Students give views on sports referendum

Most interviewed oppose hiking fees to move Poly athletics to Division I

By Aaron Nix
Staff Writer

The decision to move Cal Poly sports to Division I is a hot issue, and feelings across campus vary widely. The following is just a sample of students’ opinions on the upcoming referendum vote.

Of the 20 students polled, five approved of the registration fee increase and 15 disapproved. All of those polled feel Cal Poly should more actively recruit outside sponsorship of the sports program.

Joe Negrey, engineering technology sophomore — We are already paying more for fees, and the referendum would just compound the problem. It’s just not fair to ask the students to pay for something this expensive when the school is already in the midst of a huge financial crisis.

Pete Haag, mechanical engineering junior — I don’t think we need Division I here. This is really an academic school. Sports are nice, but they are not vital to the survival of the school, and this is an institution known for its academic programs.

Brian Slattery, construction management junior — I think we should pay to keep sports if it has to because of tradition.

Group discusses ways to limit student rowdiness

By Carolyn Nielsen
Staff Writer

Should Cal Poly be given the right to discipline students who misbehave off campus?

That was the primary question discussed at the Student-Community Liaison Committee meeting at City Hall Thursday afternoon. The issue that sparked the question was the street party at Murray Street and Hathaway Avenue the start of this quarter.

“If something happens on school property or at a school-sponsored event, the university can take action,” said Police Chief Jim Gardiner. “But, if a student misbehaves out in the community, no action can be taken.”

Gardiner is on the 22-member committee along with Cal Poly ASI members, Panhellenic Council and Interfraternity Council presidents, Cuesta College students, community residents, Mayor Ron Dunin, County Supervisor David Blakely and representatives of other organizations.

“People who belong to a church and misbehave get censured.” It is important that they respect this community as the one they live in (at home),” Gardiner said.

Gardiner said Murray Street and Hathaway Avenue’s reputation as a party area has to be done away with. Last weekend, he sent out two extra police cars to patrol the area. “You can’t just go walking down that street with a beer in your hand anymore, because the cops will be there,” he said.

“We now have a street permit,” this committee has done an outstanding job,” he said. “They have worked real hard to open lines of communication.”

U.S. hostage to be released in 24 hours

BEIRUT, Lebanon (AP) — Shiite Muslim kidnappers are expected to release an American hostage by Monday afternoon and Israel is to free some Arab prisoners in response, the United Nations said Sunday.

The announcement from the U.N. information center in Beirut did not say which of the five American captives in Lebanon would be freed or where. U.N. officials refused to elaborate on the brief statement.

The U.N. announcement came after Israel said on Saturday that it had received solid information that one of its five missing servicemen in Lebanon was dead, and hinted it would free more Arab prisoners it holds.

The hostage-holders are demanding that Israel free all Arab prisoners in exchange for the release of the hostages, but Israel has said it first must know the status of its missing servicemen.

The longest-held of the nine remaining hostages is American Ibrar Anderson, chief Middle East correspondent of the Associated Press. He was kidnapped on March 16, 1985.

Blacks, Hispanics are often victims of crime

WASHINGTON (AP) — The chances of being a crime victim continued to decline last year for most Americans, but blacks and Hispanics were much more likely than whites to be victimized, the government reported Sunday.

The National Crime Victimization Survey, released by the Bureau of Justice Statistics, showed that crimes against individuals age 12 and over fell 3.6 percent from 1989 to 1990.

There were 18.9 million individual crimes in 1990, compared with 19.7 million the year before, the report said.

There was no state-by-state breakdown. Crimes against households, including burglaries and car thefts, decreased 4.4 percent, from 16.1 million to 15.4 million.

Violent crimes such as assault increased 2 percent, from 5.8 million to 6 million. Those numbers were included in the individual crime figures.

The figures are estimates of the total number of crimes committed annually and the rate of each crime per 1,000 people 12 or older.

Fund-raising follows sex harassment debate

SAN FRANCISCO (AP) — The day the Senate voted to confirm Supreme Court nominee Clarence Thomas, Congresswoman and Senate candidate Barbara Boxer wrote a new fund-raising plea.

"More than ever before, last week's events have made clear the need to elect more women to the U.S. Senate," read the letter.

