Calif. governor, attorneys debate Jessica’s Law’s reach

Don Thompson
ASSOCIATED PRESS

SACRAMENTO — Attorneys for the governor, attorney general and local prosecutors said Monday that they cannot agree how to enforce tough new residency restrictions on sex offenders that were approved last year by California voters.

The attorney general’s office says the law should apply retroactively to those previously released from prison, the governor and local prosecutors say it should apply only to those released after Proposition 83 was approved in November.

The disagreement arose from a lawsuit filed by attorneys representing sex offenders. Under the initiative commonly known as Jessica’s Law, offenders are prohibited from living within 2,500 feet of a school or park.

U.S. District Judge Lawrence Karlton of Sacramento delayed a ruling after Monday’s hearing because of the see Law, page 2

Republicans block Senate debate on Iraq buildup resolution

David Espo
ASSOCIATED PRESS

WASHINGTON — Republicans blocked a full-fledged Senate debate over Iraq on Monday, but Democratic leaders vowed they still would find a way to force President Bush to change course in a war that has claimed the lives of more than 3,000 U.S. troops.

“We must heed the results of the November elections and the wishes of the American people,” said Majority Leader Harry Reid.

Reid, D-Nev., spoke moments before a vote that side-tracked a nonbinding measure expressing disagreement with the wishes of the American people,” said Majority Leader Harry Reid.

See Resolution, page 2

Economy SLO without students

Janelle Eastridge
MUSTANG DAILY

Christina Mills sits at a quiet table in the back room of Linnane’s Cafe in downtown San Luis Obispo. She flips through the pages of her structures book and, in between taking notes, she takes a sip of the medium chai latte at her side.

The architecture junior easily spends at least $40 a month at coffee houses around town, in addition to the money she spends at grocery stores to keep up her constant supply of creamer, three flavors of coffee, and tea.

Like many Cal Poly students, she is just as dependent of the city of San Luis Obispo as it is on her.

After some decreases in the past couple of years, it looks as though Cal Poly’s spending in the community may be on the rise.

In a recently released economic report, it was estimated that Cal Poly’s economic impact shrunk from $1.07 million to $1.03 million from the 2003-04 to the 2004-05 fiscal years.

The reasons for this cutback are two-fold: enrollment was down and the job market was soft (so the earnings of recent college graduates were down, too); though this second estimate could have just been a “statistical quirk.”

But due to an increase in capital expenditures (i.e. money spent on new buildings and new equipment) and a boost in enrollment numbers, Ken Barsae, finance professor and department chair, and co-author of this report, estimated that spending, either from the university itself or students living...

Pride Alliance: It’s OK to be ‘out’ on campus

Cassie Gaeto
MUSTANG DAILY

The Pride Alliance, which is dedicated to raising awareness about the gay, lesbian, bisexual and transgender (GLBT) community, held its first advisory committee meeting Wednesday in the Pride Center.

The committee will meet every other week and looks to receive input from students, faculty and staff on GLBT issues and how they affect Cal Poly.

The Pride Alliance is a branch of the Student Life and Leadership Department, similar to the Multicultural or Women’s Centers, which offers programs and resources to all students.

“Right now we are trying to build a bigger membership and make it safer for students to be out on campus,” said Jessica Cresci, animal sciences freshman and Pride Alliance leader.

“We are really trying to focus in on getting more professors involved, it would help if there were more teachers to look up to,” said Daniel Pfau, an animal sciences sophomore and one of four Pride Alliance leaders.

The alliance has created a large online following through groups on Facebook and Yahoo, actively notifying staff and students about programs and events.

“I feel it’s important to have a professor with more life experience involved. It would really help to have a prominent teacher in the alliance, to give the ‘I’ve been there’ type of advice,” said Daniel Pfau, an animal sciences sophomore and one of four Pride Alliance leaders.

The alliance is often confused with...
Alliance  
continued from page 1

the Gay Lesbian Bisexual United Club (GLBUC) on campus.

"We are different from the club in that we are open 8 a.m. to 5 p.m. everyday, we are something permanent here for the students," said Amy Nowakoski, a liberal studies sophomore and Pride Alliance leader.

Nowakoski began supporting the LBT community through the GLBUC and then decided to dedicate more time through the Pride Alliance. She said although there is some ignorance in the community about the different programs and issues, she has not experienced major problems of being stereotyped on campus.

Aside from the advisory committee the Alliance's other big program is their ally training which they offer three separate times a quarter. Ally training is a two-hour workshop where participants become familiarized with correct terminology and engage in group discussions about homophobia and LBT issues. The ally program is designed to encourage support and involvement from people of all sexual backgrounds and walks of life.

"I want to stress that the Pride Alliance is not just for LGBT people, this organization is open for anyone who cares about these issues and wants to help," Nowakoski said. "The center is always open and can even be a place for people to come hang out between classes."

The Pride Center also has books and videos concerning GLBT issues available to be borrowed.

The Pride Alliance advisory committee meeting is Feb. 14 at 2:30 p.m. in the Pride Center, which is attached to the Science building in room 104. The next ally training will be March 1 at 10 a.m. in the University Union, room 219.

"It is so important to support this community and allow the Pride Group to be an environment where GLBT people feel comfortable being themselves. More people should come get involved," Orci said.

Visit the Pride Center or call (805) 756-7733 for more information.

Law

disagreement between Gov. Arnold Schwarzenegger, Attorney General Jerry Brown, and local prosecutors. Attorneys representing those office said they interpret the residency restriction differently for the roughly 90,000 sex offenders who are registered with the state.

County district attorneys and probation departments said the residency restriction should apply only to crimes committed after the measure passed.

Schwarzenegger and the California Department of Corrections and Rehabilitation, which oversees parolees, said it applies to anyone released from prison or jail after Nov. 8. no matter when the crime occurred. State lawmakers who wrote the initiative also back that interpretation.

The attorney general's office offered yet a third interpretation. Deputy Attorney General Geoffrey Gundell told Karlton the ban should apply if sex offenders now on parole try to move to a new home within the restricted zone.

Karlton disagreed with the attorney general's interpretation. But the judge said he may not have jurisdiction and could send the case to a state judge to sort out the dispute between state officials. He said he would recuse the matter before issuing a ruling.

"The problem is the attorney general is the only party who takes the position that the statute is retroactive," Karlton said.

Brown argued in court papers filed last month that voters clearly wanted to prohibit sex offenders from living near schools or parks, even if the law can't be applied to offenders who currently live within the restricted zone now.

Resolution  
continued from page 1

with Bush's plan to deploy an additional 21,000 troops to Iraq.

The vote was 49-47, or 11 short of the 60 needed to go ahead with debate, and left the fate of the measure uncertain.

Senate Republican Leader Mitch McConnell of Kentucky described the test vote as merely "a bump in the road" and added that GOP lawmakers "welcome the debate and are happy to have it."

The political jockeying unfolded as Democrats sought passage of a measure, supported by Sen. John Warner, R-Va., that is critical of the administration's new Iraq policy. It was the first time Democrats had scheduled a sustained debate on the war since they won control over Congress in last fall's midterm elections.

McConnell called for equal treatment for an alternative measure, backed by Sen. Judd Gregg, R-N.H., saying Congress should neither cut nor eliminate funding for troops in the field. That measure takes no position on the war or the president's decision to deploy additional forces.

Democrats launched a withering attack on Bush's war policy in the run-up to the vote.

"The American people do not support escalation. Last November, voters made it clear they want a change of course, not more of the same," said Reid. "The president must hear from Congress, so he knows he stands in the wrong place, alone."

Dick Durbin of Illinois, the second-ranking Democrat, echoed Reid. "If the Republicans want to stand by their president and his policy, they shouldn't run from this debate. If they believe we should send thousands of our young soldiers into the mess of this wretched civil war, they should at least have the courage to stand and defend their position," he said.

The war has claimed the lives of more than 3,000 U.S. military personnel so far, and costs are counted in the hundreds of billions of dollars. The administration in recent days asked Congress for $245 billion more to cover the costs of the conflict through 2008.

