'patriots.'

Football

continued from page 5

with 16 catches for 141 yards, both career highs, and his two scoring catches tied a career high for the season.

Cal Poly was held to just two yards rushing. Carmon was sacked five times to cut into the Mustangs’ total. Adam Martinez had 38 yards on five carries while Geno Randle added 33 yards on six carries.

Jones matched his career high with eight catches for 163 yards.

Defensively, Cal Poly was led by linebacker Jordan Beck with 21 tackles, second-most in his four-year Mustang career. Shorell finished with 13 tackles, including 1.5 sacks, and Chris Gocong had 11 tackles, including a sack. Both Beck and Gocong are Buck Buchanan Award

nominees.

Cal Poly’s defensive record six sacks, raising its season total to 31, and one interception, giving the Mustangs 19 on the year.

Cal Poly will host Northern Colorado at 6 p.m. in Mustang Stadium.

Soccer

continued from page 8

ing shutouts against both regular season co-champions Cal State Fullerton and UCSB. The Mustangs have recorded a shutout in 10 of their last 16 contests.

Kelsey Carroll’s 39th minute goal help propel the Mustangs to a 1-0 win over Cal State Fullerton on Friday. Cal Poly eliminated the Titans from the tournament semifinals for the third time.

The Mustangs and Gauchos battled to a 0-0 double overtime tie in their regular season matchup on Nov. 15. The lone score of Friday’s game was set up off a corner kick by senior Stephanie Hedeen. The midfielder served it into the six-
yard box, touching off a scramble for the ball.

The ball pinballed between players before going to Carroll, who capitalized with her second goal of the year.

Cal State Fullerton applied steady pressure throughout the second half in an attempt to gain the equalizer.

However, opportunities were limited as Mustang goalkeeper Liz Hill only made one save in the second half and four for the game.

Her goalie counterpart Karen Burbide made four saves for the Titans.

Each team took 12 shots for the game, led by Carroll with three for Cal Poly and Kandace Wilson with three for Cal State Fullerton.

Women's soccer defends its title

The Cal Poly women's soccer team allowed just four shots to UC Santa Barbara as the Mustangs defeated the Gauchos 2-0 to win the Big West Women's Soccer Tournament for the third consecutive year.

As it did last year, Cal Poly defeated the Gauchos in the tournament finale and earned a spot in the NCAA Tournament.

Sophomores Sharon Day and Danielle Camarena tallied goals for the Mustangs who captured their fifth championship in six seasons and sixth overall.

Cal Poly improved to 11-2-6 on the year and earned the Big West's automatic bid to the NCAA Tournament, which begins Friday.

UC Santa Barbara, the Big West regular season co-champion, fell to 13-6-2 and awaits the possibility of an NCAA Tournament at-large bid.

The announcement of the 64-team Division I Women's Soccer Championship bracket will take place between 1-2 p.m. today on ESPNEWS.

Cal Poly grabbed the 1-0 lead at the 12:56 mark when Day stole the ball from UCSB defender Cintha Ruiz in the penalty box. Ruiz subsequently fouled Day on the turnover of possession, resulting in a penalty kick for Day. The forward converted the opportunity as UCSB goalkeeper Jamie Considine guessed correctly and dove left but could not corral the shot. It was Day's team-leading 11th goal of the year. The first half ended with Cal Poly owning a 10-3 edge in shots.

The Mustangs upped their lead to 2-0 in the 66th minute on a corner kick. Senior Stephanie Hedeen served a ball into the six-yard box that Considine misplayed amongst a logjam of players. The ball squirted out to Camarena who capitalized on the short-range shot for her second goal of the season. UC Santa Barbara managed only one shot in the second half and did not have a shot on goal for the entire game. Senior forward Jennifer Borich, who notched a hat trick against Cal State Northridge in Friday's semifinals, was limited to two shots for the match.

The Mustangs finished with a 13-4-3 advantage in shots. Day and sophomore Kelsey Carroll led the Mustangs with three shots apiece.

Cal Poly goalkeeper Liz Hill earned Big West Tournament Most Valuable Player honors after posting a clean sheet.

Football can't overcome air attack

For the second straight week, Cal Poly football couldn't stop the pass.

And for the second straight week the Mustangs lost, falling to No. 21 Eastern Washington 38-21 in a non-conference game at Woodward Field.

Junior quarterback Erik Meyer completed 21 of 32 passes for 417 yards and four touchdowns. Meyer's performance comes a week after UC Davis quarterback Jon Grant came off a similar performance. The Mustangs have given up 810 yards in the past two games.

It was a game where Cal Poly worked to keep the offensive pace.

Tying the game at 7-7 and 14-14, but never taking the lead.

Meyer produced the fifth-best passing performance in Eastern Washington history and became the first player to pass for over 400 yards against the Mustangs since J.T. O'Sullivan amassed 415 yards for Davis in 2000.

But Mustang junior quarterback Anthony Garnett wouldn't let it become a one-sided affair completing 21 of 44 passes for 341 yards, his third 300-yard passing game in four weeks. He also threw three touchdow

The Mustangs suffered their second consecutive loss and have given up 74 points total over the past two games including 810 passing yards.
