Live in the M:OMENT

Lauren Zalner
MUSTANG DAILY

The work of two architecture faculty members will be displayed in the Robert E. Kennedy Library Learning Commons from Oct. 27 to Dec. 15 in the exhibition, "M:OME — Modern Sustainable Living."

Tom Di Santo and Laura Jones-Novotney are the featured architects from the local firm M:OME. "We believe in bringing beauty into the world. If something is not sustainable then to me it is not really beautiful," Jones-Novotney said. "Living in harmony with natural resources and the community around us is really beautiful."

Architectural design, process drawing, watercolor renderings, furniture and lifestyle product design will be exhibited. Catherine Trujillo, special collections curator, is organizing the show. "We’re hoping that this exhibit will attract faculty and students from all different colleges. There’s a lot of different aesthetics that will attract students, faculty and members of the community," Trujillo said.

The exhibit will show the architectural process from beginning to end and how similar design can be used on a variety of projects regardless of scale. "Our goal is to educate people about the total process or total aspect of being an architect," Jones-Novotney said.

Sustainable living is important, she said, because people are living "in a vacuum" and they think they have to turn on a switch to heat up or cool down. "I live in the M:OME," she said. "We believe in bringing beauty into the world. If something is not sustainable then to me it is not really beautiful." Joines-Novotney said. "Living in harmony with natural resources and the community around us is really beautiful."

"We think it’s a matter of how one defines those words: I go so far to say there is a difference between institutional religion and individual spirituality," said Lila Corvvin, associate professor of religious studies and history. Some professors regularly attend weekly worship services and programs at the Pasquerilla Spiritual Center, said Bob Smith, interim director of the Pasquerilla Spiritual Center. The study’s authors, Harvard University professor Neil Gross and George Mason University professor Salon Simmons, speculated that an explanation for college professors’ more religious than originally perceived beliefs, while 10 percent described themselves as "do not believe in God at all." Some Penn State professors said they choose to practice spirituality as opposed to religion, because spirituality better suited their personal philosophies.

"There is a perception that the universities are much more secular than the general population," said Gregg Roehrer, Pennsylvania State University professor of early modern history and religious studies.

The Oct. 5 study showed 81 percent of faculty across the nation consider themselves "spiritual beings" and 35.7 percent profess their belief in God. The study showed 35.7 percent of respondents believe in God and have no doubts about those beliefs, while 10 percent described themselves as people who "do not believe in God at all." Some Penn State professors said they choose to practice spirituality as opposed to religion, because spirituality better suited their personal philosophies.

First-year psychology professor Bob Smith, interim director of the Pasquerilla Spiritual Center, said some of his students have regular church affiliations, but many others choose to practice spirituality instead of religion. Smith said he believes spirituality is a personal choice, and that some people may find a sense of connection and peace within themselves rather than through religious practices.

"I think it’s a matter of how one defines spirituality," Smith said. "This study found that many professors consider themselves spiritual beings, but not necessarily religious. They may have different beliefs about God, but they still find meaning and purpose in their lives through spirituality." Smith said he believes this trend is becoming more common in the academic world, as professors increasingly seek alternative ways to connect with the world.

Study finds professors more religious than originally perceived

UNIVERSITY PARK, Pa. — A recent study showed that while professors are less religious than other Americans, they are more religiously affiliated than what people perceive. "There is a perception that the universities are much more secular than the general population," said Gregg Roehrer, Pennsylvania State University professor of early modern history and religious studies.

The Oct. 5 study showed 81 percent of faculty across the nation consider themselves "spiritual beings" and 35.7 percent profess their belief in God. Some Penn State professors said they choose to practice spirituality as opposed to religion, because spirituality better suited their personal philosophies. "I think it’s a matter of how one defines spirituality," Smith said. "This study found that many professors consider themselves spiritual beings, but not necessarily religious. They may have different beliefs about God, but they still find meaning and purpose in their lives through spirituality." Smith said he believes this trend is becoming more common in the academic world, as professors increasingly seek alternative ways to connect with the world.

