ASI presidential election campaigns commence

Kelly Cope

Bright, colorful and informative fliers calling for students' attention are sprouting up along frequently-traveled roads and walkways on campus this week, announcing the return of the annual ASI student government elections.

Though voting does not begin until May 3, candidates are not wasting any time in getting their faces noticed and their voices heard. Advertisements went up Monday all over campus, the candidates participated in a “Meet the Candidates” forum on Tuesday, and a candidates' debate is scheduled for Thursday at 11 a.m. in the University Union Plaza during UU Hour.

The forum gave students a chance to get to know the two candidates for ASI president: Todd Maki, from the College of Engineering, and Anne Giapponi, from the College of Agriculture. In a meet-and-greet-style session, the candidates highlighted their experience and past accomplishments, laid out their plans for the university's future if elected and met with audience members. Issues discussed at the forum included Mandi Gras and co-sponsorship, two matters that will certainly come to the forefront of the winner's presidency next year.

In all, John Azevedo, ASI elections committee chair for the Board of Directors, estimated that about 60 people attended the forum on Tuesday, and said he hopes to see even more attend the debate on Thursday.

"There weren't as many as I expected there to be (at the forum)," he said. "We like to pull questions ... from the audience in order to better address the students' issues."

Having more students present in the audience to voice their concerns helps create a more well-rounded representation of the student body's wants and needs for the candidates, he said.

Candidates for the ASI Board of Directors will also join the two presidential hopefuls on the ballot. Numerous students from all of the colleges on campus are determined to win a seat on the board.

Poly goes greek for a week

As part of Greek Week, Cal Poly fraternities and sororities participate in a variety of competitions and service activities

Katie Hofsetter

An awards ceremony Thursday will mark the end of Greek Week and honor the sorority and fraternity teams that earned top points in the week's series of events.

"It's a time for the whole greek system to come together and show everyone the good things we do and also for us to compete against each other for campus bragging rights," said Nicholas Leone, a member of the InterFraternity Council.

Teams, usually made up of a multi-cultural chapter, a large fraternity, a small fraternity and a sorority, as well as individual sororities and fraternities, compete in athletics and participate in community activities throughout Greek Week to receive points.

Events began April 18 with the Run to Remember, a night run to raise sexual assault awareness.

see Greek, page 2

Real cheese comes from Cal Poly dairy science graduate

Lauren Zahner

Cal Poly graduate Jonathan Van Ryn graduated in 2004 with a degree in dairy science and has since put his education to use starting a new micro cheese plant in T ovar, Calif. about two months ago.

"I went to Cal Poly thinking I was going to be a dairyman and got interested in the milk processing side," Van Ryn said.

After graduation, he partnered with a well-known local cheese maker and started building the new plant on his father's Valley Farms. His partner, William Boersma, had been making cheese for 10 years and had outgrown his plant.

"We're making three times more cheese than he was before," Van Ryn said. "We tripled production, now we have to figure out how to triple sales."

Bravo Farms has six varieties of cheese, but specialize in different flavored cheddars such as chipotle and sage.

see Cheese, page 2
Fraternity
continued from page 1

It feels good to be recognized for it, especially because we have a lot of other fraternities in Northern California that have done a good job also.

Many of the community service the fraternity carries out is in the form of campus tours, including having many of its members' high schools come to visit Cal Poly. Lambda Theta Phi's achievement this year is especially notable, as it allowed for community service instead on Mott Lawn. In addition, fraternity members also took part in a dress drive, which collected dresses and sent them to areas affected by Hurricane Katrina. Leone said.

The chapter has even gambled the rural Tulare county for the elections has been declining for the past few years. According to ASI's "Vote: One Voice, 17,000 Strong" Web site, between 2003 and 2005, voter participation dropped 5.6 percent to a dismal 15 percent last year of the total Cal Poly population. ASI's goal for this year's elections is to raise that number to 25 percent of the total university population.

The polls will be open on Wednesday and Thursday, May 3 and 4, at various locations on campus. From 8 a.m. to 4 p.m. on both days, polling places include the Ag bridge (new building 10), Fisher Science/Science North, the Kennedy Library and Campus Market.

Several locations downtown in the Education building break-out rooms will also be open for voting. Students will be asked for their student ID before they receive a ballot to cast their vote, so don't forget it.

Elections
continued from page 1

Unfortunately, voter turnout for the elections has been declining for the past few years. According to ASI's "Vote: One Voice, 17,000 Strong" Web site, between 2003 and 2005, voter participation dropped 5.6 percent to a dismal 15 percent last year of the total Cal Poly population. ASI's goal for this year's elections is to raise that number to 25 percent of the total university population.

The polls will be open on Wednesday and Thursday, May 3 and 4, at various locations on campus. From 8 a.m. to 4 p.m. on both days, polling places include the Ag bridge (new building 10), Fisher Science/Science North, the Kennedy Library and Campus Market.

Several locations downtown in the Education building break-out rooms will also be open for voting. Students will be asked for their student ID before they receive a ballot to cast their vote, so don't forget it.

Greek
continued from page 1

The service day event is just an example of what (the fraternities and sororities) do all year long.

—Eddie Dominguez
director for Greek Affairs.

