Cal Poly's tie to weapons engineering

Students struggle with the ethical dilemma of making weapons to advance their career

Carrie McGourty
MUSTANG DAILY

His life was changed completely when a family friend nonchalantly handed six-year-old Francesco Giannini a model airplane at a dinner gathering at their home in Rome. His small hands became addicted to the puzzle of putting parts together. His mind was consumed with the process of creating something from nothing. His behavior reflected that of a quintessential engineer.

In a country with a long history of battles and conflict, the reflex of warfare inspired the young boy. Fascinated by the military machines that ruled the sky, he inherently knew he would study and craft his own designs.

But when he grew up, and followed his dream from Italy to the United States to study aeronautics at Cal Poly, Giannini realized the reality that settled upon his future. He would not be creating toys, but tools of war.

"If you're an engineer, you have a will to create things independent of what's happening in the world," Giannini said. "I have ideas that can turn into reality, but I don't think about how it will impact people. It just so happens that I'm good at designing airplanes."

Aeronautical engineering graduate Francesco Giannini is unsure about whether he will use his education to build weapons. Giannini, a graduate in aeronautical engineering at Cal Poly who is pursuing a masters in aerospace engineering. "I have ideas that can turn into reality, but I don't think about how it will impact people. It just so happens that I'm good at designing airplanes."

Like many, he struggles with the personal predicament of fulfilling his potential as an engineer, which could mean designing weapons that will kill, or settling for the "mediocrity" of civilian projects, which might encompass work that limits his capabilities. "The intellectual challenge is really important," he said. "But you should be thinking about what happens to that idea too."

Giannini is an Italian citizen and cannot work in the United States, but his situation reflects many Cal Poly engineers who find themselves at a turning point in their careers.

Ten campuses, including Cal Poly, were awarded between $45,000 and $50,000 to be used over a two-year period with the third year of the program funded by the individual universities.

Poly receives grant to fight alcohol abuse

Ten CSU campuses have been awarded up to $50,000 in an attempt to cut alcohol-related misconduct among students

Nicole Stivers
MUSTANG DAILY

Cal Poly is among 10 California State University campuses to receive a grant to reduce student alcohol abuse and resulting traffic deaths. The $750,000 grant from the state's Office of Traffic Safety finds a new CSU Alcohol and Traffic Safety program intended to curb alcohol abuse, alcohol-related crashes and alcohol-related misconduct among college students.

"Our message is geared toward moderation and safety, as opposed to abstinence," said Perry Angle, CSU ATS program director.

The CSU ATS program will employ a series of mini-grants to promote anti-DUI initiatives created by campus Alcohol Advisory Councils, said Paul Ollano, vice president for student affairs.

College Drinking Consequences

Facts for college students between the ages of 18 and 24

Alcohol abuse is a real problem among college students between the ages of 18 and 24. According to the National Institute on Alcohol Abuse and Alcoholism, more than 70,000 are victims of alcohol-related sexual assault or date rape each year.

Sexual assault

More than 600,000 are assaulted by another student who has been drinking.

Unsafe sex

400,000 had unprotected sex and more than 100,000 reported having been too intoxicated to know if they consented.

Student assaulted during Mardi Gras

It took the San Luis Obispo Police Department more than an hour to arrive at the victim's Mustang Village apartment

Karen Velie
MUSTANG DAILY

A Cal Poly student reported being sexually assaulted at Mustang Village early Sunday morning.

The alleged assailant followed the victim down California Blvd. as she walked home from a party.

"My friends thought he had been sent by a sorority to follow me home, "she said. "I had been drinking."

The woman, who wasn't identified by police, reported that she did not know her attacker. But witnesses have identified him as a Cal Poly fraternity member, said the survivor.

"I think he picked me up and set me in the back seat," she said.

The police were called at 2:12 a.m., but did not arrive at the Mustang Village apartment until 3:31 a.m., according to the police log.

"It took a very long time," the survivor said.

When asked why the response time was not quicker, Justin Stevens, record clerk for the San Luis Obispo Police Department, said, "A sex offense is in the past, we refer to it as a cold call. Calls of drunk and disorderly are in progress."

"We have no leads," San Luis Obispo police detective Allison Martinez. "It's an ongoing investigation."