Local salon and day spa turns 20, changes location
Kelly Cope
MUSTANG DAILY

The Bladerunner Salon and Day Spa is now in its new location at the corner of Monterey and Morro streets. It’s also celebrating its 20th anniversary, and is much larger than the old location which was just across the street. Owners Todd Trujillo, special collections curator, is organizing the show. "We’re hoping that this exhibit will attract faculty and students from all different colleges. There’s a lot of different aesthetics that will attract students, faculty and members of the community," Trujillo said.

The exhibit will show the architectural process from beginning to end and how similar design can be used on a variety of projects regardless of scale. "Our goal is to educate people about the total process or total aspect of being an architect," Jones-Novotney said.

Sustainable living is important, she said, because people are living "in a vacuum" and they think they have to turn on a switch to heat up or cool down. "I live in the M:OME," she said. Cal Poly's Walter Payton Award candidate, sophomore tailback James Noble, will make his first career appearance against a Division I-A team.

Tristan Aird
MUSTANG DAILY

There is one thing sophomore tailback James Noble hasn't done in his already storied career at Cal Poly — play against a Division I-A school.

That will change Saturday when the Mustangs visit San Diego State at Qualcomm Stadium.

"It's a lot of excitement, but I'm going to try to treat it as another game," Noble said Thursday after practice. "I know it's going to be a very intense game. I've got all my family coming down from Barstow. They're excited to see me play. I'm just really looking forward to it to see what I can do."

As a freshman last year, Noble rushed for school records of 1,578 yards and 16 touchdowns despite missing games at both I-A Troy (coach's decision) and Great West Football Conference rival UC Davis (ankle injury).

Noble was sidelined with a left ankle sprain Sept. 23 when Cal Poly (5-2, 2-1) fell 17-7 at I-A San Jose State. In three games since then, the 5-foot-11, 180-pound Noble has rushed for 425 yards and three scores on 76 carries, averaging 5.6 yards per carry.

On the season, Noble's 669 rushing yards are second in the Great West. His 111.5 rushing yards per game are second to North Dakota State's Tyler Steffen by 1.5 yards.

"You can always count on James to fall forward and get you that extra yard when it looks like you might not be able to get it," Cal Poly senior middle linebacker Kyle Shortwell said. "He's an outstanding talent. I'm glad he's on our team."

Noble was held out of practice as a precautionary measure Thursday, but Cal Poly head coach Rich Ellerson said he fully expects him to play Saturday.

"He's going to play," said Ellerson, who added he doctored Noble will be 100 percent healthy for the rest of the season.

Noble said it has been beneficial not being pushed too hard in practice situations.

"The ankle's doing fine," Noble said. "The coaches are doing a very good job of keeping me healthy in practice situations."

Ellerson said having Noble available provides added confidence in the huddle.

"Some of those blocks that aren't quite good enough for another guy, you've got enough of them for James," Ellerson said. "It's not enough of them for an average guy, but for James, they're enough. Our guys understand that — they play with more confidence, they block better, their expectations are higher."

If Noble needs to be spelled at point during the game, 210-pound sophomore Fred Hives II can step right in, Ellerson said.

Despite missing four games with a broken left toe, Hives II has carried 23 times for 112 yards and two touchdowns. He has seen time at both tailback and fullback, sometimes lined up alongside Noble.

"He's a nice change-of-pace guy," Ellerson said of Hives II. "A different kind of running back. We can keep running the same two or three plays, but now they start to look six or seven plays because you have different style runners and they hit (the hole) differently. That's an advantage."

Another advantage for Cal Poly could be having a defense that ranks sixth in I-AA in fewest points allowed per game (12.4) and third in fewest yards from scrimmage allowed per game (217.9).

The Mustangs were ranked second and first, however, in those respective categories before they suffered a stunning 29-28 loss to South Dakota State on Oct. 21. The Jackrabbits rallied from a 28-6 deficit to win that game by scoring 23 points in the final 8 minutes.

"We want to get that swagger back that we kind of lost the last little bit of the fourth quarter last week and as a defense, we're a little bit edge," said Shortwell, a Buck Buchanan Award candidate whose 74 total tackles lead the Great West. "We want to get back out there and re-establish ourselves. We're looking forward to another opportunity because that wasn't us on Saturday in the fourth."

