Lower graduation rates blamed for fall quarter enrollment cuts

By Amy Koral Staff Writer

Police estimated that 1,000 to 2,000 people lined up on Santa Rosa and Monterey streets Sunday afternoon for a pro-life demonstration organized by the Christian Action Council.

The group of people, including about 50 churches in the county signed up for the event. Participants held signs which read "Abortion Kills Babies," "Silent Witness," and "Save Babies."

"It was a quiet and peaceful protest," said Monica Ortiz, editor and creator of the paper.

"The Cal Poly Spectrum is an ethnic newspaper geared towards problems and issues concerning minority students," said Monica Ortiz, editor and creator of the paper.

"The Cal Poly Spectrum is trying to inform and educate students, Ortiz said.

There is a lot of controversy on campus including issues on affirmative action and ethnic rights," she said.

The Cal Poly Spectrum plans to address issues on campus, such as student fears of prejudice in the dorms.

At present, there are three Hispanic students working on the paper, but anyone interested is invited to help, Ortiz said.

"The paper is for everyone," she said. "And, if people are open-minded, it can make a difference." Ortiz added that the $65 application fee for fall quarter has dropped 330 to 400 students from last fall quarter. As of Sept. 23, there were 17,443 students enrolled through CAPTUR.

Walter Mark, director of Institutional Studies, said this fall's reduced enrollment is due to lower graduation rates, not to budget cuts made last spring. Mark said admittance could be increased as graduation rates increase.

"We didn't know about the budget cuts before our enrollment targets were made," Mark said. "So, if we had already sent space reservations to students we could accommodate.

We know we were going to have some access problems, but we felt that most students would want to come anyway.

The target for new student enrollment for fall quarter has dropped 330 to 400 students from last fall quarter. As of Sept. 23, there were 17,443 students enrolled through CAPTUR.

Walter Mark, director of Institutional Studies, said this fall's reduced enrollment is due to lower graduation rates, not to budget cuts made last spring. Mark said admittance could be increased as graduation rates increase.

We know we were going to have some access problems, but we felt that most students would want to come anyway.

"Cal Poly can't shelter itself from the number of minority groups here," Ortiz said.

"Changes are inevitable," Andre agreed. "In my opinion, Cal Poly and San Luis Obispo are too ethnocentric and lily-white," she said. But see SPECTRUM, page 7.

The demonstration was not a protest against any specific political action, said CAC volunteer Dottie Johnson, but a protest against killing babies as a national event.

Tom Farrell, pastor at Atascadero Bible Church, said about 350 of his church members were participating.

"This is a human rights issue," he said.

"We need to support those who can't protect themselves. That's part of being a civilized society.

"There's also healing and forgiveness for those who have been wounded by abortion," he said.

"The baby is not the only victim," Johnson said.

"He was also there to send a positive message.

"There are also healing and forgiveness for those who have been wounded by abortion," he said.

Lower graduation rates blamed for fall quarter enrollment cuts

By Amy Alonso Staff Writer

Preliminary statistics show that total enrollment for fall quarter has dropped 330 to 400 students from last fall quarter. As of Sept. 23, there were 17,443 students enrolled through CAPTUR.

Walter Mark, director of Institutional Studies, said this fall’s reduced enrollment is due to lower graduation rates, not to budget cuts made last spring.

Mark said admittance could be increased as graduation rates increase.

"We didn't know about the budget cuts before our enrollment targets were made," Mark said. "So, if we had already sent space reservations to students we could accommodate.

We know we were going to have some access problems, but we felt that most students would want to come anyway.

"Cal Poly can't shelter itself from the number of minority groups here," Ortiz said.

"Changes are inevitable," Andre agreed. "In my opinion, Cal Poly and San Luis Obispo are too ethnocentric and lily-white," she said.

But see SPECTRUM, page 7.

There were 14,251 applications sent in this fall quarter. This was a decrease in applications from the first time in a decade, Mark said. He attributes this to the economy, bad public relations, and budget cuts.

"At present, there are three Hispanic students working on the paper, but anyone interested is invited to help," Ortiz said.

"The paper is for everyone," she said. "And, if people are open-minded, it can make a difference.

"Cal Poly can't shelter itself from the number of minority groups here," Ortiz said.

Gorbachev speaks out against anti-Semitism

MOSCOW (AP) — Breaking decades of silence by Soviet leaders, President Mikhail S. Gorbachev on Sunday sharply denounced hatred for Jews and bemoaned their exodus from the Soviet Union.