In Baghdad on Monday, there were signs that the much-awaited operation to restore peace to the capital is gathering up near a month after it was announced. Iraqi troops manned a major new checkpoint at the northern gate to Baghdad, and Lt. Gen. Abboad Gambar, who will direct the operation, took charge of his still-unfinished command center.

But bombings and mortar attacks killed at least 74 people Monday across Iraq — all but seven of them in Baghdad. Nearly 1,000 people have been killed in attacks in the past week.
Economy

continued from page I

in the area, has increased since September of 2005. And probably even more so since then.

"Student numbers are up significantly," Riener said. "And that will play through student expenditures and university spending."

Currently, approximately 18,500 students attend Cal Poly, compared to the 17,582 students enrolled at the time the report was written.

This is good news for San Luis Obispo businesses.

At the six-month-old California Pizza Kitchen, assistant general manager Jakco Vaskov estimated that about 90 percent of his front house staff was college-aged, with about half of this number coming from Cal Poly.

What made the company attracted the San Luis Obispo in the first place was mainly the fact that there is a university here, Vaskov said.

Across the plaza at Starbucks, things are a bit different. According to Geoff Martinez, assistant manager at the Higuera Street branch, college students aren't a part of the "the normal coffee house rush" in the morning, but do use the coffee house for studying and hanging out later in the day.

Local businesses — "people who work in the area and are stopping to get coffee" — seem to be the core of their customers.

At Linnaea's, the opposite effect reigns. There, students use the back room and quiet patio to study or just enjoy their coffee or tea with friends.

Whatever the degree of student involvement, the implication remains: The San Luis Obispo city and county economies would be markedly different without Cal Poly's presence.

"The pure numbers show that Cal Poly is about 10 percent of the overall economic impact in the county," Riener said.

Riener projects that by 2011, the total economic impact Cal Poly will have on the community will be around $1.22 million.

The university also acts as a stabilizer, Riener said. Tourism, which has a seasonal (summer) impact on the community, is also a big factor on the economy. Cal Poly acts as a stabilizer in this way, providing revenue for the community during the school year when tourism is low.

"You want to talk about economic impact? A coffee shop open 24 hours would make so much money, especially during midterms and finals weeks," Mills said.
How to avoid being the party's jackass

Last quarter I told you about the dangers of having your friends tell some people could get in class. As a follow-up, I'm going to talk about the common slogan, "Guarde to Life" to prevent you from also becoming an annoying jackass at parties. Although we're already in winter quarter, it is amusing to me how people still just can't get it right in how to act at certain events. Don't worry though, I'm here for you. We'll get through this together, and you'll turn into the best college boy or girl that you can possibly be, as we're going to introduce you to the worst possible people at a college party. The first thing has to do with the most common thing at any party, which, of course, is alcohol. This alcohol also leads to the first joke you will want to make. That would be The Overly Excessive Drink Counting and Annoyance Causing Jackass. If the catchy name of the jackass was too broad for you, let me break it down a bit. So, you're at a party and a drink, a sudden, out of nowhere, someone starts a drinking marathon. Along the lines of, "Bro, bro, dude, bro, you have no idea how drunkass- usk I am. Bro, this like, bro this is my fifth beer. But wait, bro, I already had like 10 shots, three beer bongs, and bro I went through the alphabet like wise when I was doing a kegstand. They said it was like some sort of record or something, bro." You're notice it on a side note, the Overeaser of the drink, Word "Bro" Jackass also comes into play. Back on subject, though. First of all, nobody cares how much you drink, and really the simple formula is divide the amount of alcohol by three fourths of what was said, and you'll get the true amount. This jackass is also usually apparent the day after every party too, as he or she will list off all the drinks (plus the exaggeration) from the night before.

On the flip side of this jackass that probably had too much to drink is The Always Better Than Everyone Else Jackass. You have all seen this person at a party, and every time you just want to go up to them and just say, "Dude, come on, just shut the bell up." This isn't because he is sober, which totally isn't the problem here. The new problem in play is that even though you have no idea how drunk everyone is, it makes for some of the most funny conversations as well, "I'm the most hardcore drunk that you have ever seen, that's how drunk I am."

The incident in Boston is far from the classic example of yelling fire in a movie theater. People are stupid. A person can be smart. So when you have a bunch of oblivious people, parties are over. In this post-Sept. 11 world, it seems like everyone has lost their sense of humor.

This situation has been blown out of proportion because this country is completely paranoid. In all honesty, al Qaeda is not going to try to make bombs shaped like cartoon characters. Let's just see some common sense. People. The light boards were placed near bus stations, bridges and even open spaces, all of which are good places to detonate a bomb, or good places to advertise. What do these people that advertisers have in common? Location matters.

New Boston Mayor Thomas Menino wants to ban what he has called a "nutwit technique." He also went on using the word "arson" an excessive amount of times. He said the incident cost the city at least $900,000. But in order to ban it, how do you have to know exactly what guerilla advertising is? I can just see the law now. "Light up signs with cartoons so people think the city is not safe."

The whole premise of guerilla marketing is to be non-traditional, and sometimes that requires making people think. It's hard to do a lot of the time. No wonder Cartoon Network and Turner be heart, "Let's just use some common sense. People. The light boards were placed near bus stations, bridges and even open spaces, all of which are good places to detonate a bomb, or good places to advertise. What do these people that advertisers have in common? Location matters.

The light boards were placed near bus stations, bridges and even open spaces, all of which are good places to detonate a bomb, or good places to advertise. What do these people that advertisers have in common? Location matters.

But, well, that does it for another issue of Mustang Daily's Take, and I'll see you next week. For quick reference with no room for explanation, also make sure not to forget that The Drinks on Me Hits on Every Girl There's. The Pukes Every Single Party Jackass, The Just Wants To Get In Fights Jackass, and finally The Jackasses Who Hook Up Right In The Middle of the Party Making Everyone Else Uncomfortable.

Career Fair Issue

Abercrombie & Fitch

Abercrombie & Fitch is synonymous with classic, all-American lifestyle and quality. Based in Columbus, Ohio, the Abercrombie & Fitch brands have never been more powerful or more profitable.

Accenture

Accenture is a global management consulting, engineering, technology services and outsourcing company. Committed to delivering innovation, Accenture collaborates with its clients to help them become high-performance businesses and governments. With deep industry and business process expertise, broad global resources and a proven track record, Accenture can mobilize the right people, skills and technologies to help clients improve their performance. With approximately 95,000 people in 48 countries, the company generated net revenues of USD$11.8 billion for the fiscal year ended Aug. 31, 2003. Its home page is www.accenture.com.

ACCD Engineering Systems

ACCD is the nation's largest and most successful HVAC design/build firm. Since 1934, we have provided environmental conditioning solutions spanning the full spectrum from commercial buildings to high purity manufacturing process facilities.

Accredited Home Lenders

Accredited Home Lenders Holding Company (Accredited), is one of the nation's premier mortgage banking institutions with over 4,000 employees engaged in the business of originating, servicing, and selling non-prime residential mortgage loans. With offices coast to coast, Accredited is ranked one of the nation's fastest growing companies. Accredited's rapid growth has led to the need to fill key management positions with qualified, professional team leaders. The need for quality individuals spawned the concept of Accredited's Management Trainee Program (MTP). More information can be found on our company web site: www.accredited-home.com.

Aerogent

Aerogent, a GenCorp Inc. (NYSE:GY) company, is a major space and defense contractor specializing in missile and space propulsion, and defense and armsaments. Since the company was founded in 1942, it has led the wave in the development of crucial technology and products that have kept America strong and furthered our exploration of space.

Agilent Technologies

Agilent Technologies is the world's premier measurement company. Agilent provides core electronic and bio-analytical measurement tools to advance the electronics, communications, life science research, environmental and petrochemical industries.

About two-thirds of Agilent's revenue was generated from outside of the United States in fiscal 2005. With 21,000 employees, our global presence offers a competitive advantage. Agilent's manufacturing, R&D, sales and support capabilities around the world give customers the flexibility they need in today's competitive environment.