Having participated in the first Greek Day of Service in 2005, Leone said he noticed an increase in community participation this year.

"This year we took less effort to get people," Leone said. "I have seen morephiathons."

Aside from the Day of Service and Run to Remember, Greek Life members contributed to the community in a number with a blood drive held on Mont Lawn. In addition, sorority members also took part in a dress drive, which collected Prom dresses and sent them to areas affected by Hurricane Katrina. Leone said.

The chapter also earned points Thursday in a five-minute hot dog eating contest. The winner finished 8 3/4 hot dogs, Leone said.

The week's athletic events include flag football, racquetball, volleyball, dodgeball, bowling, arm wrestling and a tug-of-war.

And TJ Sullivan, co-founder of Campusquipe, addressed an audience on "How to Combat the Idiot in Your Chapter" on Wednesday night. Leone said Sullivan offered "really good advice for looking inside your house and yourself."

While Dominguez said Greek Week is not designed as a recruitment technique, he said the publicity of activities around campus often do entice students into Greek Life.

All fraternities and sororities are invited to participate in Greek Week, provided they pay the $200 entry fee and are not disqualified.

Events will still come include today's tug-of-war, from 3 to 5 p.m., and arm wrestling in the University Union Plaza from 11 a.m. to 2 p.m. tomorrow.

Cheese
continued from page 1

These cheeses have won awards from the American Cheese Society and the California State Fair. They have even gained the rural Tulare County based Bravo Farms national recognition in publications such as the San Francisco Chronicle and Business Week Magazine.

Travelers on U.S. Highway 99 who stop at the Valley Farms gift shop can also watch artisan cheese making in the viewing room next door at Bravo Farms.

Besides being located on his father's farms, Van Ryn gets the milk for his cheese from his aunt and uncle. "It's kind of a family process all the way through," he said. Van Ryn's former dairy science professors, Nana Farkeye and William Gillis, agree that he was a good student.

"He was somebody who had a vision. He knew what he wanted and decided to go after it," Farkeye said.

"He was very interested in learning and very interested in trying new things," Gillis said. Both professors said the "learn by doing" experience at the campus dairy farm and processing plant is important in preparing students for the industry. Gillis also said that the dairy science department helps students get internships in the summer.

"They get a lot of experience working in the actual industry before they even graduate," he said. "I've learned a lot of science, a lot of techniques, a lot of the reasons why milk can be turned into cheese," Van Ryn said about his time at Cal Poly. "I think I went to college to learn how to learn, it gives you knowledge, not all the knowledge, but once you get out they you know where to look to find more."

Bush, under pressure on gas prices, halts deposits to reserves

Nedra Pickler

ASSOCIATED PRESS

WASHINGTON — President Bush on Tuesday ordered a temporary suspension of environmental regulations for natural gas, making it easier for refiners to meet demands and possibly dampen prices at the pump. He also hailed for the summer the purchase of crude oil for the government’s emergency reserve.

The moves came as political pressure intensified on Bush to do something about gasoline prices that are expected to stay high throughout the summer.

Bush said the nation’s strategic petroleum reserve had enough fuel to guard against any major supply disruptions over the next five months. “So by deferring deposits until the fall, we’ll leave a little oil in the market. Every little bit helps,” he said.

Wholesale gasoline futures prices for June delivery dropped 8 cents a gallon to $2.10 on the New York Mercantile Exchange immediately upon Bush’s remarks.

Easing the environment rules will allow refiners greater flexibility in providing oil supplies since they will not have to use certain additives such as ethanol to meet clean air standards.

The suspension of oil purchases for the federal emergency oil reserve is likely to have only modest impact since relative little extra oil will be involved.

The high cost at the pump has turned into a major political issue, as Democrats and Republicans planning each for a problem that is largely out of Congress’ control.

Republicans are worried that voters paying more than $3 per gallon would punish the party in power. Democrat want to make that happen.

Democrats sought to turn gas prices — like Hurricane Katrina and the Iraq war — into an issue that hurts Bush’s standing with voters.

“What happened to Iraq oil, Mr. President?” You said Iraqi oil would pay for the war. Ain’t seen no money. Ain’t seen no oil,” Sen. Barbara Mikulski of Maryland said.

“Families are gripped by the fear of rising gas prices,” she added.

At the same news conference, New Jersey Sen. Bob Menendez proposed a 60-day suspension of the gasoline tax, saying the money could be recouped by repealing tax breaks for energy companies. He scoffed at Bush’s call to cut tax breaks for the oil companies.

What we’re left wondering today is why it took five years for Bush to act when taxes increase on the energy industry, Menendez said.

The gasoline prices are disturbing. “Our addiction to oil is a matter of national security concerns,” the president said in a speech to the Renewable Fuels Association, which advocates alternate energy sources. “After all, today we get about 60 percent of our oil from foreign countries. That’s up from 20 years ago, when about 25 percent of our oil came from foreign countries.”

Bush said gasoline prices are expected to remain high throughout the summer and “that’s going to be a continued strain on the American people.”

Bush, in his speech, urged Congress to revoke about $2 billion in tax breaks over 10 years that Congress approved and he signed into law to encourage exploration. “Taxpayers don’t need to be paying for certain of these expenses on behalf of the energy companies,” Bush said.