Shortwell was a redshirt freshman during Cal Poly's last win over a I-A school, a 34-13 victory at UTEP in the 2003 season opener. He said the Mustangs have been looking forward to playing the Aztecs since the schedule came out.

"Any time you get to play a Division I-A school, you've got to see Football, page 5

that little extra incentive," Shotwell said. "You want to play against the best, here they are. Every year at the beginning of the season when we see we've got a 1-A on our schedule, everyone gets a little bit jacked up for that."

San Diego State opened the season 0-5, but is coming off a 19-12 Mountain West Conference win over visiting Air Force. The Aztecs (1-5, 1-2) are under the direction of first-year head coach Chuck Long, a former NFL quarterback who was offensive coordinator at Oklahoma under first-year head coach Bob Stoops.

"You can see that they're becoming more schooled, more studied, more precise in their new systems," Ellerson said of the Aztecs. "They have a weapon at running back."

The player Ellerson referred to is Atiyyah Henderson, a redshirt freshman who has carried 83 times for 536 yards and four touchdowns since a season-opening 44-0 rout of San Jose State.

How to pick a wingman

By Mike Henneman

Mike's Guide to Life

How to pick a wingman

In my three and a half years of dating and going steady, I have learned some helpful tips to make a guy more marketable to the opposite sex. Although I don't have any boyfriends to recommend, I have some tips for picking a wingman.

1. Always be yourself. It helps
2. Never worry about who you are
3. Always have a good time
4. Never be too concerned about your appearance
5. Always be confident

If you follow these tips, you'll be successful in picking a wingman.

STAFF COMMENTARY

Where have all the men gone?

The Mustang Daily is a free newspaper published by the Mustang Daily campus and the neighboring community. We appreciate your readership and are thankful for your careful reading. Please send your correction suggestions to mustangdaily@comcast.net.

HUMOR COLUMN

The Mustang Daily is a "designated public forum." Student editors have full authority to make all content decisions without censorship or administrative approval.

The Mustang Daily is a free news­paper; however, the removal of more than one copy of the paper per day is subject to a cost of $5 per issue.

The third and last thing to note is that you are doing a great job. Keep it up.

I have no desire to bring back the old-fashioned ideal of the sturdy, hardy man running to rescue the helpless damsel in distress, because women these days don't need much rescuing, if any at all. One thing that would be nice, though, is if we could maintain some sort of balance and women could at least have a shot at finding a man who requires less primp time than they do.

I don't believe the Timberlake/straight man relationship is as complicated as you say. I think it's just about how you present yourself to the world and what kind of image you want to project.

I think you're right about the current trend of androgynous fashion. It's a way for men to express their individuality and break away from traditional gender roles. I also think it's important for women to show that they can be strong and independent.

I'm glad you brought up the issue of men and women being equal. It's something that we should all strive for in our relationships.

I don't know if I have any other comments, but I really enjoyed reading your piece. Keep up the good work.

Mike Henneman is a journalism major at the Mustang Daily who's just looking his own personal Robin.

There are many factors that contribute to the decline of the American male, but one of the most significant is the rise of the "cafe culture." Men used to be more active and engaged in their communities, but now they spend most of their time behind a computer screen.

I think it's important to encourage men to get involved in their communities and to participate in activities that will help them develop as individuals.

I also think it's important to support men who are struggling with their identity. It's not easy to be a man in today's society, and it's important to provide a safe space for men to express themselves.

I don't have any other comments, but I really enjoyed reading your piece. Keep up the good work.

Halloween festivities galore throughout SLO County this weekend

As Halloween approaches, many activities will be held that will allow you to get your costumes on and your scare on. Here are just a few of the events taking place this weekend that will enable people of all ages to have some fun. So finish those costumes on your counter and stay tuned to the Mustang Daily next week for more Halloween enjoyment.

Friday
The “Halloween Family Fun Night” in San Luis Obispo includes a costume contest, Halloween crafts, games, a scavenger hunt and a bounce house. The free event is being held from 3:30 to 7:30 p.m. at the San Luis Obispo County YMCA at 1020 Southbound Dr. For more information contact Jennifer Rhyne at 543-8235.