The mailing included a photograph of Boxer and a group of women colleagues marching up the Capitol steps, on their way to press for an investigation of the sexual harassment allegations against Thomas.

Campaign consultants say the Boxer mailing is part of a feminist fund-raising surge that followed the explosive hearings in which law professor Anita Hill claimed Thomas sexually harassed her when she worked for him. Thomas vehemently denied the allegations and was confirmed on a 52-48 vote.

The hearings prompted phone calls from women who had not been politically active, said Ellen Malcolm, director of EMILY's List, a women candidates group.

Be a true friend by being aware of alcohol abuse

New dean brings fresh outlook
Dean for School of Architecture and Environmental Design looks to future

By Holly Vanderlaan

The School of Architecture and Environmental Design has a fresh outlook for the future since the appointment of a new dean.

Paul Neel, a national leader in architecture and a longtime Cal Poly professor, was recently appointed as the dean. He said he would like to make sure that the school has a vision and that it adheres to this vision into the 21st century.

"I want this school to be the best it can be, the best in the country," he said.

This is possible, he said, because Cal Poly is the only school that knows of which he has all five disciplines that mirror the construction industry: city and regional planning, landscape architecture, architectural engineering and construction management.

He credits the Architecture and Environmental Design school's success to "devoted faculty" and a good mix of academics. "Our greatest strength is our highly professional approach," he said.

In addition, he says that the school has a lot of connections with the construction industry due to its good standing. Neel said he wants to provide his five departments with the resources and ideas necessary to enable them to do their jobs successfully.

"I want to bring them what is important to teach," he said.

Neel is the kind of man who "makes things happen," said Richard Zweifel, associate dean of the school. "He's a real people person," said Zweifel, who has worked with Neel since 1973.

Neel is "interested in the development of the whole person," he added. "He looks at a person and builds on his/her strengths."

Perhaps this is why students come back to see Neel after graduation. He provides direction, but also gives the freedom necessary for growth, Zweifel said. "He treats them (students) as professionals," he added.

Neel feels architects have a huge responsibility to society as builders of the future.

"We are responsible to the public for our own actions, in what we build and how we do it," he said.

By midafternoon, the wind picked up, sending firefighters racing in retreat. Fire department radios carried frantic shouts of firefighters surrounding by flames. "We're on Alvarado and there are 50 homes on fire here," one call said.

Two people were admitted to Highland Hospital in Oakland, one suffering smoke inhalation and the other with burns, a nurse supervisor said. Their conditions weren't immediately available, she said.

At Alta Bates Herrick Hospital, four people were admitted to the burn center and five or six people were being treated in the emergency room for smoke inhalation, minor burns and scratches, said spokesman Carolyn Kemp.

As the fire raged, scores of residents dashed down hillsides, their arms laden withurniture.

From page 1

Houlgate said since the School of Liberal Arts cannot admit any more than its allowed number of external transfers into philosophy majors, it "given the popularity of Cal Poly, we will have no trouble filling up." Irvin said it will be possible for Cal Poly students to make internal transfers into philosophy as well.

"The philosophy department is looking at creating a concentration in ethics and technology," he said. "That is something we could offer here that other schools couldn't," he said.

The "ethics and society" concentration includes courses in social ethics, professional ethics and biomedical ethics.

Newly appointed dean Paul Neel, who has been with the school since 1973, gives the school a strong presence in the region.

"Neel is interested in the development of the whole person," said Richard Zweifel, associate dean of the school. "He looks at a person and builds on his/her strengths."

Perhaps this is why students come back to see Neel after graduation. He provides direction, but also gives the freedom necessary for growth, Zweifel said. "He treats them (students) as professionals," he added.

Oakland fire rages, hundreds evacuate

OAKLAND, Calif. (AP) — A wind-swept firestorm roared through an upscale residential area in the hills above Oakland on Sunday, engulfing scores of homes and forcing dozens of people to flee, witnesses and officials said.

A paramedic at the scene said five people were killed, all apparently at a single residence. Paul Schuler of the Alameda Paramedics said authorities were unable to remove the bodies because of the fire.

There was no official count on the number of houses involved. Witnesses saw smoke burning on the hillside and a 250-unit apartment complex was leveled.