He also urged lawmakers to expand tax breaks for the purchase of fuel-efficient hybrid automobiles.

The president said Democrats in the past have urged higher taxes and price control to cap fuel expenses, but he said neither approach works. Instead, he called for increased conservation, an expansion of domestic production and increased use of alternative fuels like ethanol.

Bush said high energy prices are disturbing. “Our addiction to oil is a matter of national security concerns,” the president said in a speech to the Renewable Fuels Association, which advocates alternate energy sources. “After all, today we get about 60 percent of our oil from foreign countries. That’s up from 20 years ago, when about 25 percent of our oil came from foreign countries.”

Bush said gasoline prices are expected to remain high throughout the summer and “that’s going to be a continued strain on the American people.”
Abercrombie & Fitch is synonymous with quality. Based successful specialty retailer in opera­tional and military agencies.

Abercrombie & Fitch is the most successful specialty retailer in opera­tion today. Our casual, classic, all-American lifestyle brand of clothing is synonymous with quality. Based in Columbus, Ohio, the Abercrombie & Fitch brands have never been more powerful or more profitable.

The A&F culture is one-of-a-kind. We design, merchandise, mar­ket and live the Abercrombie & Fitch brand. We are our best cus­tomers. A&F's brand-powered momentum is fueled by additional lifestyle reinforcement. Every aspect of our stores — the music, the marketing and photos, and overall aesthetic — has made the in-store experience more potent than ever. Our Web site, abercrombie.com, receives more than 1 million hits per month. Through the Web site, e-commerce has expanded the A&F experience beyond our stores, and gives cus­tomers access to the brand from anywhere at any time.

Accredited Home Lenders
Accredited Home Lenders Holding Company (Accredited), is one of the nation's premier mort­gage banking institutions with over 2,600 employees engaged in the business of originating, servicing and selling non-prime residential mort­gage loans. With offices coast-to-coast, Accredited is ranked one of the nation's fastest growing compa­nies. Accredited's rapid growth has led to the need to fill key manage­ment positions with qualified, pro­fessional team leaders. The need for quality individuals spawned the con­cept of Accredited's Management Trainee Program (MTP). More information can be found on our company Web site: www.accred­home.com.

AECOM
AECOM is a leading global provider of design, engineering, construction management, program management, operations and mainte­nance support and technical assis­tance.

As the parent company to numer­ous firms, we retain specialty, niche experience in: Transportation, envi­ronmental, facilities, operations and maintenance and logistics, as well as power and mining and international development assistance programs.

American Constructors
American Constructors was founded in Austin, Texas in 1982 and in California in 1989 and is com­mitted to excellence in building construction.

American Constructors of California is a leader in high-end multi-family construction. We are devoted in building high quality multi-family homes to owners and developers in the Southern California area. Our current clients include Lennar, Pacific Standard Pacific and the CPM Group. American Constructors' ability to build a project in the shortest possible time without sacri­ficing quality, function, usability, aesthetic appearance or increasing cost is due to our commitment to the following principles: Value, peo­ple, experience, performance and safety.

Amgen
Amgen discovers, develops and delivers innovative human therapeu­tics. A biotechnology pioneer since 1980, Amgen was one of the first companies to realize the new science's promise by bringing safe, effective medicines from lab to manu­facturing plant to patient. Amgen therapeutics have changed the prac­tice of medicine, helping millions of people around the world in the fight against cancer, kidney disease, rheumatoid arthritis, and other seri­ous illnesses. With a deep and broad pipeline of potential new medicines, Amgen remains committed to advancing science to dramatically improve people's lives. To learn more about our pioneering science and our vital medicines, visit www.amgen.com.

Anderson & Doig
Structural Engineers

We are a structural engineering consulting firm providing services for a diversified set of structure types, with a core specialty of hos­pital and public education build­ings.

The firm is located in Sacramento, Calif., where the cost of living is lower and traffic is less congested than the Bay Area and Southern California communities. Sacramento offers an active social and cultural environment, great recreational opportunities includ­ing local rivers and reservoirs and access to Lake Tahoe, the coast and San Francisco within a two-hour drive.

and senior living facilities from California to Florida.

Building more than 4,000 housing units every year, CRIB's portfolio now consists primarily of third-party general contracting work for satisfied customers across the country. Repeat business serves as an indicator to new clients that a Clark-built project is a good value.

Climax Portable Machine Tools

Climax Portable Machine Tools, Inc. in a strategic world-class provider of mobile machining and metalworking solutions. Climax Portable Machine Tools created the portable machine tool concept and presently holds 21 patents covering portable machine tool technology and equipment. As the world’s largest supplier of portable machine tools, it offers standard and custom-built solutions and serves the domestic and international markets.

Clexon Company

The Clexon Company is a leading manufacturer and marketer of consumer products with fiscal year 2005 revenues of $4.4 billion. Clexon markets some of consumers’ most trusted and recognized brand names, including its namesake bleach and cleaning products, Armor All®, and STP® auto care products, Fresh Step® and Scoop Away® cat litters, Kingsford® charcoal briquets, Hidden Valley® and K C Masterpiece® dressings and sauces, Brita® water-filtration systems, and Glad® bags, wraps and containers.