Gorbachev's statement was carried by the Tass news agency on Sunday and read on the radio that night before a ceremony marking the 50th anniversary of the Nazi massacre of thousands of Jews at Babi Yar, in a suburb of the Ukrainian capital of Kiev.

Gorbachev said persecution of Jews did not end in the Nazi era. In Soviet society today, he said, "social expressions of anti-Semitism have not been surmounted and certain reactionary circles are exploiting this fact."

Soviet and foreign Jewish leaders have been pressing Gorbachev for several years to speak out against anti-Semitism.

He may have finally decided to do so now because since the August coup, he has been free of the hard-liners who resisted condemnation of anti-Semitism. Gorbachev may also have wanted to please foreign Jewish leaders who could support his drive for international aid for his country's ailing economy.

Many of the 1.4 million Soviet Jews say they are harassed daily and fear a revival of pogroms aimed at Jews in Russia at the turn of the century.

FDA cannot keep bad products from public

WASHINGTON (AP) — Dangerously adulterated food, substandard medical devices and prescription drugs of dubious effectiveness are reaching consumers because the Food and Drug Administration's steps to stop them, says a House report.

"We're mystified about being in this position today, actually putting birds back out in the wild," said Michael Wallis, a member of the Condor Recovery project and curator of birds at the Los Angeles Zoo.

"Next year we're hoping for four to six birds to go out," Wallace said. "In four years or so, we're looking at having 15 to 20 birds out each year."

The last wild California condor — designated AC-9, for adult condor 9 — was captured on Sunday, Oct. 10, 1982, at the Los Angeles Zoo and released in 1987.

The finding, contained in a teacher's aide for his country's ailing economy.

They are harassed daily and fear a revival of pogroms aimed at Jews in Russia at the turn of the century.

Two captive condors will be freed this week

 LOS PADRES NATIONAL FOREST, Calif. (AP) — A $25 million program to save the endangered California condor from extinction will reach a milestone this week when two of the giant vultures will be freed from a zoo.

"We're mystified about being in this position today, actually putting birds back out in the wild," said Michael Wallis, a member of the Condor Recovery project and curator of birds at the Los Angeles Zoo.

"Next year we're hoping for four to six birds to go out," Wallace said. "In four years or so, we're looking at having 15 to 20 birds out each year."

Protesters granted new classroom site

By Holly Vanderlaan
Staff Writer

Just before the students of Bus Evans’ POLS 103, political inquiry, class protested poor classroom conditions to President Warren Baker last Tuesday, they found out that their class could move to a different room.

Evans learned shortly before class that the section would be relocated Thursday.

Despite knowing their problem would be solved, the protest to help out other students who had classes in the Business Administration and Education building’s room 214, said Geoff O’Quest, a political science junior.

They were successful.

All the classes in room 214 have been moved, said Debbie Arseneau, university class scheduler. In addition, most of the classes in nearby room 212 have been moved.

It was a big effort,” she said. “It was with the cooperation of a lot of departments, faculty and students.”

About 100 classes were shifted to accommodate the students, she said.

“We had to make vacant spaces,” Arseneau said. “There are not just empty rooms available on campus.”

Not all classes have been moved out of room 212 as of now.

“We are still trying to invent places,” she said.

Some of the morning classes have decided to stay because the heat is not as intense and because the foggy morning weather keep. See CLASSROOM, page 12.

HEALTH

From page 2

inviolable. We’re not.

According to the 1990 Annual Report of Fatal and Injury Minor Vehicle Accidents in California, 5,173 people were killed in auto accidents with 28 percent in the age group 15-24.

There were also 3,242 pedestrians between the ages of 15 to 24 killed or injured in California, by automobiles during 1990.

These statistics boil down to the fact that one person was killed every hour and 42 minutes, while one person was injured every minute and 26 seconds due to a traffic accident in California.

I know that statistics or a personal story may not convince you that it could happen to you, but it can.

A nearly fatal accident taught me how precious and fragile life can be.

No appointment, no project, no date (no matter how late you are) is worth your life or someone else’s.

Please, slow down, wear your seat belt and your motorcycle helmet.

OUR REPUTATION OPENS THE WORLD TO ENGINEERS

As a major worldwide engineering firm, The Ralph M. Parsons Company has established sound reputations for building some of the world’s most dynamic and challenging projects.