Alcon

At Alcon, we develop, manufacture and market ophthalmic pharmaceuticals, ophthalmic surgical equipment and devices, contact lens care products and other consumer eye care products that treat diseases and conditions of the eye. With the exception of eye-glasses and contact lenses, we operate in all areas of ophthalmology. Our broad range of products represents the strongest portfolio in the ophthalmic industry, and we have leading market share positions across most product categories.

Alfa Tech

Alfa Tech Cambridge Group, Inc. is the leading mechanical/electrical/plumbing/technology consulting firm in the Bay Area, with a reputation for quality engineering and exceptional service with projects in Education, Biotech, Microelectronics, High Tech, Healthcare, and Industrial projects. Competitive salary and benefits, including 401(k), stock ownership, "Cafeteria Plan," etc.

An employee owned company. EOE
Amazon.com was founded in July 1994 with a vision of building a Fortune 500 company operating in six countries with a selection that included millions of products in an ever-growing number of categories. Amazon.com leverages its $900 million investment in technology to offer its customers unparalleled shopping experiences. Based in Seattle, Amazon.com has hundreds of software engineers working on some of the most interesting technical challenges on the planet. As a member of our team, you’ll be part of the evolution of e-commerce and learn from industry leaders. You’ll be joining a scientific culture focused on achieving aggressive goals. Many of the challenges we encounter have never been dealt with before on this scale, if at all.

Amgen
Amgen discovers, develops and delivers innovative human therapeutics. A biotechnology pioneer since 1980, Amgen was one of the first companies to realize the new science's promise by bringing safe, effective medicines from lab to manufacturing plant, to patient. Amgen therapeutics have changed the practice of medicine, helping millions of people around the world in the fight against cancer, kidney disease, rheumatoid arthritis, and other serious illnesses. With a deep and broad pipeline of potential new medicines, Amgen remains committed to advancing science to dramatically improve people's lives. Visit www.amgen.com to learn more about our pioneering science and our vital medicines.

Anheuser-Busch
As the world's leading brewer for more than 165 years, Anheuser-Busch and its subsidiaries are committed to finding innovative ways to continually improve. It's this kind of thinking that creates a unique work environment by rewarding talent, celebrating diversity and encouraging forward thinking. We also think enjoying work is an important part of life. If you have what it takes to become part of our team, we'd like to hear from you.

Apple
There's the typical job. Punch in, make widgets, punch out, repeat. Then there's a career at Apple. Where you're encouraged to defy routine. To explore the far reaches of the possible. To travel uncharted paths. And to be a part of something far bigger than yourself. Because around here, changing the world just comes with the job description.

Applied Biosystems
The Applied Biosystems Group (NYSE: ABI) serves the life science industry research community by developing and marketing instrument-based systems, consumables, software, and services. Customers use these tools to analyze nucleic acids (DNA and RNA), small molecules, and proteins to make scientific discoveries and develop new pharmaceuticals. Applied Biosystems' products also serve the needs of some markets outside of life science research, which we refer to as "applied markets," such as the fields of human identity testing (forensic and paternity testing); biosecurity, which refers to products needed in response to the threat of biological terrorism and other malicious, accidental, and natural biological dangers; and quality and safety testing, for example in food and the environment.

Aramark
Aramark is a leader in professional services, providing award-winning food service, facilities management, and uniform and career apparel to healthcare institutions, universities and school districts, stadiums and arenas, and businesses around the world. In FOR TUNE magazine's 2006 list of "America's Most Admired Companies," Aramark was ranked number one in its industry, consistently ranking since 1998 as one of the top three most admired companies in its industry as evaluated by peers and industry analysts. The company was also ranked first in its industry in the 2006 FOR TUNE 500 survey.

The Austin Company
The Austin company is a full-service architectural, engineering and construction services firm, with offices in Irvine, Atlanta and Cleveland. Austin, a DBIA charter member, is a well-recognized leader in the professional services, providing award-winning architectural, engineering, design-build and construction firm. Austin serves a wide range of clients, focusing on projects in such industries as: aviation and aerospace, entertainment and broadcasting, communications/information technology, pharmaceutical/biotechnology/medical practices, publishing and research and development. Austin's professional staff includes an interdisciplinary team of architects, structural, mechanical and electrical engineers as well as project and construction managers. In 2005, Austin became part of the worldwide Kajima organization, ranked by ENR as one of the world's largest design and construction organizations operating in over 20 countries.

Aviza Technology
Aviza Technology, Inc. (Nasdaq AVZA) is a leading supplier of advanced semiconductor equipment and process technologies for the global semiconductor, compound semiconductor, nanotechnology and other related markets. In order to drive and accelerate IC innovation, chipmakers are looking for advanced technology and process solutions that can meet their aggressive production schedule, on time and on budget. Aviza offers both front-end-of-line (FEOL) and back-end-of-line (BEOL) process applications including products for atomic layer deposition (ALD), diffusion and low pressure chemical vapor deposition (LPCVD), furnaces, atmospheres process CVD (APCVD), CVD, etch and physical vapor deposition (PVD). The company's portfolio of clients, varying from leading to mid-market, and includes Chipworks, IBM, Intel, and others.

BAE Systems
BAE Systems is an international company engaged in the development, manufacture, and support of advanced technology systems and services. The company is a leader in the aerospace, defense, and engineering sectors, providing innovative solutions to meet the needs of customers around the world. BAE Systems is committed to delivering high-quality products and services that meet the requirements of our customers, while also contributing to the economic prosperity of the communities in which we operate.
Engineers, Science Majors, and MBA Graduates!

Contribute to the technologies used to build high-performance integrated circuits by putting your talent to work at Lam Research Corporation.

We have immediate openings for B.S. / M.S. graduates and interns. Chemistry / materials science / physics / applied physics majors and chemical / mechanical / electrical engineers should apply for positions at the career fair or at www.lamresearch.com.

Learn and achieve in a team environment while being rewarded for your successes!

Lam is a major provider of wafer fabrication equipment and services to the world’s semiconductor industry and an equal opportunity employer (M/F/D/V) www.lamresearch.com

Fast track to success

With a new Walgreens store opening every 17 hours nationwide in the next 5 years, we're going to need lots of management! So if you're ambitious, self-motivated and would like an opportunity to learn valuable business skills from one of the nation's leading retailers, join us now:

MANAGEMENT TRAINEES • MANAGEMENT INTERNS

Please visit us at the Cal Poly State University Winter Career Fair
Thursday, February 8, 2007
Or, if unable to attend, please apply online at: www.walgreens.jobs

Walgreens offers:
- Great advancement potential
- Competitive starting salaries
- Intensive training
- Hands-on management experience
- Cutting-edge technological tools
- Dynamic, flexible work environment
- Excellent benefits, including a stock purchase program

Walgreens is an equal opportunity employer and participates in diverse talent and backgrounds. Walgreens promotes and supports a drug free workplace.

California Public Utilities Commission

The California Public Utilities Commission (CPUC) is recognized internationally for its innovative policy initiatives. The policy standards we create for California often influence national regulatory trends and federal policies. Join our team of talented staff and commissioners to help launch programs such as climate change, consumer protection, renewable energy, energy efficiency, rail safety, and many other important issues that are shaping California's future.

CalPERS

CalPERS is the nation's largest retirement fund. We manage more than $900 billion in assets for over 300,000 public and private sector members. Our mission is to provide a secure retirement for those who serve the public.

Franchise Tax Board

The Franchise Tax Board (FTB) is a recognized leader in state government and is known worldwide as a model tax agency at the forefront of public service, audit, collections, disbursement and technology. Our organization generates over $40 billion annually, representing more than 90 percent of the state's General Fund revenues. In addition to administering California's personal income and corporation tax laws, elected officials have empowered FTB to collect delinquent court-ordered debts, industrial health and safety payments and amounts due to the Department of Motor Vehicles.

California Child Support Automation System.

FTB can provide you with great opportunities in all areas, including information technology, accounting, audit, communications, collections and automation.

Capital Group Companies

The Capital Group Companies form one of the most experienced and successful investment management organizations in the world. For more than 70 years, we've been serving an increasingly global group of investors, now consisting of more than 10 million individuals and thousands of corporations and institutions. The companies within The Capital Group manage $1.6 trillion in assets worldwide and are recognized internationally for their innovative, disciplined investment process.