CNET Networks, Inc

CNET Networks, Inc. is a worldwide media company and creator of content environments for the interactive age. CNET Networks takes pride in being “a different kind of media company,” creating richer, deeper interactive experiences by combining the wisdom and passion of users, marketers and its own expert editors. CNET Networks’ leading brands — such as CNET, GameSpot,MP3.com,Webshon and ZDNet — focus on the personal technology, entertainment and business technology categories. The Company has a strong presence in the U.S., Asia and Europe.

Coen Company

Since 1912, Coen Company has specialized in the design, manufacture, servicing and maintenance of burner equipment and combustion systems. With over 15,000 installations worldwide, Coen burner equipment and combustion systems provide optimum performance, meeting the needs of the industrial boiler, utility boiler, cogeneration, wood products, pyro-processing, and steel industries.

The Coffee Bean & Tea Leaf

Since 1963, The Coffee Bean & Tea Leaf has been a part of people’s lives and we pride ourselves on providing our Team Members and customers with the world’s finest quality coffee experience. The Coffee Bean is not just a job but a lifestyle and we encourage diversity and striving to be “simply the best” in all areas of our lives. We understand the importance of each Team Member's contributions and efforts in making The Coffee Bean & Tea Leaf the world’s finest coffee shop.

We are currently looking for all positions for our Pismo Beach and Paso Robles locations, and are looking for individuals who consider themselves “simply the best,” and are interested in joining our growing company!

Cole Chrysler Dodge

We have been in business for over 56 years in San Luis Obispo. We offer a rare opportunity for Cal Poly graduates to live and succeed here on the Central Coast. We have just finished our first year at our new 7-acre complex and business grew by close to 70 percent! Our growth has made it possible to add several additional individuals to our team. The majority of our sales professionals and managers are Cal Poly alumni. We intend to and will be the most exciting line of automobiles on the market period.

Consolidated Electrical Distributors, Inc.

In 1957, the two locations of the Electrical Corporation of San Francisco became Consolidated Electrical Distributors, Inc. CED has since expanded into a coast-to-coast network of sales and distribution warehouses, with more than 500 locations nationwide.

Contra Costa County Health Services Dept.

Contra Costa County Health Services Dept. is the largest employer in the County. Environmental Health Division hires summer students (any college level) to conduct pool/spa inspections, qualified environmental health specialist trainee and registered environmental health specialists. Work authorization will be reviewed by Human Resources.

Registered environmental health staff enforce applicable state laws and regulations as well as local ordinances in programs such as land use, solid waste/medical waste, consumer protection and retail foods. REHS staff work closely with all regulatory agencies including the District Attorney’s office.

Staff are assigned to programs. Many of the senior specialists conduct training for the community, write for grants, develop brochures or work on a multitude of environment health projects.

Cupertino Electric

In more than 50 years, Cupertino Electric has grown by helping to develop the latest electrical turnkey solutions as each new generation of technology demands it.

CEI built the entire electrical system, on a turnkey basis, for the first large-scale microchip fabrication plant and the first sophisticated biotech plant. The company pioneered the building of Internet data centers and the delivery of “high nines” power reliability for mission-critical facilities.

Texas Instruments

is hiring Electrical Engineers!

Visit us on April 28th. Email your resume to analogu@list.ti.com

Texas Instruments Technology for Innovators™

We will be the technology shaping the future.
Make it come true!

For more than six decades, Texas Instruments has created milestone innovations, including the first commercial silicon transistors, the first integrated circuit and the first electronic handheld calculator. Since then, our range of products has continually grown due to new technology.

Texas Instruments envisions a world where every phone call, every Internet connection, every photograph you take, and every song you listen to are touched by the power of TI's Digital Signal Processor (DSP) and Analog technology. That dream is coming true. TI is making it happen right now.

TI is looking for top talent to help us create innovative custom IC solutions that bridge the analog and digital domain into everyday life. As part of our team, you would work with the team and customers to create custom mixed-signal solutions with exceptional service.

Are you looking for a real opportunity? We are looking for qualified employees.

ViSat, a fast growing, innovative development company, produces advanced digital wireless communications and signal processing products for commercial and government markets. Our exciting development projects all involve digital communications and cover specialties such as satellite communications, wireless networking, tactical communications, network security, and communication simulation and training.

We currently have openings at our corporate headquarters in Carlsbad, CA (San Diego) and our facilities in Atlanta, GA; Boston, MA; Cleveland, OH; Germantown, MD; and Phoenix, AZ.
Directory

Frito-Lay North America is a leader of fun food products with production operations in over 40 locations throughout North America. Frito-Lay produces some of your favorite fun food items with solid brands that include Doritos, Fritos, Rold-Gold and Tostitos. Frito-Lay is a division of PepsiCo, a world leader in snack foods and beverages, with revenues of about $27 billion and over 143,000 employees. PepsiCo brands are available in nearly 200 countries and territories.

Gothic Landscaping and Grounds Management

Work for one of the largest landscape construction companies in the nation. We have two divisions — Gothic Landscaping and Gothic Grounds Management — with branches in Los Angeles, San Diego, Las Vegas and Phoenix with sales in excess of $150 million and with over 1,700 employees. We specialize in landscape construction and grounds maintenance for residential master-planned community developers, public works and industrial commercial developers. Gothic offers competitive wages and incentive bonus with a very generous benefits package.

