Sahara Bashue
SPECIAL TO THE MUSTANG DAILY

Cal Poly is striving toward more convenient and available student housing for next year and years to come.

This fall, a large number of freshmen began their first year at Cal Poly without the ability to live on campus. Many freshmen were placed in Mustang Village, Stenner Glen or even as far as Valencia Apartments. For these freshmen, the ability to be social and meet new people can become more difficult when their housing doesn’t allow for them to be surrounded by other new students 24 hours a day.

“Other people are always talking about the dorms and you have nothing to say about it,” said biochemistry sophomore Rebecca Hooper, who stayed in Mustang Village last year.

“I plan that may help avoid this issue becomes more difficult when their housing doesn’t allow for them to be surrounded by other new students 24 hours a day. “Other people are always talking about the dorms and you have nothing to say about it,” said biochemistry sophomore Rebecca Hooper, who stayed in Mustang Village last year.

“Plus, you’re not forced to see people every day, so you can’t meet friends as easily. There’s always that split between people who live off campus and those who live on campus.”

Cal Poly has now implemented a plan that may help avoid this issue in fall 2008.

The Institutional Planning and Analysis Registration Monitor Fall 2007 shows that last year, Cal Poly planned to receive 3,607 freshmen and ended up with 3,669, a difference of only 62 students.

Residents of a South Mountain “red brick” residence hall hang out in one of the tripled rooms. This fall, Cal Poly ended up with 563 more freshmen students than expected.

**Credit card marketing bill awaits Gov.’s signature**

Asaf Shalev
DAILY CALIFORNIA (AP-REUSSLEY)

A bill passed by the California State Legislature last month, now pending approval by the governor, aims to curb credit card marketing to college students who are increasingly weighed down by debt.

If signed by Gov. Arnold Schwarzenegger, the law will prohibit credit card companies from giving gifts to students who fill out credit card applications on public campuses.

It would also require campuses to disclose credit card marketing agreements made with banks or other financial institutions.

“We want to stop predatory marketing by credit card companies,” said Chris Vaeth, director of special projects for the Greenlining Institute, a sponsor of the bill.

The bill, written by Assemblymember Joe Coto, D-San Jose, will automatically become law if the governor does not make a decision on it by Oct. 14.

Schwarzenegger has not yet taken a position, according to Gerta Grebitus, spokesperson for the governor.

The bill seeks to prevent credit card companies from signing up college students who are attracted by a free T-shirt or a large pepperoni pizza.

“The current way of marketing detracts from the serious issue of applying for a credit card,” Vaeth said.

The ASUC Auxiliary does not approve marketing of credit cards regardless of gift-giving, according to director Nadean Permail.

“We don’t think it is appropriate for credit card debt to be advertised without a mechanism to teach students to use their resources wisely,” he said.

However, Permail said that debit cards can be marketed on campus because they are much less “dangerous” than credit cards.

According to Nellie Mar, a student loan provider, credit card debt increases throughout a student’s college career.

A 2004 company study found that seniors carry an average credit card balance of $2,864 compared to the freshmen average of $1,586.

Cal Fire, UPD seek more information

Fire investigators are still searching for the cause of Tuesday’s fire that consumed 60 acres on the hills behind the Cal Poly campus.

They are seeking information on the identity of a “college-age female” who was seen running downhill from the fire scene shortly after the blaze began around 11:15 a.m.

Witnesses described her as Caucasian with brown hair, a slender build and wearing jeans and a pink shirt.

Anyone with information should contact Cal Fire Investigators at 543-4244 or the University Police Department at 756-2281.
Housing (continued from page 1)

This fall, Cal Poly planned to have 3,809 freshmen and ended up with 3,472, a difference of 437.

"Well, we've never been able to guarantee housing to our freshmen in the years I've been here," said Preston Allen, executive director of Housing and Residential Life. "So, we must work off-campus housing like Mustang Village and Steemer Glen to head toward a win-win situation for our first-time students and the university."