During Mardi Gras weekend, 400 additional police patrolled the streets of San Luis Obispo. Saturday night, 36 arrests were made, mostly for being drunk in public.
**Shiites, Kurds win big in Iraq**

Iraq's first free election in more than 50 years gives power to groups that suffered most during Hussein regime

Robert H. Reid

BAGHDAD, Iraq — Clinging-backed Shiites and independents won Kurdish victory in Iraq's landmark election of Sunday, with power to the groups that suffered most under Saddam Hussein and fighting for the first time in modern history, according to final results released.

But the Shiites, 48 percent of the vote is far short of the two-thirds majority needed to control the 252-member National Assembly.

The theory behind the Cal Poly engineering education curriculum, according to Dr. William Heus, is that graduates will enter a work field where most of the major work will go to the military, and that the military will be earmarked for research and manufacturing of weapons and computers.

This means engineering corporations will receive billions in military contracts to manufacture state-of-the-art defense systems and job opportunities will open for many engineers.

In 2002, the aeronautical engineering department at Cal Poly, according to Dr. William Heus, had received contracts worth $2.7 billion over the next five years.

"How can you make a name for yourself when you cannot innovate at Cal Poly, a university that teaches you to think," asked Dr. William Heus.

The corporate partnership between Cal Poly and engineering companies which manufacture weapons runs deep in the university's history.

Founded in the early 1900s, as a predominantly vocational and agricultural school, Cal Poly trained in study of the applications engineering companies had to apply in multiple industries. In early foundations in practical skills, especially engineering, helped the university to attract the students and credibility among hiring companies as the century advanced.

The first engineering companies were soon recruited in the engineering industrial sector, many of whom had worked in the same area the public, including public works and weapons manufacturing.

"When you're a student for their careers, the College of Engineering partnered with engineering companies of the last decades and formed an advisory council that develops a cohesive and practical program," said Dr. William Heus, the director of publications and communications for the college.

"They prepare students for the jobs that will be available when they get out of college," Dr. William Heus said.

The advisor to the engineering department,170 members, composed of faculty and corporate representatives, among the companies are Boeing, Raytheon, Northrop Grumman and Lockheed Martin, which accord- ing to the CTU, are the major contractors for weapons systems manufactur- ing. There are also a number of corporate-advisory council members who do research in the manufacture of weapons.

"They make sure that the engineering department maintains high standards and a relevancy curriculum to stay competitive in the academic world," Dr. William Heus said.

The theory behind the Cal Poly engineering education curriculum, according to Dr. William Heus, is that graduates will acquire an array of holistic, practical and theoretical skills that can be applied to many areas of the engineering field, including weapons manufacturing.

"But there is no specific gnoming of them for one particular industry," Dr. William Heus said. "The largest attrition of students in the state and that would pigeon-hole us.

Yet, there are strong economic ties between the college and weapons manufacturing companies. As "industry partners" with the COE, Lockheed Martin, Northrop Grumman, Raytheon and Boeing corporations donated hundreds of thousands of dollars in 2003-04, in addition to numerous student scholarships.

"They help out the students a lot," said Steve Deol, an industrial controls student at Cal Poly and e-mail all the time about internships, co-ops and job opportunities.

Students said they work for those companies because they have a very good reputation and they pay well.

"We definitely have a presence on campus," said Dr. William Heus.

In 2003, the aeronautical engineering department at Cal Poly, according to Dr. William Heus, had received contracts worth $2.7 billion in the next five years.

"If we can share with one another and tell our students what is going on in other departments and activities, in the mechanical engineering depart- ment, Lockheed Martin, Boeing and Space and will give a $5,000 grant to Dr. Frank Oven to develop Micro Electro-Mechanical Systems (MEMS) applied research project.

Career Services did not track the number of Cal Poly graduates who go on to work in those industries, but engineers from almost every major were recruited by those companies, especially in chemical, aeronautical, computer science and computer engineering. These companies are among students who don't involve weapons, but said that fresh recruits won't know which employers are involved in the work they're hired.

"When you're interviewing for a job, they're going to ask you about your department, not a project," Dr. William Heus said, who interacted with Boeing last year. "They're interested in the same things.

"As a new employee, it might be hard to take a moral stance against a program if you're worried about your future," said Dr. William Heus.