Groeniger and Company

Groeniger and Company has 16 branches from Northern California in Redding to the southern tip of the state in Temecula. This allows us to operate throughout the entire state of California.

We are a distributor of engineered products for the water and wastewater industry. Simply put: Piping, pipe fittings, valves, meters, hydrants and other fixtures. That may not sound like a lot of products, but we handle close to 60,000 different items that can vary in weight from 10 tons down to less than an ounce.

Gruen Associates

Gruen Associates, established in 1946, provides architectural, interior design, planning, urban design, environmental assessment, landscape architecture, community participation and transportation services worldwide.

Through its broad international practice the firm has received recognition for its design of mixed-use developments, sports facilities, theme parks, transit stations, convention centers, civic centers, office buildings, hotels and destination resorts, condominiums and apartments, specialty retail stores, shopping centers, schools and universities, libraries, performing arts and cultural centers, museums, marinas, parking structures, airports and judicial facilities. We strive to blend function and efficiency with distinctive architectural forms, spaces and amenities designed to respond to the client’s needs and the building’s users. Our projects not only meet functional and budgetary requirements, but also represent timeless architectural design in the contextual setting. We pride ourselves on a diverse staff in multiple disciplines allowing for a symbiosis in the design, production and see Directory, page 16

Power Systems

Project Engineer Intern/Associate

Peterson Power Systems in SF Bay Area has opportunities for PS Project Engineer Interns. Halliburton

Founded in 1919, Halliburton leads the world providing products and services to the petroleum and energy industries. With a workforce of over 100,000 employees, operations in over 100 countries and revenues of over $20.4 billion in 2004, Halliburton is a global leader in energy services, engineering and construction.

Wherever in the world oil and gas reserves are being discovered, drilled, extracted, produced or refined from dense jungles to deepwater wells, chances are Halliburton’s people are working, sharing, contributing and creating value for our customers, our shareholders, our employees and our world.

City of Hanford

Hanford is a municipal corporation charted by the State of California since 1891. We provide a complete line of municipal services to the residents of the City of Hanford, including: Police and fire protection, planning, building inspections, storm drainage collection, sewer, refuse, water, street and park maintenance and recreation programs.

Hanford operates under the council-manager form of municipal government. The City of Hanford is governed by a five-member City Council elected by districts to four-year terms on a staggered biennial basis. The voters of Hanford elect five representatives to serve as members of the City Council. They decide policy. The council appoints a City Manager to carry out their policy in the day to day work of the City. The City Manager organizes the City functions under various departments and appoints the department heads and other staff to assist in getting the job done.

Harbor Freight Tools

Harbor Freight Tools, is one of the country’s largest tool and equipment catalog retailers. Harbor Freight Tools offers more than 7,000 tools and equipment items, including products marketed under such brands as Central Machinery, Chicago Electric, DeWalt, Makita, Pittsburgh and Stanley. The company www.lamresearch.com.

The Company’s reputation as an organization where talented people can learn, achieve, and be rewarded is the result of innovative employee policies, competitive compensation practices, and corporate culture.

For additional information, visit www.lamresearch.com.

Lam Research Corporation has been a major provider of wafer fabrication equipment and services to the world’s semiconductor industry for 25 years. The Company’s innovative technologies empower customers to build advanced, high-performance integrated circuits. Headquartered in Fremont, Calif., Lam employs more than 2,000 people worldwide.

An equal opportunity employer (M/F/D/V).

In today’s economy, there is some security in knowing that our clients have been using our real estate management software since 1982.