Despite Cal Poly's link to off-campus housing locations, the situation remains inevitably more difficult socially for freshmen.

Freshman enrollment increased by a wide range from 2006 to 2007, and in 2008 there is the possibility that it will increase further.

"The freshman class was so large this year, so adjustment for space will most likely be taken on next year's freshman class," Allen said. "It depends on this year's graduates and enrollment — it changes every year."

Since Cal Poly exceeded its enrollment projection this year, both Allen and institutional planning and analysis director Brent Goodman agree there is no way to predict if it will happen again.

Housing availability is based on a student's intent to register, but Goodman has not yet received the numbers for next fall's enrollment.

"Through general thinking I suppose the numbers will remain relatively the same next year," Goodman said.

But if the numbers go up, Cal Poly now has a plan. The housing department is beginning a first-year program model for the Cerro Vista apartments in fall 2008.

Part of the Cerro Vista complex will be open to incoming freshmen and similar dormitory guidelines will be in place.

"We are poised to see what happens and are looking forward to possibly placing freshmen in Cerro Vista next year," Allen said.

Plus, sophomores will not lose any housing options since Poly Canyon Village will be opening up for extra sophomore student housing.

The new plan allows more space for incoming freshmen and an entire building available for sophomores.

"We'd like to provide 900 additional beds to sophomores in fall," housing department representative Julie Clark said. "We are hoping for more than that if we become ahead of schedule, but we know we won't have all 2,700 beds by fall."

Allen feels this new arrangement will work a lot better for incoming students.

"This seems a better fit than a first-year student having to live off campus, maybe way in Morro Bay, because of housing costs. Students in their third and fourth year have gained more experience to move off campus."

The story behind the comic...

If you drive by Los Osos Valley Road, you may notice people sleeping outside in bunk beds and tents. I decided to investigate this odd phenomenon and get behind the scenes. It was here that I discovered the story surrounding Sunny Acres.

This is the fifth and last part of a comic strip describing my experiences.

Jeff Chang is an art and design senior at Cal Poly.
WORD ON THE STREET
“What band would you like to see next at Cal Poly?”
Compiled and photographed by Mollie Helmuth

"G Love & Special Sauce, because it’s a different style than the usual bands that come.”
— Day Bernstein-Freeman, art and design sophomore

"I’d like Flogging Molly to come back. They were such a good live show.”
— Jess Hawley, journalism senior

"Farm, because they get my bones groovin’.
— Michael Wallenrod, environmental management junior

“Red Hot Chili Peppers, because they’re the best band ever.”
— Sean Pearson, economics freshman

State

SEBASTOPOL (AP) — A city lawmaker has pleaded not guilty to scratching a pickup truck owned by a guest of her neighbor and fellow member of the Sebastopol City Council.
Linda Kelley, 53, was charged with misdemeanor vandalism on Oct. 3, after the guest, Michael G. Zinsley, accused her of intentionally keying his truck while he slept in the back.

LOS ANGELES (AP) — Investigators were asking for the public’s help after a body was found on Interstate 880 Thursday.
The California Highway Patrol shut down the southbound side of the freeway for two hours Thursday morning after the discovery.
CHP investigators said the victim, a man believed to be in his 50’s, may have been a pedestrian. He was apparently struck before sunrise, possibly by several cars, authorities said. His name has not been released.

SAN JOSE (AP) — San Jose police have made an arrest in the kidnapping and attempted sexual assault of a 12-year-old girl.
Police are releasing few details, except to say the suspect was taken into custody Wednesday night.

National

PORTLAND, Ore. (AP) — It was pandhandling, it was performance art, and it was a political statement about the legacy of slavery and reparations for black people.
A dozen volunteers, black and white, took to the streets of Portland on Wednesday to take part in what its creator called the National Day of Panhandling for Reparations.

LAS VEGAS (AP) — Two hot dog eating champs faced an upset, not of the stomach variety, when a Chicago culinary arts student trumped them in eating chicken wings.
Patrick “Deep Dish” Bernietti, a Chicago culinary arts student, won the chicken wing “Chowdown” for Spike TV.