COE Dean Peter Lee declined an interview on this article.
Jackson's lawyers announced — With a verbal cease-fire deal — a major Hollywood spectacle: Tuesday for face-to-face talks and gathering at a MidEast summit the president's priorities and charging terrorism and protecting the homeland while seeking to weed out "Tonight Show" host Jay Leno, promoting Tucker and singer Stevie Wonder, producer Quincy Jones, actor Chris Tucker and singer Stevie Wonder, along with Taylor, Ross and Kobe Bryant to the witness stand during the pop star's molestation trial.

The list of possible witnesses sounded like coming attractions for a major Hollywood spectacle: "Tonight Show" host Jay Leno, producer Quincy Jones, actor Chris Tucker and singer Stevie Wonder, along with Taylor, Ross and Kobe Bryant. The Justice Department.

**WASHINGTON — President Bush on Monday urged Congress to reauthorize the U.S. Patriot Act, passed in the wake of the Sept. 11 terrorist attacks, bolstered FBI surveillance and law-enforcement powers in terror cases, increased use of material witness warrants to hold suspects incommunicado for months, and allowed secret proceedings in immigration cases.**

The president also argued that the Senate must give his nominees for the federal bench up-or-down votes without delay to fill vacancies in the courts. The Patriot Act, passed in the wake of the Sept. 11 terrorist attacks, bolstered FBI surveillance and law-enforcement powers in terror cases, increased use of material witness warrants to hold suspects incommunicado for months, and allowed secret proceedings in immigration cases.

The explosion Monday afternoon at the Sunjiawan mine in Liaoning province also injured 22 miners, despite nationwide safety efforts. The cause of the blast, which occurred 794 feet underground, was under investigation, it said. China has suffered a string of deadly mining disasters in recent months despite nationwide safety efforts.

Man used Valentine's Day to organize mass suicide

Rukmini Callimachi
ASSOCIATED PRESS

PORTLAND, Ore. — In an Internet chat room, a man tried to entice out to more than two dozen emotionally fragile women, but prosecutors say he wasn't looking for dates. Instead, he allegedly tried to persuade them to end their lives on the day love is celebrated.

Gerald Krein, 26, is charged with organizing a mass suicide on Valentine's Day, possibly while the female participants were all logged online at the same time, said Klamath County Sheriff Tim Evinger.

Prosecutors were expected to add an attempted manslaughter charge on Monday, when they were expected to take the case to a grand jury.

"The common theme is that these were women who were vulnerable, who were depressed," said Evinger.

"Because he lived in a mobile home, it's clear that he was either engaging in some kind of fantasy. Or that he planned it for it to happen somewhere else," Caleb said on Sunday.

No deaths had been found that were linked to Krein, the sheriff said. However, he said he would not be surprised if someone had killed herself as a result of Krein's alleged actions.

"My concern is if he's been doing this for some time — it's my hope that he hasn't been successful — but it could turn out that he has been," Evinger said.

Detectives learned of the Valentine's Day plan from a woman in Ontario, Canada, who said she saw a message in a Yahoo chat room that had "Suicide Ideology" in the title. The chat room is no longer active.

The woman told detectives she was going to take part in the suicide, but had second thoughts when another chat room participant talked about killing her children before taking her own life, Evinger said.

Krein was arrested Wednesday at his mother's home in the southern Oregon town of Klamath Falls. He moved to Oregon about a year ago from the Sacramento area to take care of his ailing father, Evinger said.

So far, investigators have tracked down four of the women Krein was in contact with the woman who came forward in Canada and three others living in Oregon, Missouri and Virginia.

Students at recently-closed D-Q University fight to reopen the state's only tribal college for American Indians

SACRAMENTO (AP) — The campus may be closed, but some students aren't leaving.

D-Q University was California's only tribal college for American Indians before the small Yolo County school closed more than three weeks ago.

But 24 students remain on campus, clinging to the hope that they can save the institution. The die-hard students have defied eviction threats and subsisted on donated food as they battle to reopen D-Q.

"If we let this place die, it will be a tragedy," D-Q student body president Lynn Brown told the Sacramento Bee. "The people really think we should just walk away and let that happen?"

The 34-year-old school's finances have been troubled for some time, spurring complaints about D-Q's leadership and unsavory living conditions.

The Bureau of Indian Affairs delivered D-Q a damaging blow by pulling $300,000 from the school's budget because its enrollment of federal recognized Indians fell below 31 percent. Yet the college managed to stay open until it lost its accreditation last month. The situation became even more muddled with the creation of a new board of trustees to challenge the group that told students to leave the campus dorms.

