Ag dean resigns to follow other interests

By Meredith Rehrman
Staff Writer

After 10 years as the dean of the School of Agriculture, Lark Carter has decided to step down from the position to pursue other professional interests. Respected by colleagues, teachers and students, Carter will leave a mark on the School of Agriculture for many years to come.

"Lark always wanted to make sure that he was doing what was best and in the best interest of the people who would be affected by it," said Vice President for Academic Affairs Robert Koob. "He is a very positive and extraordinarily caring man. With all of the budget cuts occurring, I think it made him feel uncomfortable because he cared so much about the feelings of all the people that he worked with." Koob said he accepted Carter’s resignation with regret, but added that Carter has done what deans are asked to do. "Deans are responsible for the broad progress of their school, and he’s done things on all kinds of fronts," he said. "He tried to shepherd the evolution of the program of teaching, worked with national committees to make sure that he was fully aware of what was going on in the nation. He also worked with the agribusiness community to understand their needs." See CARTER, page 7

P.E. department wrestles with loss of 73 sections

CSU budget ax hacks 155 Professional Studies classes from Poly’s fall schedule

By Barbara Barcellona
Staff Writer

The fact that many students were unable to enroll in overloaded physical education classes this quarter could leave Cal Poly students under the impression that this year will be all work and no play.

Since Sept. 28, 155 classes have been cut from the School of Professional Studies, under which P.E. falls, said Dean Harry J. Busselen. E elective classes were the first to be cut in all departments, including 73 from P.E.

Although all departments suffered course cuts this year, P.E. is an example of one of the hardest hit.

"P.E. just had more to cut," Busselen said.

All part-time staff members in the School of Professional Studies were laid off, including those from P.E., said Busselen. The full-time staff had the choice to take more students or not, he said.

Some instructors, like Deanne (Johnson) Vochatzer, think this option caused more stress. "I think it was a cop-out. It just put the burden on the teachers. We are not happy on this side of the campus," said Vochatzer, Cal Poly women’s track and cross country coach.

Classes are overloaded already and students lucky to get in are feeling cheated, Vochatzer said. Students understand the situation, she said, but they’re angry to be paying a big dollar for crowded conditions.

The focus in deciding what to cut was on maximizing the impact on students so they could graduate on time, Busselen said.

In light of the department’s $1.3 million reduction, Busselen said he thinks the school generally did a good job.

"I would have chosen other areas to reduce, but it was a good effort," he said.

Vochatzer, however, does not see it as a good effort.

"I’m sorry the university does not think the students’ well-being is important,” said Vochatzer. "I would have chosen other areas to reduce, but it was a good effort." She said the school generally did a good job.

"There is nothing better than seeing a healthy, active campus where students are letting off steam and pressure through sports," she said.

Although the quantity of services at Cal Poly has diminished, the quality has not, said Robert Koob. See CLASSES, page 12

Peace Corps visits Poly to share information, attract applicants

Volunteer positions available in 80 overseas countries

By Holly Vanderlaan
Staff Writer

Representatives and returned Peace Corps volunteers will be on campus today through Thursday. P.E. Fall Opportunities and Opportunities available in more than 80 different countries. The Peace Corps is seeking applicants with agriculture, business, math, science and foreign language backgrounds. Volunteers selected to teach overseas must have a bachelor’s degree, but a teaching certificate is not necessary. Completion of 10 to 15 semester units in math or science can enable an applicant to qualify.

"The Peace Corps is looking for qualified and motivated individuals in a variety of fields to provide technical assistance to developing countries," said Troy Flanagan, Peace Corps graduate coordinator.

Recruiting activities include an information booth in the University Union Plaza from 9 a.m. to 2:30 p.m. each day. Special seminars will also be held discussing assignments in the fields of math and science, as well as agriculture and forestry. Returned volunteers will talk about international issues on the final day.