Our projects offer opportunities in a wide range of complex, diversity, and locations — from a major airport in Saudi Arabia to construction management for San-Augustine $5 Million Mita Rail Rapid Transit System.

And our concerns are just as global — from projects that benefit whole environmental yields such as the treatment of hazardous and nuclear waste products to studies on the Advanced Launch System for the first generation of large-payload space launch vehicles.

Since 1944, our projects have helped shape our world’s capabilities. In the process, we understand and utilize the people in engineering processes in the following disciplines: Chemical, Civil, Electrical, power options, Mechanical, Nuclear, Structural, and Process Control.

We offer a competitive salary and benefits package, including an Employee Stock Ownership Plan. On campus interviews are scheduled for Tuesday, October 15th, and an on-campus assessment on Wednesday, October 16th. See your Placement Office for details. The Ralph M. Parsons Company, 10 West Wilshire Street, Pasadena, California 91103.

Police don't force drunks to drive

I just don't understand the logic either. Specifically the logic of those who say that the police are trying to break up parties.

Do the police encourage drunk driving? I think not. I have yet to see a police officer, or a state trooper, break up a party. They have the duty to enforce laws everywhere else. I just don't understand the logic either. Specifically the laws of San Luis Obispo or any other city break up a party and force people to drive away drunk? Yes, police break up parties. Even the harmless ones. All parties must come to an end. But what does the law do? Does the law give the general public a right to control other people's parties? I think not. I think the law is there to protect the rights and safety of all people, not the people who so often throw parties and drive drunk.

All drunks to drive

But what was the plan of all those people who want to party without taking responsibility for their actions? To throw "I'm in a position to change the potential hazard." Ms. Lee, that's us. Mustang Daily offices are located in Graphic Arts Room 226, Cal Poly University San Luis Obispo, CA 93407. Mustangs sack, stomp on Antelopes, 66-3

By Neil Pascale
Editorial staff

He's back ... again.
Andres Washington, healthy again, sacked the visiting Antelope quarterback five times as the Mustangs punished visiting University of Nebraska at Kearney quarterbacks five times. Washington had three of them.

And, of course, he's back.

The Mustangs are 2-2. Washington is back. Dutton's defense was dominating. Washington is back.

And, of course, he's back.

University of Nebraska at Kearney quarterback several times as the Mustangs stomped University of Nebraska at Kearney, 66-3, at Mustang Stadium.

It was only appropriate that Andres Washington recorded three sacks, recovered a fumble, had four unassisted tackles, two assisted tackles and hurried the quarterback several times as the Mustangs punished visiting University of Nebraska at Kearney, 66-3, at Mustang Stadium.

It was only appropriate that the Mustangs honored five of their finest on Hall of Fame Night when Andres Washington, healthy again, sacked University of Nebraska at Kearney quarterback five times. Washington had three of them.

And, of course, he's back.

Washington is back. Dutton's defense was dominating.

University of Nebraska at Kearney quarterback several times.

It was only appropriate that Washington honored five of his finest on Hall of Fame Night. Washington had three of them.

And, of course, he's back.

And the community doesn't care. And the competition doesn't care. And, of course, he's back.

Hiatt said she wasn't impressed with their times. They were two minutes faster. They were intimidated by the competition, and they backed off in spots.

Cal Poly's women's cross country team ran against some of the country's best. The Mustangs placed ninth in a field that included six of the nation's top-10 teams. Cal Poly and UC Davis were the only Division II contenders.

“Overall, I'm pleased with some of the aspects of the way we ran, but I could be happier,” said Head Coach Deanne Johnson. “We could have done much better. And I really believe they are better than fourth. They were intimidated by the competition, and they backed off in spots.”

Johnson said the Mustangs didn't do as well as she expected.

The team ran into trouble when Tracy Leichter, usually Cal Poly's third-place runner, tripped and fell at the start of the race.

Melanie Hiatt had the second fastest time for Poly running a season-best time of 17:34. She placed 23rd overall.

“Did they feel very well, and I'm pleased with their times. They were two minutes faster, they were on the move and in spots,” Johnson said.

Hiatt said she wasn't intimidated by the competition.

“Tm a senior, and I had already run against a lot of these girls before,” she said. “I expect with my performance because I was running 40 seconds faster than I had been for so far this season.”