WASHINGTON (AP) — Hillary Rodham Clinton has given a private clue on an issue she has refused to discuss publicly: how to preserve Social Security in the long term.
The Democratic presidential contender told an Iowa voter she would be willing to consider an idea that her Democratic rival John Edwards has been promoting raising Social Security taxes on high-income earners.

International

BAGHDAD (AP) — The top U.S. commander in Iraq warned Thursday that Turkey’s threatened incursion into Kurdish regions in the north of the country could harm the flow of supplies for U.S. troops and damage the Kurdish economy.
Iraqi Kurdistan, a haven of relative calm, could suddenly become another flash point if Turkey makes good on threats to cross the northern border in pursuit of Turkish Kurdish militants.

BAGHDAD (AP) — U.N. officials in Iraq stepped up pressure on the United States on Thursday to prosecute any unjurisdic­tional killings of Iraqi civilians by private security contractors, saying such killings could amount to war crimes or crimes against humanity if “done in cold blood.”

ISTANBUL, Turkey (AP) — An Egyptian plane carrying 163 people to Warsaw caught fire Thursday after making an emer­gency landing at Istanbul’s interna­tional airport, a government offi­cial said. One passenger was slightly injured.
The fire in the Egyptian plane was extinguished, and there was no loss of life, said the official at the state agency in charge of airports.

writing the ‘moby dick’ of potatoes

Ruth Ozeki, author of PREFACE book ‘All Over Creation,’ spoke with students about writing and urged them to question the world

Cassandra Carlson
MUSTANG DAILY
March 9, 1997

The audience sat captivated by the woman who walked on stage with grace, a relaxed attitude and a trendy headband. As the bright stage light glared upon her, she raised her hand to her eyes and looked into the audience of over 300 people, joking how she could not see. The Cal Poly Shared Reading Program came to listen and ask questions of the author. Cassandra Carlson laughed along with personable author Kuth Ozeki at Harmon Hall in the Performing Arts Center. Students, community members and the volunteers of PREFACE were interested in Ozeki’s experiences and her writing.

“My opinions don’t matter. Whether I’m vegetarian or not, believe in genetic engineering or not—I have no particular agenda,” Ozeki told the audience. “I’m a novelist; I ask questions and sow the seeds to provide collaborative discourse.”

The author spoke of how it’s a huge mistake to support or buy into the status quo, collaborate and be poetically promiscuous. “It’s wild when in the world there is more science fiction going on than a fiction writer could ever write,” Ozeki said. Ozeki feels uncomfortable by the rapid commerce of technology due to its destructiveness, but also believes it to be a value-neutral subject. The book involves a company called Cynaco who heads the field in gene splicing and GMOs. Cynaco is modeled as a real company, but the only insight Ozeki gave was that “the company starts with an ‘M.’” She chose to write on this topic because it has that dramatic conflict to drive the story along, providing a great narrative perspective. As a consumer and citizen of the planet she is concerned. “It seems important for all of us to learn from,” Ozeki said. Throughout her speech she gave insight to the world of potatoes and the potato research she has done. She spoke of her travels to Idaho and Wisconsin to both small and large farms. She talked to seed farmers, environmentalists, wild potato collectors (yes, they exist) and University of Wisconsin experts on breeding plants. Ozeki went as far as gathering information from the United States Potato Genebank (NRSP-6). Her extensive research on the subject says a lot about the background she gives to a fictional story. A 900-page draft appeared by the time she was done, to which her editor said, “Congratulations; you’ve just written the ‘Moby Dick’ of potatoes.”

It was then that Ozeki realized that not everyone would want to know the arcane bits of potato trivia as her editor sifted through the informative yet mundane ‘world of potatoes.’

Ozeki’s name is actually her pen name; she did not feel right about using her family name on the cover of her novels. “This way I can use the language I want to use — my father was from a conservative intellectual background,” Ozeki said. After speaking Wednesday night, the author stood in the doorway, answering questions with both intelligence and personality.