Interviews will be held Oct. 28, but applications must be completed prior to interview (see chart). A Peace Corps assignment is a two-year, voluntary commitment with all expenses paid and language and cross-cultural training provided. A $5,400 cash "readjustment allowance" is also paid at the completion of service. To qualify, a volunteer must be a U.S. citizen and have a high school education. See PEACE CORPS, page 11

High pollutant levels in Greece pose danger

ATHENS, Greece (AP) - Air pollution surpassed danger levels in the capital Monday, and the government planned to consider temporarily banning cars from the city center.

A brown cloud, known by Athenians as "the Nefos," often forms over this capital of about four million people on warm, still days. On Monday, temperatures were in the 90s. The Environment Ministry said nitrogen dioxide levels were at 561 milligrams per cubic meter of air near the business district, while carbon monoxide hit 15.6. The danger levels for the two pollutants are 500 and 15 milligrams respectively.

Salvadoran colonel convicted of murder

SAN SALVADOR, El Salvador (AP) — The conviction of a Salvadoran colonel for ordering a massacre of Jesuit priests strikes a "the Nefos," often forms over this capital of about four million people on warm, still days. On Monday, temperatures were in the 90s. The Environment Ministry said nitrogen dioxide levels were at 561 milligrams per cubic meter of air near the business district, while carbon monoxide hit 15.6. The danger levels for the two pollutants are 500 and 15 milligrams respectively.

Sen. Bob Kerrey joins 1992 presidential race

LINCOLN, Neb. (AP) — Nebraska Sen. Bob Kerrey entered the 1992 presidential race today, offering himself as a bold new leader eager to reverse a decade of economic decline and "to lead America's fearless, restless voyage of generational progress."

The 48-year-old Vietnam war hero turned 20th-century politician said the hope his generation inherited from its parents had been dashed in the 1980s by shortsighted leaders worried more about recession than chronic problems he said gave today's children good reason to be pessimistic about their future.

Government settles in Exxon Valdez litigation

ANCHORAGE, Alaska (AP) — Exxon Corp. and the state and federal governments have agreed to a $1.025 billion settlement of multimillion-dollar litigation over the nation's biggest oil spill, Gov. Walter J. Hickel said today.

The new settlement slightly revises a $1 billion agreement that was rejected by a federal judge and Alaska legislators earlier this year.

The major change is a $150 million criminal fine, of which $25 million is suspended — that is $25 million more than in an earlier settlement.

Gov. Wilson vetoes job discrimination bill

SACRAMENTO, Calif. (AP) — Gov. Pete Wilson vetoed a bill outlawing job discrimination against homosexuals, declaring the measure would unduly burden employers.

Gay rights activists and others condemned Wilson of betraying the homosexual community with his veto Sunday. About 350 people protested with a march through West Hollywood.

The bill, in most instances, would have banned employment discrimination based on sexual orientation.

State report reveals declining dropout rate

SACRAMENTO (AP) — The California school dropout rate fell from 25 percent in 1986 to 20.1 percent in 1990, a state education report said Monday.

State school chief Bill Honig and education secretary Maureen DiMarco released California's National Education Goals Report to coincide with the first report of the National Education Goals Panel.

"California's educational community has made significant strides during the last decade, in spite of enormous challenges," said DiMarco, who heads Wilson's Child Development and Education Department.

For better or worse, faculty given new office building
Professors worried about location of new facility

By Brian Volk
Staff Writer

In the wake of a new year at Cal Poly, many students will notice they have a new place to meet with faculty advisers—the Faculty Offices East building.

The crescent-shaped, three-story addition to the campus opened its doors the first day of fall quarter. The building houses the School of Science and Mathematics faculty, an advising center and a health professions office.

The building, located off Poly View Drive between the Administration and Science buildings, took more than 6 1/2 years to complete from conception to completion, including 16 months of construction.

It contains more than 94 individual faculty offices and three department complexes, of which one houses the school's dean, Philip Bailey.

Close to 120 faculty and staff members began moving into the new building on Sept. 12, and many are still unpacking.

Peter Phillips, Poly's architectural coordinator, said most of the faculty are moving from the adjacent Science building and the rest from the Math and Home Economics, Fisher Science and Science North buildings.

Phillips said that the purpose of the building was to "embrace" the California State University concept of providing faculty with their own individual offices. Phillips said providing a larger supply of new office space will help relieve the crowded offices of the older buildings, some of which were three times over capacity.