At least 11 people were injured, authorities said.

The 250-unit Parkwood apartment complex was destroyed, leaving only skeletal structures and over 20 burned cars, according to Oakland Fire Lt. Phillip Bell.

"Oh God, I hope there's no one in there," Bell said as he watched the building burn.

Frightened, ash-covered residents fled their homes, clutching their belongings as the huge flames whipped in the gusts behind them. Above the hills, a huge cloud of black smoke turned gray to dark, casting a brown pall as far as San Francisco, 15 miles away.

"It's awful. The heat and the swirling wind makes for a real deadly combination," said Berkeley firefighter Wayne Lynch. "This could be the worst one yet in terms of property destruction in the area."

Oakland police officer John Fukuda said at least 45 homes had burned. The fire was reported around 11 a.m. and officials did not have an estimate of damages as of late Sunday night.

By midafternoon, the wind picked up, sending firefighters racing in retreat. Fire department radios carried frantic shouts of firefighters surrounding by flames. "We're on Alvarado and there are 50 homes on fire here," one call said.

Two people were admitted to Highland Hospital in Oakland, one suffering smoke inhalation and the other with burns, a nurse supervisor said. Their conditions weren't immediately available, she said.

Faculty input is not a bad thing

I was happy to read that the ASI Board of Directors was not content with the first draft of a proposal that seeks to prevent faculty from using their positions and special relationships to influence the outcome of the student election. I hope that if the Board does adopt such a proposal, its effect will be to allow them to be able to distinguish between faculty courses (which is always inappropriate) and the right of faculty to express their opinions to students.

I also hope that if the Board does ask President Baker to formulate a policy, he might be able to reprimand on administrative and faculty conduct and inviting students to be able to see the policy itself. Since President Baker has already reprimanded the ASI Board of Directors for the referendum well known, and a proof of the referendum as reprimanded by the Board's newly learned about the outcome of the election, I was very interested in seeing what sort of consistent policy he might be able to devise.

Personally, I feel that each faculty member should do everything within his/her power to encourage a large turnout for this referendum. It makes no sense to make an important issue decided by such a small percentage of students. To this end, I plan to talk to the ASI Board of Directors on their decision to get a very small amount of "extra course credit" when they provide me with evidence that they actually voted on the referendum. I would like to see them that I do not want to know how they voted, just that they voted. Perhaps the other faculty will wish to offer similar incentives to their students.

Nicholas E. Brown
Physics

Kapic is sincere about neutrality

David Beck's con arguments in the opinion column of the Oct. 16 issue of Mustang Daily contained a paragraph, "Frankly, I don't trust ASI President, David Kapic, to remain neutral in this process, especially since he was elected with substantial support from the Athletic Department," which I feel requires the following response.

David Kapic is my advisee.

We spent several hours discussing the pros and cons of running for student body president. David had two reasons for his decision during this time.

1. A chance to serve his fellow students
2. To gain leadership experience for his technical management.

David has high standards and no integrity is above reproach.

During my close to 30 years at Cal Poly, I have met few students that I would trust more than David. I am surprised that a senior journalism student at Cal Poly would put such an unjustified statement in print.

Incidentally, I am neutral on the subject of athletics.

Nelson L. Smith III
Professor
Industrial Technology

Thomas is not a white wannebe

Professor Shapiro of the journalism department has returned with another highly offensive commentary (Mon., Oct. 14). Shapiro is correct to point out that Supreme Court justices often are not the country's best legal scholars because they are political appointees.

Clarence Thomas, like his predecessor Justice Marshall, is not one of our most outstanding legal scholars; he was chosen because he met President Bush's political criteria — he is conservative, he is black and he is qualified.

What is offensive to Shapiro's commentary is his claim that conservative blacks are "white wannabes." Apparently Shapiro believes they lack the "courage to think for themselves and arrive at the political conclusions;" that differ from the views held by the self-proclaimed 'black leadership,' the elites of the liberal intellectual community, mistakenly called 'civil rights' organizations.

A recent example of the diverging opinions of ordinary blacks and the 'black leadership' is the support of the vast majority of blacks for the nomination of Judge Thomas, which was opposed by the NAACP and most other civil rights organizations. More and more blacks, having witnessed the failures of liberal policies, are turning to more conservative organizations.