D-Q President Victor Gabriel said the school's original board of trustees, led by school founder David Rading, remains in charge, but a rival board led by Cindy La Marr contends it is in power.

La Marr's group got a court order last week to keep Gabriel off campus.

The board led by La Marr has asked the Western Association of Schools and Colleges to reconsider in decision to revoke D-Q's accreditation.

"We cannot let this tribal college go away," said La Marr. "...But we have some major issues to work through, and this will take some time."

Meanwhile, the Rading-led flank has told the students to vacate the campus dorms.

D-Q's students have been trying to raise money from the affluent tribes that operate casinos, but haven't had much success.

The school's leadership vacuum is discouraging the casino tribes from financing a bailout, said Paula Lorenzo, chairwoman of the Rumsey Band of Wintun Indians, which owns the nearby Cache Creek Casino Resort.

"They need to get their accreditation back, get a board and a president that can show students and the community that they can provide an education," Lorenzo said.

D-Q probably would have opened if not for the perseverance of students who jumped the fence of a closed U.S. Army Communications Center in 1970 to demand that the space be turned over for a tribal college.

After weeks of negotiations with federal officials, the student activists prevailed in 1971.

While they tried to save D-Q, the current group of protesting students have enrolled for classes at a Solano College campus in Vacaville.

"We've been through a lot, and it's not easy when we don't know what's going to happen to our school," Lorena Rivera, a Mohawk/Umpqua, told the Sacramento Bee. "We want our education to be from here. That's why we are staying."
More U.S. colleges make health insurance mandatory for students

John Seewer
TOLEDO, Ohio — A growing number of public universities are requiring students to have health insurance before they step into the classroom, a move aimed at saving the uninsured from huge bills and college officials are also finding that some students are forced to drop out when faced with the medical care expenses.

“Who makes it a tough decision is the potential added costs,” said Jim Mitchell, director of student health services at Montana State University, which has required insurance for nearly 20 years. “But there are compelling reasons to do it.”

More schools have started mandating the coverage in the past four years. Hospitals no longer absorb the costs because of increasing health care expenses.

The University of Connecticut, Ohio State University and all 18 schools within the University of California system now require health insurance. The University of Utah is looking into it.

Others, including Old Dominion, Kent State University and South Dakota’s board of regents, have decided against the idea.

Costs vary from campus to campus — undergraduates at UCLA paid $558 for a full year; the price is $1,211 this year at the University of Toledo, where insurance is required.

Yet, some schools have resisted mandatory coverage, fearing extra costs will push students to other colleges. Still, others worry students already are burdened with huge loans and rising tuition.

“We may be pricing students out of college,” said Alex Wright, president of the student government at Bowling Green State University.

The costs to uninsured students can be staggering when they’re hospitalized.

For example, a student at Old Dominion University, in Norfolk, Va., had $100,000 in medical bills stemming from injuries in a car accident, said Jenny Foss, director of student health services.

“Students can take care of their car repairs, but they may not be able to take care of their injuries,” she said.

In extreme cases, the student is forced to declare bankruptcy.

Allowing students to decide whether they want health insurance can dilute a school’s health plan when few buy into it. Often, Foss said, it’s mainly students with health problems who purchase coverage, driving up the number of claims and costs.

Old Dominion discontinued its health insurance plan a year ago — only 400 of its 20,000 students were using it. That’s despite a school survey that showed about 4,000 students had no health coverage.

Glenn Egelman, director of student health at Bowling Green, noted that some students are forced to drop out when faced with the medical expenses.

Chocolate industry criticized for inaction on child labor

Jim Abrams
WASHINGTON — Forgot to buy chocolates for your Valentine? Now you can say you’re in step with lawmakers shunning the treat because of child slavery on West African cocoa farms.

Sen. Tom Harkin, D-Iowa, said Monday he’s buying his wife flowers instead of chocolate for Valentine’s Day and encouraged others to do the same.

The Chocolate Manufacturers Association is “puzzled and surprised” by charges that chocolate makers are not abiding by an agreement aimed at child labor practices, the association’s spokesman Susan Smith said.

A 2001 protocol called for the industry to join international labor and other groups in monitoring child labor in the Ivory Coast, the world’s largest cocoa-producing countries of West Africa.

Harkin and Rep. Eliot Engel, D-N.Y., in negotiating the 2001 protocol, said negotiations with the industry have “nearly collapsed” and that the goal of a public accounting of labor practices in cocoa-growing countries by July will not be met.