As the 1990s progress, Cal Poly athletic finances face a crisis. And it's not whether the program should move to Division I status from its current Division II status, but it's finding adequate facilities for athletic teams to practice and play matches.

Poly will need to improve existing facilities if it wants to attract top Division I schools to Poly and get private sector support.

Without improved facilities, Cal Poly athletics will continue to be overlooked by the community and the students, said Jim Sanderson, Poly's executive director of fund raising.

“Jf you got a (horrible) stadium like we got and you got a (horrible) schedule like we got, people don't care.” Sanderson said in a recent Mustang Daily article.

The kids don't care. And the community doesn't care. You have to have a climate to create a climate.

Improved facilities will also help attract television revenues for Cal Poly, said USC assistant athletic director Jim Romo.

UCSB is a Division I school that competes in the Big West Conference. The Gauchos attract television to the campus to cover basketball games against nationally ranked teams UCLA, Ohio State and New Mexico State. The Gauchos' volleyball and basketball teams regularly receive television coverage on the Prime Ticket network.

Romo said that facilities can attract television to colleges to make a difference. He pointed to Cal Poly's 4-0 victory over Chapman last Saturday, running for two touchdowns in the fourth quarter.

Alumni association increases annual donation to show support for referendum

By Amy Koval
Staff Writer

Cal Poly's Alumni Association is increasing its annual scholarship donation to athletics from $1,000 to $4,000, beginning next season, said Steve Showkey, alumni president.

He said the hike in the amount of their donation is being made possible by reallocating Alumni Association money. "The reallocation of the money will involve "a little more fund raising and cutting back on a few other expenses," Showkey said.

The bottom line is that the alumni association is committed to doing everything we can to keep and stabilize our athletic program — if not improve its status to Division I," Showkey said.

"It (reallocation of alumni money) will have no effect on the student body.

The Alumni Association will be supporting the football team's plan kicker this year and each year hereafter, Showkey said. He said the hike, in the amount of their donation is being made possible by reallocating Alumni Association money.

"It's certainly not going to be

From page 5

Hass said because of the way it was run, there was a lot of pushing and shoving.

"Everyone's in a tight group at the finish line," Hass said. "You're like a fish in a big school of fish, and it's hard to breathe at the finish line.

The University of Arizona placed first, the University of Oregon came in second and Brigham Young University took third.

Study checks incidence of SLO County AIDS risk

By Minka Parsons

An ongoing study to deter­mine the incidence of the HIV virus in emergency room patients in San Luis Obispo County has found three out of 425 randomly tested blood specimens to be HIV positive.

The study being done by Dr. Dale King, Dr. Tom Maier and Dr. Donald Smedsvik began last April. Since then, the three have been collecting blood specimens from all five San Luis Obispo County hospitals.

The process of the study begins when blood is drawn from an emergency room patient. A portion of that blood is sent from the hospital to a laboratory which tests it for the HIV virus. The blood cannot be linked in any way to the individual because the only information given when it is sent to the lab is a code number.

Dr. Tom Maier is the director of disease prevention services at the San Luis Obispo County Health Department.

"There may be people who are walking around that don't even know they have it," Maier said.

Maier said that because of the anonymity of the testing, they cannot trace the specimens back to the individual. The study is a blinded, anonymous study used for purposes of computing statistics and data.

Maier said that the cumulative number of AIDS cases ever reported in San Luis Obispo County is about 90. However, he said it is probable that there are more cases that have gone unreported. Maier estimates there are between 200 and 500 people carrying the HIV virus in this county.

"The main importance of the study is that it gives us a snapshot of the incidence of HIV infection in 1991 in San Luis Obispo County," Maier said. "It confers for people the fact that we definitely have HIV in our county."

Maier said that the study will be repeated in future years and will tell whether the number of cases of HIV positive in San Luis Obispo is increasing or staying the same. The study will also show how San Luis Obispo matches up to other counties.

Dr. James Nash, retiring director of Student Health Services at Cal Poly, said, "The study is a good idea to find out the status of AIDS, page 8

---

The main importance of the study is that it gives us a snapshot of the incidence of HIV infection in 1991 in San Luis Obispo County.

-- Dr. Tom Maier

Nash said about 1 million U.S. citizens have HIV infection, and that the disease is increasing most rapidly in adolescents, young adults and women.