Wednesday, April 26, 2006
It's a lot of albums. Since their 1996 inception, and had "The Runners Four," it's used inside "The KKunners Four," but their schedule is done. So we were playing and it was before a tiny winding streets you can barely how he reacts. I think the four of us don't against the Italians now? What's 'Deerhoof'? Spelled. (starts laughing hard) So they were trying to say. You almost couldn't even tell what and the screen kept showing both the character Milk Man. I believe the music. We were playing them. AB: With "The Runners Four," and what they're doing. It's endless "Milk Man" started simply with the character? And not sort of trying to infuse it with yourself. AB: "Milk Man" was a concept album based on the art of Ken Kagami. What were the ideas behind it? AB: Yeah, we had other images of him, too. So we started free-associating: What would a world be like where there would be this character? And not sort of trying to pin the character down necessarily; I don't know. But you could syn- 'pose what he's like or his exact person. I think the four of us don't know any better than you do in your impressions of seeing the pictures of him and hearing the music. We were just trying to present some possible ways of things I play, and putting him in situations and seeing how he reacts. AB: Have you had any great or terrible experiences on the road? JD: Oh! We played one show in Palermo, Sicily. AB: Whoo. JD: Yeah, it was several years ago. It was incredible — that city is one of the most gorgeous places I've ever seen in my entire life. It's so old and just so complicated— little tiny winding streets you can hardly fit your car through. But we played a show there and it was before a disco — there was the band part and then the dance part after we were done. So we were playing and there was this music screen going all night on the side. It was like a calendar of what was happening. The tour was Deerhoof and another band I play in called Gorge Triso, and the screen kept showing both of those names completely mis-spelled. (starts laughing hard) So mis-spelled — like, I can't even try. You almost couldn't even tell what they were trying to say. AB: Like "Deerhoof" with three extra J's? JD: Yeah, seriously! And so we were playing our show and in the middle, someone yelled, "Basta!" which means "Enough" in Italian. They wanted to dance; they weren't feeling the Deerhoof that night. AB: So do you have bad feelings against the Italians now? JD: Oh, no, hopefully we'll be going back there sometime soon. AB: That's a funny story — very different. Speaking of which, there's so much music out there, presently and before, and so much calculated difference, do you think it possible to have a truly unique idea in rock now? JD: I think it is. OK... say I decide that what I am doing is playing a certain kind of music. I think the capacity for difference is in peo- ple's desire to redefine themselves and what they're doing. It's endless — you can decide anything. Anything can be original if you infuse it with yourself. AB: That reminds me of something you said in a past interview, when you mentioned Bob Dylan and suggested that the depth of some music comes from the person singing it. JD: Right. I was saying that in the context that I sung a song on "The Runners Four" and wanted to perform it live as well, but was feeling frustrated because I thought I couldn't perform it that well every night. I have this thing where when I plan something, it's really loud and very excited, I make sounds with my voice. I kind of play or shoot my guitar parts while I'm playing them. AB: You're into it. JD: Yeah but I kind of screw up my voice that was... By the time we got to the song I was supposed to be singing in the set, I would have being shouting for the entire show! (laughs) And that made singing very difficult. So what I was saying is that I wish I could be the one who is singing it, but that wasn't working out. I'm trying to teach myself not to injure myself while I'm playing guitar. AB: At least in that way. So I'll have to watch for your screaming when I catch you at Coachella. JD: That's embarrassing. I proba- bly shouldn't have told you that. AB: Yeah, probably not. Stacey Anderson is a journalism and when you mentioned Bob Dylan, and they are doing. It's endless "The Runners Four" and wanted to perform it live as well, but was feeling frustrated because I thought I couldn't perform it that well every night. I have this thing where when I plan something, it's really loud and very excited, I make sounds with my voice. I kind of play or shoot my guitar parts while I'm playing them. AB: You're into it. JD: Yeah but I kind of screw up my voice that was... By the time we got to the song I was supposed to be singing in the set, I would have being shouting for the entire show! (laughs) And that made singing very difficult. So what I was saying is that I wish I could be the one who is singing it, but that wasn't working out. I'm trying to teach myself not to injure myself while I'm playing guitar. AB: At least in that way. So I'll have to watch for your screaming when I catch you at Coachella. JD: That's embarrassing. I proba- bly shouldn't have told you that. AB: Yeah, probably not. Stacey Anderson is a journalism and everyone's voice in it. In the past, there was never part of the idea. AB: With "The Runners Four," the guitar parts seem to match the vocals closely, especially on such guitar parts seem to match the vocals closely, especially on such... does it deserve to be called much more than just the steady "experi- mental" The San Francisco art-rock quartet has deftly evolved from ephemeral noise to catchier pop since their 1996 inception, and had seen their stock rise recently with glowing reviews from the Yeah Yeah Yeahs, Sonic Youth, legendary BBC. JD: John Peel and even the terribly hipster New York Times. Deerhoof is still riding on the suc- cess of their 2005 Infra- "The Runners Four," but their schedule is busier than ever. This week alone, they'll make a rare trek with director Harry Smith's works at the San Francisco International Film Festival and also at the massively popular, utopian Coachella Festival. Last week, guitarist John Dieterich told moth-eaten and wriggling cattle—and charred with The Art Beat about interpretive cartoons, vocal cord viola- tions and intertidally disco Sicilian.
Luce had $1 million dollars, and you were looking for someone to entrust with your fortune, who would you choose? Michael Jackson, Paris Hilton or Donald Trump? Hopefully you’d choose Mr Trump because he knows what it takes to manage money. He’s got the experience necessary to navigate the complicated world of Wall Street and to help your money make money.

This is a ridiculous question! I think.

Now don’t get carried away, it’s not like the President is free to go where he pleases.

Two people were hospitalized near Waikiki, closing some of the most popular beaches.

The controversy over the sewer system is obviously a complex issue, stressing cost and location as major points of disagreement, but the most important matter to be addressed, keeping Los Osos’ groundwater and our coastlines clean and safe, has been all but lost in a storm of political debate.

There is no Central Coast without the coast.

Huma’s letter lacks suggestions.

It is very sad to see still another letter, like Huma Chowdhury’s, appearing in a university newspaper. What is the intention of these oft-repeated messages? They offer no solutions to the very complex problems of the Central Coast and between the Palestinians and the Israelis. They offer no suggestions for ending the tragic costs, particularly in human lives. No do the writers show the many sides of the issues and only succeed in inciting violence and sustaining the continuing destruction and chaos.

These letters are obstacles to the construction of peace-loving families who are seeking to negotiate co-existence and non-violent methods to deal with differences and disagreements.

Huma’s letter is a fine example of what Middle Eastern communities will become if we don’t take steps to make sure that we are not running one of our most valuable natural resources over a difference of opinion.

What happened in Hawaii shouldn’t be a cautionary tale to the Central Coast. It’s true what they say: you don’t appreciate what you have until you’ve lost it.