*The Halloween “YMCA Spaghetti Dinner & Family Fun” night in Paso Robles offers the community a chance to get a salad and spaghetti dinner for a donation of $5. Ages six and under eat for half-price. Everyone is encouraged to wear a costume to the fundraiser. There will be plenty of free games, activities and gift bags at the event, which will be held from 8:30 to 7:30 p.m. at 6000 Nickerson Rd. in the Acorn Room at Centennial Park.

Saturday
*Cal Poly’s Sigma Nu fraternity has put together a haunted house to raise funds for San Luis Obispo Special Olympics. The haunted house, located at 1304 Foothill Blvd., will be open from 6 to 10 p.m. every day.

For more events happening globally, Take Action! For more information, contact Jenifer Khynes at 543-5235.

Time and travel may be reimbursed for qualified patients.
Events

continued from page 7

night until Halloween. Admission is $5 for adults, and free for those 12 and under. For more information, contact Sigma Nu President Alex Wyatt at 234-6128.

Saturday

*The 30th annual "Jubilee by the Sea" in Pismo Beach is set to kick off Saturday at noon. Fifteen jazz and swing bands will perform at the three-day festival, which welcomes all ages. The event runs from 7 to 9 p.m. in the corn maze on campus. To get there, take U.S. Highway 1 to the Highland Drive entrance to campus, turn left on 1119 Garden St. and follow the signs to the maze and free parking.

For more information, contact Crop's Club President Jennifer Weststein at 1-209-968-6384 or by email weststein@calpoly.edu. Admission is $20 and space is limited. For details, call 481-7840 or 1-800-443-7778.

*Cal Poly's corefoll is bound to be as scary as any haunted house when the Crop's Club hosts its annual Haunted Corn Maze. Everyone is being encouraged to wear costumes to the event. Admission is $3, and free for children 5 and under. The event runs from 7 to 9 p.m. in the corn maze on campus. To get there, take U.S. Highway 1 to the Highland Drive entrance to campus, turn left on Mt. Bishop Road, and follow the signs to the maze and free parking.

For more information, contact Crop's Club President Jennifer Weststein at 1-209-968-6384 or by email weststein@calpoly.edu.

*The fifth Annual Halloween X-Ball will be held on Second Street in Baywood Park from 9 a.m. to 4 p.m. Admission is free. For more details or to register for the run or the kayak or canoe race, call 528-4884.

**Trick-or-treaters can knock on the doors of downtown merchants at the annual "Pumpkins on the Pier" in Pismo Beach. There will also be a children's parade, costume contest, pumpkin decorating contest, crafts and games. The festival will be from 10 a.m. to 3 p.m. For more information, call 1-800-443-7778.

**San Luis Obispo's "Candy Corn Classic" gives participants the opportunity to help a charity while doing something good for themselves. Riders can register for one of four bicycle courses, and all proceeds benefit the National Multiple Sclerosis Society. The races start at 7 a.m., and a health fair will be held at 11 a.m. This all takes place at 805 Arroyo Drive. For more information is call 788-6905.

**Arrigo Grande is putting on a "Halloween Trick-or-Treat in the Village." Thousands of children will trick-or-treat at downtown businesses from 3 to 5 p.m. A haunted house and other games will be on West Branch Street from 5 to 7 p.m. For more information, call 473-2250.

*If getting scared is your thing, try taking a candlelight tour of an old adobe mission in San Miguel. There will be ghost stories, refreshments and, of course, a guided tour of the mission. The free event will be held from 7 to 9 p.m. at 780 South Mission St. Call 467-3357 for more information.

Sunday

*Los Osos is celebrating Oktoberfest this Sunday with a pancake breakfast, live music, arts and crafts, train rides, a canoe and kayak race, a four-mile run, and a Halloween costume parade. A beer wagon will also be there for adult enjoyment. KZOZ-FM 93.3 will be broadcasting live from the 28th Annual Car Show by the Bay, which will also be in Los Osos this weekend. Oktoberfest will be held on Second Street in Baywood Park from 9 a.m. to 4 p.m. Admission is free. For more details or to register for the run or the kayak or canoe race, call 528-4884.