Cal/OSHA Response

The Cal/OSHA enforcement unit has jurisdiction over every employment and place of employment in California which is necessary to adequately enforce and administer all occupational safety and health standards and regulations.

The Cal/OSHA enforcement unit conducts inspections of California workplaces in response to a report of an industrial accident, a complaint about an occupational safety and health hazard, or as part of an inspection program targeting industries which have a high rate of occupational hazards, fatalities, injuries or illnesses.

California Dept. of Toxic Substances Control

The California Department of Toxic Substances Control (DTSC) protects Californians from exposures to hazardous wastes. Approximately 1,000 scientists, engineers and specialized support staff work in nine offices statewide. DTSC is a department of the California Protection Agency (Cal-EPA). DTSC operates program to: deal with the aftermath of improper hazardous waste management by overseeing site cleanups; prevent releases of hazardous waste by ensuring that those who generate, handle, transport, store and dispose of wastes do so properly; take enforcement actions against those who fail to manage hazardous wastes appropriately; explore and promote means of preventing pollution; and encourage reuse and recycling; evaluate soil, water and air samples taken at sites, and develop new analytical methods; practice other environmental sciences, including toxicology, risk assessment, and technology development; involve the public in DTSC's decision-making.

California Dept. of Water Resources

DWR operates and maintains the State Water Project (SWP), including the California Aqueduct. The SWP is the nation's largest state-built water and power development and conveyance system.

Planned, designed, constructed and now operated and maintained by the California Department of Water Resources, this unique facility provides water supplies for 23 million Californians and 75,000 acres of irrigated farmland.

The department also provides dam safety and flood control services, assists local water districts in water management and conservation activities, promotes recreational opportunities, and plans for future statewide water needs.

Franchise Tax Board

The Franchise Tax Board (FTB) is a recognized leader in state government and is known worldwide as a model tax agency at the forefront of public service, audit, collections, disbursement and technology. Our organization generates over $40 billion annually, representing more than 90 percent of the state's General Fund revenues. In addition to administering California's personal income and corporation tax laws, elected officials have empowered FTB to collect delinquent court-ordered debts, industrial health and safety payments and amounts due to the Department of Motor Vehicles.

Our leadership and success with technology and automation projects also led to the Governor and Legislature assigning FTB the responsibility to develop a California Child Support Automation System. FTB can provide you with great opportunities in all areas, including information technology, accounting, audit, communications, collections and automation.

Walgreens promotes and supports a drug free workplace.

global presence of more than 16,000 employees worldwide, involved in many business sectors including water, waste water and other resources; transportation, military facilities and base operations with nuclear, environmental services, communication and information solutions, industrial process and manufacturing, power, and energy. For 2006, CH2M HILL was named in the Top 100 employers in America by Fortune Magazine and this was the second time within three years the company has appeared on this list. In August 2006, CH2M HILL was named the No. 1 environmental firm in the US by Engineering News Record (ENR).

Looking ahead we are eager to pursue the many opportunities for success for our clients, our company and our communities and we are seeking highly motivated and qualified individuals who want to join us in that effort.

Charles River Laboratories
Charles River Laboratories recognized for excellence as the world leader in providing services and products to the biomedical and pharmaceutical communities.

Cisco Systems
Cisco Systems, Inc. is the worldwide leader in networking for the Internet. Today, networks are an essential part of business, education, government and home communications, and Cisco Internet Protocol-based (IP) networking solutions are the foundation of these networks. Cisco hardware, software, and service offerings are used to create Internet solutions that allow individuals, companies, and countries to increase productivity, improve customer satisfaction and strengthen competitive advantage. The Cisco name has become synonymous with the Internet, as well as with the productivity improvements that Internet business solutions provide.

Citrix Online
Citrix Online, a division of Citrix Systems, Inc. offers the leading Web-based access, support and collaboration software and services including GoToMyPC, GoToAssist and GoToMeeting products.

Coastland Civil Engineering
Coastland provides unparalleled civil engineering, construction management and building department services to municipalities, counties, utility districts and other public sector agencies.

Comerica Bank
Comerica is America's top business bank, with more than 10,000 employees whose dedication and teamwork have helped make us an industry leader. We're a Fortune 1000 company and one of the largest banking holding companies in the United States, providing financial services to customers in Michigan, California, Texas, Florida and other locations around the country and around the world.

Communications and Power Industries
We design and manufacture the products that make systems work. Often hidden from the end-user, CPI products are the engines that drive applications used to entertain, navigate and protect you. Whether in the telecommunications, radar, medical, electronic warfare, industrial or scientific segment, we provide the underlying innovative technologies — along with unmatched service — that make these applications possible. We encourage teamwork, continuous improvement and operational excellence in an ISO certified environment. Please visit our website at www.cpii.com. CPI is proud to be an equal opportunity employer.

Consolidated Graphics
Consolidated Graphics (CGX) is the leading commercial printing company in the nation — more than double the size of our nearest competitor. We have 67 printing facilities, 12 fulfillment centers and two technology centers strategically located across 26 states.

Print is essential to life. A life in print touches every other aspect of life on the planet. Commercial printing includes books, magazines, brochures, pamphlets, annual reports, displays and so much more. You name it, we print it. Our clients consist of the top Fortune 500 companies in addition to over 19,000 clients nationwide.

In addition to our traditional printing services, Consolidated Graphics is committed to providing customers with the latest technology for print. The COGXsolutions group offers an extensive range of online applications that complement our core printing services.

Credence Systems
Credence Systems is the industry leading provider of design-to-test solutions for the global semiconductor industry.

Deloitte & Touche
Deloitte & Touche USA LLP is the U.S. member firm of Deloitte Touche Tohmatsu and services are provided by its subsidiaries, including Deloitte & Touche LLP, Deloitte Consulting LLP, Deloitte Financial Advisory Services LLP and Deloitte Tax LLP. Deloitte & Touche USA LLP's subsidiaries are among the nation's leading professional services firms, providing audit, tax, consulting, and financial advisory services through nearly 30,000 people in more than 90 cities. Known as employers of choice for innovative human resources programs, they are dedicated to helping their clients and people excel.

Caltrans
Caltrans manages more than 45,000 miles of California's highway and freeway lanes, provides inter-city rail services, permits more than 400 public-use airports and special-use hospital heliports, and works with local agencies. Caltrans cares for the people around the world.
START YOUR CAREER!

Are you looking for an opportunity to start your career? If you are a graduating student, look no further! Bolthouse Farms, a highly sophisticated food processing company in Bakersfield, California is looking for talented individuals from different academic backgrounds to join our team.

Why Bolthouse?

Since 1915, Bolthouse Farms has been on the forefront of the carrot market with technological advances, which have made it possible to harvest carrots 365 days a year. Continuing our trend of ingenuity, we have added an All-Natural Beverage line. This new product is fast becoming the benchmark of All-Natural Beverage production and consumption. In addition to Beverages, we have some of the most sophisticated food processing machinery in the industry, partly because we build it ourselves. As demand for our products continues to grow, so does the demand for quality employees. For more about Bolthouse Farms, visit www.bolthouse.com.

Right now, Bolthouse is offering challenging career opportunities for the following positions:

- Production Supervisors
- Packaging Engineer
- Robotics Engineer
- Mechanical Engineer
- Electrical Engineer
- Quality Assurance Analyst
- Project Manager
- Sales Assistant

Why Bakersfield?

Bakersfield (population 280,000+) is a growing community projected to double in population in twenty years. Bakersfield's climate is warm and dry which contributes to its huge 200-crop agribusiness base, including carrots, citrus, potatoes, table grapes, almonds, pistachios, tomatoes, and pomegranates. Bakersfield is a better choice for living, working, growing, and playing than other California places as it is affordable, accessible, and extremely welcoming. You can make a day trip to almost any major California city right from Bakersfield but not have to deal with the traffic in your own back yard. For more about Bakersfield, visit www.bakersfield.com.

Bolthouse Farms hires and retains the best employees in the Kern County area. If you want to join a winning team, consider this as opportunity knocking on your door! Salary DOE. Company paid insurance premium.