“It was one of the better events I have been to and (it was) nice to hear her explain her writing processes. The audience really listened to her,” said Robert Council, 51, who traveled from San Diego to listen to the author talk about the book. Council has a background in film and television. His daughter plays in the Cal Poly theater program.

“Her personality comes through in the book,” Council said. “The audience was captivated.”

Ozeki has enjoyed the environment of the college students in her 15 years of speaking at campuses. As an Asian-American, Ozeki has confronted the role of the “typical white male writer … or even better if you’re dead.”

One audience member asked about the topic of her next book. Ozeki admitted to be done writing about food for now, in fear of being typecast. Her next book will be about environmentalists, wild potato collectors (yes, they exist) and University of Wisconsin experts on breeding plants.

The author speaks with students after her presentation.

Ozeki told students that falling in love is an easy thing to write about, but when writing about death she had to handle a failed relationship with her father but also his death after a long illness. Dealing with her own father’s death created the character with both intelligence and personality. Ozeki told students how it’s a huge mistake to support or buy into the status quo, collaborate and be poetically promiscuous.

“One sentence will pop into my head and I start to hear something,” Ozeki said. She believes all fiction comes from a personal experience or something that is intimately close with the writer. Dealing with her own father’s death created the character Lloyd (the father) and the protagonist, Yunii, in “All Over Creation.” Yunii not only had to take on her own point of view to the audience’s questions, but also believes it to be a value-neutral subject.

“Although my relationship was a lot closer than Yunii’s relationship with her father, I felt angry about (my father’s) death. I couldn’t understand why I was so angry and I did not like not being able to control his dying,” Ozeki said.

Yumi has many character flaws, mainly her selfishness. She is caught up in her own narrative and is blind to everyone and everything going on around her.

The audience at the PAC consisted of many fans of the book that read and built connections with in storyline and characters.

“I could relate to the book. I’m semi-fluent in French and know Japanese, so I understand the culture in the book,” horticultural senior Kim Wakasuki said. “I’m also from a small town, so I know how that kind of mindset rules their lives.”

While other universities have chosen “My Year of Meats” for their common book programs, Cal Poly is the first to choose “All Over Creation.”

“I am thrilled to be a part of the PREFACE program. It’s an incredible opportunity for any author, especially with university students and new leaders,” Ozeki said. On the subject of genetically-engineered organisms (GMOs), the writer does not hold back.

“It’s wild when in the world there is more science fiction going on than a fiction writer could ever write,” Ozeki said. Ozeki feels uncomfortable by the rapid commerce of technology due to its destructiveness, but also believes it to be a value-neutral subject. The book involves a company called Cynaco who heads the field in gene splicing and GMOs. Cynaco is modeled as a real company, but the only insight Ozeki gave was that “the company starts with an ‘M.’” She chose to write on this topic because it has that dramatic conflict to drive the story along, providing a great narrative perspective. As a consumer and citizen of the planet she is concerned. “It seems important for all of us to learn from,” Ozeki said. Throughout her speech she gave insight to the world of potatoes and the potato research she has done. She spoke of her travels to Idaho and Wisconsin to both small and large farms. She talked to seed farmers, environmentalists, wild potato collectors (yes, they exist) and University of Wisconsin experts on breeding plants.

Ozeki went as far as gathering information from the United States Potato Genebank (NRSP-6). Her extensive research on the subject says a lot about the background she gives to a fictional story.

A 900-page draft appeared by the time she was done, to which her editor said, “Congratulations; you’ve just written the ‘Moby Dick’ of potatoes.”

It was then that Ozeki realized that not everyone would want to know the arcane bits of potato trivia as her editor sifted through the informative yet mundane ‘world of potatoes.’

Ozeki’s name is actually her pen name; she did not feel right about using her family name on the cover of her novels. "This way I can use the language I want to use — my father was from a conservative intellectual background," Ozeki said.

After speaking Wednesday night, the author stood in the doorway, answering questions with both intelligence and personality.