So let’s make sure we never lose it.

Nasty and dirty, rusty, old Los Osos has made it clear its reasons: we do not like the President is free to go where he pleases.

I urge everyone not to let the most charming quality of our beautiful area go to waste. After all, there is no Central Coast without the coast.

April 19, 2006, shouldn’t be an end to what can be construed as advocating for any nation’s destruction or for war-mongering anywhere on the planet seemingly to justify terrorism.

Maki is the right choice for ASI president

I will be casting my vote for Todd Maki for ASI president.

There is no Central Coast without the coast.

Let’s take a look at the candidates.

April 19, 2006, shouldn’t be an end to what can be construed as advocating for any nation’s destruction or for war-mongering anywhere on the planet seeming to justify terrorism.

**Frankly**

**edited from page 28**

on the roster it's same Title IX thing.
Title IX I thought I knew all about the equals in the sports
court but what it does to have in the
cal Poly rack team I just found out.
Folks at it in sets in a classroom on the second floor of
Mount Gym. Some made quiet con-
terface with the women's tags.
A slight tension filled the
room. Then Coach Carried whitened in
our eyes we all expected. We were out.
Effective one week from that day,
our nurses were being taken off the
team roster. However, just a Terrance
said, following spring training it's
being placed back on the roster.
I was afraid to talk about it
suggestion because I thought our coach
was in a part-time, potentially
incriminating procedure to keep us
around. It turns out it was playing
the rules.

How far, in nearly two months
back on the roster and competing for
Cal Poly, I was shaky in coach and
administration's willingness to
work out a solution. So everybody in the
same situation is so fortunate.
For one hour I knew what it felt like to
be a wrestler at Marquette University; a school that
dropped to and was cut at the
woman. I did not know how to
speak to my team on the roster.
In his time as wrestling coach at
Marquette University walk-on
regularly sound for his team on the
conference championships and were a
large part of his team's success. Due to
proportionality, those same point-
scoring walk-ons are in danger of being
cut.
Moyer called Marquette University
the roster for his Title IX. For five years leading up to the 2001,
the team was almost entirely publicly
funded, but the program still was ter-
minated, Moyer said.

"How did that benefit women? And if it's not discrimination
against males then what is?"

Frank Stashel is the sports editor and a collegiate sports reporter. His column is
intended to raise awareness of alternat-
ive methods. school to simply call Cal
Poly and the same team faced

Title IX

continued from page 28

The national average for enrollment is
57 percent female, which proportion-
ably doesn't translate to many oppor-
tunities for a large roster, low income
movers, Moyer said.

Title IX: first line of defense
for schools to meet Title IX is to trim
male roster sizes ... how does that help
women's sports?" Moyer said.
Moyer's approach was to work with the
U.S. Department of Education in 2002 on
the basis of reverse discrimination; but the
case was thrown out.
Moyer argued that the interpreta-
tion of Title IX and use of propor-
tionality tools to discriminate against
male athletes, as well as females
on small-roster teams that are cut or
rarely added to university's for teams
with larger roster sizes.
Roster capping due to proportion-
ality forces universities to make a
decision: Either cut opportunities or
add them. When players or teams are
cut, the athletes involved are almost
always walk-ons, Moyer said — like
terrance Grady and his 14 trimmings
from Cal Poly.

In his time as wrestling coach at
George Mason University walk-on
regularly sound for his team on the
conference championships and were a
large part of his team's success. Due to
proportionality, those same point-
scoring walk-ons are in danger of being
cut.
Moyer called Marquette University
the roster for his Title IX. For five years leading up to the 2001,
the team was almost entirely publicly
funded, but the program still was ter-
minated, Moyer said.

"How did that benefit women? And if it's not discrimination
against males then what is?"

**Scenario one:** "That's my Title IX team I heard someone yell from the staging area at a county meet yesterday. I had to leave the finish line in the first 100 of the race, I wasn't sure what to think. They were moving well behind the leader and seemed to be slowing down. In the end, the highest finisher from TNCIT was the closest male runner. Hoy, 1.75-2.00, and 76-80, out of 80 females in the field. Fanny was five minutes behind the leader, Marci. I didn't want to think, that probably means the same behind the race.

Scenario two: "At about next Friday, your name will be taken off the roster. After spring break, assuming you meet the conditions listed, you will be placed back on the roster," director of Cal Poly track and field Terry Crawford said solemnly, adding she had a half-dozen athletes.

One of the athletes is in the room would return in three weeks and run a 3.50-6.8 1.50-meter hurdles at the Big West Conference last in the event. Another would have qualified himself for the Big West Championships with a high jump of 6-6. However, Terence County made his leap while competing unattached in his three-week hiatus and will need to replace the mark in the next two weeks if he is to compete at the conference championships in the second week of May.

Title IX often makes national headlines, but the individual stories are often lost amid improper legal briefs.

On March 15, Cal Poly male track and field athletes were cut, victims of roster capping. Each athlete had survived the tryout process in walk-on, but two weeks prior to the first competition, their status became unclear.

"Roster sizes are probably the most difficult thing we deal with," Cal Poly athletic director Alison Cone said. There's nothing worse than having talented, eager athletes who want to participate and you have to tell them no.

