After suffering from an eating disorder at the end of her freshman year of college, Cal Poly communications junior Jamie Engelhardt decided to start a club to help prevent others from going through the same thing.

Engelhardt took a year off so she could fully recover from anorexia nervosa and then returning to school has been in the process of forming the Coalition for Health, Wellness and Body Appreciation club.

"After going through the recovery process and being in recovery, it's my passion in life to help people who suffer from (anorexia nervosa) and make a difference (in the fight against the disease)," Engelhardt said.

The psychology minor wants to obtain a masters degree in marriage and family therapy in order to professionally treat eating disorders and ends the club as a step in that direction.

Engelhardt came up with the idea of starting a club after speaking with a specialist in her native San Diego while volunteering at an eating disorder prevention program at the Healthy Within Foundation, a program she also graduated from.

"I didn't know how much support I would get on campus, I was nervous about it," she said.

"But I just decided that I needed to follow my passion and I wanted to go into this full force." — Engelhardt

After distributing flyers and talking to psychology classes, Engelhardt said she's gotten "a great response" from students on campus. Over 60 people have expressed interest in being a part of the club, which will encompass a variety of topics in the fight against eating disorders.

Senior psychology major Kristin Stary is one such student. Stary started restricting her diet at age 12 and suffered from anorexia nervosa throughout her teen years. Seven years later, Stary said she finally considered herself recovered.

She heard about the club through an email from the psychology department.

"I got so excited because there's nothing like that on campus and I've always wanted to do something like that," Stary said. "I've always wanted to see someone take initiative and establish a club like that because it's so needed."

Stary who also interned for the Health Center and works with various women's programs, emailed Engelhardt and the two began talking.

Both realized how important it was to have a group of people to talk about their experiences with eating disorders. Ultimately, Stary decided to work on the club for her senior project.

"I was just like Jamie, I had a very healthy up- potential growing up and I was very involved with sports," Stary said. "It started with me thinking I needed to lose weight and I was 12 years old and that's terrible. I didn't wake up one day and say, 'Oh I'm going to be anorexic' but it led me to a place where I was deeply afraid to eat.

Engelhardt said she hopes to educate students about eating disorders, but also wants to promote self-esteem and a healthy body image. Stress management and media criticism will be discussed as well as how to approach someone who has an eating disorder. She plans to draw on her own education and experience, but wants the club to be a collaborative effort where everyone can contribute.

"The eating disorder is not just about food and exercise," Engelhardt said. "You just love yourself. This whole last year has been a process of rediscovering and celebrating who I am again."

The club is still in the process of becoming official, but Engelhardt said they have more than enough members and officers.

Engelhardt and Stary said they don't know how long the entire process will take, but they plan to have unofficial meetings with interested students, brainstorm ideas for the club. "I just know that there is not only a need for this club but an interest in it," Stary said. "I just want to be a part of the grassroots of this and I would love to see the club be very successful and maybe even spread across all campuses in California."

Anyone interested in joining the Coalition for Health, Wellness and Body Appreciation is encouraged to contact Engelhardt at jengelha@calpoly.edu.

CSU defers fees for grant students

Chris Jagger

MUSTANG DAILY

Cal Poly and the rest of the CSU system has decided to postpone payment of spring term fees for all students facing delayed grants from the California Student Aid Commission (CSAC).

Since California lawmakers are currently unable to agree on a budget, the CSU system is not receiving the necessary cash flow to cover all students receiving Cal Grants A and B. These grants provide funds to low-income students to help with tuition and other expenses.

In order to receive these grants, students must meet eligibility requirements. Some of these requirements include having a family income and assets below a certain number. Communication sophomore Torera Rant, a communication specialist at the CSU office of Public Relations, the CSU system is doing its part to help these low-income students.

"We are going ahead and delaying fees so that students do not have to drop out of school, because many students are dependent on these grants," Rant said. "We are essentially waiting for the state to figure out its budget.

Recession rakes up more layoff victims

Jeannine Aversa

ASSOCIATED PRESS

WASHINGTON (AP) — The recession is killing jobs at an alarming pace, with tens of thousands of new layoffs announced Monday by some of the biggest names in American business — Pfizer, Caterpillar and Home Depot.

More pink slips, pay freezes and other hints are expected to slam workers in the months ahead as companies desperately look for ways to survive.

"We're just seeing the tip of the iceberg — the big firms," said Rebecca Braun, economist at John Hancock Financial Services. "There's certainly other firms beneath the surface that will lay off workers as quickly or even quicker.

Looking ahead, economists predicted a net loss of at least 2 million jobs — possibly more — this year even if President Barack Obama's $255 billion package of increased government spending and tax cuts is enacted. Last year, the economy lost a net 2.6 million jobs, the most since 1945, though the labor force has grown significantly since then.

The unemployment rate, now at a 16-year high of 7.2 percent, could hit 10 percent or higher later this year or early next year, under some analysts' projections.

Obama called on Congress Monday to speedily enact his recovery plan, warning that the nation can't afford "distractions" or "delay."

With the recession expected to drag on through much of this year, more damage will be inflicted on both companies and workers.

The mounting toll was visible Monday as roughly 40,000 more U.S. workers got the grim news.

see Economy, page 2

Caterpillar Inc.'s fourth-quarter profit dropped 32 percent as the global economic slowdown sapped demand for heavy equipment, forcing the company to lower its 2009 profit expectations and make further job cuts that will ultimately wipe out 20,000 positions.
Economy
continued from page 1

Pharmaceutical giant Pfizer Inc., which is buying rival drug-maker Wyeth in a $68 billion deal, and Sprint Nextel Corp., the country's third-largest wireless provider, said they each will slash 1,500 jobs.

Home Depot Inc., the biggest home improvement retailer in the U.S., will get rid of 7,000 jobs, and General Motors Corp. said it will cut 2,000 jobs at plants in Michigan and Ohio because of slow sales.

"We are seeing no improvement in labor market conditions," said Sal Guatieri, senior economist at BMO Capital Markets Economics. "This year could be as bad as last year in terms of layoffs.

In response to deteriorating business conditions, Caterpillar Inc., the world's largest maker of mining and construction equipment, disclosed nearly 20,000 job cuts, most of which already have been made. They include 5,000 new layoffs of white collar workers, which will occur globally by the end of March.

Earlier actions included the elimination of 2,200 Caterpillar workers through a buyout offer announced in December, the termination of about 8,000 contract and temp agency workers, and the reduction of 4,000 full-time factory workers through layoffs and buyouts.

Home Depot Inc. plans to eliminate 7,000 jobs while closing four dozen stores under its smaller home improvement brands as the recession continues to batter the nation's housing market. Most of the cuts affect workers at Home Depot's 34 Expo Design Centers. Those stores will close in the next two months.

**BELFLOWER, Calif.** (AP) — A woman has given birth to eight babies in a hospital south of Los Angeles, the world’s second live-born set of octuplets.

Dr. Karen Maples told KCAL- TV that the babies were born Monday at Kaiser Permanente and were “doing quite well.”

The hospital says the mother, who asked not to be identified, gave birth to six girls and two boys weighing between 2.8 pounds and 3.4 pounds.

**SAN JOSE, Calif. (AP)** — A Stanford University law school graduate has pleaded guilty to a tax charge for income she earned while working as a high-priced prostitute.