"It was one of the better events I have been to and (it was) nice to hear her explain her writing processes. The audience really listened to her," said Robert Council, 51, who traveled from San Diego to listen to the author talk about the book. Council has a background in film and television. 'Quinceañera'
tells of love and understanding

Daniel Seguin

Teenage pregnancy, alternative lifestyles and traditional family values all crash head-on in this poignant story centered around life, love and loss.

Magdalena, played by Emily Rios, is a happy teenager growing up in Echo Park, the heart of Los Angeles. Magdalena's 15th birthday is quickly approaching and she is excited about her upcoming world slowly crumbles.

When Magdalena discovers she is pregnant, she is shocked. Her best friend, Carlos, is devastated. He is the only one who has ever really loved her. He wants to support her, but he knows he can't.

Magdalena's father, a Catholic priest, wants her to get an abortion. But when she finds out she is pregnant, she realizes that she can't do it. She decides to have the baby, and she and Carlos move in together.

As they try to find another place to live, Magdalena and Carlos struggle to make ends meet. They have to work long hours and still don't have enough money to pay for the rent. They are forced to move in with Magdalena's cousin, Ivan, who owns a restaurant.

Ivan is a kind-hearted man, but he has his own problems. He is dealing with a drug addiction, and he is trying to stay clean.

Magdalena and Carlos soon realize that they are not the only ones struggling. Many of the people around them are also dealing with their own challenges.

Through it all, Magdalena and Carlos remain strong. They support each other, and they never give up hope.

In the end, they do find a place to live, and they are able to start a new life together.

'Quinceañera' is a powerful story of love and understanding, and it reminds us that even in the toughest of times, there is always hope.

GUEST COMMENTARY

Get the facts straight and talk it out

In Wednesday’s opinion column in the Mustang Daily, Taylor Scott, representing the College Republicans, stated that his position on climate change is an endorsement of free market capitalism. In his opinion, “It is my belief that global warming is not a human-generated problem and that free market capitalism will solve it.”

However, today, I want to go a little further than just talk about the facts. This is an opinion column, and I want to go beyond the facts to discuss the implications of this position.

While it is true that the free market may have some advantages in addressing climate change, it also has significant drawbacks. For example, it is not clear how the free market will ensure that the necessary investments are made in renewable energy technologies. Additionally, it is not clear how the free market will address the distributional implications of climate change, such as the costs that will be borne by the poorest and most vulnerable communities.

Furthermore, it is important to recognize that climate change is a global problem, and it is not something that can be solved by individual countries acting alone. For example, a country that reduces its emissions will not necessarily see a decrease in its temperature, as the other countries continue to emit greenhouse gases.

What do you think? Is it accurate to say that global warming is not a human-generated problem? What is your opinion on the role of the free market in addressing climate change? I would love to hear your thoughts.

Taylor Scott
Horseshoe
continued from page 6

"How they defend it will de­
terminate our success," Ellerson said at the Mustang openings.

The passing game is headed up by junior quarterback Jonathan Dally, who has posted 625 yards passing and a 13-10-in touchdown-to-interception ratio so far this season.

Dally proved two weeks ago that he can also be a threat on the ground as well with four touch­downs against Northern Colorado on runs of 2, 14, 1 and 7 yards.

Dally continues to look to ju­ni­or wide receiver Ramon Barden as a favorite target. The Dally to Barden staple alone earned 498 yards and six touchdowns in Cal Poly's three-game homestand.

Ellerson said that junior center Stephen Field, who was injured early in the season, will be return­ing to the offensive line Saturday. He said that Jon Cow, who has filled in for Field at center may see some time at tackle.

Cal Poly has held the Golden Horseshoe for the past year after rallying back from a 10-3 deficit to defeat the Aggies 23-17, but in UC Davis they own the series record with 16 wins to Cal Poly's 14. The teams have tied twice.

This year's game will mark the first time the Mustangs have been played in the recently completed Aggie Stadium. The new $31 mil­lion facility features state-of-the­ art turf and a seating ca­acity of 10,763.