Many black scholars and professionals have argued that race-based preferential treatment policies (affirmative action) and other liberal social policies have been counterproductive to improving the lives of poor blacks.

On Wednesday, Oct. 23, William B. Allen, former chairman of the U.S. Civil Rights Commission, professor of government at Harvard Mudd College and candidate for the U.S. Senate, will be on campus to speak on civil rights and his Senate campaign. I urge Dr. Shapiro and others to listen to Dr. Allen and decide for themselves whether he is a highly intelligent, sincere man or merely a right-wing extremist who does not even suggest this, a "white wannabe.'

Sensitivity to people of all religious faiths:

During WOW week the fact that Yom Kippur, the holiest day of the Jewish calendar, occurred on the Wednesday of this week was grossly ignored. (It is standard fare on most desk calendars!) Events went on as usual. I was even chastised for the tolerance of and acceptance of those of those who have different roots and backgrounds from us.

It is incumbent upon the Cal Poly community to be sensitive in other ways as well. Let's take note on several of these below.

Sensitivity to people of all religious faiths:

The university is correctly and admirably committed to the goal of ethnic diversity, in both its student body and its faculty and staff. Although there are diverging opinions on how to go about achieving that goal (affirmative action, quotas, K-12 education improvements, etc.), the goal itself is a noble one that few would disagree with. The realization of this goal looks hand-in-hand with what can be termed "ethnic sensitivity." The tolerance of and acceptance of those of those who have different roots and backgrounds from us.

We must strive for a diversity of ideas as well as a diversity of ethnic backgrounds. It is essential that our tolerance extends to all members of our community. A university that is intolerant graduates students who have an education, but does not produce educated graduates.

Martin E. Kaliski is chairperson of the electronic and electrical engineering department and writes regularly for Mustang Daily. The views expressed are his personal ones and do not represent the "official position," of the ELEL department.

Sensitivity to diverse ideologies:

It may not be the case that everyone on this campus is a conservative republican (in fact, it's not true), but it sure seems that way. Where is the concern for the welfare of our fellow man? Where is the compassion for the homeless? For the disadvantaged? Have we really sold out to big business? Do we really believe that George Bush is the "education president?" What is wrong with paying higher taxes to help our fellow man?

Why do students have time for mass parties, but no time to march against overseas right-wing policies? It is essential that political voices of all persuasions make themselves heard at Cal Poly. It is essential that administrators and faculty encourage students to take public positions on the issues of the day. We must create climate here that is tolerant of all political viewpoints.

Beyond ethnic sensitivity

By Martin E. Kaliski
Weather SLOs down field at Poly invitational

Cal Poly gets a surprise ...

By Holly Gilbert

Despite searching hot weather and tough competition Saturday, Cal Poly's Kristina Hand still managed to hold on until the final seconds in the SLO invitational.

Hand and UC Irvine's Rayna Cervantes were running neck and neck toward the finish line in the women's invitational when Cervantes pulled ahead and crossed the line first.

Throughout a good portion of the race, Hand said she kept her place behind a pack of runners to help block the wind.

Just past the 2-mile mark, Hand pulled out from behind the pack and took her second-place position.

"I thought it was a good solid race," Hand said.

Mustangs kick themselves after blown chances, 21-20

By Gregg Mansfield

Senior Staff Writer

It was a game of missed opportunities for the Cal Poly football team.

The Mustangs missed a field goal, had a point attempt blocked and had another field goal in last the last seconds knocked down as Cal Poly nearly upset the ranked Sacramento State, 21-20, Saturday night at Hornet Stadium in Sacramento.

Cal Poly trailed 21-0 at halftime, but battled back in the second half with a 20-point burst to almost beat Sacramento State in a Western Football Conference opener for both schools.

Although Poly Head Coach Lyle Setencich was pleased with his team's comeback effort, he had a word for the referees of officiating the football game.

"No matter what it is, they've got to be restrained by security," Setencich said Sunday afternoon. "We made a lot of mistakes as a team. But they (the officials) made a lot more mistakes.

"When we were a couple of late hits. There were three obvious pass interference plays that should have put us in range (for the final field goal)."