Thirty-five-year-old Cristina Warthen admitted in San Jose federal court Monday that she failed to pay taxes on nearly $82,000 earned in 2003 as an escort. She repeated under the stage name “Brazil” and ran the Web site, TouchBrazili.net.

Warthen admitted in her plea agreement that she exchanged sexual favors for money while visiting customers across the country.

Authorities seized $61,000 from Warthen’s safe deposit box in January 2004. Later that year, she married David Warthen, co-founder of the online search engine, Ask.com.

**NEW ORLEANS (AP)** — A multimillion-dollar budget hole is forcing New Orleans to scale back rigorous cleaning in the city’s French Quarter.

Before Hurricane Katrina, it wasn’t unusual for French Quarter streets to be lined and floor-scrubbed after a night’s partying. But the scrubbing began after Katrina has helped önce visitors to the crucial tourism area.

Mayor Ray Nagin said Monday the city is suspending mechanized street sweeping and a service in which a truck sprays water to clear garbage and other debris. Other services including pressure washing and manual street cleaning will continue.

**National**

**LINCOLN, Neb. (AP)** — Five people imprisoned for the 1965 rape and murder of a 68-year-old woman were pardoned Monday, two months after investigators said DNA evidence proved they were innocent.

In all, six were convicted in the death of Helen Wilson of Beatrice. Investigators had described a gruesome crime scene in which Wilson was held down and napked in front of a group of people. Her hands were bound, and she died of suffocation.

Assistant Attorney General Corey O’Brien told the parole board Monday that only one man committed the crime.

**BAGHDAD (AP)** — Iraq’s prime minister said Monday he believes the U.S. will withdraw its troops more quickly than the three-year timeline set down in a U.S.-Iraq security agreement. The U.S., meanwhile, suffered its biggest single loss of life in months when two helicopters crashed, killing four service members.

An agreement negotiated under former President George W. Bush’s administration called for U.S. combat troops to withdraw from Baghdad and other cities by the end of June, with all American forces out of the country by the end of 2011.

**International**

**PRETORIA, South Africa (AP)** — Southern African leaders ended an all-night summit on forming a unity government in Zimbabwe but the regional leaders and representatives of Zimbabwe’s opposition disagreed on the results.

In a communiqué early Tuesday, the main regional grouping said it has decided to swear in a prime minister, the post the opposition leader is to hold in the unity government, on Feb. 11, after passing a Constitutional amendment creating the post on Feb. 5.

South African President Kgalema Motlanthe, who is the current chairman of the regional grouping, told reporters after the communiqué was read that the opposition had agreed to that formula.
Carter claims Israel will be in danger without Palestine state

Former U.S. President Jimmy Carter is seen during an interview in New York, Monday. (DIANE BONDAREFF/ASSOCIATED PRESS)

Peter James Spilsmann

Former President Jimmy Carter said Monday that Israel will face a "catastrophe" unless it revises the Mideast peace process and establishes an independent Palestinian state.

In an interview with The Associated Press, he said Arabs will outnumber Jews in the Holy Land in the foreseeable future.

"If we look toward a one-state solution, which seems inexorable — it would be a catastrophe for Israel, because there would be only three options in that case," Carter said.

One would be to expel large numbers of Palestinians, which he said would amount to "ethnic cleansing."

The second would be to deprive the Palestinians of equal voting rights, which he said would amount to "apartheid."

The third would be to give the Palestinians equal voting rights, and therefore the majority, he said.

"And you would no longer have a Jewish state," Carter said.

"The basic decisions would be made by the Palestinians, who would almost very likely vote in a bloc, whereas you would have some sharp divisions among the Israelis, because the Israelis always have different points of view."

Carter spoke to The Associated Press as his new book, "We Can Have Peace in the Holy Land," was released.

His working on Israel's options was not new. His 2006 book, "Palestine: Peace Not Apartheid," provoked a hail of criticism, particularly from Jewish-Americans who felt it unfairly compared Israeli treatment of Arabs in the West Bank and Gaza to the legalized racial oppression that once existed in South Africa.

Carter still believes a two-state solution is the best option, with all of Israel's Arab neighbors recognizing its right to exist in peace, and Israel withdrawing from most of the land it captured in the 1967 Arab-Israeli War to create an independent Palestine.

Carter brokered the Camp David Accords between Israel and Egypt 30 years ago, and received the Nobel Peace Prize in 2002.

During Monday's interview, Carter also criticized the refusal of British Broadcasting Corp. and Rupert Murdoch's Sky News to broadcast a charity appeal to help Palestinian victims in Gaza.

"The two major broadcasters maintain they must protect their journalistic impartiality."

"When asked whether the appeal might lead to donations being co-opted by Gaza's ruling Hamas militants, Carter responded, "Not necessarily.""

"You have to remember that about 70 percent of the total population of Gaza are refugees, and their extreme concerns are administered by the United Nations High Commissioner for Refugees," Carter said.

"So the funds could be channelled through United Nations agencies, or through some other objective agencies, not through Hamas political leaders."

"We understand that the sight of hundreds of frozen tunas looks unique and interesting for foreign tourists," said Yoshiaki Takagi, deputy director of the market. "But they have to understand the Tsukiji market is a professional place, not an amusement park."

Pokemon KASHARA/ASSOCIATED PRESS

Frozen tunas at a morning auction are carried on a cart at Tsukiji fish market in Tokyo, Monday.

One of the most notorious recent cases was that of a two-year-old British tourist — caught on tape by a Japanese TV crew — who licked the head of a frozen tuna and put it in gift. Two others, also caught on video, rode around on a cart used by wholesalers. "Get out! Get out!" an irate market official shouted in English.

"Tuna is a very expensive fish," Takagi said.

Indonesian Muslims are no longer able to practice yoga

Robin McDowell

Muscis in Indonesia are banned from practicing yoga that contains Hindu rituals like chanting, the country's top Islamic body said Monday, echoing concerns by some religious groups elsewhere about its effect on their faiths.

Though not legally binding, most devout Muslims will likely adhere to the ruling because ignoring a fatwa, or religious decree, is considered a sin.

The decision in the world's most populous Muslim state follows similar edicts in Malaysia and Egypt as the ancient Indian exercise gained popularity worldwide in recent years.

Religious leaders in Indonesia are divided about its effect on Muslims in Indonesia are divided about its effect on Muslims.

"There is little or no spiritual element to it," she said. "There is nothing focusing on purely religious matters, not that."

"Yoga — a blend of physical and mental exercises aimed at integrating mind, body and spirit — has become so popular in the United States that many public schools have started offering it as part of their physical education program."

Golfers walk the fairway on the golf course at William Land Park in Sacramento, Calif., Wednesday.

Schwarzenegger wants to tax golf, auto repairs

Steve Lawrence

Golf course owners and some of their customers are teeing off on Gov. Arnold Schwarzenegger. So are veterinarians, auto mechanics and amusement park operators.

The Republican governor is proposing to extend California sales taxes to cover some services — rounds of golf, auto repairs, veterinary care, amusement park and sporting event admissions, as well as appliance repair and some of their customers.

"We're old and retired. We don't need any more taxes," said Fred Mayers, of Sacramento, as he played a round of golf recently at a public course in the state capital. "The only luxury we have is playing golf. They can't charge us any more."