He said human rights activists estimate that as many as 30 percent of cocoa farms in the Ivory Coast use forced child labor.

“The chocolate companies have the leverage and clout to stop this suffering. But if corporate responsibility is lacking, Congress will be obliged to act,” Harkin said.

Smith said the industry has met every deadline established under the protocol and intends to meet the July 1 deadline.

She said a large-scale test program for cocoa farm labor monitoring is already under way in Ghana and the Ivory Coast, which is the source of more than 40 percent of the world’s cocoa beans.
There's a purpose for a movie like "Hitch." And that is to offer an amusing and undemanding romantic comedy to take your sweetheart to on Valentine's Day.

The film starts with Alex "Hitch" Hitchens (Will Smith) instructing the audience on life and dating. "Life is not about the amount of breaths you take, it's about the moments that take your breath away."

"Hitch" takes place in New York City, where every man is properly groomed, yet completely incompetent; where every woman is tightly clutching her copy of "He's Just Not That Into You," and everyone is connected through an invisible network of Google searches. It's a place where men are so worried about being themselves that they hire a professional to do it for them.

Hitch, secretly known as the "date doctor," helps his fellow men get from date one to date three without self-destructing. Yet this romantic know-it-all is caught off guard by Sara Melas (Eva Mendes), a newspaper gossip columnist who is investigating rumors of the "date doctor." However, she is unknowingly cozying up to Hitch, the urban legend himself, in a series of disastrous encounters.

From the trailers, "Hitch" seems to be this season's perfect romantic comedy. Unfortunately, every funny scene in the movie was overplayed. There are a few amusing moments, but overall, if you've seen the commercials, there's no sense in going out to see the movie.

The main reason people see this film is undoubtably Will Smith. He expresses himself just fine with none of the offbeat stink of "Hitch." Smith is naturally charming, and not in a superficial manner he has often fallen back on in some previous work. He's comfortable, intelligent and secure.

Hitch's main attention in the story was focused on Albert (Kevin James from "King of Queens"), a pudgy, nervous, fumble-thumbed accountant who is in love with one of his clients Allegra Cole (supermodel Amber Valletta), a wealthy, beautiful heiress.

In this film, James has a knack for fine-tuned physical comedy that makes you laugh, even when the script isn't a bit humorous. And despite the fact that his best scene was played in TV advertisements, James and Smith's goodnight kiss is hilarious no matter the setting.

One great aspect about "Hitch" is the moral that is exerted within every growing scene. The "date doctor" shows us that he doesn't help the "hit her and quit her" type of guy, just the long-time commitmentters. In the end, this proves to any woman who would have made a presumed judgment about him, that they were wrong.

Overall, one can think of this movie as a typical blind date. Bits of it are enjoyable, but much of it is slightly awkward; many moments trudge along with uncomfortable stop-and-start conversations and by the end, you just can't wait for it to be over.
students are more susceptible to depression and anxiety because of a high-stress lifestyle and alcohol, drug abuse

Kristen Oato  
OCKINGHAM DAILY

His typical morning begins as he jumps out of bed around 7 a.m. He quickly shaves a random assortment of papers and books into his backpack and runs to school without breakfast. After three hours of class, he hurries home to change into work clothes. After a six-hour shift, he books it to the library for a group meeting. Upon returning home to do homework, he realizes he has only eaten an apple and two cups of coffee. Here comes the frozen dinner. Is he a superhero? No, just a college student.

Factors such as high-stress levels, leaving home and new responsibilities are likely culprits of depression and anxiety. Finding a balance between school and social activities can be difficult with a less-structured schedule. A female's chances of developing an anxiety disorder — including generalized anxiety disorder, panic disorder, post-traumatic stress disorder and specific phobias — are double in the years following adolescence, according to national magazine College Health in Action.

Depression, anxiety and drug abuse are all extremely prevalent on college campuses. According to the 2002 National Survey of Counseling Center Directors, about 94 percent of counselors from 274 institutions of higher education perceive an increase in students with more serious psychological problems during the past five years.

"Although I started in Cal Poly in December, I worked as a physician in Southern California for 20 years. I can honestly say that 20 percent of the patients I saw came in for depression or for depression-related issues," said David L. Harris, a staff physician for Health Services at Cal Poly. "Here the percentages seem the same. Every day there are students who come in with symptoms of depression. Usually, they are referred through the counseling center."