The Mustangs fell to 2-4 overall and 0-1 in conference, while the Hornets improve to 6-0 and 1-0 on the season.

Cal Poly's wide receiver Chris Thomas and quarterback David Lafferty led the Mustangs' charge in the second half.

Thomas, who caught nine passes for 150 yards in a loss to Pacific last week, set a pair of records against Sacramento.

The wide receiver had 334 yards in receiving, setting a single-game receiving mark for Cal Poly and a single-game receiving record for the Western Football Conference. The old mark of 274 yards was set by Charles Weber against Whittier College in 1948.

Lafferty continued to put up strong numbers. He finished the game with 410 yards passing including 16 of 37 passes with no interceptions.

Lefferty connected with Thomas for three touchdown scores to pull the Mustangs back in the game in the second half.

The first connection came early in the third quarter. Lefferty aired out a 81-yard touchdown bomb to Thomas as the Mustangs trailed 21-7.

A few minutes later, Lefferty hit Thomas for a 99-yard touchdown score.

The Mustangs were back in at 21-14.

It wasn't, however, a night that kicker Tom McCook would want to remember.

The usually reliable kicker missed a 35-yard field goal that would have pulled Cal Poly within four points.

"I thought Cal Poly outshone a little bit to be honest," said Sacramento State coach Bob Mattos to KVEC Radio. "I was a little surprised that they played like that."

With about eight minutes left in the game, the Cal Poly offense struck again.

Lafferty aired the ball out again to Thomas. This time it was a 31-yard touchdown pass. The Mustangs were behind 21-20.

All that was left was to kick the extra point attempt. McCook, who hadn't missed an extra point attempt all season (21 for 21). he was blocked by Sacramento State's special teams.

Cal Poly, however, didn't slow down as they got one final chance to clinch the game.

With seconds remaining in the game, the Mustangs moved the ball to the Hornets' 20-yard line. With the ball spotted at just past the 2-mile mark, Hand pulled out from behind the pack and took her second-place position.

"I thought it was a good solid race," Hand said.

Cal Poly wins, loses in 5-1 victory

Mustangs' top-scoring forward injured right ankle in win

By Christy Rinsuaro

Staff Writer

An explosive Cal Poly offense redeemed itself Saturday with a 5-1 win over Cal State San Bernardino's men's soccer team.

Cal Poly, who lost to San Ber­

nardino 4-0 in their first meeting of the season, turned the tables earning a home victory. Poly improved its conference record to 4-1-1.

"We did dominate the game," said Head Coach Wolfgang Gartner. "We go to win because we know we have people capable of scoring."

Poly, however, did receive some news.

The Mustangs' top-scoring for­

ward, Todd Henry, left the game late in the second half with an injured right ankle.

Henry said he expects to get x-rays Monday and will probably miss Wednesday's game.

The first score of the game came with 6:47 left in the first half when Poly midfielder Chris Fisher scored on a pass from forward Loren Cremona.

"Fisher has a good scoring instinct," Gartner said. "He scores beautiful, well-placed goals."

Fisher's scoring instinct ap­

peared again minutes into the second half when he scored after a pass from Poly forward Todd Henry.

Henry, however, injured his ankle almost 20 minutes into the second half.

Henry, the fifth starter of the season to be sidelined with an in­

jury, had to be helped off the field.

Gartner said the injuries are not hampering the Poly team, but rather opening opportunities for other players to score.

"No matter what it is, they've overcome it and they're playing exciting soccer," Gartner said.

Poly's midfielder Rich Kobe said the injuries have made the Poly's next few games even tougher.

"These last few games are going to be tough, especially with all our injuries, but we've got enough depth on our bench that will be able to carry us

Poly ag students energize the meaning of agriculture

By Meredith Rehrman

Agriculture is alive and kicking. And so were Cal Poly's Agriculture Ambassadors last Thursday when they showed at least 150 educators and agricultural tourists from across the state that there is a positive future in agriculture. The presentation was a highlight during the California Foundation for Agriculture in the Classroom Conference held at Embassy Suites.

The conference, which brought together educators, school administrators, counselors and agricultural education representatives, was to encourage an awareness and understanding of agriculture's positive influence in society. Many of the teachers were impressed by the enthusiasm of the ambassadors that they invited many of them to do presentations in their classrooms.