California isn't the only state considering taxes on services to address its revenue shortfall. The Center on Budget and Policy Priorities predicts state budget deficits nationwide could reach $350 billion by 2011.

In New York, Gov. David Paterson has proposed taxes on taxi rides, movie tickets, concerts and sporting events and personal services such as haircuts, manicures and massages.

Utah Gov. Jon Huntsman has shelved a proposal to tax attorney and accounting services but promised to bring it back next year.

The plan to extend the state sales tax is among several proposals under consideration by Schwarzenegger and lawmakers as they try to reach a midyear budget fix. But it already has generated furious opposition from businesses that would be affected and some of their customers.

"We're old and retired. We don't need any more taxes," said Fred Mayers, of Sacramento, as he played a round of golf recently at a public course in the state capital. "The only luxury we have is playing golf. They can't charge us any more."

Justice. He has likened himself to the hero of a Frank Capra movie and a Wild West cowboy in the hands of a lynch mob. He said he sat there from thinking of Nelson Mandela, the Rev. Martin Luther King Jr. and Gandhi.

Blagojevich complained, among other things, that the trial is unfair because he was unable to call White House chief of staff Rahm Emanuel as a witness. Emanuel has said Blagojevich did nothing wrong when the two talked about Obama's Senate seat.

"I'm talking to Americans to let them know what's happening in the land of Lincoln," Blagojevich said during his media blitz. "If they can do this to a sitting governor, deny me to bring witnesses in to prove my innocence...they can do it to you."

Neither the prosecution nor the defense is allowed to summon any witnesses whose testimony might interfere with federal prosecutors' criminal case against Blagojevich. But Blagojevich has not asked to call any witnesses at all, and said he does not plan to participate in any trial.

"The suggestion that this is somehow unfair to the governor is the most self-serving, ludicrous statement I have ever heard in my life," state Sen. Matt Murphy, a Republican, said on "Good Morning America" during Blagojevich's appearance.

The impeachment case against Blagojevich also includes allegations he defied the Legislature, circumvented hiring laws and schemed to trade state contracts for campaign contributions.

In one of the most surprising interviews of the day, Blagojevich said he briefly considered naming Oprah Winfrey to the Senate.

Winfrey said she would have turned him down.

"I'm pretty amused by the whole thing," Winfrey told "The Gayle King Show" on Sirius XM Radio. "I think I could be senator, too. I'm just not interested."

-Associated Press writer Sara Kugler in New York, Deanna Bland in Chicago and Andrea Ziltowsk in Springfield this contributed report.
Help Wanted
STAYING IN TOWN THIS SUMMER AND LOOKING FOR A GREAT JOB ON CAMPUS? Conference and Event Planning is Hiring 10-20 staff for summer conference season. Paid training begins in late April. Seeking hardworking, responsible and positive individuals who enjoy working in a fun, fast-paced team setting! Customer service and cashier experience preferred. sonated with consulting engineering, of the marketplace and the desire of through construction documents. We are constantly developing new areas of expertise to meet the needs of the marketplace and the desire of our employees to be challenged in their work. We seek out challenging, complex projects that require a creative and innovative approach to their design. Our designs have won local and national engineering awards, and we are committed to excellence.

Agilent Technologies

Agilent Technologies is the world's premier measurement company. Agilent provides core electronic and bio-analytical measurement tools to advance the electronics, communications, life science research, environmental and petrochemical industries. About two-thirds of Agilent's sales and support capabilities around the globe serve customers in these areas. Agilent provides core electronic and bio-analytical measurement tools to advance the electronics, communications, life science research, environmental and petrochemical industries. About two-thirds of Agilent's sales and support capabilities around the globe serve customers in these areas.

AGILENT-BUSCH Companies

We Tap Talent. As the world's leading manufacturer and marketer of semiconductor manufacturing equipment, we attract and develop the finest people to serve our clients. From engineers to scientists, we are committed to getting the most out of people and providing a work environment that promotes individual achievement, creativity, and engineering excellence.

The Austin Company

The Austin Company is a full-service architectural, engineering and construction services firm. Austin, a DBIA charter member, is a well recognized and leading Architectural / Engineering, Design-Build, and Construction firm. Austin serves a wide range of clients, focusing on projects in such industries as: aviation and aerospace, education, entertainment and broadcasting, communications / information technology, government, pharmaceutical / biotechnology / medical products, publishing, and research and development, as examples. Austin's professional staff includes an interdisciplinary team of architects, structural, mechanical, and electrical engineers, as well as project and construction managers. Austin is a member of the U.S. Green Building Council and has personnel accredited in the EEDM facility certification program. Austin is a part of the worldwide Kajima organization – ranked by ENR as one of the world's largest design and construction organizations – operating in over twenty countries. Austin's Irvine Office is proud to be home to a number of Cal Poly graduates from multiple majors, and actively recruits from Cal Poly each year.

Brinderson

Brinderson is an integrated professional service company offering engineering, construction and maintenance to a broad range of energy related industries including petrochemicals, power generation, data centers, manufacturing, alternative fuels and renewable energy. Founded in 1965, the company has been ranked among the top contractors nation­ally for over two decades by Engineering News-Record. Safety is the number one priority at Brinderson and we take it very seriously.

Brodace Communications

Located in San Jose, CA, the heart of Silicon Valley, Brodace Communications delivers the industry's leading platforms and solutions for intelligent connecting, managing, and optimizing IT resources in shared storage environments. In a relatively short period of time, Brodace has emerged as the undisputed leader in storage area networking (SAN). Brodace offers our employees industry competitive salary, matching 401(k) plan, comprehensive health coverage, paid time off and holidays, tuition assistance, employee stock purchase plan and are supportive of your professional growth and development.

Brown and Caldwell

Headquartered in Walnut Creek, Calif., Brown and Caldwell is a full-service environmental engineering and consulting firm with 45 offices and 1,500+ professionals across the country. For more than 60 years, our creative designs and progressive solutions have helped some of the most challenging environmental obstacles. We've built a reputation for collaborating with clients, adding value through innovative and build­ing relationships that last.

Central Intelligence Agency

The Central Intelligence Agency (CIA) is an independent US Government agency whose mission is to collect, analyze, evaluate, and disseminate foreign intelligence to assist the president and senior US government policymakers in making decisions relating to national sec­urity. We seek motivated men and women from a variety of academic backgrounds to join our workforce as co-ops and full-time employees.

The Clorox Company

The Clorox Company is a leading manufacturer and marketer of consumer products with fiscal year 2008 revenues of $5.3 billion. Clorox markets some of consumers' most trusted and recognized brand names. Founded in 1986, The Clorox Company Foundation has awarded cash grants totaling more than $75.4 million to nonprofit or­ganizations, schools and colleges. In fiscal 2008 alone, the foundation announced 47 grants totaling $5.3 million. For more in­formation about Clorox, visit www.TheCloroxCompany.com.

Consolidated Graphics

Consolidated Graphics (CGX) is North America's leading general commercial printing company. With 70 printing facilities, 12 fulfillment and 2 technology centers strategi­cally located across 27 states and in Canada, we offer an unmatched geographic footprint with extensive capabilities supported by an unparalleled level of convenience, efficiency and service.

Communications & Power Industries, Inc.