Analysts who work in the drug abuse and mental health industries report that a significant number of students who seek mental health treatment often appear to also have symptoms of substance abuse. Likewise, many college students who frequently abuse alcohol, or other drugs, often show signs of depression or anxiety.

In a survey among college students, taken in the spring of 2003 by the National College Health Assessment, 15.9 percent of women and 8.5 percent of men report a diagnosis of depression at some time. Students who look to reduce anxiety issues or elevate their mood by drinking or smoking are at a higher risk for developing a substance abuse problem. Substance abuse is also extended to the misuse of prescription drugs. Stimulants such as Ritalin, Adderall and Dexedrine, which increase blood pressure, heart rate and alertness, are common on campuses because of the large number of students who are diagnosed with attention-deficit hyperactivity disorder. Students looking to enhance study skills typically use these drugs.

Many students have a tough time seeking help. Family physicians often see many parents, as well as friends, bring in others.

"I think that the best approach to depression, since it is a multifaceted problem, is dealt with in a multifaceted way," Harris said. "As far as treatments, medications usually have a role to play, but it's not the only thing to rely on."

Counseling and therapy also play a vital role.

"I think counseling and or psychotherapy with a psychiatrist or a counselor can be beneficial to a patient, he said. "It's a multidimensional medical problem that affects a variety of aspects of life, so I think to look for a single avenue like a pill is certainly an inadequate approach."
The original 'Deep Throat,' released in 1972, would be protested and eventually banned in 23 states, only making the film more popular.

"No, it's not a good movie," director Jerry Damiano happily admits at his Florida home, tanned and dressed in high-wasted slacks.

And he's right. "Deep Throat" was shot in six days for $25,000, and it shows, though the Brillo-haired, bug-eyed production manager says he approached the movie "like I was Luc Longoria's muse, as a woman looking to shake down the cashiers for half the day's receipts. But even those did not go.

The idea of organized crime connection is tossed out there, that the mob helped distribute "Deep Throat" and then sent 'checkers' to shake down the cashiers for half the day's receipts. But those don't aren't connected completely, leaving you to walk away with more questions than answers.

If you're only in it to have a good time, though, 'Inside Deep Throat' comes through.

Men, women opinions vary on sexual terms

David Cohen
Independent Film Journalist

A University of Florida study has confirmed what couples have claimed for centuries — men and women do not see eye to eye. The study noted men and women view sexual terms, ranging from "orgasm" to "rape," differently.

"We wanted to compare and contrast the meaning of sexual terms over time as well as new words," said Virginia Noland, a professor in the health science education department and the leader in the study.

"Examining the evolution of sexual language is important in the 21st century as communication becomes more important," she said.

Noland's team of researchers asked about 370 undergraduates at a large Midwestern university to rate their initial feelings toward 42 sexual terms. The study found men see "feminist," "gay," "heterosexual" and "sexual assault," as having a more positive light.

On the other side of the coin, women rated "breast enlargement," "erection," "Internet sex," "oral sex," "pornography" and "transgender" more positively.

Noland and her team compared the results of their study to a similar one done in the Midwest in 1989 by the University of South Florida and Southern Illinois University. Noland found the research "Inside Deep Throat," a new 15-year period.

"We think this signals a shift in 'orgasm' becoming something that is acceptable for both men and women," she said. "(It is) something women shouldn't be ashamed of talking about or achieving. There's a growing realization that women are sexual creatures, too."

A few trends warranted concern for Noland. "Breast enlargement" made in first appearance in the study, and the female impression of the word was more favorable than men. "The favorable rating women gave to breast enlargement could signal acceptance of unrealistic body image expectations and surgical techniques to try and achieve them," she said.

Noland expressed a sense of unease about the fact men rated the term 'HIV/AIDS' only slightly on the negative side. She said this may be due to the notion men often view the disease as a problem strictly for homosexuals.

Download of the day

Iri Kanozo - "Hosteppa"

"Hosteppa," the lyrical Gangster's one and only hit is surely an early '90s rap classic. I'd recommend this track to anyone from Panama, chased by a french fry with hot sauce on it. Like the song, the shot is also classic.

Courtesy of Cal Poly graduate "Booze" Susie Byrnes.