"I thought the presentation was great," said Kasey Hardesty, a kindergarten teacher from Durham, Calif., "and I'd love to have college students come to my class with that kind of enthusiasm."

"It really made me think because a lot of times you take agriculture for granted. But agriculture is everywhere and people should know about it," said the ambassadors did a great job of sharing their knowledge of the industry.

The ambassadors, dressed in matching red shirts, walked around the room and sat at tables to get participants actively involved in their presentation. One game was to have the audience associate their dinner menu with agriculture. Everything from spinach-stuffed chicken to whipped cream was shouted out.

"Alphabet soup" let audience members list the different commodities, A through Z, grown along the Central Coast.

County agriculture-related festivals were discovered in a game of "Jeopardy." Ambassadors included such well-known events as Arroyo Grande Strawberry Festival, Edna Valley Harvest Festival, Mid-State Fair and Cal Poly's Agri-View.

"I think what they (participants) liked seeing was that the agriculture ambassadors were very energetic and positive toward agriculture," said Jackie Crabl, conference coordinator from the San Luis Obispo County Farm Bureau. "Their presentation showed that there are going to be people in the future to spread the word for the industry. It's just another way of getting the word out about agriculture."

The agriculture ambassadors program, made up of students from a variety of majors within the school, is now.

behavior.

Also, see if there are reasons for your friend's drinking, and whether your friend's drinking has any impact on his or her relationships, studies or goals. A person doesn't have to drink or get rip-reeling drunk every night to have a drinking problem. If you can determine the reasons for your friend's drinking and how it affects the things around him or her, then you may be able to decide whether your friend has a drinking problem.

Observing a friend's drinking habits can also help you determine whether your friend has a problem with alcohol. A social drinker typically drinks slowly, knows when to stop drinking (does not drink to get drunk), and eats before and while drinking. A problem drinker typically drinks to get drunk, tries to solve problems by drinking, drinks when he or she should not (before driving or going to class or work), or experiences personality changes — may become loud, angry or violent... or silent, remote or recluse. An alcoholic may spend lots of time thinking about drinking and planning where to get the next drink, keep bottles hidden for quick pick-me-ups, start drinking without conscious planning and lose awareness of the amount consumed; be or she may drink drinking or drink alone. These are partial lists. Your friend may have habits that are not listed here, but these lists can give you an idea of whether your friend has a problem and how severe it is.

If you think your friend has a drinking problem,

* Talk to your friend. Show your concern. Try not to lecture. Just ask whether your friend feels that he or she has a problem with alcohol. You may have to deal with denial or defensiveness. If the person denies any drinking problem, at least tell your friend how his or her drinking affects you. If in

From page 3, he said. "And those are the kinds of things instilled in Cal Poly graduates and will continue to be." Neel's term began Aug. 15, and at his request, will last for three years.

He succeeds G. Day Ding, who resigned his post to pursue building science-research at the national level. Ding expects to return to Cal Poly to teach, said Neel. No date for Ding's return has been given.

Neel received a bachelor's degree in architectural engineering at Cal Poly in 1958. In 1962, he became a member of Cal Poly faculty after having earned a bachelor's in architecture from the University of Southern California.

In 1969, he earned a master's degree in building science from the University of Sheffield (England).

He was department head of Cal Poly's School of Architecture and Environmental Design from 1968 to 1978. Currently, Neel is one of three key members on the governor's earthquake response team.

"We contribute several thousands of dollars of professional expertise by both distinguished architects and fifth-year architecture students from throughout the state at no charge," he said.

Neel has received many awards for his reconstruction work. He said he is most proud of the honor he received from President Reagan in 1984 for his work on the reconstruction planning of Coalinga, Calif., after its 1983 earthquake.

Neel has had a vast amount of professional and academic experience in architecture at both state and national levels. He served as the California state architect from 1989 to 1991.

He is a member of the National Council for Architectural Registration Boards and is president of the California Board of Architectural Examiners.

Neel was named Man of the Year in 1989 by Engineering News-Record magazine for outstanding service to the construction industry.