CPI is a world leader in the de­velopment and manufacture of Mi­crowave Vacuum Electron Devices (MVEDs), which are devices that amplify microwaves to high power levels for use in radar, communica­tions, television broadcast, medical treatment, scientific research and industrial processes. CPI is a publi­cally traded company located in Palo Alto, California, near Stanford Uni­versity. With a history of innovation, technology leadership, reliability and product/service excellence, CPI is a market share leader in its five largest mar­kets.

nificant, we focus on four main cardiovascular state: heart valve disease, coronary artery disease, peripheral artery disease and congestive heart failure. We leverage our design, development and marketing expertise through our main product categories: CardioSurgic, Critical Care, Vascular and Perfusion. Our global brands, which are sold in approximately 100 countries, include Carpenter-Edwards, Cosgrove- Edwards, Durall, Fogarty, Research Medical, St. Francis and Swann-Gan.

EMC Corporation
EMC Corporation is the world leader in products, services, and solutions for information management and storage. We are a trusted provider of information infrastructure, helping organizations of every size around the world keep digital information protected, secure, and continuously available. With 38,000 people worldwide and four straight years of double-digit revenue growth, we are among the 10 most valuable IT product companies in the world. EMC is the 6th largest software company in the world, specializing in Security, Virtualization, Storage Management, Content Management, and Network Management.

Enterprise
We are dedicated to creating your own start. Of mastering skills that help you take ownership of your future. So, yes, you never dreamed of working at Enterprise. But we can make your dreams a reality. As a Management Trainee at Enterprise, you'll learn to run a profit center, manage people and grow your own fast-paced business. You'll enjoy big earning potential, with performance-based promotion that many MBAs would envy. Plus you'll find great opportunities, fun people and a $13.1 billion company recognized as one of America's best places to work. It's your personal enterprise. And it starts today. The chance to run your own business and share in the profit you helped to create: Highly marketable skills and training in business, management, sales and service. Rapid promotion based on performance.

Epic Systems Corporation
Improving healthcare is one of the biggest challenges of our time. Epic rises to this challenge by creating award-winning software that helps healthcare organizations provide better care, reduce costs, and save lives. We continue to be at the forefront of real-time, patient record interoperability and are leading the revolution in giving patients access to their own electronic medical records.

Factenal Company
Factenal Company is an industrial and construction distributor with over 2,100 locations in the United States and Internationally. Factenal is a fast-growing company with great career opportunities in sales and sales management with room for advancement.

Federal Insurance
For over a century, Federal Insurance Companies has provided peace of mind to business owners through value-added insurance protection. Federal's home office is located in Southfield, Michigan, with sales offices in California and Florida. Federal's more than 2,600 employees and operates in 48 states and the District of Columbia. Nearly 400 trade associations and industry organizations recommend one or more of Federal's products.

Fluor Corporation
Fluor Corporation is one of the world's largest publicly owned engineering, procurement, construction and maintenance services organizations. Rated as one of the world's safest contractors, Fluor's objective is to develop, execute, and maintain projects on schedule, within budget, and with safety excellence. Fluor maintains offices with over 30,000 total employees internationally, in more than 35 countries. Fluor is a FORTUNE 500 company. Over the past six years, Fluor has ranked No. 1 for four times on FORTUNE magazine's America's Most Admired Companies list in the Engineering Construction.

FourniFactor
FourniFactor is the leader in advanced wafer probe card, which are used by semiconductor manufacturers to electrically test integrated circuits (IC's) while they are still on the wafer. The company's wafer sort, burn-in and device performance testing products move IC's testing and stream from post-packaging to the wafer level, enabling semiconductor manufacturers to bring next generation devices to the marketplace faster than ever reducing their overall cost of goods and improving their yields.

George B. Woodcock & Co.
George B. Woodcock has been engineering, designing, manufacturing and supplying packaging solutions since 1945. GBW creates award-winning packaging solutions, product protection, loss reduction and customer satisfaction through a hard-working group of packaging professionals. Well-known in the industry, George B. Woodcock supplies custom corrugated cartons, molded/fabricated boxes, customized Point-of-Purchase display, or any other form of packaging a customer would need. Our design lab and drop-test lab give us an innovative edge in our exciting industry.

Granite Construction Inc.
Granite Construction Inc. is an American general contractor and is a member of a group of closely held companies, one of the nation's largest heavy civil contractors and construction materials producers. Each year in a row Granite was named to Fortune's "100 Best Companies to Work For." Still No. 6 overall on the list that was published in Fortune Magazine. Granite Construction Inc. is a national provider of industrial and commercial construction, facilities management and a Drug-Free Workplace.

HNTB Architects, Engineers & Planners
With nearly 100 years of profitable growth, HNTB is one of the most prominent design and planning firms in the nation. The three operating companies of HNTB Companies include HNTB Corporation, a transportation, engineering and construction management firm; HNTB Architecture Inc., whose design professionals provide structural design services; and HNTB Federal Services Corporation, which provides federal-sector operations and design services.

Intuit
Intuit is the industry leader for 20 years, and best known for developing products including Quicken, QuickBooks and Turbo Tax, Intuit transforms business and financial management for small businesses, accounting professionals and consumers. The company's mission is to create new ways to manage personal and small business finances that are more powerful, easier to use and more affordable. Customers cannot imagine going back to the old way.

ISEC
ISEC is a prime trades contractor and subcontractor for specialty building interiors and equipment. We provide planning and manufacturing of architectural woodwork, ornamental metals, building specialties, fireproofing, hardware and prefabricated casework.

LEVEL Studios
LEVEL Studios is an independent digital agency that amplifies global brands by innovating across desktop, web and mobile environments. Founded in 1995 as Web Associates, the agency now operates through a family of companies specializing in user experience, digital media and application development.

Lincoln Electric Company
The Lincoln Electric Company is the world leader in the design, development and manufacture of arc welding products, robotic welding systems, plasma and oxyfuel cutting systems and other specialized welding equipment. As the welding experts, Lincoln products are manufactured in 37 manufacturing plants and facilities in 19 countries and worldwide network of distributors and sales offices covering more than 160 countries. The Lincoln Electric Internship/Co-Op program exposes you to the wealth of experiences and knowledge of our elite class of professionals. Our program allows you the opportunity to have meaningful and challenging work assignments, which will complement the knowledge that you're

The Bold Company
The Bold Company consists of three divisions: Oscar J. Boldt Construction, Boldt Consulting-Services, and Boldt Technical Services. Founded in 1989, they are firmly grounded by the values of honesty, fairness, hard work, performance and a love of what we do. Boldt provides many construction services to the healthcare, institutional, renewable energy, commercial, and industrial markets.

Boston Scientific
For more than 25 years, Boston Scientific has been a leader in the development of less-invasive medical technology providing a broad and deep portfolio of innovative products, technologies and services across a wide range of medical specialties. These less-invasive medical technologies range from major surgery to less-invasive procedures and other medical procedures that are typically traumatic to the body. In less-invasive procedures, devices are usually inserted into the body through small natural openings or small incisions and can be guided to most areas of the anatomy to diagnose and treat a number of range of medical problems.

Cisco Systems, Inc.
Cisco is the worldwide leader in networking that transforms how people, companies and countries work, communicate, and collaborate. Since 1984, Cisco has led in the innovation of IP-based networking technologies, including routing, switching, security, Telepresence, unified communications, video, and wireless. The company's responsible business practices help ensure accountability, business sustainability, and environmentally conscious operations and products.