Interfraternity Council

Rush Begins with the Fraternity Kickoff BBQ on February 15, from 6-8pm in the IU Plaza.

I've been tuning in for the first time in a while and let me fill you in on a mini-series I've writing called Cal Poly: What is the Master Plan? Last week I tried to get you to think about the quality of life on this campus in terms of recreation, campus community and programming space. This week, I compared what our peer institutions provide students and mentioned what campus communities are moving toward - places that serve all the students' needs beyond academics.

I will inform you of what students said they wanted on campus two years ago in a comprehensive campus-wide survey.

If you could have anything on this campus what would you take? Where would you put it? As a student art gallery? I would like a paintball park and water slides. Oh wait, I mean more parking, classes and cheaper textbooks. It's time to let go of the obvious reasons we are in college, which (in case you party too much) is academics, and dream of a campus that you would love to stay on day.

With more than 5,173 survey respondents in spring 2003, students said the top spaces they would like to see added or improved in a new satellite university union were 24-hour study lounges (48 percent), ATMs (47 percent), post office (45 percent), movie theater/auditorium (40 percent) and a juice bar (31 percent).

Other sites mentioned were shaded patios and seating areas, a copy center, computer lab and convenience store. Beyond that, 26 percent of students said they would actually like a nightclub/dance club on campus.

These would be additions in a proposed satellite university union, so what about the one we currently have? Of the 5,173 students surveyed, 51 percent said the improvements suggested to increase students' usage of the current union were improved quality/variety of the food service (35 percent), additional availability of parking near the facility (49 percent), awareness of programs and activities (38 percent), more space (34 percent) and appearance/atmosphere of building (34 percent).

But a main problem for those students who voiced they do not use the current University Union was location. On such a large campus where architecture, business and agriculture buildings are headquarters "down the hill," students would rather walk over to Campus Center, where architecture, business and agriculture buildings are headquarters, instead of reactive.

So what about the one we currently have? Of the 5,173 students surveyed, 49 percent said the top spaces they would like to see added or improved in a new satellite university union were 24-hour study lounges (48 percent), ATMs (47 percent), post office (45 percent), movie theater/auditorium (40 percent) and a juice bar (31 percent).

The fact is the current UU is not the campus core anymore. But if it's not the UU then where is it? Where is the space where everyone meets for recreation and leisure while at the same time making their convenience needs?

I personally don't have that answer. Dexter Lawn is great for relaxing, the Rec Center doesn't have any social space unless you are bickering next to your friend. Campus Market has the best food on campus and the UU is great besides becoming further removed from where the campus development is headed.

Now is the time to ask these questions so we can be proactive instead of reactive.

Next week, I'll address some concerns and praises for future campus development and renovations in some of the 1,000 comments we gauged during fall quarter from the "Your Voice, Your Choice" survey.

Blake Bellow is the ASI President who hung out in the "quad" in high school with his buddies. He welcomes your comments and suggestions at asipresident@calpoly.edu.
U. Kentucky rape survivor speaks out

Sexual-assault victim expresses rage and pity for her attacker; frustration with the media's treatment of her story.

Dariush Shata
LEXINGTON, Ky. — It is The Kernel's policy not to print the names of sex-crime survivors. The woman's name in this story is being withheld at her request to protect her safety.

Picking herself up off the ground, covered in mud, the University of Kentucky student wanted only one thing.

"I just wanted to get a job so no one could see me fail," said the UK senior who was jogging last Wednesday morning on Stone Avenue, near her home, when a man grabbed her, pulled her to the ground and raped her.

Less than a week later, the student has come forward to talk about the ordeal.

"I remember not knowing if he wanted to hurt me or take something from me, because I had my wallet, and I offered it to him, or if he wanted to kidnap me," she said.

"Even though it lasted a relatively short time, I felt like years passing in moments," she said.

She recalls the attack, around 7 a.m., lasted about five minutes.

"When it was over, I didn't move or make any noise, and I kept thinking inside my head, "Please, God, let this be over.""

After the attack, she went home, got her cell phone and called the University Health Service.

During the assault, the student remembers that she felt pity for her attacker, even though she was the crime victim.

"I can remember thinking that I felt very sorry for him," she said. "How terrible your life must be that you have to hurt someone, that you seek fulfillment by taking people's dignity away."

Following the examination and police report, and several hours after the assault itself, she said the ordeal was not over.

When she arrived home that afternoon, a news van was near her home.