Electrical Engineering, Computer Science, and Mechanical Engineering Majors

Applied Technologies Associates (ATA) is a leading developer of borehole navigation, formation detection and production logging equipment primarily used in the oil and gas industry. We provide excellent growth potential with competitive benefits, including profit sharing and EOE.

We are now looking for an Industrial Physicist or Electrical Engineer trained in specific areas. We prefer a specialist in computational electromagnetics able to analyze and predict antenna gain patterns for patch antennas and other low profile small antennas. We also prefer experience in finite element modeling with commercial packages such as Ansys, Ansoft, or MSC software. Application involves transmission in lossy media in the 2MHz to 2GHz range.

We are also looking for other positions such as

- Board level electronic design
- Window software development
- Mechanical design and Embedded Systems design/development.

If you are someone with strong analytical skills, leadership abilities, and a self-starter attitude, then we want you.

Applied Technologies Associates

I believe a person should “actually like” their job.

I like to laugh a lot and have a good time. That’s why I like working at Enterprise. Every day, I’m working in a fun and fast-paced environment alongside people I enjoy. And it’s so easy here to develop strong friendships as we all pull together to do the best job possible.

What’s more, I’ve noticed that Enterprise supports and rewards every employee who works hard to make a difference. Believe me, it’s a great feeling to know that your company works just as hard as you do to make sure you “actually like” your job.

Take tonight, for example – thanks to our office’s great numbers, we’re all being treated to a fun night out.

My personal enterprise

Enterprise

We are an equal opportunity employer M/F/D/V.

If you have experience in sales or customer service and a bachelors degree please apply online at www.enterprise.com/careers.
Or contact: Dave Dutchen, College Relations Manager • phone: (909) 821-7785 • e-mail: david.a.dutchen@erac.com
The Dutra Group is a heavy civil contractor based in the SF Bay Area that specializes in dredging, marine construction, aggregate production on the west coast.

East Bay Municipal Utility District

The District supplies water and wastewater services for 1.2 million people in parts of Alameda and Contra Costa counties in the San Francisco Bay Area. Headquartered in Oakland, we are a recognized industry leader, known for innovative solutions to environmental, conservation, and natural resources issues. Our mission is to provide reliable, high-quality services to our customers, to exercise responsible stewardship over the natural resources with which we are entrusted, and to protect the environment for future generations. Our watershed encompass a pure source high in the Sierras, as well as a number of local reservoirs offering serene, natural settings for both wildlife habitat and recreation. We seek motivated Civil, Environmental, Electrical and Mechanical Engineers to join our team. Help us meet present needs and future challenges in all aspects of water supply and distribution, and wastewater treatment. In return, we offer rewarding career opportunities, along with exceptional pay and benefits.

Edwards Air Force Base

The Air Force Flight Test Center at Edwards AFB, California is the Center of Excellence for Test and Evaluation of Air Force weapons platforms and defense systems for the United States and its allies. Engineers work with the leading technologies integrated on the most advanced aircraft systems in the field of communications, navigation, propulsion, flying qualities, structures, RF and IR countermeasures, radar, directed energy, low observables, unmanned air vehicles, precision strike weapons, sensor fusion, and electronic intelligence. Edwards AFB has a rich history of innovation milestones in the field of aviation and defense technologies and is looking for the next generation of engineers to continue the tradition of excellence.

Edwards Lifesciences (NYSE: EW) is a global leader in products and technologies to treat advanced cardiovascular disease and the number-one heart valve company in the world.

Headquartered in Irvine, California, we focus on four main cardiovascular disease states: heart valve disease, coronary artery disease, peripheral vascular disease and congestive heart failure. We leverage our design, development and marketing expertise through our main product categories: Cardiac Surgery, Critical Care, Vascular and Perfusion. Our global brands, which are sold in approximately 100 countries, include Carpentier-Edwards, Corevalve-Edwards, Duraflow, Fogarty, Research Medical, Starr-Edwards and Swan-Ganz. Working as trusted partners in the community fighting cardiovascular disease, we are committed to helping patients and improving the quality of life around the world. Our company’s Credo contains the pledge, “Helping Patients is Our Life’s Work, and Life is Now.”

Endwave Corporation

Endwave Corporation designs and manufactures RF modules that enable the transmission, reception and processing of high-frequency signals in next generation wireless telecommunications networks, defense electronics and homeland security systems. Endwave operates two complementary business units, each drawing upon dedicated teams with the vast market experience necessary to win in these competitive industries.

Endwave’s commercial telecom business, where we are one of the largest suppliers of microwave point-to-point radio subsystems; and,

Endwave Defense Systems, focused on defense, homeland security, and other government end-use applications.

Enterprise Rent-A-Car

You’ve dreamed of creating your own startup. Of mastering skills that help you take ownership of your future. Okay, so you never dreamed of working at Enterprise. But we can make your dreams a reality. As a Management Trainee at Enterprise, you’ll learn to run a profit center, manage people and grow your own fast-paced business. You’ll enjoy big earning potential, with performance-based promotion that many MBAs would envy. Plus you’ll find great opportunities, fun people and a $9 billion company recognized as one of America’s best to work for.

Full Benefit Package including:

- Health
- Vision
- Dental
- Life Insurance
- 401k Savings Plan
- Paid Time Off
- Company Car
- Employee Assistance Program
- Recognition and Rewards Program
- Paid holidays
- and more.

We are looking for motivated MBAs, with a track record of success.

Family Care Network
The Family Care Network,
Inc. (FCNI) is the largest private
provider of children's mental
health and social services on the
California Central Coast. Over
1,300 children, youth and fami­
lies are served annually through
12 un­institutionalized, community­
guided programs in five service
divisions: Alternative Family Services;
Family Support Services; Delin­
quency Prevention Programs; Transitional
Housing & Special Programs. FCNI ser­
serves the community through multiple
partner­ships with
numerous governmental agen­
cies, community-based organiza­
tions, schools, churches, local
businesses and volunteers.

Fastenal
Fastenal is one of the largest,
fastest growing industrial distrib­
utors with over 1,500 retail store loca­
tions across the U.S., Canada,
Puerto Rico, Netherlands, Singapore
and Mexico with 2005 sales of approx­
itimately $1.5 billion. The company was
established in 1967 as a fastener vend­
ing machine, and has experi­
nenced exponential growth over the
last 30 years.

Flowserve
Flowserve is a $2.5B world
leader in supplying pumps,
valves, seals, automation and ser­
vices to the power, oil, gas, chem­
ical, water and other industries.
With more than 14,000 employ­
ees in more than 56 countries, we
combine our unmatched global reach with a truly local
presence.
Flowserve solutions can be
found anywhere fluid motion
and control are mission-critical.
Even in harsh environments, our
flow control experts excel in the
design, installation and ongoing
maintenance throughout the life
of the products. Around the
world, our employees are viewed as
a trusted partner who strive to
help our customers succeed beyond their expectations.
Flowserve is more than a leader
in its industry. It's also an out­
standing place to work.

FluidIQs
FluidIQs is the premier commer­
cial systems integrator in California! We
develop and deliver value­
based control and information
solutions. We invite you to
Design, Refine, Combine …
your skills with ours to develop
and deliver control and informa­
tion solutions. We're growing —
make the connection to your career with us!

Fluor Corporation
Fluor Corporation is one of the
world's largest publicly
owned engineering, procure­
ment, construction, and mainte­
nance services organizations.
Rated as one of the world's safest
contractors, Fluor's objective is to
develop, execute, and maintain
projects on schedule, within bud­
get, and with excellence. Fluor
maintains offices, with over
30,000 total employees interna­
tionally, in more than 25 coun­
tries. Fluor is a FORTUNE 500
company. Over the past six years,
Fluor has ranked No. 1 four
times on FORTUNE magazine's
America's Most Admired
Companies list in "Engineering
& Construction".

Foster Farms
Foster Farms has been a fami­
ily­owned and operated company
for four generations. Since our
founding days back in 1939, we
have always been committed to
providing consumers with the
highest­quality, best­tasting poul­
try products available. The hope
is that our commitment to excel­
ence, honesty, quality, service,
and delivering success through
in everything we do.