Crittfield Mechanical, Inc.
After more than 30 years, Crittfield Mechanical, Inc. (CMI) remains one of the finest mechanical contractors in Northern California, specializing in the design, fabrication and installation of heating, ventilating, air conditioning, plumbing & process piping systems. Joe Crittfield, his sons and a team of professionals have earned CMI a well-deserved reputation for excellence. Regardless of the application—multi-story office buildings, hotels, data centers, hospitals, LEED buildings and more—CMI is known for quality workmanship, timely project completion and budget consciousness. Our employees welcome the opportunity to participate in a concerted team effort with other trades involved in the design and construction process. We believe this team philosophy results in increased productivity and quality. We are dedicated to recruiting and training the finest engineers. As a result, CMI's team of 45 graduates and experienced engineers includes 19 registered Professional Engineers. CMI has been Accredited Professionals. All engineers are equipped with the latest computerized estimating software for Title 24 calculations, cooling duct calculations and computer-aided design programs to offer our customers innovative design solutions.

E&J Gallo Winery
E&J Gallo Winery, the largest producer of wine in the world, has a World of Difference. Our employees welcome the opportunity to participate in a concerted team effort with other trades involved in the design and construction process. We believe this team philosophy results in increased productivity and quality. We are dedicated to recruiting and training the finest engineers. As a result, CMI's team of 45 graduates and experienced engineers includes 19 registered Professional Engineers. CMI has been

Frito-Lay North America
Frito-Lay North America is a leader in the fast food products with production facilities in 34 locations throughout North America. Frito-Lay produces some of your favorites, including Fritos, Tostitos, Fritos, Rold Gold, and Tostitos.

Gallo Sales Company
Gallo Sales Company is the Northern California distributor for E&J Gallo Winery, the largest producer of wine in the world. The Winery's annual sales exceed $1.4 billion, expanding internationally into over 97 countries. Founded in 1933 by Ernest and Julio Gallo, it is still a privately owned and operated family corporation with a commitment to excellence in every aspect of its business. The Gallo family is dedicated to both building their brands and the California wine industry. By focusing in attention on the future rather than on past successes, it has been able to capitalize on opportunities despite uncertainty, risk, and great competitive odds. With the Winery's current organizational resources, including exceptionally dedicated and talented employees, world class vineyards and winery facilities, a new state-of-the-art research facility, a growing international marketing and distribution network, label design, point-of-sale, and much more, Gallo is in a very favorable competitive position.

Fort Dearborn
Fort Dearborn is a leading provider of high impact, decorative labels for the high velocity consumer goods markets. We supply labels to top Fortune 500 companies such as Pepsi, Kraft, Unilever and Del Monte.

Foster Farms
Foster Farms has been a family-owned and operated company for four generations. Hilmar Cheese Company
Hilmar Cheese Company is dedicated to the design, engineering, and construction of dairy and other food facilities. Our unique single-source, design-build approach provides customers with the ability to determine the project scope, the project schedule, and the project budget without having to involve multiple engineering or construction organizations. Our team of experienced professionals is dedicated to providing our customers innovative design solutions.

Bae Systems
Bae Systems, one of the premier global defense and aerospace company delivering a full range of products and services for air, land and naval forces, as well as advanced electronics, information technology solutions and customer support services.
Directory continued from page 13

traded company from FMC Technologies August 1, 2008. Corporate headquarters are located in Chicago, Illinois. The company includes both the FoodTech division as well as Aerotech. The interviewing division at Cal Poly is the following: BJT Food Tech Camning division is a global build to order food sterilization and packaging manufacturing company with it’s headquarters in Malda.

Kendall-Jackson Wine Estates

Majestic Fine Wines is the national sales division for Kendall Jackson Wine Estates. Our company represents over 30 wineries from California, Italy, France, Australia and Chile with sales over 5 million cases. In 2006 we were ranked by Wine Business as the No. 9 company in U.S. wine sales.

L-3 Communications

L-3 Communications Electron Technologies, Inc. is a leading provider of high-reliability products to space and defense customers. For more than 45 years we have been recognized as the industry’s foremost manufacturer of high-power radio frequency amplifiers for satellite communications and radar applications. We are a major supplier of advanced technologies for satellite communications and radar applications, including signal-amplifying traveling wave tubes, high-voltage power supplies, and fully-integrated linearized traveling wave tube amplifiers.

Lawrence Livermore National Laboratory

The Laboratory's workforce is motivated by the opportunity to advance science and technology to meet important national needs. Our multidisciplinary research and development are directed toward the Department of Energy's (DOE) mission areas: national security, science and technology, bioscience and emerging issues related to energy resources and environmental management.

Lockheed Martin

Lockheed Martin is a highly diversified $39.6 billion advanced technology company and the strategic leader in the aerospace industry with major positions in information systems, software development, space, launch vehicles, aeronautics, electronics, environmental services, and energy programs.

Maxim Integrated Products

At the heart of any electronics product is a digital core that interacts with people, with the physical world, with its power sources, and with other digital systems. Maxim is a worldwide leader in the design, development, and manufacture of analog, mixed-signal, high-frequency, and digital circuits that enable all four of these key interactions. We serve approximately 39,000 customers worldwide.

Mazzetti & Associates

Founded in 1962, Mazzetti Nash Lepsy Burch is a full-service consulting and design firm focused on the engineered systems of buildings, including HVAC, plumbing, fire protection, process piping, telecommunications, lighting, and power systems. Apart from traditional design services, we provide consultation and support in facility planning, commissioning, energy management, and climate change consulting, medical equipment planning and a broad spectrum of low voltage and information technologies.

NAVAIR Weapons Division

The Naval Air Systems Command (NAVAIR) serves the nation and the Navy by providing advanced warfare technologies to American interests all over the world. In its quest to be the best, NAVAIR is always on the lookout for those willing to embark on an exciting new career.

NEC Electronics

Our state-of-the-art manufacturing facility, located in Roseville is one of the largest semiconductor manufacturing facilities in North America. Set on an impressive 75 acres, this facility achieves outstanding production yields and quality standards that are among the highest in the industry.

Pacific Scientific Energetic Materials Company

Pacific Scientific Energetic Materials Company, a Danaher company, is the industry leader in the creation, development, design and manufacture of tomorrow’s energetic mission critical technologies and solutions.

Parker Aerospace

Launched in 1918 and incorporated by S. L. Parker in 1938, the Ohio-based manufacturer of Parker Aerospace manufactured a line of tube fittings. The manufacturing grew into the production of valves used to control and regulate fluids and gases. Parker Hanniﬁt is the world’s leading diversified manufacturer of motion and control technologies & systems. There are 1,400 product lines for hydraulic, pneumatic and electro-mechanical applications in some 1,000 industrial and aerospace markets. The company employs more than 6,000 people in 48 countries around the world.

Tuesday, January 27, 2009
Poet and editor of nationally known Solo Café magazine, Glenna Luschei was the featured reader last Friday night at the first annual Winter Celebration Reading. The evening was a showcase of local poets reading works from Luschei’s publication as well as poems by the Plein Air Poets of San Luis Obispo. English professor and creative writing director Kevin Clark, also a poet, orchestrated the event, and described it as “one great poet after another,” with a talented lineup including San Luis Obispo County’s first poet laureate, Ray Clark Dickson, and 2003 laureate Kevin Patrick Sullivan to name a few.