Another reason for constructing the new office space was to move faculty out of the nearby trailers into individual offices in the older buildings, Phillips said.

He also said the need for four to six trailers should be eliminated when construction on the Engineering East building is completed. Phillips said getting rid of the inefficient temporary offices was one of the main reasons for the construction.

Chemistry professor David Keeling said he likes the newness of the place and the idea of having his own office, but said he is concerned that the location will not encourage enough student traffic. Unlike a lot of the older offices which were in the same building and in the direct path of many of the classes, the new office building might keep a significant number of students from visiting their advisers, he said.

Chemistry professor Jerry Haulis shares Keeling's concern that the building may isolate the student body. He recalled a time when Tenaya Hall was used as faculty office space for the

the state.
The early 19th century to justify
Californians. It is also lowering
tution is assaulting thousands of
dents on that subject that
the only aspect of the com-
correctly in the article; it was
levels of society as a whole.
Unfortunately, in the last few
years, the state spending
towards education have been nothing but
a nightmare.
There is a very sad form of
academic justice going on in this
state. Only the wealthy afford
private colleges, and as funding declines for
governmental advantage are
developing for the wealthy.
Thankfully, the unfair ad-
vantages for the rich brought on
by lack of education in
have not been mirrored in the
most recent state tax distrib-
ution decisions. Recent tax
breaks have been beneficial to
the poor. Still, with heavy cuts
to public education, the wealthy
have an enormous advantage to
getting a good education
in California.
Bachelor degrees are a dime
a dozen these days and it is ex-
tremely difficult to get accepted
into public graduate schools.
Large amounts of money are
needed to make something of
education through education in
California.
I can't believe that I am
the only dreamer at Cal Poly.
There is a good chance that as a Cal
Poly student or faculty member,
you are having dreams of your
future. Maybe you dream of put-
ting Pete Wilson in a suit of
armor and throwing him in a
pool of Liquid Drano. Maybe you
dream of stripping a chain saw
back and throwing him in the
middle of an Earth Fire! conv-
vention.
Let's tell Pete our dreams.

like the playing ROBBY with
Sarunas Marcius at some
point during his lifetime.

Reporter didn't tell full story

The September 27 opinion
article by Ted Holz was infor-
.. I am glad the title of the
course 'Irrigation Water
Management' was spelled
correctly in the article, it was the
only aspect of the com-
ments on that subject that
were accurate. Please note
the following:
1. Students touch a
sprinkler only once or twice in
the class.
2. The class does not even
consider yards or landscapes.
3. No student is "forced" to
take the class as part of a
general education require-
ment.
4. Irrigation accounts for
85% of California's diverted
water, regardless of one's political or
philosophical views regarding water use
and allocation within the
state, one cannot ignore the
tremendous economic and en-
vironmental impacts of irriga-
tion. One option involved people
is to learn more about the
technical aspects of irriga-
tion so that problems and
solutions can be discussed
with intelligent the class of
Irrigation Water Management
is a start in that direction.
The cartoon depicts a

typical agriculture professor
as a country bumpkin. Thos
of us in agriculture who have
Ph.D degrees, have several
years of advanced math which
only started with calculus,
and have traveled throughout
the U.S. and the world
making contributions and un-
derstanding different
societies, sense that some stu-
dents need a broader educa-
tion in order to avoid making
such incorrect generaliza-
tions.

I would like to thank Ted
Holz for demonstrating the
importance of broader general
education options for some
students at Cal Poly.

Charles M. Burt P.E. Ph.D
Agricultural Engineering
Class variety is good
Pardon me, Ted Holz, but would you mind looking at the Cal Poly catalog for a second? Did you see, under the GE/B F 2 requirements, any courses entitled Residential Household Equipment, Poultry Propagation, or Swine Waste Management? We all know that serious courses do exist at Cal Poly concerning availability of courses, however, it is a naive attempt to be sarcastic using classes such as "Polytechnic," definition: "or providing instruction in disciplines that exist. They do not exist!