Gap Inc.
It was the summer of 1969: Man took his first walk on the
moon. Nearly 450,000 people
gathered in upstate New York to
witness the historic Woodstock
concert. And Doris and Don
Fisher opened the first Gap store
in San Francisco. Today, Gap Inc.
is one of the world's largest spe­
cialty retailers, with more than
3,000 stores and fiscal 2005 rev­
ues of $16 billion. We operate
five of the most recognized apparel brands in the world:
Gap, Banana Republic, Old
Navy, Forth & Towne and
Pipeline. Every day, we look for
new ways to connect with cus­
tomers around the world, provide
to our shareholders and make a positive contribution in
the communities where we do
business.

Granite Construction
Granite Construction Incorporated is a member of the
S&P 490 Index and is the parent
company of Granite Construction Company, one of
the nation's largest heavy civil
contractors and construction materials
producers. Incorporated in 1922 and pub­
licly traded since 1990, Granite
Construction Company serves both public and private sector
clients and is comprised of many
well­coordinated, highly profes­
tional teams of builders located
across the nation. We are best
known for transportation infras­
tructure projects including
roads, highways, tunnels, bridges,
mass transit facilities and airports.
Granite also produces sand, gravel,
ready­mix and asphalt con­
crete and other construction
materials. Unusual among large
contractors, Granite is equally
effective at building both large
and small jobs through its two
operating divisions, from small
site developments to massive bil­
one­dollar federal projects. The
Branch Division serves local
markets in the western United
States and builds smaller projects
of shorter duration. The Heavy
Construction Division (HCD)
builds larger, more complex jobs
nationwide.

COMPANY DESCRIPTION

Engineering, fabrication, installation, commissioning, and service to offices to schools, healthcare arenas, and hi-tech manufacturing with one of the largest and most successful design/build ACCO is dedicated to the design, construction and operations of mechanical systems for a broad range of facilities from retail and offices to schools, healthcare, arenas, and hi-tech manufacturing plants. Established in 1934, ACCO is an employee owned company located on the west coast, with projects located throughout the United States. Over the years the company has combined its capabilities in engineering, fabrication, installation, commissioning, and service to meet the demands for competitive pricing, fast delivery, and high performance systems.

QUALIFICATIONS
- Bachelor of Science in Mechanical/Environmental Engineering or equivalent
- A fundamental understanding of fluids and heat transfer
- Good communication skills

JOB DESCRIPTION

DESIGN ENGINEER & PROJECT MANAGER IN TRAINING: As an engineer with one of the nation's largest and most successful design/build firms, you will be involved in all aspects of the HVAC design/build process. From project conception through the details of design and field coordination, your work with our staff of experts to obtain a practical knowledge and experience unmatched in this exciting industry. You will have the opportunity to apply your engineering training on typical issues such as application review of system and equipment, alternative schemes, cost design, hydronic and duct system design, psychrometric, refrigeration and construction coordination. Examples of HVAC system installations span the full spectrum from the simplest commercial building "package system" to the most complex high purity manufacturing process.

Company Office:

J.M. Smucker Company

The J.M. Smucker Company was founded in 1897 when the Company's namesake and founder sold his first product--apple butter -- from the back of a horse-drawn wagon. Today, over a century later, the Company is the market leader in fruit spreads, peanut butter, shortening and oils, ice cream toppings, and health and natural foods beverages in North America under such iconic brands as Smucker's®, Jif®, Pillsbury® and Crisco®. Since then, FORTUNE Magazine's annual survey of the 100 Best Companies to Work For, the J.M. Smucker Company has consistently been recognized as one of the top 25 companies to work for in the United States, including a No. 1 ranking in 2002.

Flanic

Flanic is a privately-owned general engineering contractor specializing in the construction of wastewater and water treatment facilities. We have been delivering award-winning wastewater and water projects in both the public and private sectors throughout the southwestern United States since 1952. People are our most important asset. Our employees enjoy top-notch benefits, training and advancement potential, an excellent working environment. We have internship and career opportunities throughout California and Arizona. Current job sites include: Orange County, Riverside County, Los Angeles County, San Diego County, Yuma, AZ and Fresno, CA and the list is growing!

John Deece

John Deece, a Fortune 500 company, is making use of the latest technological breakthroughs to improve key equipment and provide first-class customer service. We're the world's leading manufacturer of agricultural and forestry equipment, a leading supplier of agricultural and turf care; and a major manufacturer of construction equipment. Kiewit is known throughout the industry as an organization built on honesty and integrity.

Kiewit

Kiewit is one of the largest construction and mining organizations in North America, with more than 30 district and area offices in the United States and Canada. For over 120 years, we have delivered world-class solutions to projects of every size, in every market. Kiewit has a proven track record for delivering large and challenging projects on time and within budget. Ranked by Fortune magazine as one of America's Most Admired Companies, Kiewit is known throughout the industry as an organization built on honesty and integrity.

KLA-Tencor

KLA-Tencor Corporation is the world's leading supplier of process control and yield management solutions for the semiconductor and related microelectronics industries. The company's comprehensive portfolio of products, software, analysis, services and expertise is designed to help IC manufacturers manage yield throughout the entire wafer fabrication process—R&D to final yield analysis.

Kraft Foods

Kraft Foods is a global leader in branded foods and beverages with 2004 net revenues of more than $32 billion. Built on more than 100 years of quality and innovation, Kraft has grown from modest beginnings to become the largest food and beverage company headquartered in North America and second largest in the world, marketing many popular brands in more than 155 countries.

Sunbelt Rentals

Established in 1983 and headquartered in Charlotte, N.C., Sunbelt Rentals is one of the leading U.S. equipment rental companies serving the commercial, industrial and homeowner markets.

Target

Target is a pro-team culture and we are really striving to empower all levels of our workforce. This is reflected in the amount of emphasis on executive training and development. As executives, we see supporting our teammates and making our work environment "fast, fun and friendly" as two of our primary responsibilities. We're also extremely committed to community service, giving more than $2M/week back to the community. Our Web site, target.com, is a great place to go to learn more about the company's culture.

Teradyne

Teradyne delivers solutions for testing and connecting electronics. It is the world’s leading supplier of automatic test equipment testing and connecting electronics. It is the world’s leading semiconductor, circuit boards, handhelds, and complete system integration. The company’s products deliver competitive advantage to the world’s leading semiconductor, electronics, automotive and network systems companies. In 2004, Teradyne had sales of $1.8 billion, and currently employs about 5,400 people worldwide.

Tetra Tech

Tetra Tech, Inc. is a leading provider of specialized management consulting and technical services in the areas of resource management, infrastructure and communications. As consultants we assist our clients in defining problems and developing innovative and cost-effective solutions. These services span the life cycle of a project and include research and development, applied science and technology, engineering design, construction management, and operations and maintenance. Our clients include a diverse base of government and commercial organizations located in the United States and internationally.

Triage Consulting Group

Triage Consulting Group is a fast-growing healthcare financial consulting firm with over 170 talented professionals, located South of Market Street (SOMA), near the beautiful San Francisco Bay waterfront. Founders Rich Griffith, Jim Hebert and Patti Lee-Hoffmann started Triage Consulting Group in 1994 to meet the unique financial needs of hospitals. The three founders have accumulated over 60 years of experience as CPAs, corporate financial officers, and healthcare consultants. Triage provides an essential service to some of the most prestigious hospitals in the country. We help them improve cash flow, strengthen business office controls, and negotiate contracts with health plans. The work is dynamic, atmosphere energetic; compensation generous, and the growth potential unlimited. In contrast to larger consulting firms, Triage employees receive practical, hands-on training, have real responsibilities, challenges, and contact with top client management—early on. They are highly-trained to become experts in healthcare finance.

UPS

UPS is the world's largest package delivery company and a global leader in supply chain services, offering an extensive range of options for synchronizing the movement of goods, information, and funds. Headquartered in Atlanta, UPS serves more than 200 countries and territories worldwide. UPS stock trades on the New York Stock Exchange (UPS) and the company can be found on the Web at UPS.com.