She spoke to a TV news reporter, and to her horror, the sound bite was replayed on the evening news.

Friends who heard her voice recalled what had happened and called her.

If reporters had found her by using the UK online directory, her attacker could do the same thing if he found out who she was.

Throughout the day, TV and radio stations called the student. The recalled that only the newspapers made no attempt to contact her that evening.

"I fielded numerous phone calls," she said. "I felt a little manipulated."

After being barraged with phone calls and questions, the student said she felt like a victim for the second time.

"It was invasive," she said. "It was almost like getting attacked all over again."

She no longer jogs to class in the mornings anymore. She looks around nervously when she walks around in public.

"I'm experiencing a lot of post-traumatic stress syndrome," she said. "Every 30 seconds or so, when you see someone out on the sidewalk, you look closer at people. It's almost like your brain retrain's your body to get that fight-or-flight heart beating."

When out in public, she remains haunted by the question, "Is that him?"

"It's a struggle to control her feelings," the student said. "The rational part of me knows, in general, I am safe."

"But I know he found out who I was, and I can't remember all that happened from the moment to the next day," she said.

"I don't think I cried until I got to the University Health Service," she said. "I remember not knowing if he knew who I was."

"I remember thinking that I felt sorry for him," she said. "How terrible your life must be that you have to hurt someone, that you seek fulfillment by taking people's dignity away."

"I think there are elements of the problem that are really bad, and there are other things that are wrong with our system, and I think we need to do something about it," she said.

Spelling said published college guides provide useful but incomplete information.

"How do credit hours compare?" she said. "I guess Ed said it was a good start for her. I thought she was trying to get to the higher-ed community," said Mark Huddleston, president of Ohio Wesleyan University in Delaware, Ohio.

"I think there are elements of the budget that are really bad. There are other things that are wrong with ours and other institutions," he said.

The Mustangs scored their lone run in the fourth inning. Modgilinn singled up the middle, stole second and came home on a triple down the right field line by Chelsea Scott.

The Mustangs return to action Friday for a tournament in Santa Barbara.

Men's tennis
The Cal Poly men's tennis team went 1-2 in the Las Vegas Invitational. On the first day of competition, Cal Poly lost a close 4-3 match against No. 72-ranked Fresno

Baseball
After Cal Poly regained the lead in the seventh on Berglund's double to left-center field, the Waves erupted for three in the eighth off Bille. Luke Salas doubled in one run and the other two came from bases-loaded walks.

There were similar late dramatics in the second game where Mustang reliever Rocky Roquet took the loss, surrendering a two-out, bottom of the ninth inning homerun to Kellen that ended the game as it soared over the left field fence.

For more information, call (530) 274-9577.

Softball
continued from page 12
five runs and nine hits, and striking out eight and walking two in six innings.

The Mustangs scored their lone run in the fourth inning. Modgilinn singled up the middle, stole second and came home on a triple down the right field line by Chelsea Scott.

Steve Gee puts his man in a crunch during the Mustangs' 20-19 win over Cal State Fullerton on Saturday.

**First Pac-10 victory comes dramatically**

**MUSTANG DAILY STAFF REPORT**

Randall Garcia pitched well and Cal Poly baseball defeated Pepperdine, 7-6 on Sunday. Garcia pitched a three-hitter and recorded the last out of the game.

The Mustangs scored four of their five runs in the third inning against Pepperdine. Cal Poly scored three runs in the third inning and breaking the game open with a free-run, third-inning rally. Nelson got the loss allowing five runs in four innings of work.

DePaul improved to 7-5 and has now lost four of its past six. In the first game of the doubleheader, DePaul grabbed a 3-0 lead with a run in the first and two more in the third. Bresk used a three-run double to account for all of DePaul's runs.

Cal Poly lost three runs in the fourth and fifth to end starter Jimmy Shell's day. Tony Saige then allowed a solo, game-tying home run to Klein in the sixth.

Cal Poly had a three-run lead in the fifth inning, but Pepperdine scored three runs in the sixth to tie the game. Cal Poly scored three runs in the seventh inning, but Pepperdine scored two runs in the eighth inning to tie the game.

DePaul improved to 7-5 and has now lost four of its past six. In the first game of the doubleheader, DePaul grabbed a 3-0 lead with a run in the first and two more in the third. Bresk used a three-run double to account for all of DePaul's runs.