Solo Café Press was created by Luschei some 45 years ago and she has been editing the poetry journal ever since. It was during a stay in South America that she came up with Solo Café as the name.

“Caffe solo means, in Spanish, coffee without any cream or sugar,” Luschei said. “I wanted my editorial policy to be straight and black and undamaged.”

She considers herself a lover of words in every language, and tries to incorporate a bilingual tone to her work. Her talent for writing was noticed early on by her mother, who told Luschei that she spoke in iambic pentameter when learning to talk. Growing up, though, she said that there was not as a large of an emphasis on creative writing as there is today.

“I have always tried to make up words and rhymes,” Luschei said. “I think words create a different way of looking at the world, so I like to play with them. As the years go on, I try and gain some mastery over language, which I think is hard to do.”

If mastery of language were difficult for Luschei, you would never know it. Her essays and other writings have been published in professional magazines and peer-reviewed journals around the world. Luschei’s publication as well as poems by the Plein Air Poets of San Luis Obispo were featured in the Print Club of America that President Obama has been reading for encouragement including Clark, and the night was complete for Luschei until he read his latest work for the crowd.

“I think most of the people on the Central Coast who know Clark have found that their own reputations have gone beyond the area because of the work Glenna has done,” Clark said. “She is an exemplar of poetry.”

Straight black and unadorned:
local poet keeps it simple

Glenna Luschei
SLO COUNTY DAILY

Poet and editor of nationally known Solo Café magazine, Glenna Luschei was the featured reader last Friday night at the first annual Winter Celebration Reading. The evening was a showcase of local poets reading works from Luschei’s publication as well as poems by the Plein Air Poets of San Luis Obispo. English professor and creative writing director Kevin Clark, also a poet, orchestrated the event, and described it as “one great poet after another,” with a talented lineup including San Luis Obispo County’s first poet laureate, Ray Clark Dickson, and 2003 laureate Kevin Patrick Sullivan to name a few.

Solo Café Press was created by Luschei some 45 years ago and she has been editing the poetry journal ever since. It was during a stay in South America that she came up with Solo Café as the name.

“Caffe solo means, in Spanish, coffee without any cream or sugar,” Luschei said. “I wanted my editorial policy to be straight and black and undamaged.”

She considers herself a lover of words in every language, and tries to incorporate a bilingual tone to her work. Her talent for writing was noticed early on by her mother, who told Luschei that she spoke in iambic pentameter when learning to talk. Growing up, though, she said that there was not as a large of an emphasis on creative writing as there is today.

“I have always tried to make up words and rhymes,” Luschei said. “I think words create a different way of looking at the world, so I like to play with them. As the years go on, I try and gain some mastery over language, which I think is hard to do.”

If mastery of language were difficult for Luschei, you would never know it. Her essays and other writings have been published in professional magazines and peer-reviewed journals around the world. Luschei’s publication as well as poems by the Plein Air Poets of San Luis Obispo were featured in the Print Club of America that President Obama has been reading for encouragement including Clark, and the night was complete for Luschei until he read his latest work for the crowd.

“I think most of the people on the Central Coast who know Clark have found that their own reputations have gone beyond the area because of the work Glenna has done,” Clark said. “She is an exemplar of poetry.”

‘Slumdog’ composer Rahman is the toast of India

Muneeya Naqvi
ASSOCIATED PRESS

NEW DELHI — The soaring “Slumdog Millionaire" soundtrack’s three Oscar nominations and Golden Globe award marked many Americans’ first exposure to the music of A.R. Rahman. But in his native India, the composer has been a national treasure for years.

The 43-year-old composer has been winning awards since he burst on the Bollywood music scene in the early 90s — blending styles rarely seen in mainstream Indian cinema.

Rahman has composed music for more than 150 Indian films, incorporating jazz, rock, Indian pop and Western classical music.

“He changed the entire concept of Indian film music,” said Subir Malik, another well-known Indian musician who described Rahman as “a very, very experimental guy.”

“He does crazy things and they still sound good. He manages to fit in the most unusual chord structures into mainstream Bollywood songs,” Malik said.

Rahman, who has a degree in Western classical music from the Trinity College of Music in London, experimented with reggae in his debut film, “Roja.”

His first taste of international recognition came in 2001 when British composer Andrew Lloyd Webber invited Rahman to compose the score for “Bombay Dreams.” Rahman also composed music for the stage adaptation of “Lord Of The Rings” that premiered in Canada in 2006 and London in 2007, but he remained relatively unknown in the United States.

That changed when he won the Golden Globe this month for best original soundtrack for Danny Boyle’s “Slumdog Millionaire.”

His first Oscar was for the song “Jai Ho” from “Slumdog Millionaire.” That last week he was nominated for three Oscars — best original score and two in the best original song section.

The film tells the story of Jamal Malik, a poor youth who becomes the champion of India’s “Who Wants To Be A Millionaire” television program as he searches for his lost love. Rahman’s catchy music seems to mirror the unyielding spirit of the Mumbai slums where the film is set.

The two Oscar-nominated songs follow his tradition of mixing globe-spanning styles. “Jai Ho” blends classic Indian pop with electronics and Beethoven-inspired drums.

“O Say” features eclectic British sensation M.I.A., who co-wrote the song with Rahman.

Rahman did not attend the Mumbai premiere of “Slumdog Millionaire.” He was already busy working on his next movie in his hometown, the southern Indian city of Chennai.

The composer, who is known to be some-what withdrawn, posted a note on his Web site thanking fans for their “unconditional love, good wishes, support and for believing in me through its thickest.”

“It is an amazing moment,” he told The Hindu newspaper after the Oscar nominations were announced Thursday.

Only two Indians have won at the Os-
"Sag Awards': More than handing out a few trophies

Frazier Moore

NEW YORK — It seems like we see our actor pals on awards shows as much as we do in the roles that got them there.

For instance, the stars of "30 Rock," who keep not only collecting trophies but also logging frequent flier miles with all those trips to Hollywood for awards shows, as much as we do in the roles that seemed like a throwback to the Golden Globes from the NBC comedy's New York home base.

Jane Krakowski accepts the award for outstanding performance by an ensemble in a comedy series for "30 Rock" at the 15th Annual Screen Actors Guild Awards on Sunday, Jan. 25, 2009, in Los Angeles.

Campus performance looks forward to a world without racial discrimination

Ashley Cusick

"Dismantling the Myth: Paper Work & Club Life. The Race to "Elaborate on" the Book," an event designed to evoke discussion, will take place tonight at 6 in Chaminade Auditorium.

The show's performers and co-writer Miles Gregore, Rafael Agudo and Alier Azabou are comedy and entertainment students who formed their original ethnically diverse band, a project with the hope of deconstructing the racial stereotypes in America.

According to them, the message of the show is the importance of viewing the world at one, united human race.

Associated Student Inc. program coordinator Michelle Curro said the show promised to be entertaining and full of energy.

"We not only had the performers bring out a range of very powerful emotions, but the message is just incredible," she said speaking of an earlier preview event.

"I went from being in deep thought to laughing hysterically with tears in my eyes. There is so much strength in every word. The message conveyed is very moving; it will really benefit the campus," Curro said.