United States Air Force

The Department of the Air Force Civil Engineering Career Field includes diverse positions such as civil, electrical, mechanical, environmental engineers, architects, realty specialists and community planners. These see Directory, page 24.
Established in 1986 with United States Steel and Pohang Iron and Steel of South Korea. One of the most modern steel facilities in the world, USP-USPOCO Industries ships more than 6,000 tons of flat rolled steel each day to customers primarily in the 13 Western states, Canada, Mexico and the Pacific Rim.

ValleyCrest
Since 1949, ValleyCrest Companies has designed, built, maintained and beautified some of America's most distinctive landscapes.

VisaSt
Visa produces advanced digital wireless communications and signal processing products for commercial and government markets. Our technology development and produces all involve digital communications and cover specialties such as satellite communications, tactical communications, network security, and communication simulation and training.

Walgreens
Walgreens, the nation's premier retail drugstore, has opportunities nationwide. With 7,000 stores planned by the year 2010, we're creating opportunities for talented, ambitious individuals to be ready to contribute to future success. So, if you're a motivated, enthusiastic, people-oriented person with a knack for organization and who thrives in the fast-paced world of retail management, we want to talk to you. Why Walgreens? Walgreens is America's best-known, largest-volume, most-trusted pharmacy retailer. We lead the U.S. drugstore industry in sales, store growth, and profits. We're also one of the nation's largest retailers—voted the #1, largest to be exact—and one of its most progressive and successful companies. Since founding in 1911, Walgreens serves more than 5 million customers daily and each store averages approximately $7.9 million in annual sales. In 2006, sales reached nearly $55 billion marking our 32nd consecutive year of record sales and earnings. We're listed among Fortune's "Most Admired Companies in America" for the 12th straight year and are ranked No. 1 among food and drugstore retailers.

Walt Disney Imagineering
Walt Disney Imagineering is the unique, creative force behind Walt Disney Parks and Resorts that imagines, designs, and builds all Disney theme parks, resorts, attractions, cruise ships, real estate developments, and regional entertainment venues worldwide.

Wealth and Tax Advisory Services

Cast of new MTV show ‘Maui Fever’ catches heat from locals

KAANAPALI, Hawaii (AP) — Cast members of a Maui-based MTV reality series criticized by locals for its raunchy, booby-constent and ethnically diverse popubdon.

While three of the players graduated from Maui schools, none were born on the island. Most moved to Maui from the mainland either as youngsters or within the past six years.

Critics of the show have drafted an online petition calling for the network to cancel the eight-episode series, Petition creator Angie Platt of Ohio said more than 10,000 entries had been gathered last week with copies mailed to Gov. Linda Lingle and friends.

Executive producer Tony DeSanto said he agreed to do the show to bring attention to his clothing sponsors and at the time thought that at least he would be treated by family and friends.

He called the negative attention surrounding the show “disheartening,” particularly when he hears that some think he is giving a bad name to Maui, his home since moving to the island with his family from Southern California at age 7.

“We’re sorry if it really offends anyone,” he said. “To all the asylum

and uncles from here, if you’re angry about it, please don’t get the wrong idea.”

Cast member and restaurant worker Sean, 24, identified on the MTV Web site only by his first name, was recently harassed out of the water at Honolulu Bay after being yelled at for being on the series, according to his boss, Orrin Cross, general manager of Hula Grill Kaanapali.

To go or not to go? That is the question

So everybody is talking about the Coachella thing. You know ... that festival in the desert where one of your favorite bands is playing. I'm positive that one of your favorite bands is playing, no matter who you are.

Maybe that Rage Against the Machine reunion has got your blood pumping and you are so ready to eff this shiz up. Or maybe you're like me and the idea of seeing any number of hyper independent bands is juicing you up. Or maybe you're in high school and you really want to see Jack's Mannequin.

Well, whoever you are, you have to decide if this is really worth baking in the hot Indio sun and forking over $250 of your savings.

I avoided the festival last year and deeply regretted missing what looked like an amazing Daft Punk show. I still really question why I did it. So maybe breaking down the pros and cons of the jam fest for you will do some good.

Let's start with the good stuff. The wealth of bands lined up to perform is absolutely incredible. Just having a Jesus and Mary Chain reunion is an incredible asset all by itself. But with the addition of The Arcade Fire, Air and Björk as some of the other big names sprawled across the three days, there's some definite talent to enjoy.

In addition, you are surrounded by thousands of people who love these bands as much as you do. In addition, you get to camp. And camping is rad. Trust me.

So why am I so scared of going to Coachella? First, it just doesn't seem like a genuine music experience to me. I'm more than a little put off by crawling through throngs of Arctic Monkeys fans in order to find some backwoods stage where I can hear CrocoRosie get drowned out by the Red Hot Chili Peppers.

Second, do I really want to be in the desert for the pretty woods. Plus, I get to continue seeing Port O'Brien on a somewhat regular basis since they landed a spot at the festival. And best of all — it's only $33, so I can spend the rest of my hard-earned money on weekend festivities.

So make your choice, and stop to think about it a bit, too. Think about what you are expecting from the experience.

Show tip: There is next to nothing I am excited about seeing next week. Or at least nothing that I've heard of yet. So take this week to brush up your skills and put some songwriting to work. There's plenty of open spaces out there for you.

The Tasty New Food at Campus Market

Melissa Montecuollo
CAMPUS DINING STAFF WRITER

The salad bar is by far one of the most popular new items at Campus Market. With a variety of offerings and the popular balsamic vinaigrette and ranch dressings, the new salad bar has been a huge hit this quarter. Students can choose from the large selection of toppings including cheese, ham, and turkey. The salad bar is by far one of the most popular that students have been able to please their customers.

Manager, Sheri Bliss. She also said that other great things are being explored and will soon be introduced.

New sandwiches are also a popular feature. Chicken salad, tuna salad, and BLT sandwiches are among many new items seen at Campus Market.

Bliss said that other great things are being explored and will soon be introduced.

Campus Market also sells half and quarter chicken that come with a rice or potato side dish, which is optimal for the roommate who ran out of time to cook dinner.

Bliss said that other great things are being explored and will soon be introduced.

Campus Market management has implemented new food items to please their customers. In addition to the salad bar, whole chickens are being sold in the evenings. After 5:00 PM, one can buy an oven roasted whole chicken that serves approximately four people (depending on how hungry those four people are.) “People want things that taste homemade and they can eat at their convenience,” said Manager, Sheri Bliss. She also said it is great for people who live on campus and don't have the facilities to cook.

Bryant scored 27 points, including 11 in the final period, as the Lakers swept the Hawks for the first time in seven years. The Lakers improved to 3-2 on their eight-game road trip with their second straight win.

Bryant wagged his index finger at Atlanta fans after his fourth straight jumper in the hot streak, which left the Hawks with a 77-71 lead. The Hawks, who pulled within three points early in the period, came no closer than six the rest of the way.

Joe Johnson led Atlanta with 27 points but made only 10 of 26 shots. Josh Smith scored 20 points and Zaza Pachulia added 14.

Only two players joined Bryant in double figures for the Lakers. Lamar Odom had 15 points and 18 rebounds, and Andrew Bynum added another double-double with 14 points and 10 rebounds.

The win came one day after the Mustangs upset 66th-ranked UNLV by a score of 4-1.

Poly men's tennis team edges Southern Miss, 4-3

The win came one day after the Mustangs upset 66th-ranked UNLV by a score of 4-1.

SPORTS INFORMATION REPORT

1. LAS VEGAS — The Cal Poly men's tennis team won its third consecutive match Sunday in the UNLV Invitational held at the Ferrita Tennis Complex.

2. The Mustangs (3-2) defeated the Golden Eagles of Southern Mississippi 4-3 in the final match of the round-robin dual format tournament.

3. Cal Poly clinched the win with the doubles point after getting victories from the duo of Matt Baca and Kyle Roybal along with Darryn Young and Robert Fox.