The California Council of the American Institute of Architects awarded him its Distinguished Service Citation in 1986, the highest honor granted to California architects.
Architecture interns receive 'inside look' from program

By Christy Rinauro

Cal Poly's architecture department received a boost from an exciting alternative to typical internships. The San Francisco Internship, a program which began in fall 1989, provides an opportunity for students to get an inside view of architectural firms.

The 14-unit program selects 16 fourth-year architecture students twice each year to participate in San Francisco-based internships. "This program is a learning experience for the students and a professional contribution to the university to the community at large," said Cal Poly professor Sandy Miller, director of the San Francisco Internship and Urban Planning Program.

Miller said selected students

"We are in some of the very best firms. I mean the cream of the crop."

— Sandy Miller
Internship director

live in San Francisco for the eight-week duration and are placed as unpaid interns at local design firms with staff ranging from two to 89 employees. Interns pay regular registration fees and are considered to be enrolled in regular Cal Poly courses.

Participants spend three days a week with their architecture firms and two days a week working on individual urban design projects under the San Francisco City Planning Department. Their time within the architecture firms is divided equally in four areas—design, construction documents, construction administration, and office management and finance.

"We are in some of the very best firms. I mean the cream of the crop," said Miller.

Within their individual firms, the interns, unlike average, lower management employees, are able to sit in on meetings with clients, consultants and building officials.

Barbara Schmidt, a senior architecture student, participated in the program last spring with Aparan and Allen Architects. "It was interesting to find out what these people do with their day," Schmidt said. "It gives us a clearer idea of where we think we want to be in our careers.

The interns also attended two urban design class meetings twice per week in the San Francisco city conference rooms. Miller instructs these meetings during which San Francisco urban designers participate as student liaisons. The students work directly with San Francisco city planners and attend Planning Commission meetings as well as speak with neighborhood groups.

This quarter, two city and regional planning students are also participating. These students have been placed as full-time interns in the San Francisco Planning Department. Although these students do not work for a specific architecture firm but solely for the planning department, they still participate in all architecture activities outside the individual firms.

"It was a gradual learning process," said spring quarter participant Dan McCauley. McCauley was placed with DMJM. The firm has nearly 30 branches worldwide in addition to a 65-employee San Francisco office.

Schmidt said, "Essentially, it's like making a career change."

Gardiner held a meeting with the residents of the Murray/Halway neighborhood last Tuesday night to discuss what they could do to help keep the area more low-key. He said it would help if there were weekend activities on campus, such as dances, that provided an opportunity to socialize else-where. He also said "peer policing" would help a great deal if the students understand that this is their community.

Gardiner said "peer policing" is already being put into use. He said at the Murray Street parties, there were some people trying to invite the crowd but, he also heard a lot of people talking each other to "knock it off."

"Compliance and cooperation are easier than enforcement," Gardiner said. "You support bottle-throwing just by being there. That is the image we need to project."

Director of Student Life and Activities Ken Barclay said, "Students who live that type of life are threatened. Too. They don't want their property damaged either. It's not like people who live there want this to happen again."

Mayor Ron Dunin expressed concern at the amount of high school students attending college parties in and around campus. He said that this was problematic since students who have the party should be responsible for not giving alcohol to these minors.

ASI Vice President Shawn Warren said Gardiner understands students and speaks on their level. "He always gives straight answers," Warren said. "He won't talk above your head. If he says something, he means it. He's willing to go the extra mile."

Warren said that Neighborhood Cooperation Week, which runs Oct. 24 to Oct. 30, will also help communication. "This event will be successful. Unlike Good Neighbor Day, there is actual interaction between the residents and the students," he said. "This is a whole week rather than just one day."

Marquen Pang, ASI Student/Neighbor Relations Coordinator organized Neighborhood Cooperation Week. He said the events include a blood drive, a Fun Run, a pancake breakfast and a booth at Farmer's Market. The first activity of the week was an informational open house where students and residents went out together to hang informational flyers on doors.

Conner said that Residents for Quality Neighborhoods would also be helping out with the event and the distribution of flyers.
SOCCER

From page 5 through," agreed midfielder Rich Kubec.

The score continued to climb higher when Poly right midfielder Jesse Hiller scored from five yards out, with assistance from forward Ryshiem Henderson.