It goes against any students to have an extra course during the five years or so parents spend paying for a "well-rounded education" here. "Poly" is a new abbréviation for "Polytechnic," definition: "or providing instruction in many scientific or technical subjects." (Webster). Being a technical school, this institution differs from the CSU system by requiring the GE/B P 2 section. It has every right to do so by name.

Have you ever taken a real F 2 class, such as Introductory Psychology? I admit, I was also turned off by the by name, yet my major demanded my enrollment in this course. It turned out to be one of the better classes I've had, dealing with important issues and solutions to emotional, social changes that can impact the everyday life of a person, including life and death, identity, discrimination, and much more. Don't knock it 'til you try it. This section of courses allows for that well-rounded education to develop, instead of graduating Cal Poly students as cloned, walking textbooks.

CARTER

From page 1 needs. He’s done what a good dean should do.

Since his early childhood growing up on a farm, agriculture has always been an important part of Carter’s life.

“I’ve always been associated with agriculture, so it’s natural that I would have a close affinity for it and understand a lot about it,” Carter said.

Carter carried his agricultural roots to Iowa State University, where he earned his bachelor’s degree in agricultural education in 1953. After serving as an intelligence officer in the U.S. Air Force, he returned to Iowa State to complete his master’s degree and received his doctorate in agronomy in 1960.

Carter began his academic career as a research associate at Iowa State University in 1959. In 1960 he accepted a position as assistant professor of agronomy at Montana State University. He later became associate dean of Agriculture and assistant director of the Montana Agricultural Experiment Station.

In 1980, he directed the United States Department of Agriculture Higher Education Programs Office in Washington, D.C.

Carter has been involved in many national agricultural and educational committees and boards, but according to Joette Eisengart, assistant to the dean of the School of Agriculture, students are his number-one priority.

“With every decision, there’s always the factor of how it will affect the students,” Eisengart said. “Basically, in all of his decision making, the human factor is really the most important part.”

Carter said that one of the philosophies of the dean of Agriculture’s office is that the administration aims to serve the students.

“I have always tried to keep an open door policy so that students can feel welcome to come in and talk to us here,” he said. “I have put a high priority on being involved with the students, especially with their co-curricular activities and counseling them whenever they come in. I think we have kept that open feeling that’s very important to students.”

Educating the masses

Thousands of students have graduated from programs that Carter has been involved in, whether at Iowa State, Montana State or Cal Poly.

Despite concerns over the budget process, Carter is optimistic about the future of the School of Agriculture.

“We have overcome problems where the budget process has been con­cerned, and we haven’t solved everything. But I think we have done our very best with the resources that are available,”

Carter has played a part in a myriad School of Agriculture projects and programs. Among the more satisfying things he said he has seen through the last 10 years are the professional development of faculty, changes in the curricula and the continu­ing commitment to a strong program.

One of his main goals when he first arrived was to improve the facilities associated with the School of Agriculture.

He has been instrumental in the establishment of the Agricultural Sciences building and dairy technology center, and the remodeling of the Erbert Agriculture building and the animal science arena.

“It isn’t a bad feeling that I leave with,” he said. “I’ve been in administration for almost 30 years and I’ve concluded that it’s time for me to step out of the administration at the university level and look into some other interests.

Plans for the future

Carter plans to resume his teaching career as a crop scientist and agronomist at Cal Poly.

“I considered myself to be a good teacher,” he said, “and I think I could be a very good teacher again. I would just need some time to prepare the classes I would teach.”

In addition, he will work on the revision of a textbook he coauthored, and he will look at the possibility of bringing Ag SAT to the Cal Poly campus.

Ag SAT is a teleconferencing program via satellite featuring leading agriculture professors from across the country.

Carter is also considering short-term job opportunities with the State department in Washington, D.C., the United States Department of Agriculture and FAO in Rome, with plans to return to Cal Poly after one or two years.

Fulfill all your communications requirements with one course.

**AT&T Student Saver Plus**

If you're looking for a simple way to handle all of your communications needs, there's one prerequisite: Join AT&T Student Saver Plus. You'll be able to get an entire line of products and services designed specifically to save college students time and money.