4. The Mustangs won three of six singles matches.

5. Baca, a senior, defeated Andrew Poole of Southern Mississippi 6-2, 6-0 in the No. 1 slot.

6. Fox won a tight 4-6, 6-3, 6-3 match over Callen Fraymichael.

7. For was down 0-3 in the third set but came back to win the match, rallying to win six straight games.

8. In the No. 5 position, Cal Poly's Nick Berg also recorded a win over Delcevisi 7-5, 6-2.

9. The Mustangs were undefeated on the weekend, 3-0.

10. Cal Poly will now prepare for the Cal Poly Invitational from Feb. 16 to 18.
The Mustangs will be looking for their third straight win and hope to earn it against an old rival.

**SPORTS INFORMATION REPORT**

The Cal Poly baseball team (3-5) which snapped a season-opening, five-game losing streak by winning the last two games of the San Diego State series last weekend, continues its home stand by hosting Fresno State (1-2) at Bagger Stadium at 6 tonight.

The Mustangs also host Nevada (2-4) for a three-game series this weekend.

Cal Poly has swept Fresno State in three-game series each of the last two years, but the Bulldogs still have a 108-51 advantage since the series began in 1945. The two schools were California Collegiate Athletic Association rivals in the 1940s, 1950s and 1960s and also were fellow members of the Western Athletic Conference in 1995 and 1996.

Cal Poly posted 4-4-1 and 9.8 victories over the Bulldogs in a season-opening series a year ago at Bagger Stadium, and also won by scores of 5-3, 7-3 and 9-7 in March 2005 at Beiden Field.

Fresno State, coached by Mike Batesole (fifth season, 135-107), returns 15 lettermen, including four position starters (no pitchers), off a team which went 16-17 in 2005 actual and qualified for the Fullerton Regional going 2-2.

The Bulldogs opened their season last weekend by dropping the first two games of a series at home against San Francisco 6-2 and 4-3, before taking the final game 4-3 behind the bat of Tom Mendonca who hit a solo home run in the seventh inning to snap a 4-4 tie. Fresno State hit 245 in the series and was outscored 14-10, committing five errors.

Seven Bulldog pitchers combined to strike out 22 Dons in 27 innings, posting a staff ERA of 4.00. Today's Bulldog starters, sophomore right-hander Tanner Schepers, pitched four innings in relief Frida, allowing one run and two hit with four strikeouts.

Cal Poly lost a record six players to the Major League Baseball First-Year Player Draft last June and two others signed free-agent contracts. Add to that list three other seniors who completed their eligibility and it leaves a lot of holes in the lineup. The Mustangs, who lost all three starting pitchers, their closer and five of the eight position starters, have a lot of new faces in the lineup this year.

After being swept by San Diego two weeks ago, the Mustangs fell 2-4 to USC last Tuesday.

Cal Poly rebounded from Friday's 9-5 loss to San Diego State in the home opener with 11-6 and 4-0 victories to take the series.

**CRAC MANTLE MUSTANG DAILY**

Cal Poly junior second baseman Pat Pezet attempts to throw out a runner during the Mustangs' 4-0 home win over San Diego State on Sunday at Bagger Stadium. Pezet was 1 for 3 as the Mustangs (2-5) clinched the series, 2-1.

**SPORTS**

**Whiten a team leader, defender for Mustangs**

Shown during a 91-72 home win over Division II Cal State Stanislaus on Nov. 20, Cal Poly junior shooting guard Dawsin Whiten has been starting in the Mustangs' backcourt since his freshman season.

Cal Poly's starting junior shooting guard puts up 10.9 points per game and leads the team in both assists (2.9) and steals (1.3) per contest.

**Taylor Moore MUSTANG DAILY**

With less than half the season left, Cal Poly men's basketball standout Dawsin Whiten is looking to finish strong.

"I'm working on getting my shooting percentage up," said Whiten, a junior shooting guard. "I am a much better射手 than what my current percentage indicates."

"Whiten has been a strong asset for the Mustangs since his freshman year starting in the backcourt."

"He brings everything to the game," Cal Poly head coach Kevin Bromley said. "He is not just special­ized in one area. Our stopper on the perimeter, he is a great on-ball defender that has become a great team defender."

In the 2004-05 season, Whiten was named to the All-Big West Conference Freshmen Team and as a sophomore to the All-Big West second team. He averaged 11.5 points per game in those two seasons. Whiten is tied for second on the team in scoring average this season at 10.9 points per game, helping Cal Poly to a 6-9 record. He is shooting .355 from the floor, but a solid .330 from 3-point range and .740 from the free-throw line.

Whiten leads Cal Poly in assists (2.9) and steals (1.3) per game. As one of the team's strongest defenders, Whiten challenges himself and his teammates to constantly improve on their skills.

"I'm looking forward to pushing my game up to the next level," he said. "I am also trying to get more rebounds at the guard position, and stretch the gap between assists and turnovers."

Whiten's skills on the court developed long before his time at Cal Poly. As a member of the Monroe High basketball team, Whiten averaged 16.2 points per game his senior year.

His time at Cal Poly has allowed the recreation administrator major to grow and strengthen his abilities.

"I am more mature now," he said. "I look to my teammates more and together we are better."

Bromley agreed.

"He has come a long way in the maturity and teamwork part of the game," Bromley said. "His game has improved incredibly."

Whiten has had plenty of memo­rable moments playing for the Mustangs, but his favorite came Jan. 25 when Cal Poly won 71-61 at UC Santa Barbara. It was the Mustangs' first win in the Thunderdome since 1998 and only their second there since 1959.

"Whatever the game demands from him, he is ready to give," Bromley said of Whiten. "He is an incredible young man — mature beyond his years."

As one of the team's strongest defenders, Whiten challenges himself and his teammates to constantly improve on their skills.

Harrison shared the award with Fresno State's Kevin Young in 1996. The Mustangs re­turned from Friday's 11-6 win over San Diego State in the home opener with 11-6 and 4-0 victories to take the series.

**Harrison takes Big West honor**

Southern Section in 2006. For the 10-3 Highlanders, he had:

• A 90-yard punt return for a touchdown in a 38-20 win over Villa Park on Sept. 28.

• A 52-yard kick return for a score in a 61-14 rout of Sonora on Oct. 27.

• A 96-yard interception return for a touchdown in a 26-5 win over Fullerton on Nov. 9.

• A 69-yard interception return for a score in a 55-6 win over Arroyo on Nov. 17.

• A 70-yard kick return for a touchdown in a 35-12 win over California on Nov. 24.

The Mustangs' sophomore forward scored a career-high 29 points in a 69-60 win over UC Davis last Thursday.

**SPORTS INFORMATION REPORT**

One of the top offensive showings recent program history helped Cal Poly sophomore basketball sophomore forward Megan Harrison earn Big West Conference Player of the Week honors Monday for the period ending Saturday.

In Cal Poly's 69-60 nonconference victory against UC Davis last Thursday, Harrison recorded a career-high 29 points — the top single-game total by a Cal Poly player in more than 10 years. Harrison's total was the most by a Mustang since Stephanie Osorio scored 31 in a 1983-84 victory Dec. 30, 1996.

Harrison's 29 points, however, are the most by a Mustang against a Division I school since Cal Poly re­cruited to the top flight in 1994. Thursday also marked the second consecutive game in which she recorded a career high in points. The forward matched 24 in Cal Poly's 78-72 win against Cal State Northridge on Jan. 27.

Harrison built her total by converting 10 of 16 field-goal attempts and 9 of 13 chances from the free-throw line. Harrison's .625 field-goal percentage was her highest since seeking 7 of 10 attempts for 18 points against San Francisco on Dec. 2.

Harrison is second among Mustangs with 20.3 points per game. She is second among Mustangs with 12.3 rebounds per game. She is second among Mustangs with 3.3 assists per game. She is second among Mustangs with 2.3 blocks per game. She is second among Mustangs with 2.2 steals per game. She is second among Mustangs with 1.34 free-throw percentage. She is second among Mustangs with 1.26 offensive rebound per game.

Harrison shared the award with UC Santa Barbara's Ashley Donohue who ended the week with 18 points against Pacific on Nov. 17 and 10 points against Cal Poly on Nov. 24. Both players have averaged 22.0 points per game since Jan. 25.