"It looks like a nice setting," Ellerson said.

The game will mark the 38th time the teams have met since the series began in 1939.

"We love to play these guys," Ellerson said. "It's a team we re­spect (and) that's who you want to measure yourself against."

CLASSIFIEDS
Two weeks ago Cal Poly was struggling with injuries. But with a week's rest coming off a bye, it will be school and conference rival UC Davis that will try to cope with injuries in Saturday's annual Horseshoe Classic at Davis' new Multi-Purpose Stadium.

"We are a better football team coming out of the bye than we were going into it," Cal Poly head coach Rich Ellerson said in a telephone interview.

The Aggies (2-4, 0-1), on the other hand, are coming into the game beat up following a 35-16 loss to Great West Conference leader North Dakota State. Perhaps the most notable injured player for the Aggies was Tim Plough who went out of the game in the first half with a knee injury.

Plough, a key component of the UC Davis offensive game, has completed 64 percent of his passes this season and has passed for 1,355 yards and 11 touchdowns. His Saturday start is questionable according to the UC Davis athletics Web site.

Quarterback Matt Engle was called upon to replace Plough in last week's game and managed to complete 21 of 33 passes for 221 yards.

The Aggies offense boasts a heavy pass game with 1,683 yards in 11 games but struggle in the running game with only 242 total rushing yards. Cal Poly hopes to get above the 80-yard mark in their last two games.

Red shirt freshman Joe Trombetta has accounted for 525 of those rushing yards. He leads the team in rushing per carry. He has played in all six of the Aggies' games this year, is the top target for both of Davis' quarterbacks. He has posted 499 yards on 37 receptions and is averaging 13.2 yards per game.

Defensively the Aggies have struggled to stop the pass, giving up 1,543 yards so far this season as well as 10 touchdowns.

However, in spite of its own rushing faults, Davis has managed to limit the rush of opposing teams to 543 yards — an opponent average of 98.5 yards per game. The Aggies have given up 11 rushing touch­downs so far this season.

"We have to run our offense," Ellerson said. "We can pass the ball but we have to be able to run the ball. If we can't put up a hundred yards against (UC Davis) then we lost the game."

With injuries in Saturday's annual Horse­shoe Classic, the Mustang overall offense remains balanced with only a 17-yard difference be­tween total rushing yards and total passing yards. Rushing has yielded the most yard­age for 1,335 so far this season. Cal Poly took U C B S in 4 Points per game 35 22.7 First Downs 103 124 Rushing yardage 1132 624 Average per rush 4.5 3.4 Passing yardage 1118 1683 TD INT 22 2 17-10 Total yards 2523 2307 Fumbles-lost 10 10-11 Penalties-yards 30-207 53-498 Punt-avg 23.4-24.4 24-36.3 Avg. time of poss. 31.53 30-42 Third-down conversions 21-26 40-87 Fourth-down conversions 6-13 4-13 Sack-yards 8-50 17-126 Field goals attempts 6-7 4-8 How They Stack Up

Junior wide receiver Rameses Barden makes a catch over a Northern Colorado defender. Barden leads the Great West in receiving yards per game.

Northern Colorado game but didn't play in order to prevent further injuries. Ellerson said that Mole is "100 percent" and that Noble "should be at 100 percent" Saturday's game.

Sophomore Jerni Grayson and junior Jon Hall have filled in for those two well. Gray­son posted his first ever 100-yard game with Cal Poly against Northern Colorado. He has 242 yards in three seasons and Game No. 2 on the team in rushing.

Hall, the team leader in rushing with 282 yards on 50 attempts, has earned a work­horse reputation by chipping away at real estate with an average per carry of 5.5 yards per carry. He leads the team in rushing with 282 yards on 50 attempts.

The Mustang overall offense remains balanced with only a 17-yard difference be­tween total rushing yards and total passing yards. Rushing has yielded the most yard­age for 1,335 so far this season.