Researchers say it will be possible to keep larger numbers of people from becoming infected with the HIV virus by disease prevention.

According to AIDS: Questions and Answers by V.G. Daniels, infection with the AIDS virus is acquired through sexual intercourse (especially with multiple partners), needle and syringe-sharing by intravenous drug users, transfusion of contaminated blood and transmission by infected mothers to babies.

Dr. Maier said he suggests that people don’t share needles if they are intravenous drug users, and to use condoms for safer sex. He also said it would be a good idea to find out the status of AIDS.
WASHINGTON

From page 7

The injury — a separated shoulder — left Washington on the sidelines for the second game and on a part-time basis for the third game.

"Andres Washington ... think he played as fine a game as he's played for Cal Poly," Dutton said.

And that's probably an understatement. From the get go, Washington dominated the Antelopes' offensive line.

On the third play of the game, Washington chased down UNK's starting quarterback, Jeff McDonald, and dragged him into the end zone. The referee, however, marked McDonald down on the 1-yard line. Seven plays later, Poly had its first of nine touchdowns.

UNK's second drive was even shorter — two plays. Washington again caught McDonald scrambling, sacked him, caused a fumble and to boot, recovered it. And, seven plays later, Poly scored another touchdown.

It all made for a long, deep sleep for Dutton, who will be delighted to announce, "He's baack."

AIDS

From page 7

one's sexual partner. "Most people don't know the status of their partner, it's a good idea to be tested."

Maier said anyone who thinks they may have HIV infection should be tested because now there are ways to delay the disease. The sooner the virus is found, the sooner treatment can be started to delay the disease. "AZT can slow down the process of the growth of the virus and the progression of the disease," Maier said.

AZT is an anti-viral drug which makes a difference in the lifespan of an HIV-positive individual.

There is no drug available which can prevent someone from developing AIDS. Because the virus mutates frequently, it is hard to produce a highly effective vaccine.

"There are ongoing experiments going on now," Maier said. "There's good reason to believe a vaccine will be developed."

The only protection available from AIDS right now is personal attention and care. "HIV can hit any careless, thoughtless person," Nash said.

"HIV is not something that we should worry about in the future," Maier said.

"It's something we need to know about now."

SLO, students, alumni join for Homecoming

By Allison Bosselmann
Staff Writer

"Home-grown Fun" is this year's Homecoming theme, and the Cal Poly Alumni Association is welcoming everyone to participate in this year's harvest of events.

Some of this year's Homecoming events are being held in conjunction with the first-ever Neighborhood Cooperation Week, sponsored by the Student-Community Liaison Committee, a group that emphasizes community pride and neighborhood cooperation.

David Kapic, ASI president and chairman of the committee, said, "The idea we are trying to get out with Neighborhood Cooperation Week is respect. Students need to respect the community and the community needs to respect the students."

The festivities for both events begin on Thursday, Oct. 24, in the University Union. The Alumni Association is hoping to sponsor a local band to entertain during U.U. hour, but a definite choice has yet to be made.

Marci Rae Blue, Alumni Committee chairperson, said, "We want to cater to the students. We want everyone, not just the alumni, to have a good time and get involved in the events."

To show support for Neighborhood Cooperation Week, blue ribbons will be distributed during U.U. hour and Farmer's Market.

Marquam Piros, chairman of Neighborhood Cooperation Week, said, "The blue ribbons represent an awareness of and involvement in the events for the week."

The theme for Neighborhood Cooperation Week is, "Do Yourself a Favor; Be a Good Neighbor."

Door hangers, provided by the liaison committee, will be distributed throughout San Luis Obispo with tips on how to be a good neighbor. Piros said, "We want the students and the community to work together and start communicating."

Blue said communication is important, but it is also important to show the community a different side of Cal Poly students. She said, "We want to show them (the community) that Poly students don't just throw parties."

Kim Rutledge, assistant to the director of Alumni Relations, said the sixth annual Laugh Olympics would be a perfect chance to bring the students and community together. The Laugh Olympics, to be held Oct. 25, is See HOMECOMING, page 11

Choice of Loans. BofA offers three types of student loans. Stafford Student Loans, Supplemental Loans for Students, and Parent Loans for Students. Favorable rates and maximum amounts range from $2,625 to $7,500 per year*.

Call Toll-Free. To receive an application or for more information, call toll-free 1-800-252-7526, 8:00 am to 5:00 pm Pacific Time (Mon.-Fri.).