Scenario one depicts a method Fresno State University used to cut its participation numbers. Although a Fresno State coach wasn't available for interview, the names of several members of "TNCIT" are listed in the Fresno State cross-country roster. By increasing in female participants, more male athletes would be allowed for varsity races. Although Fresno State's approach numbers proportionate to enrollment. A school's proportionality relates to the quota needed to meet the Title IX standards of the university. Title IX provides three separate methods for boosting roster caps might seem controversial, it still allows for increased female participation, which is the intent of Title IX, Cone said.

Scenario two is an example of both the potential shortfalls of Title IX and a system to work around the standards. The unfortunate breakdown of Title IX implementation is a loss of opportunities for males, but the huge increase in female chances to be overlooked, Cone said.

"Roster capping" Roster capping is a technique used by universities to keep participation methods for an instruction to be compliant. The second and third prong are largely unchallenged due to court precedents and clear interpretation, NCAA gender equity spokesperson Rosie Stallman said.

The second prong allows compliance for schools showing a history and ongoing progress of program expansion for the underrepresented sex.

"It is a bit of a loophole. I guess it could be used as a bit of a loophole," Cone said.

Loophole or not, it's probably the issue of being addressed because "you have the potential of denying some opportunities for people who legitimately should get them," Cone said. These "tiny cuts" don't affect female participation and allow for some more male opportunities, Cone said.

There's nothing worse than having talented, eager athletes who want to participate and you have to tell them no.

MUSTANG DAILY

The NCAA recently called for the possible withdrawal of a clarification of the Title IX law made by Congress in March 2005.

The clarification to the 1972 educational act that banned gender discrimination at the college level allows an on-field survey to be used to determine interest in female athletes at schools nationwide. "I think it's a bit inappropriate that the NCAA asked for its withdrawal," said Alison Cone, athletic director for Cal Poly. There are currently three ways that schools can show they are in compliance with Title IX. Showing that the number of male and female athletes is proportionate to the make-up of the student body or that a school has a history of extending equal opportunities in athletics to both genders are the first two. The third way is for a school to provide evidence of a lack of interest among the underrepresented gender in a sport, which is what the clarification was trying to define.

The survey would poll the student body or the gender least represented to determine whether there is enough interest in a sport not currently offered by the university to create a varsity team. If results from the survey showed that there was not enough interest then schools could offer more opportunities to one gender and still be in compliance.

Schools receive federal funding based of their compliance with Title IX. The NCAA urged schools not to use the survey and questioned the reliability of e-mail as a means of administering the survey.

"That kind of e-mail survey doesn't provide accurate results," Cone said. "Especially when they are allowing a non-response to mean there is no interest." Cal Poly does not currently use the survey to determine interest in athletics for females. Cone said that she does not know of any university that uses the survey. Rep. Lynn Woolsey (D-Calif.) recently asked the Department of Education to change the clarification calling it "a disservice to our nation's young women" and "inconsistent with the long-standing Department policies on fundamental principles of equality." Woolsey's resolution is co-sponsored by both Democrats and Republicans in the House and has been sent to the Committee on Education and the Workforce for review.

**Congress calls for halt to Title IX clarification**

Woolsey's resolution is co-sponsored by both Democrats and Republicans in the House and has been sent to the Committee on Education and the Workforce for review.

**Frankly Speaking**

Frank Stranzl

Talking about Title IX is a lose-lose situation.

If you speak out against Title IX, you become a chauvinist pig if you support it, a feminist. Public opinion allows for little gray area in an issue that's anything but black and white.

At the risk of being that "chauvinist pig," Title IX could use a little tweaking.

Hear me out before tossing me into the mix. My coach is former Braves' closer John Rocker. The intent of Title IX is clearly understandable: It's a line of defense against discrimination of women in sports. However, the implementation results in unequal cuts. Most people read the fine print or hear something on the news and think they are well-versed in the matter, yet hardly anybody can back their judgments with personal experience.

Two teams later called it "The Letter of Doors." I walked into my coach's office to talk about the team's media guide and was handed a memo on my way out.

"Your attendance at a mandatory meeting of selected track and field athletes is required on Friday, February 24, 2006 at 5:00 p.m. in Mont Gym, Room 205E. Failure to attend will indicate your disinterest in your sport and field team and your name will be cut from the roster permanently."

As I left the office, Terry Crawford, the director of Cal Poly track and field, assured me I had nothing to worry about. Heeding his advice, I didn't think much of Friday's meeting ... until I spoke to my teammate about it.

"We're all getting cut," one of them told me. Neither of us understood the scope or intent of the letter at the time, but now I was worried. Nine months of sweat and sacrifice, early morning trips to the weight room and long afternoons on the track, and this is how it ends? One week before the season starts and poof, it's over.

"Isn't this a big deal?" I thought, remembering my coaches' parting words when I left her office.

"We had an hour after practice ended before we cut again," I spent my time with teammates Terrance Gray and Jeremy Hodgkins as wecharted our way to Backstage Pizza. Terrance was puzzled about my concerns.

"You know we're getting put back on the team, right?" he said.

"Ha!"

"It's only a temporary thing, I guess we get cut for a few weeks then after spring break, we'll be back."