In conjunction with the event, a public forum on race and ethnicity will be held at 11 a.m. tomorrow in the Performing Arts Center, Friends of the Arts. The forum is designed to further elucidate the use of stereotypical, racial, cultural terms of "race" and personal identity issues.

NSWUC has performed for over 10,000 people at IUPUI and the country.

"I would be thrilled if Cal Poly had an atmosphere that held something out of this show. Whether it is being able to laugh or be entertained, moral stories will educate students on the basis of racial stereotyping and how it can be dealt with," a campus representative said.

The event is free with Cal Poly I.D. cards and $10 for general admission.

because they have no regulation, no rules, no distinction between Hindu and Muslim.

As a musician, Rahman started as a keyboard player with several music composers before coming into his own, composing ad jingles and scores for television shows. In 1993, he was offered "Roja," a film by one of India's best known directors, Mani Ratnam. Rahman has gone on to sell more than 100 million albums, Indian films are almost entirely musicals, and he has composed for films in a dozen of languages. The Oscar nomination, his fans in India believe, will carry his sound to the rest of the world.

"We've always known that he's world class," said Supratik Sen, a Mumbai-based filmmaker. "Now the world is going to know as well."
For activist chef Alice Waters, food is change to believe in

Alice Waters, the executive chef and owner of Chez Panisse in Berkeley, Calif., looks over the produce at a farmer's market in Washington, Sunday, Jan. 18, 2009. Waters has been pushing for seasonal, local food since the '60s, but for the first time in a long time, she sees an ally in the White House.

"If you talk about a 'Victory Garden' on the White House lawn, a gesture both symbolic and practical, she's talked about it with first lady Michelle Obama, explaining that there was a garden at the executive mansion during World War II."

"At this economic moment, with such difficulty, we should be thinking about how we can feed people," Waters said. "And bringing jobs should include green farming."

From Waters' mouth, it's all so easy: Eat well. Take care mine and get out there," she said. "I had the feeling that everyone..." said. "It was a pleasure to everyone if they turn to the garden for "free" food and purchase ingredients wisely — a whole chicken to be used in several meals, not costly boneless chicken breasts."

The problem, she said, is that no one knows how to cook anymore. There's the Food Network, sure, but she thinks about feeding our children. Waters would like to teach everyone if they turn to the garden for "free" food and purchase ingredients wisely — a whole chicken to be used in several meals, not costly boneless chicken breasts.

"We need a WPA project that rebuilds our public space, not just the physical space but the public spirit," she said. "And bringing jobs should include green farming."

"It was a pleasure to have come together and celebrate poetry and honor it because it is in own story telling, and its own world. Everybody has a little of that in them and they can bring that out and enjoy it," she said.

"I adore her and feel privileged to be at the same podium," she said. "It's always so inspiring to hear...]"
Innovation Nation
Economic forces can bring about an environmental revolution

Economists predict that the current recession will come to an end around late July 2009 (with recovery effects lasting the rest of the year or longer), making it the longest period of economic downturn since the Great Depression.

The economic crisis will not only transform finance and business, but the way we think and behave. Then there’s the environmental crisis, and the realization that most of the institutions and systems that regulated our lives in the 20th century need to be reconfigured for the 21st century.

Over the next year, people around the world will continue to suffer from the recession’s devastating impact, and as a result, the ones who will suffer most are the ones who can least afford it. The Great Depression, and the recovery period that followed, irreversibly realigned the values of those who struggled through it, leaving its mark on the way they ran their families, spent their money and did their jobs. What legacy will this convergence of crises, both financial and environmental, leave on the psyches of today’s young workers and students? And what intelligent solutions will subsequently emerge?

When things are going well, it’s hard for most people to stir things up, to change their own lives, their jobs and their communities. Yet when times are hard, we might just be able to run with that startup idea we’ve always dreamed about, if for no other reason than the simple fact that there isn’t much to lose. For better or for worse, collective action for change often requires a period of collective disconnection. Lean times can arguably begin where innovation is strongest, more practical and effectively more sustainable from both a social and financial standpoint.

There are two main differences in social innovation during difficult financial times:

- venture capitalist Rob Katz writes, “First, for the need for true social innovation is never more acute than when things are not humming along in the global economy. Second, there is increased oversight on social innovators to be ruthless, efficient and profitable.” As Chuck Vest, the former president of M.I.T, said: “Innovation is the essence of our country.”
- Instead of innovating in superficial solutions that make people feel like they are winning, progress being made, now is the time to move for word selectively, favoring the ideas that will pay for themselves in the long run.

Economists have been watching the world struggle to come to terms with its new realities and recover from the downturn. The recession also showcases the resilience of and — and the leadership efforts for operating in — socially responsible investments. In a portfolio of microfinance institutions, which offers a little to a few percent rate of returns, would have been below market rate. Now, four to five percent looks very competitive. People who have been investing in microfinance institutions haven’t been losing money in the last six months, with other investors across the board have been watching their holdings drop. Microfinance offers an option for low-risk, medium-return investment that isn’t directly correlated with the financial world, and that kind of investment looks much smarter to prudent investors right now. To borrow a line from one of my favorite hip-hop groups, CNME: “I’m just trying to make a dollar out of what makes sense.”

At the World Economic Forum summit meeting a few weeks ago in Dubai, the dominant word were “change,” “reboot” and “transformation.” There was clear consensus on the need for fundamental change and for experimenting with new approaches to achieving it. As I’ve written before, I’m a huge Thich Nhat Hanh fan. Unlike Al Gore, Friedman is a distinctly different shade of green, a deeply practical thinker whose economic forces can usher in a revolution in environmental policy. He argues that systemic change simply requires showing the world that it needs green technology and letting pure economics do the rest. For Friedman, the systemic solution works and not just because of the environmental benefits, but because of the investments that follow.

The recession also provides us a reason to be hopeful in our own country. The recession is the global downturn is the solution to all problems. To put succinctly, innovation is now the only path to growth, prosperity, environmental sustainability, and national security for America. So tell me, what innovations do you hope to see spread and take hold as we recover from this recession?

LETTERS TO THE EDITOR
Without validation, hope is empty rhetoric

In response to letter to the editor, “Hope is Not All Empty Message,” "Hope" is entirely empty rhetoric if the reason for hope is not substantiated. Should we have hope that our future financial situation will be better than it is today? Sure we should, because we’ve seen it better in the past. It’s a substantiated fact that the economy is cyclical, it goes up and down, and it booms and busts. We can have hope that a better economy will come tomorrow because the economy has a track record of coming back.

Should we have hope that Obama can guide us to the promised land? Well, let’s look at his track record. One and a half years in the U.S. Senate (before announcing his bid for Presidency) — zeros pieces of a legislation written. Seven years in the Illinois State Senate — that state isn’t looking too good right now.

I’m not saying that he isn’t going to lead us to the promised land, I’m saying he hasn’t led anyone anywhere desirable before. He has never held a real job let alone created one, he has never held an executive position in government. He is unproven, plain and simple.

I hope he does a good job for our country’s sake, but until he provides us a reason to be hopeful in him other than him telling us to, the skeptical people will remain.

is often difficult to bring down … could go as high as the second round” — DraftHeadquarters.com's Shawne Kobel, Wednesday, a day after calling Barden "a stronger Plaxico Burress.”

• "Will be off the board during the first day of the draft" — Sports.com's Ed Thompson, who the morning of the game compared Barden’s leaping ability to Larry Fitzgerald’s.