**Our Reach Out®**

Our **Reach Out®** could save you money, no matter when and where you call. Our **Call Manager®** will save you time by separating your long distance calls from your roommates' calls, for free. And the AT&T Calling Card makes it easy to call from almost anywhere to anywhere. And with AT&T, you'll always get the most reliable long distance service.

**1 HOUR FREE**

Plus, if you register for any of our services—or if you're already an AT&T customer—you'll get a free hour's worth of AT&T long distance calling.* As well as discounts on all kinds of things, all year round. So ask about AT&T Student Saver Plus. You'll find that for this communications course, we did our homework.

Join AT&T Student Saver Plus today. Call 1 800 654-0471 Ext. 4810.

*This service may not be available in residence halls on your campus. Valid for one hour of direct dial coast-to-coast night and weekend calling. Based on prices effective 2/16/91. Offer limited to one $6.25 AT&T Long Distance Certificate per student. Offer valid through June 30, 1992.
YOUR BROTHER ACHED THAT CLASS, YOU KNOW.
SORRY, YOU'RE SHORT TWO CREDITS.
WOULD YOU CARE TO SHARE THAT WITH THE REST OF THE CLASS?
YOU DON'T HAVE A DATE FOR HOMECOMING?
OF COURSE, 90% OF YOUR GRADE WILL DEPEND ON THE FINAL.
YOU HAVEN'T PICKED A MAJOR YET?
YOU CAN'T GO OUT LOOKING LIKE THAT!
WHAT'LL YOU BE DOING FIVE YEARS FROM NOW, HUH?
SHOW A LITTLE RESPECT!
ISN'T IT TIME YOU GOT SERIOUS?
WHERE WERE YOU TIL 4 IN THE MORNING?

JanSport quality collegiate apparel and backpacks are available at your college store.
PEACE CORPS

From page 1
U.S. citizen, in good health and at least 18 years old. There is no upper age limit.

Since the Peace Corps began in 1961, 150,000 volunteers have served overseas, not only in education, but also in agriculture, health, natural resources, conservation, business, skilled trades and other areas.

Currently there are about 8,500 people serving as volunteers. Former Peace Corps graduate coordinator "If I have a bunch of students making many of the faculty members shut their doors. He said the narrowness of the halls could also result in a quick build up of students waiting to see their advisers. If you have a bunch of students coming to see me around the same time, when are they going to sit? There is no place for them to wait or read notes," Housin said.

A popular opinion of the students who have seen or walked in the building is that they like the modern design and the improved accessibility of the offices.

"It's a clean choice for personal growth and professional growth," Carnathan said. "It gave me a personal understanding of what it's like in developing countries."

Koob, vice president of Academic Affairs.

"We are working very hard to keep the quality up," he said, but admitted that it is difficult to adjust to these large cuts in such a short time.

"The quality of the faculty and students is good, which is absolutely bizarre because we are so compacted," Bussen said. They tried not to destroy programs but the flexibility was taken away, he said.

Room for flexibility is scarce in the P.E. department, which has seen many of its class sections severely reduced. P.E., for example, now only has one jogging class, a few swimming classes and no golf.

The athletic department has not escaped the knife either, Vochatzer said. The track and cross country teams will have to do more fund-raisers this year in order to pay for uniforms, shoes and travel expenses, she said.

The School of Professional Studies is heading a $500,000 fund-raising campaign in hopes of regaining faculty positions by next January, said Bussen. Letters will be sent out to 13,000 alumni asking for donations. If that does not work, phone campaigning will follow, Bussen said.

If the budget cuts get worse, Cal Poly will continue to get smaller, said Koob.

Proportionately, Cal Poly is doing about the same in the number of courses cut compared to last year, said Debbie A. Arsenau, the university class scheduler. Last fall there were 3,810 sections and 315 were cancelled, this fall 3,650 sections were offered and 374 were cancelled, said Arsenau.

In the meantime, Cal Poly has closed spring admissions in order to lessen some of the congestion. If this does not help, Bussen said Cal Poly should consider switching to a semester system. This would enable more students to take more units and therefore graduate more quickly, he said.

If you're not recycling you're throwing it all away.