Poly's final goal came with 16 minutes remaining when Cremona scored on a free kick from 20 yards out. A San Bernardino player was red-carded and dismissed from the game immediately after the score, which left San Bernardino playing with 10 men for the remainder.

San Bernardino's loss places it at 5-1-0 in the CCAA. They lead Cal Poly by 1.5 half-games in their first season playing in Division II. Both Cal Poly and San Bernardino's crucial matches with CSU Bakersfield will decide who tops the league.

"Last night was a crucial win for us. We now have to win every game and we have to count on someone to beat San Bernardino," Kubec said. "All we can do is win, the rest of it's out of our hands."

Cal Poly will play Chapman College in Orange on Wednesday before meeting Cal State Dominguez Hills at Mustang Stadium on Oct. 27.

"Last night was a crucial win for us. We now have to win every game and we have to count on someone to beat San Bernardino," Kubec said. "All we can do is win, the rest of it's out of our hands."

the game against Cal Poly alumni on October 30.

"It should be a lot of fun," Cummings said. "I think Poly will win."

In place of the Pepperdine match, the Mustangs will play a game against Cal Poly alumni on October 30.

"It should be a lot of fun," Cummings said. "I think Poly will win."

From page 5 the 41-yard line, McCook's 51-yard field goal attempt was blocked and Sacramento escaped with the victory.

"The game should have ended up in a tie," Matteo said. It was a lattersweet loss for Thomas who finished the game with nine catches for 334 yards. "It's kind of tough to swallow," Thomas said to KVEC. "When you work real hard tonight as we did for the majority of the game and come out with a loss."

Sacramento State put its points on the board early in the game. All-WFC running back Troy Mills was responsible for the Hornets' scores. Mills had a 1-yard touchdown run in the first quarter and a 45-yard touchdown sprint later in the quarter. Mills finished the game with 131 yards on 20 carries.

Sacramento State's other score was early in the second period. Quarterback Bobby Frakes hit Brian McCullough with a 40-yard scoring strike. In the first half, the Hornets led in total offense with 228 yards to Poly's 159 yards. But the Mustangs dominated the second half and finished the game leading in total offense with 482 yards to 328 yards.

"We played hard and aggressively," Betenoch said. "We did nothing differently from the first to second half."

INTERNSHIP

From page 3

that it gives them focus. They see reality," she said.

Miller also said the program helps architecture students see a balance between strong design abilities and business skills, both of which are vital to success in the field.

"I look for a balance between theory and practice. This school's balance of reality and academics, or theory and practice, I see as a really strong base for architecture careers," Miller said.

Miller said the program helps students see that Cal Poly offers a unique experience to the community, and they're a part of it.

Tim Chapelle, a senior architecture student and spring quarter intern at Backen, Arrigoni & Rose, said it was interesting to find that the information he has learned in class, his employer had begun learning through trial and error 20 years ago.

"They learned from experience, and we learned during our education. We don't have to make those mistakes in our careers," he said. "The internship was the best hands-on experience Cal Poly has offered me.

Miller said the information and selection process for spring quarter participants will begin the second week of winter quarter. Interested students should leave their name and phone number in the architecture department office.

FIRE

the roofs and firewood stacks in photos, their pets in tow.

people were evacuated from the area filled with

Close to the fire, at least 100 homes were rescued from the flames that engulfed the Windy Ridge housing complex near the Caldecott Tunnel that goes through the Berkeley Hills. San Francisco said a spokesman for the California Highway Patrol that the fire had burned for more than a mile of downtown Berkeley.

Firefighters from across the region battled the blaze.

The area is filled with fashionable homes and condominiums with a view of the bay. Power was cut off in the affected area.

State Highway 24, which runs through the tunnel, was closed, a Caltrans spokesman said.

Wind gusts to about 30 mph, moving the fire to within about a mile of downtown Berkeley.

J. Weizel said the fire forced him to flee his home.

"It looked like it was far away and then there were tinders everywhere," he said. "The home was burning and we got out. We just ran."

After five hours of drought, fire crews were finally able to contain a fire that began in some 21,900 acres and grew to about 2,200 acres by the end of the week.

In all, the fire caused more than $2 million in property damage.