ENROLLMENT

From page 1 college transfers over the last few years.

"The UC system has been told that they need to take more transfers. So now we have more competition for these students," Mark said.

Out of all the schools, the School of Agriculture has the most new students this fall — 767.

Interim dean Joe Plend was happy with this number. He said with the budget cuts and false fears about the school being hit harder by cuts, department heads had to work harder to let prospective students know this was not the case.

During the summer, each department in the School of Agriculture hosted an orientation barbecue for prospective students and their parents to show them what Cal Poly had to offer and dispel false rumors.

Stephen Kaminske, interim associate dean for the School of Agriculture, said, "There was so much bad news last year, people think the School of Agriculture is dying."

The schools of Liberal Arts and Business had the fewest new students with 207 and 228, respectively. Mark said, "Maintaining new student rates is the hardest for these two schools."

He said the main reasons for this are that they are among the smallest schools and have heavy internal transfer loads.

"A lot of people come in under another major and then try to switch into these two schools. The more internal transfers, the smaller the new student rate will be," Mark said.

The School of Engineering received 681 new students, the School of Architecture received 352, the School of Professional Studies received 350 and the School Science and Math received 261.

"We teach so many majors outside the School of Science and Math. I'm concerned about all the schools," said Philip Bailey, dean of the School of Science and Mathematics.

With this year's cuts, there are 16 fewer instructors and fewer classes being offered.

"Our school has always prided itself in accommodating students, and now we aren't able to do that," he said. He feels that not allowing admissions for spring quarter will help a little, but spring quarter is not that big a time for new students.

Mark said that the overall admissions policy is being reviewed to consider having only one application period for each year. As such, students would apply in the fall and at that time would receive acceptances into fall, winter or the other quarters.

"There is some talk among the deans about this. Because the fall applicant pool is the deepest in as far as numbers and quality, we might do more to accommodate what we're going to take for the whole year," Mark said.

There has already been some testing with moving people to summer and winter quarters, and the show rate has still been good, Mark said. It went from about 55 percent show rate to 45 percent show rate.

"The biggest concern I have for this is the winter applicants. That is a large, 85 percent community-college-applicant pool. They are finishing their Associates of Arts degrees and are ready to go on to college," Mark said.

The soonest this change could take place would be the 1993-94 application period, he said.

Student jobs prove tough

Student jobs prove tough to find in San Luis Obispo

Sparse Placement Center lists fall short of demand

By Barbara Barcellona
Staff Writer

Part-time jobs for college students can often mean having to look far and wide for employment opportunities.

"This is not a good town for students to be choosy," said Joan Ganous, Placement Center office manager.

Department as well as posting the Telegram-Tribune went wide. In past years, we haven't had to do this," said Joan Ganous.

"Businesses in the county are hurting because tourism is down," said Joan Ganous.

"As of last year Cal Poly employed over 1,000 volunteers, but not many full-time employees," he said.
CLASSROOM

From page 3
the dust to a minimum, she said.
A few other classes chose to
stay because they did not like
being relocated to laboratory
classrooms or changing the time
of the class from day to evening.
POLS 100-01 has moved to
the conference room in the Heal­

th Center.
"It's nice and cool and quiet in
there," O'Quest said. "At least
you can pay attention."
Although there are no desks
in the room, there are enough
chairs for everyone, he said. "It's
a casual atmosphere."
O'Quest said that he is "com­
pletely satisfied" with the way
things turned out.
"I am pleased with the way
Baker responded to the protest," he said.
Rooms 212 and 214 will
remain partially closed
throughout winter quarter, Ar­
senau said.
Classes in rooms 212 and 214
will then be held after 4 p.m.,
after the construction day ends.
One class is scheduled from
noon to 1 p.m. when construction
workers take their lunch break.

JOBS

From page 11
students. We won't know if the
number has changed until after
Oct. 15 when the first payroll
goes out," said Carol Clifford, Cal
Poly's payroll officer.
According to Howard
Grisham, assistant manager of
the San Luis Obispo County Un­
employment Office, "In the coun­
try of San Luis Obispo, 5,650
people were unemployed as of
July. Over 1 million people
were unemployed in the state of
California."
He said jobs are available in
areas such as the retail trade
and service sector.
"But they are the jobs where
all you do is follow instruc­
tions be dependable and receive min­
imum wage," Grisham said.