• "By the end of the weekend (he'll) finish his metamorphosis from player-you-didn't-know to guy-your-team-needs … since rolling into Mobile … the only questions about Barden center around his potential.” — The Sporting News' Dave Curtis, who Friday named Barden his "player to watch.”

• "Created a buzz … Most Valuable Network Tennessee Titans writer Derek Perry, who wrote Friday that Barden drew comparisons to Marques Colston and Vincent Jackson, also FCS products — the latter of whom was even a Great West Conference Offensive Player of the Year, just like Barden

• "(Looked) like he (belonged)" at the practices, showing "more playing speed than advertised" — NFL.com's Pat Kirwan, who reiterated the Colston comparison Thursday.

• "Did a good job using his mansize frame to shield himself from defensive backs during the week … has the size and growth potential to help him up the draft boards between now and April" — Miami Dolphins' Nick Scufflet, who listed Barden as one of the game’s three "offensive standouts.”

**THUMBS DOWN**

• "Needs a lot of work … had issues getting separation from the more physical corners" — Re- gGFLFootball.com's Jeff Kisdon, Wednesday.

• "Showed little separation ability at Senior Bowl practice" — Rotoworld.com's summary of the analysis of NFL Network's Mike Mayock, Wednesday.

• "Size: might be all he’s got going for him, and he was “not impressive” — Dove-LionsAndTigers.blogspot.com, Wednesday.

• "Looks thin" — The Sporting News' Russ Lande, a former NFL scout, Thursday.

• "Struggling to get any kind of separation in and out of the breaks … lacks quickness and always forced to make plays with corners draped over him" — GryphonSports.blogspot.com's Wes Bunting, Thursday.

• "Had a nightmare of a week despite making a "good (19-yard) catch," adding a 1-yard reception and a "semantic" step on a slant pattern in the end zone during the game — CollegeFootballNews.com's Pete Florich, Saturday.

• "Saw his size unsurp him … had trouble with his release at the line of scrimmage … must refine his technique … to keep his stock from plummeting" — Seawave-kNatonblog.com, which listed Barden as one of four "near-shot" prospects after the game.

Some simply bought a ticket just to get a glimpse of the spectacle who not only measured in at a legitimate 6-foot-6 and 237 pounds, but with a wingspan of 33-3/4 inches and 10-5/9 hands — both the largest of the 12 receivers in Mobile.

The Sacramento Bee and the Palm Beach (Fla.) Post filed in during the week, each writing roughly 700-word spotlights on the man single out Wednesday as Pro Football Weekly's Prospect of the Day. Of course, it only matters what NFL teams think.

"He’s not wide-eyed here — he belongs," Cincinnati Bengals receivers coach Mike Shiftead told the Palm Beach Post. "The overused word on him between now and the draft will be ‘rare’ because people will say ‘small school’ and this that and whatever. He’s better than that.”

According to the report, even Miami Dolphins head of football operations Bill Parcells was among Dolphins staff interviewing Barden on Jan. 19.

The Baltimore Ravens, Packer-Chatters.com reported Friday, took particular interest in questioning Barden about the severity of his head injury suffered Wednesday, when he "banged his head against the ground,” keeping him out of practice Thursday.

Baltimore’s interest was corroborated Monday by the Carroll County (Md.) Times’ Aaron Wilson, who named Barden as one of a group of receivers Ravens scouts “spent a lot of time at the Senior Bowl evaluating and talking with.”

Wright reported the Tampa Bay Buccaneers, in addition to the Ravens, displayed interest in Barden on Jan. 20.

They’ll do some movie hopping before sitting back in their seats at the scouting combine in Indianapolis, where Barden will be among receivers observed Feb. 20.

But then again, what do they know? Steve Largent, Andre Reed, Charlie Joiner and John Stallworth went in the fourth round. Colston and Harold Carmichael were chosen in the seventh. Dwight Clark came off the board in the 10th.

Keenan McCardell was selected in the 12th (astute observers would note that’s a full five rounds deeper than today even allows). Just as it was then, drafting is not a science, no matter how much talent evaluators make it out to be — with supposedly objective boards, charts and standards of numbers.

It’s no more than a bunch of people with different opinions.

Sports designer: Kate Nickerson
The Mustangs gather to celebrate overtaking UC Davis in the final moments of Cal Poly’s 64-60 win on Saturday.

They’re a scary team for us to go on the road and take on but at the same time it’s great preparation for (Northridge).

—Faith Mimnaugh
Cal Poly head coach

The Cal Poly women’s basketball team hadn’t won two consecutive Big West Conference games this season until last weekend’s defeat of Pacific and UC Davis.

The Mustangs (11-7) now have finally found their stride in conference. Now they step away from the Big West for the final time this season as they take on Cal State Bakersfield at 7 p.m. in the Icardo Center.

Mimnaugh said that playing the Roadrunners while moving up to third place in the Big West standings. The Mustangs now trail UC Riverside by a 1 1/2 games for second place in the conference.

The top two seeds earn first round byes in the tournament in March.

The Roadrunners (13-7) are undefeated against Big West competition in four games this year and are in the third year of a four-year transition to the Division I level.

Cal State Bakersfield is lead by senior guard Chrystine Kryreckian who averages 18.3 points and 9.1 rebounds per game. Her scoring and rebounding averages would be among the top 60 in the nation if the Roadrunners were not classified as a transitioning team.

Not bad for a guard who is 5-6.6-7.

They’re underestimated,” Mimnaugh said of the Roadrunners. “They play a lot of guards. They penetrate the ball well and they shoot the three extremely well. They’re a scary team for us to go on the road and take on but at the same time it’s great preparation for what we’re going to face on Saturday against Northridge.

Cal Poly senior guard Lisa McBride will be among those drawing the tough assignment of slowing down Kryreckian. McBride was named Big West Player of the Week after she averaged 18.5 points and six rebounds in the Mustangs’ two victories.

The Mustangs continue to share the ball extremely well, including an astounding 25 assists on 26 field goals in Cal Poly’s 64-60 win over UC Davis on Saturday.

Mimnaugh explained that the team coming together off the court has helped how they play together on it.

“They really do enjoy each other,” Mimnaugh said of her team. “They spend a lot of time together. Their chemistry is good off the court, which is why their chemistry is so good on it.”

Cal Poly’s Keeler named Player of the Week

Cal Poly junior guard Lorenzo Keeler was named Big West Conference Player of the Week on Monday after averaging 22 points, four rebounds and 1.5 assists per game in the Mustangs’ two road victories over UC Davis and Pacific last week.

Keeler helped propel Cal Poly (5-12, 2-5 Big West Conference) to its first conference victory of the year over Pacific scoring a career-high 25 points in the Mustangs’ 76-60 win last Thursday.

He followed up that effort two nights later with a team-high 19 points, two rebounds and three assists against UC Davis. Keeler scored 15 points in the first half, helping to keep the Mustangs close.

Cal Poly would eventually go on a 23-5 run to overtime the Aggies in the final minutes of the game and held on for a 77-75 win.

Keeler shot 56.3 percent from the field during the week and made all 13 of his free throw attempts.

The Mustangs’ return to action at 6 p.m. Saturday when they host Cal State Northridge in a matchup nationally televised by Fox Sports Network Prime Ticket.
